Inasmuch as prisoners may be under constraints because of their incarceration which could affect their ability to make a truly voluntary and uncoerced decision whether or not to participate as subjects in research, it is the purpose of this subpart to provide additional safeguards for the protection of prisoners involved in activities to which this subpart is applicable.

§ 50.44 Permitted clinical investigations involving prisoners.

(a) Clinical investigations conducted by the Food and Drug Administration, subject to requirements for prior submission to the Food and Drug Administration under section 505(i), 507(d), or 520(g) of the act, or conducted in support of an application for a research or marketing permit for a product regulated by the FDA may involve prisoners as subjects only if:

(1) The institution responsible for the conduct of the clinical investigation has certified to the Commissioner that the Institutional Review Board has approved the clinical investigation under § 50.48 of this subpart; and

(2) In the judgment of the Commissioner, the proposed clinical investigation involves solely research on practices both innovative and accepted, which is intended to improve, or which has a reasonable probability of improving, the health and well-being of the subjects.

(b) Except as provided in paragraph (a) of this section, clinical investigations conducted by or subject to requirements for prior submission to the agency or conducted in support of a research or marketing permit for a product regulated by the agency shall not involve prisoners as subjects.

§ 50.46 Composition of institutional review boards where prisoners are involved.

In addition to satisfying any other requirements governing Institutional Review Boards set forth in this chapter, an Institutional Review Board, carrying out responsibilities under this part with respect to research covered by this subpart, shall also meet the following specific requirements:

(a) A majority of the Board (exclusive of prisoner members) shall have no association with the prison(s) involved, apart from their membership on the Board.

(b) At least one member of the Board shall be a prisoner, or a prisoner advocate with appropriate background and experience to serve in that capacity, except that where a particular research project is reviewed by more than one Board only one Board need satisfy this requirement.

§ 50.48 Additional duties of the institutional review boards where prisoners are involved.

(a) In addition to all other responsibilities prescribed for Institutional Review Boards under this chapter, the Board shall review clinical investigations covered by this subpart and approve such clinical investigations only if it finds that:

(1) Any possible advantages accruing to the prisoner through his or her participation in the clinical investigation, when compared to the general living conditions, medical care, quality of food, amenities, and opportunity for earnings in the prison, are not of such a magnitude that his or her ability to

V 43 | 88

weigh the risks of the clinical investigation against the value of such advantages in the limited choice environment of the prison is impaired;

(2) The risks involved in the clinical investigation are commensurate with risks that would be accepted by nonprisoner volunteers;

(3) Procedures for the selection of subjects within the prison are fair to all prisoners and immune from arbitrary intervention by prison authorities or prisoners;

(4) The information is presented in language which is appropriate for the subject population;

(5) Adequate assurance exists that parole boards will not take into account a prisoner's participation in the clinical investigation in making decisions regarding parole, and each prisoner is clearly informed in advance that participation in the clinical investigation will have no effect on his or her parole; and

(6) Where the Board finds there may be need for followup examination or care of participants after the end of their participation, adquate provision has been made for such examination or care, taking into account the varying lengths of individual prisoners' sentences, and for informing participants of this fact.

(b) The Board shall carry out such other duties as may be assigned by the Commissioner.

(c) The institution shall certify to the Commissioner, in such form and manner as the Commissioner may require, that the duties of the Board under this section have been fulfilled.

Interested persons may, on or before July 5, 1978 submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this proposal will not have a major economic impact as defined by Executive Order 11821 (amended by Executive Order 11949) and OMB Circular A-107. A copy of the economic impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: April 22, 1978.

DONALD KENNEDY,
Commissioner of Food and Drugs.

[Docket No. 78N-0106]

PROPYL GALLATE

Proposed Modification of GRAS Usage as a Direct Human Food Ingredient

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to modify the conditions of use for propyl gallate as a generally recognized as safe (GRAS) direct human food ingredient. The safety of propyl gallate was evaluated during the comprehensive safety review being conducted by the agency, and the ingredient was affirmed as GRAS. But the adopted conditions of use conflict with good manufacturing practice. This proposal would modify the regulation for the use of propyl gallate to include current good manufacturing provisions for its GRAS use in food.

DATE: Comments by July 5, 1978.

ADDRESS: Written comments (preferably four copies) to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: A comprehensive study of human food ingredients classified as generally recognized as safe (GRAS) or subject to a prior sanction is being conducted by FDA. Pursuant to this review, the Commissioner of Food and Drug issued a proposed regulation in the FEDERAL REGISTER of September 23, 1974 (39 FR 34199) for the use of propyl gallate as an antioxidant in food. This proposal summarized the available information regarding the identity, manufacture, and safety of this food ingredient. It was proposed that propyl gallate be affirmed as GRAS as a direct human food ingredient for use as an antioxidant, under conditions of good manufacturing practice. Good manufacturing practice was defined as a maximum level of 0.015 percent in food. No comments were received on this proposal, and in the FEDERAL REGISTER of December 7, 1976 (41 FR 53613) it was adopted without change.

A manufacturer of propyl gallate recently requested clarification of the labeling requirements for this ingredient because of the changes in its permitted levels and conditions of use resulting from the GRAS affirmation regulation published on December 7, 1976. Before this regulation, the GRAS use of propyl gallate was restricted to a level where the total content of antioxidants did not exceed 0.02 percent of the fat or oil content of food (including essential (volatile) oil content of the food). The present GRAS regulation limits the use of propyl gallate to 0.015 percent of the food irrespective of the fat or oil content of the food or the content of other antioxidants. The December 7, 1976 regulation could be interpreted as authorizing increased levels of use of propyl gallate in food, and this would appear to conflict with good manufacturing practice (21 CFR 184.1(b)(1).

But the current regulation was not intended to alter the levels of use of propyl gallate in food. This condition developed because of two errors. The first error was the failure to include the restrictions that base the level of addition of the ingredient on the fat or oil content of the food and on the presence of other antioxidants. The second error resulted from adoption of the maximum weighted mean use level of 0.015 percent, rather than the maximum use level of 0.02 percent as reported in the National Academy of Sciences/National Research Council's survey of food manufacturers. Affirming the former level as GRAS is unfair to those manufacturers that are using the ingredient at the maximum level reported in the survey. Both of these errors were in the proposed regulation for propyl gallate published on September 23, 1974, and, through an oversight, were not corrected in the final regulation, which was published on December 7, 1976. The Commissioner therefore concludes that it is in the public interest to amend the existing regulation and restore the previous good manufacturing practice use of propyl gallate. He is therefore proposing that propyl gallate be affirmed as GRAS as an antioxidant at a maximum use level of 0.02 percent of the fat or oil content of the food. This maximum use level, consisting of propyl gallate alone or in combination with other antioxidants, shall represent the total content of antioxidant in food.

The proposed action does not affect the current uses of propyl gallate for pet food or animal feed.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food, and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348, 371(a))), and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Part 184 be amended in § 184.1660 by revising paragraph (d), to read as follows:

§ 184.1660 Propyl gallate.

* * * * *

(d) The ingredient is used in food, in accordance with § 184.1(b)(1), at levels not to exceed good manufacturing practice. Good manufacturing practice results in a maximum level, as served, of 0.02 percent calculated on the fat or oil content, including the essential (volatile) oil content, of the food. The maximum use level, consisting of propyl gallate alone or in combination with other antioxidants, shall represent the total content of antioxidant in food.

* * * * *

Interested persons may, on or before July 5, 1978, submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this proposal will not have a major economic impact as defined by Executive Order 11821 (amended by Executive Order 11949) and OMB Circular A-107.

Dated: April 28, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[Docket No. 77P-0353]

COAL TAR HAIR DYES CONTAINING 4-METHOXY-*M*-PHENYLENEDIAMINE (2,4-DIAMINOANISOLE) OR 4-METHOXY-*M*-PHENYLENEDIAMINE SULFATE (2,4-DIAMINOANISOLE SULFATE)

Proposed Warning Statement; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Extension of comment period for proposed rule.

SUMMARY: This document extends to May 22, 1978 the comment period on the proposal to require a warning statement and warning posters on coal tar hair dyes containing 4-methoxy-*m*-phenylenediamine (also known as 2,4-diaminoanisole) or 4-methoxy-*m*-phenylenediamine sulfate (also known as 2,4-diaminoanisole sulfate). This action is taken because of a request for extension of time. The proposed warning will inform consumers about the risk of cancer that may result from using hair dyes containing these ingredients.

DATES: Comments by May 22, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

John A. Wenninger, Bureau of Foods (HFF-441), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-245-1061.

SUPPLEMENTARY INFORMATION: in the FEDERAL REGISTER of January 6, 1978 (43 FR 1101), the Commissioner of Food and Drugs issued a proposal to require warning labels on coal tar hair dyes containing 4-methoxy-*m*-phenylenediamine sulfate (also known as 2,4-diaminoanisole sulfate) to warn consumers about the risk of cancer that may result from using hair dyes containing these ingredients. The proposal would also require that posters be displayed in beauty salons alerting patrons to ask to read the label on the hair dye preparation to be used on their hair. Interested persons were requested to submit their comments on the proposal on or before March 7, 1978. The comment period was extended to close of business, May 8, 1978 in a notice published in the FEDERAL REGISTER of March 10, 1978 (43 FR 9830).

The Commissioner has received a request for further extension of time for comment aby the Cosmetic, Toiletry and Fragrance Association (CTFA). The CTFA request seeks an extension of time to comment on the proposal in light of material, including material on risk assessments, placed on file with the Hearing Clerk as memoranda during the comment period. The request asserts that additional time is needed, because of scheduling problems, to evaluate the filed material and submit comments.

The Commissioner is granting the extension.

Interested persons may, on or before May 22, 1978 submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: May 1, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

COPYRIGHT ROYALTY TRIBUNAL

[37 CFR Part 302]

FILING OF CLAIMS TO CABLE FEES

Proposed Rulemaking with Respect to Filing of Claims to Cable Royalty Fees

AGENCY: Copyright Royalty Tribunal.

ACTION: Proposed rule.

SUMMARY: Consideration is being given to the following proposed rule,

MAY 5 1978 UMI

V 4 3 1 8 8

which would prescribe requirements whereby persons claiming to be entitled to compulsory license copyright fees for secondary transmissions by cable systems shall file claims with the Copyright Royalty Tribunal. The proposed rule would prescribe the content and time of filing of such claims.

DATE: Comments must be received on or before May 22, 1978.

ADDRESSES: Comments shall be addressed to the Chairman, Copyright Royalty Tribunal, 1111 20th Street NW., Washington, D.C. 20036. Ten copies of all written comments shall be submitted.

FOR FURTHER INFORMATION CONTACT:

Thomas C. Brennan, Chairman, Copyright Royalty Tribunal, 202-653-5175.

SUPPLEMENTARY INFORMATION: The Copyright Royalty Tribunal in an Advance Notice of Proposed Rulemaking, published at 43 FR 6263, invited comments concerning the filing of claims to royalty fees for secondary transmissions by cable systems pursuant to 17 U.S.C. 111(d)(5)(A). The comments and reply comments filed with the Copyright Royalty Tribunal reflect a difference of opinion among representatives of copyright owners who are likely to be major claimants as to whether the copyright statute requires filings in July, 1978, for claims to royalty fees for secondary transmissions during the period January 1 through June 30, 1978. Certain comments filed maintain that the copyright statute requires filings every July, including July of 1978. Other comments suggest that the Copyright Royalty Tribunal has discretion to forego a requirement that claims be filed in July of 1978, in view of the regulations adopted by the Copyright Office concerning the filing with the Office of statements of account by cable operators.

The proposed rule requires all copyright owners who wish to share in the distribution of royalty fees for secondary transmissions by cable systems during the first six months of 1978 to file claims with the Copyright Royalty Tribunal during the month of July, 1978. A failure to file a claim during the month of July would bar a copyright owner from sharing in the distribution of royalty fees for uses during the first six months of 1978. The proposed rule requires only a minimal filing of a claim in July of 1978, with a requirement that the filing be supplemented in July, 1979, after copyright owners have had an opportunity to examine the statements of account filed by cable operators in the Copyright Office. Adoption of the proposed rule would thus preclude any distribution of royalty fees by the Copyright Royalty Tribunal prior to August, 1979.

The Advance Notice of Proposed Rulemaking stated that the "CRT wishes to receive comments concerning the types of information that should be required of copyright claimants." The comments filed indicate that copyright owner claimants will be unable to determine the types of information that would be appropriate to a claim, at least until the claimants have had an opportunity to examine the initial statements of account filed by cable operators. The Copyright Royalty Tribunal consequently does not propose at this time to adopt regulations on this subject, but later this year will invite comments on what information should be required in the 1979 filings. It is likely that subsequent to the first cable royalty distribution proceeding, the Copyright Royalty Tribunal will wish to consider more detailed regulations concerning information to be required of claimants.

The Copyright Royalty Tribunal, in an advisory letter of January 31, 1978, stated that participation in the royalty distribution proceedings does not require copyright owners to preserve and submit simultaneous fixations of live transmissions. The Motion Picture Association of America, Inc. (MPAA) urges the Copyright Royalty Tribunal to "reconsider" the advisory letter and to "invite comments in the matter in any further notice the CRT may issue in this proceeding." The MPAA is concerned that the letter may be relied on to support a claim that a fixation of a live television broadcast is not necessary as a condition for filing a royalty claim, or that a fixation, once made, may be erased or destroyed prior to filing the claim without detriment to the copyright owner.

17 U.S.C. 102 requires that a work must be fixed in a tangible medium of expression as a condition of copyright protection. This requirement is statutory in nature and precludes the Copyright Royalty Tribunal from adopting any regulations waiving the requirement of fixation. Consequently, the copyright Royalty Tribunal was not requested to address that issue in its advisory letter.

No comments or reply comments filed with the Copyright Royalty Tribunal suggest that the views expressed in the advisory letter are an incorrect interpretation of the copyright statute. Certain comments or reply comments suggest the desirability of the Copyright Royalty Tribunal considering the subject of what proof may be required to establish that fixation of a particular program did occur. For the same considerations that resulted in the advisory letter, the Copyright Royalty Tribunal believes that it may be desirable for the Tribunal to determine at the earliest feasible date the nature of the proof of fixation that may be required during a royalty distribution proceeding. Therefore, the Copyright Royalty Tribunal invites interested parties to submit comments not later than June 15 as to what proof of fixation, other than the actual video tape or film, should be required in a royalty distribution proceeding. Comments should consider such form of proof as affidavits from authorized personnel, and the technical feasibility of preserving an indentifiable frame or frames from each program.

Such proposed rule reads as follows:

PART 302—FILING OF CLAIMS TO CABLE ROYALTY FEES

Sec.
302.1 General.
302.2 Filing of claims to cable royalty fees for secondary transmissions during the period January 1 through June 30, 1978.
302.3 Content of claims.
302.4 Forms.
302.5 Supplemental filing.
302.6 Filing of claims to cable royalty fees for secondary transmissions during the period July 1 through December 31, 1978.
302.7 Filing of claims to cable royalty fees for secondary transmissions during calendar year 1979 and subsequent calendar years.
302.8 Compliance with statutory dates.

AUTHORITY: 17 U.S.C. 111(d)(5)(A).

§ 302.1 General.

This regulation prescribes procedures pursuant to 17 U.S.C. 111(d)(5)(A), whereby persons claiming to be entitled to compulsory license fees for secondary transmissions by cable systems shall file claims with the Copyright Royalty Tribunal (CRT).

§ 302.2 Filing of claims to cable royalty fees for secondary transmissions during the period January 1 through June 30, 1978.

Every person claiming to be entitled to compulsory license fees for secondary transmissions by cable systems during the period January 1 through June 30, 1978, shall file in the office of the Copyright Royalty Tribunal a claim to such fees during the calendar month of July, 1978. No royalty fees shall be distributed to copyright owners for secondary transmissions during the period January 1 through June 30, 1978, unless such owner has filed a claim to such fees during the calendar month of July, 1978. For purposes of this clause claimants may file claims jointly or as a single claim.

§ 302.3 Content of claims.

The claims filed pursuant to § 302.2 shall include the following information:

(a) The full legal name of the person or entity claiming compulsory license fees.

(b) The full address, including a specific number and street name or rural route, of the place of business of the person or entity,

M Y 5 7 8 UMI

(c) A general statement of the nature of the copyrighted works, whose secondary transmission provides the basis of the claim,

§ 302.4 Forms.

The Copyright Royalty Tribunal does not provide printed forms for the filing of claims.

§ 302.5 Supplemental filing.

During the month of July 1979 those persons who filed claims pursuant to § 302.2 for secondary transmissions during the period January 1 through June 30, 1978, shall make a supplemental filing, which shall include such information as the Copyright Royalty Tribunal may require.

§ 302.6 Filing of claims to cable royalty fees for secondary transmissions during the period July 1 through December 31, 1978.

During the month of July 1979, every person claiming to be entitled to compulsory license fees for secondary transmissions during the period July 1 through December 31, 1978, shall file in the offices of the Copyright Royalty Tribunal a claim to such fees. No royalty fees shall be distributed to copyright owners for secondary transmissions during the period July 1 through December 31, 1978, unless such owner has filed a claim to such fees during the calendar month of July 1979. For purposes of this clause claimants may file claims jointly or as a single claim. Such filing shall include such information as the Copyright Royalty Tribunal may require.

§ 302.7 Filing of claims to cable royalty fees for secondary transmissions during calendar year 1979 and subsequent calendar years.

During the month of July 1980, and in July of each succeeding year, every person claiming to be entitled to compulsory license fees for secondary transmissions during the preceeding calendar year shall file a claim to such fees in the office of the Copyright Royalty Tribunal. No royalty fees shall be distributed to copyright owners for secondary transmissions during the specified period unless such owner has filed a claim to such fees during the following calendar month of July. For purposes of this clause claimants may file claims jointly or as a single claim. Such filing shall include such information as the Copyright Royalty Tribunal may require.

§ 302.8 Compliance with statutory dates.

For purposes of 17 U.S.C. (d)(5)(A), claims required to be filed with the Copyright Royalty Tribunal during the month of July shall be considered as timely filed if (a) they are addressed to the Copyright Royalty Tribunal, 1111 20th Street NW., Washington, D.C. 20036, and deposited with the U.S. Postal Service with sufficient postage as first class mail prior to the expiration of the statutory period, and (b) they are accompanied by a certificate stating the date of deposit. The persons signing the certificate should have reasonable basis to expect that the correspondence would be mailed on or before the date indicated.

Dated: May 2, 1978.

THOMAS C. BRENNAN,
Chairman,
Copyright Royalty Tribunal.

[6560-01]

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 891-4]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

North Carolina: Proposed Plan Revisions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: It is proposed to revise the North Carolina implementation plan by adding limits for emissions of sulfur dioxide (SO_2) and sulfuric acid (H_2SO_4) mist from the roasting of spodumene ore (a lithium-bearing mineral), and by changing the procedures used by fuel-burning sources to demonstrate, through fuel analysis, their compliance with the sulfur dioxide control standards of the plan.

DATE: To be considered, written comments must be received on or before June 5, 1978.

ADDRESSES: Comments should be sent to Walter Bishop of the Agency's Region IV Air Programs Branch (see Atlanta address below). Copies of the materials submitted by the State of North Carolina may be examined during normal business hours at the following locations:

Air Programs Branch, Environmental Protection Agency, Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308.
Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.
Air Quality Section, Environmental Management Division, North Carolina Department of Natural Resources and Community Development, 512 North Salisbury Street, (P.O. Box 27687), Raleigh, N.C. 27611.

FOR FURTHER INFORMATION CONTACT:

Walter Bishop, Air Programs Branch, EPA Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308, 404-881-3286 (FTS: 257-3286).

SUPPLEMENTARY INFORMATION: On February 9, 1978, the North Carolina Environmental Management Commission, following notice and public hearing in conformity with 40 CFR 51.4, adopted changes in the State's air pollution control regulations. These changes were submitted to EPA's Region IV office as proposed implementation plan revisions on February 14, 1978. The purpose of this notice is to describe these changes and to ask for public comment on them.

Two facilities in the State now process the lithium-bearing ore known as spodumene: Lithium Corporation of American in Bessemer City, and Foote Minerals in Shelby. On the basis of data supplied by these two sources, the North Carolina air quality agency performed diffusion modeling to estimate the ambient impact of their SO_2 and sulfuric acid mist emissions. The results were used to set the following emission limits for spodumene ore roasting: 9.7 pounds of SO_2 and 1.0 pound of H_2SO_4 mist per ton of ore roasted. These limits are contained in a new regulation, 15NCAC 2D .0527. Compliance with them is to be determined through the use of Method 8 of Appendix A to 40 CFR Part 60 (regulation .0501(d)(4)). The State agency's modeling results indicate that implementation of the new emission limits will not jeopardize the continued maintenance of the three national ambient air quality standards for SO_2, which are currently being met throughout the State.

Under regulation, .0501(d)(3), fuel-burning sources in North Carolina may demonstrate compliance with SO_2 emission control standards either by stack sampling or by fuel analysis. The present revision changes the requirements for the latter alternative. The following test methods of the American Society for Testing and Materials (ASTM) are to be used: (A) for coal—D 2234 for sampling, D 2013 for preparation, D 2015 for gross calorific value, D 3173 for moisture content, and D 3177 for sulfur content (the old regulation called for the use of methods D 2234 and D 3177 only); (B) for oil—D 270 for sampling, D 240 for heat of combustion, and D 129 for sulfur content (the old regulation called for the use of methods D 270 and D 129 only). Sulfur content and heating value of fuels shall be reported on a dry basis.

The public is invited to participate in the present rulemaking by submitting written comments on the proposed revisions in the North Carolina plan. After considering relevant comments received together with other information available to him the Administrator will act on the proposed changes.

(Section 110 of the Clean Air Act (42 U.S.C. 7410).)

Dated: April 27, 1978.

JOHN C. WHITE,
Regional Administrator.

CIVIL AERONAUTICS BOARD

[Docket 32484; Order 78-4-126]

INVESTIGATION OF THE LOCAL SERVICE CLASS SUBSIDY RATE; CLASS RATE IX

Order Instituting Investigation and Requiring Information; Correction

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April, 1978.

The information instructions attached to the order first published at 43 FR 18229 in the issue of April 28, 1978, were based on proposed costing procedures in notice of proposed rulemaking, PDR 46. PDR-46 was adopted as a final interim rule by PR-172 but with modifications. The instructions in Attachment A should be changed to reflect the adoption of PR-172. The attached tables II, II-A, II-B, II-C, II-D, and IV, Page 1 of 6, supersede the corresponding tables in Appendix A of the order.[1]

Also, the second paragraph in the first column on page 18230 should read as follows:

We also propose the adoption of an improved costing methodology based on Subpart K amendments adopted by PR-172. We feel the use of the Subpart K revisions will produce a beneficial refinement in the costing techniques used to compute subsidy rates, especially in the areas of passenger service expense and expenses related to ground property and equipment.[2] An explanation of the proposed changes can be found in Attachment A.

Dated: April 26, 1978.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

TACA INTERNATIONAL AIRLINES, S.A.

Statement of Tentative Findings and Conclusions and Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 2d day of May, 1978.

TACA International Airlines, S.A. (TACA) is the holder of a foreign air carrier permit[1] authorizing: (a) Foreign air transportation of persons, property, and mail (1) between the terminal point San Salvador, El Salvador; the intermediate points Guatemala City, Guatemala, San Pedro Sula, Honduras, Belize City, British Honduras (Belize), and Merida, Mexico;[2] and the terminal point New Orleans, La.; and (ii) between the terminal point San Salvador, El Salvador; the intermediate points San Pedro Sula, Honduras, and Belize City, British Honduras (Belize); and the terminal point Miami, Fla.;[3] and (b) the performance of charter trips in foreign air transportation pursuant to Part 212 of the Board's Economic Regulations.

By application filed on March 9, 1978,[4] TACA filed for renewal of its existing foreign air carrier permit.[5] Subsequently, TACA filed a petition requesting that its application be handled by show-cause procedures.

In granting TACA two routes to the United States, the Board found that the carrier met the operational and financial fitness standards of the Act,[6] and that its services were in the public interest. It currently serves the San Salvador-Miami and San Salvador-New Orleans markets each with daily round-trip combination services utilizing BAC-111 equipment. An opportunity for reciprocity exists for U.S. air carriers seeking to perform similar operations to El Salvador.

Finally, we are unable to conclude that TACA is substantially owned and effectively controlled by the citizens of El Salvador. The applicatin does show, however, that 30 percent of the stock continues to be held by an El Salvador corporation which is in turn exclusively owned by a Salvadorian family and that no other person owns as much as five percent of the stock.[7] Thus, it appears that control does lie in Salvadorian citizens. Since the only question appears to be technical ownership, rather than control, and the majority ownership by non-Salvadorian nationals does not appear to raise any problems, we find that it is in the public interest to waive our traditional national ownership and control policy.

In view of the foregoing and all the facts of record, the Board tentatively finds:

1. That it is in the public interest to renew the foreign air carrier permit of TACA International Airlines, S.A. authorizing the carrier, for a period of five years: (a) to engage in foreign air transportation of persons, property, and mail (i) between the terminal point San Salvador, El Salvador; the intermediate points Guatemala City, Guatemala, San Pedro Sula, Honduras, Belize City, British Honduras (Belize), and Merida, Mexico; and the terminal point New Orleans, La.; and (ii) between the terminal point San Salvador, El Salvador; the intermediate points San Pedro Sula, Honduras, and Belize City, British Honduras (Belize); and the terminal point Miami, Fla.; and (b) to engage in charter trips in foreign air transportation pursuant to Part 212 of the Board's Economic Regulations;

2. That the authority to serve Merida shall expire whenever a United States carrier inaugurates scheduled service between New Orleans and Merida. Service to Merida under the temporary authority granted here shall *not* be considered to be activity of a continuing nature as that term is used in section 558(c) of the Administrative Procedure Act, and will not be automatically extended by the timely filing of a renewal application;

3. That TACA is fit, willing, and able properly to perform the above-described foreign air transportation, and to conform to the provisions of the Act and the rules, regulations, and requirements of the Board;

4. That the public interest requires that the exercise of the privileges granted to TACA International Airlines, S.A. shall be subject to the terms, conditions, and limitations contained in the specimen form of foreign air carrier permit attached to this order, and to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board;

5. That an oral hearing is not required in the public interest;

6. That except to the extent granted, the application of TACA International Airlines, S.A. in Docket 32220 should be denied; and

7. That the renewal of TACA International Airlines, S.A.'s foreign air carrier permit is not a "major federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969,[8] and will not constitute a "major regulatory action" under the Energy Policy and Conservation Act of 1975 (EPACA), as defined in subsection 313.4(a)(1) of the Board's regulations.[9]

It is therefore ordered, That:

1. All interested persons are directed to show cause why the Board should not make final its tentative findings and conclusions, and should not, subject to the approval of the President, renew the foreign air carrier permit issued to TACA International Airlines, S.A. by Order 77-10-39 for a period of five years in the form of the attached specimen permit;

2. Any interested persons having objections to the issuance of an order making final the Board's tentative findings and conclusions and issuing the renewed permit shall, within 14 days after the service of this order, file with the Board and serve on the persons named in paragraph 5 a statement of objections specifying the part or parts of the tentative findings or conclusions objected to, together with a summary of testimony, statistical data, and such evidence expected to be relied upon in support of the statement of objections. If an oral hearing is requested, the objector should state in detail why such hearing is considered necessary and what relevant and material facts he would expect to establish through such hearing which cannot be established in written pleadings;

3. If timely and properly supported objections are filed, further consideration will be accorded the matters and issues raised by the objections before further action is taken by the Board: *Provided*, That the Board may proceed to enter an order in accordance with its tentative findings and conclusions set forth in the order if it determines that there are no factual issues presented that warrant the holding of an oral hearing.[10]

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Secretary shall enter an order which, subject to the approval of the President, (1) shall make final the Board's tentative findings and conclusions set forth in this order, and (2) shall issue a renewed foreign air carrier permit to the applicant in the specimen form attached; and

5. This order shall be served upon TACA International Airlines, Pan American World Airways, Inc., the Ambassador of El Salvador in Washington, D.C., and the United States Departments of State and Transportation.

This order shall be published in the FEDERAL REGISTER and transmitted to the President.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

(Specimen Permit)

UNITED STATES OF AMERICA, CIVIL AERONAUTICS BOARD, WASHINGTON, D.C.

PERMIT TO FOREIGN AIR CARRIER (AS AMENDED)

TACA International Airlines, S.A. is authorized, subject to the provisions set forth, the provisions of the Federal Aviation Act of 1958, and the orders, rules, and regulations issued under the Act, to engage in foreign air transportation of persons, property, and mail as follows:

1. Between the terminal point San Salvador, El Salvador; the intermediate points Guatemala City, Guatemala, San Pedro Sula, Honduras, Belize City, British Honduras (Belize), and Merida, Mexico, and the terminal point New Orleans, La.; and

2. Between the terminal point San Salvador, El Salvador; the intermediate points San Pedro Sula, Honduras, and Belize City, British Honduras (Belize); and the terminal point Miami, Fla.

The holder shall be authorized to engage in charter trips in foreign air transportation, subject to the terms, conditions, and limitations prescribed by Part 212 of the Board's Economic Regulations.

This permit shall be subject to the condition that the holder shall serve the terminal points Miami, Fla., and New Orleans, La., only on flights that serve San Salvador, El Salvador.

The holder shall conform to the airworthiness and airman competency requirements prescribed by the Government of El Salvador for Salvadorian international air service.

This permit shall be subject to all applicable provisions of any treaty, convention, or agreement affecting international air transportation now in effect, or that may become effective during the period this permit remains in effect, to which the United States and El Salvador shall be parties.

This permit shall be subject to the condition that in the event any practice develops which the Board regards as inimical to sound economic conditions the holder and the Board will consult and use their best efforts to agree on modifications satisfactory to both.

By accepting this permit the holder waives any right it may possess to assert any defense of sovereign immunity from suit in any action or proceeding instituted against the holder in any court or other tribunal in the United States (or its territories or possessions) based upon any claim arising out of operations under this permit.

The holder shall keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to liability limitations of the Warsaw Convention and the Hague Protocol approved by Board Order E-23680, May 13, 1966, and a signed counterpart of any amendment or amendments to such agreement which may be approved by the Board and to which the holder becomes a party.

The holder (1) shall not provide foreign air transportation under this permit unless there is in effect third-party liability insurance in the amount of $1,000,000 or more to meet potential liability claims which may arise in connection with its operations under this permit, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the third-party liability insurance provided, and (2) shall not provide foreign air transportation of persons unless there is in effect liability insurance sufficient to cover the obligations assumed in CAB Agreement 18900, and unless there in on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the passenger liability insurance provided. Upon request the Board may authorize the holder to supply the name and address of an insurance syndicate in Lieu of the names and addresses of the member insurers.

The initial tariff filed by the holder shall not set forth rates, fares, and charges lower than those that may be in effect for any U.S. air carrier in the same foreign air transportation. However, this limitation shall not apply to a tariff filed after the initial tariff regardless of whether this subsequent tariff is effective before or after the introduction of the authorized service.

The exercise of the privileges granted here shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time-to-time be prescribed by the Board.

[1] Tables filed as part of the original document.

[1] Order 77-10-39. approved October 11, 1977.

[2] TACA's permit states that the authority to serve Merida, Mexico as an intermediate point is a temporary authorization, which expires "whenever a United States carrier inaugurates scheduled service between New Orleans and Merida." (Order 77-10-39)

[3] TACA's permit is subject to the condition that the carrier serve the terminal points Miami and New Orleans only on flights that serve San Salvador.

[4] A copy of the application has been transmitted to the President of the United States in accordance with the requirements of section 801 of the Act.

[5] TACA requests that its foreign air carrier permit be renewed for an indefinite period. Previously, TACA's permit has been renewed for five-year periods (47 C.A.B. 742 and Order 73-5-142). There is no bilateral air transport agreement between the United States and El Salvador. Accordingly, we will renew TACA's current permit for a period of five years, rather than for an indefinite period.

[6] In the most recent order amending TACA's foreign air carier permit (Order 77-10-39), the Board found that the carrier met the fitness standards of the Act, and that TACA's services would be in the public interest. The present application continues to support these findings.

[7] The applicant indicates by amended exhibits filed April 4, 1978, that only the following persons held more than one percent of the carrier's voting stock: Cede & Co.; Merrill Lynch, Pierce, Fenner & Smith, Inc.; Pershing & Co., Inc.; Tad & Co.; Underwood Neuhaus & Co., Inc.; Watkins & Co., Inc.; William B. Daly; Albert B. Fay; Harry B. Leslie; and Robert K. Moses, Jr.

[8] Our tentative finding is based upon the fact that the applicant is seeking only renewal of existing authority. Section 312.9 of the Board's regulations does not require that an environmental evaluation be made in such cases.

[9] Since no new services are to be performed, there will be no material increase in the utilization of fuel.

[10] Since provision is made for the filing of objections to this order, petitions for reconsideration will not be entertained.

V 43 | 88 MY 5 78 UMI

This permit shall be effective on ———, and shall terminate five years thereafter, except that it shall be subject to termination at any time if the authority to conduct flight operations to and from El Salvador granted by the Government of El Salvador to any air carrier designated by the United States is canceled or restricted: *Provided, however,* That if in the period during which this permit shall be effective the operation of the foreign air transportation here authorized becomes the subject of any treaty, convention, or agreement to which the United States and El Salvador are or shall become parties, then this permit is continued in effect during the period provided in such treaty, convention, or agreement: *Provided further,* That, with respect to Merida, Mexico, the authority granted here shall expire whenever a United States carrier inaugurates scheduled service between New Orleans and Merida.[1]

The Civil Aeronautics Board, through its Secretary, has executed this permit and affixed its seal on ———.

———,
Secretary.

Issuance of this permit to the holder approved by the President of the United States on ——— in Order ——.

PRESBYTERIAN HOSPITAL, ET AL

Applications for Duty Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before May 25, 1978.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5:00 p.m., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. 20230.

[1]The amendment authorizing service to Merida is a temporary authorization and does not refer to an activity of a continuing nature within the meaning of section 558(c) of the Administrative Procedure Act, 5 U.S.C. 558(c).

Docket No. 78-00072. Applicant: Presbyterian Hospital (Col. Pres. Medical Center), 622 West 168th Street, New York, N.Y. 10032. Article: ANOPS 101 Histogram Computer. Manufacturer: (Unitronex) Politechnika Warszawska, Poland. Intended use of article: The article is intended to be used for the study of computerization of the motor unit potential, particularly from patients with muscular dystrophy or carriers of patients with this order. This is an essential form of investigation and in many instances can only be accomplished by computerization of the muscle motor unit potentials so recorded with this article. Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00099. Applicant: Case Western Reserve University, Department of Macromolecular Science, University Circle, Cleveland, Ohio 44106. Article: Chart Recorder, Model TE 200/2 and Accessories. Manufacturer: Tekman Electronics Ltd., United Kingdom. Intended use of article: The article is intended to be used to record volume changes against time during studies of the static and dynamic P-V relationships and creep measurements at constant pressures and comparison of changes in internal and external volume for several pressures. Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00114. Applicant: Texas A. & I. University, Station 1, Box 104, Kingsville, Tex. 78363. Article: TE 16 Test Bed (used) and accessories. Manufacturer: Experimental Engineering Equipment Ltd., Canada. Intended use of article: The article is intended to be used in the course Mechanical Engineering Laboratory (ME341) study of measuring techniques and performance characteristics of mechanical engineering equipment including fluid devices, power systems and heat transfer equipment. Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00151. Applicant: Old Dominion University, Department of Biological Sciences, Room 120, Hampton Boulevard, Norfolk, Va. 23508. Article: LKB 8800A Ultrotome III Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section plant, insect and animal specimens which have been embedded in hard epoxy and water emissible resins. Investigations will be conducted in order to understand basic ultra-structural phenomena associated with these tissues. In certain pathologic studies (human sperm and duck plague virus) attempts will be made to correlate changes with clinical treatment. The article will also be used for educational purposes in the courses: "Methods in Electron Microscopy" and "Advanced Methods in Electron Microscopy" which will involve a study of general principles on techniques and the use of the electron microscope to study the fine structure of cells, virus and the employment of cytochemical staining to localize various enzymes and minerals. Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00152. Applicant: Washington State University, Division of Purchasing, Pullman, Wash. 99164. Article: Waferizer Cutterhead for a Hombak Type ZOA 18 Drum Type Wood Flaker and Accessories. Manufacturer: Hombak GmbH, West Germany. Intended use of article: The article is intended to be used for evaluating the potential of converting sawmill waste, plywood waste, and forest slash into wafers for further manufacture into building products. Variables to be researched are: species, moisture content, wafer size and geometry, and type and quality of residue. Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00166. Applicant: University of Rochester, 250 East River Road, Rochester, N.Y. 14623. Article: Three (3) Ultrafast Streak Cameras and Accessories. Manufacturer: Hadland Photonics Ltd., United Kingdom. Intended use of article: The article is intended to be used in the study of the feasibility of heating targets with a pulsed high power laser to produce thermonuclear reactions. The article converts the laser photons to electrons and then sweeps the accelerated electrons across a phosphor, transforming temporal to spatial variations. Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00186. Applicant: Cornell University, Department of Biochemistry, Wing Hall, Ithaca, N.Y. 14853. Article: Xenon Arc Lamp System and Accessories. Manufacturer: Photochemical Research Association Inc., Canada. Intended use of article: The article is intended to be used for the investigation of binding of ligand (e.g., Oxygen [O_2], carbon monoxide [CO] or nitric oxide [NO]) to hemoglobin as well as protein conformational changes of hemoglobin. All the experiments will involve flash photolysis in which a laser pulse is used to remove ligand from hemoglobin. These investigations are directed toward obtaining a clearer understanding of cooperative effects observed in the binding of ligand by hemoglobin. Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00188. Applicant: The Regents of the University of California, Department of Pathology, School of Medicine, University of California, SF, San Francisco, Calif. 94143. Article: Electron Microscope, Model JEM 100CX and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used both as a means for analysis of naturally occurring disease and as a supplemental aid to the study of model disease systems. Specimens obtained from surgical pathology and from the autopsy will be prepared by standard means, sectioned and stained for routine transmission microscopy. Specifically, detailed analysis of soft tissue tumors, the ultrastructural features of meningiomata, and the distortions produced by liver disease will be followed. The studies will be conducted in an attempt to define the structural and functional correlations that are associated with degenerative and proliferative diseases both in animal models and in humans. The article will also be used for training graduate students in electron microscopy techniques. Application received by Commissioner of Customs: April 11, 1978.

Docket No. 78-00206. Applicant: National Eye Institute, National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. 20014. Article: Electron Microscope, Model EM 400 HMG with Water Chiller and Accessories. Manufacturer: Philips Electronics Instruments NVD, the Netherlands. Intended use of article: The article is intended to be used to examine plastic sections of human ocular tissues, animal tissues and tissue culture preparations in investigations related to corneal diseases, glaucoma, cataracts, retinal diseases, ocular cancer and ocular viruses. Application received by Commissioner of Customs: April 13, 1978.

Docket No. 78-00207. Applicant: University of Oklahoma, 1000 Asp Avenue, Room 314, Norman, Okla. 73019. Article: Nuclear Magnetic Resonance Pulse Spectrometer, Model CPS-2 and Accessories. Manufacturer: Spin-Lock Ltd., Canada. Intended use of article: The article is intended to be used for the study of the motional behavior of water and sodium ions in muscle, collagen and other body tissues in laboratory animals in the aging process. The two techniques which will be used in this project are the study of spin-spin relaxation time in the rotating framework (T_1) and self-diffusion coefficient by applying pulse magnetic field gradient. Continued studies of the effect of cross-linking of collagen on interaction between ATP and collagen molecules, will also be conducted. Application received by Commissioner of Customs: April 13, 1978.

Maritime Administration

[Docket No. S-605]

ATLAS MARINE CO.

Multiple Applications

In the matter of Atlas Marine Co., Aeron Marine Shipping Co., Aquarius Marine Co., Worth Oil Transport Co., American Shipping, Inc., Pacific Shipping, Inc.

Notice is hereby given that the foregoing companies, holders of long-term operating-differential subsidy (ODS) contracts in the worldwide bulk trades, have filed separate applications dated April 18, 1978 to amend their respective contracts so as to include the transportation of dry bulk cargo under the cargo preference laws of the United States, including but not limited to 10 U.S.C. 2631, 46 U.S.C. 1241, and 15 U.S.C. 616 (a), provided, however, that no subsidy will be paid for voyages during which the applicants carry less than 55,000 long tons of dry bulk cargo on the loaded leg, and provided further, that no subsidy shall be paid for any voyage during which the applicants carry dry bulk cargo which has been bagged.

The applicants' current ODS contracts specify that the subsidized vessels shall carry exclusively commercial liquid and dry bulk cargoes not subject to the cargo preference statutes of the United States unless such cargoes are those that, except for the participation of the subsidized operator, would be carried by foreign flag vessels. In this event, such cargoes shall be carried at rates comparable to those offered by foreign flag vessels. Subsidized vessels may also engage in the carriage of liquid bulk cargoes specifically to meet the requirements of the Strategic Petroleum Reserve (SPR) Program of the United States with the understanding that no ODS shall be paid while the vessel is engaged in the carriage of that portion of SPR cargoes reserved for U.S. flag ships.

Interested parties may inspect the applications in the Office of the Secretary, Maritime Subsidy Board, Room 3099-B, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20230.

Any person, firm, or corporation having an interest in such applications who desires to offer views and comments thereon for consideration by the Maritime Subsidy Board should submit them in writing, in triplicate, to the Secretary, Maritime Subsidy Board, Washington, D.C. 20230, by the close of business on May 15, 1978.

The Maritime Subsidy Board will consider these views and comments and take such action with respect thereto as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS).)

By order of the Maritime Subsidy Board.

Dated: May 1, 1978.

JAMES S. DAWSON, Jr.,
Secretary.

National Oceanic and Atmospheric Administration

ATLANTIC GROUNDFISH

New Landing Restrictions

Section 651.7(e) of the fishing regulations regarding cod, haddock, and yellowtail flounder (43 FR 14969) provides that the Assistant Administrator for Fisheries may adjust the landing restrictions for cod, haddock and yellowtail flounder after 40 percent of the quarterly quota of cod, haddock, or yellowtail flounder has been taken. The Assistant Administrator has determined that more than 40 percent of cod, haddock and yellowtail flounder west of 69° W. longitude has been taken, and that it is necessary to impose additional restrictions on the landings of those species. The New England Fishery Management Council recommended that additional restrictions be imposed and its suggestions were carefully considered and adopted in part.

The Assistant Administrator also announces that further restrictions may soon be imposed to ensure that the quarterly quota is not taken before the end of the quarter.

The new restrictions per vessel are as follows:

(1) Cod:

Vessel size	*Pounds per week*
0 to 60 gross registered tons	4,900
61 to 125 gross registered tons	9,800
126 plus gross registered tons	14,000
Fixed-gear vessels	[1]8,000
Do	[2]13,000

[1]Gulf of Maine.
[2]Georges Bank and southern New England.

(2) Haddock:

Vessel size	*Pounds per week*
0 to 60 gross registered tons	3,500
61 to 125 gross registered tons	7,000
126 plus gross registered tons	10,000
Fixed-gear vessels	8,000

(3) Yellowtail flounder west of 69° W. longitude: 2,250 pounds per trip. The alternative limit based on a percentage of the weight of all fish on board no longer applies.

The weekly over-run of 5,000 pounds permitted by § 651.7(c), as amended, in the FEDERAL REGISTER on April 24, 1978 (43 FR 17362), is reduced by the same proportions of 30 percent for cod

V 43 | 88 MAY 5 78 UMI

and 50 percent for haddock. Thus the permitted "over-run" for cod is 3,500 pounds per week.

Fishermen may continue to land 5,510 pounds of yellowtail flounder per trip caught east of 69° W. longitude. However, the alternative limit based on a percentage of the weight of all fish on board no longer applies.

These new landing restrictions will become effective at 0001 hours eastern daylight time, May 7, 1978..

Signed at Washington, D.C., this 28th day of April 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[3510-12]

WEATHER MODIFICATION ADVISORY BOARD

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App., notice is hereby given of the twelfth meeting of the Weather Modification Advisory Board.

The Weather Modification Advisory Board will meet from 4 to 6 p.m. on May 30; from 9 a.m. to 6 p.m. on May 31-June 2, and from 9 a.m. to 1 p.m. on June 3, 1978, in the Conference Room of the Aspen Meadows, Aspen, Colo.

The Board was established in January 1977 (42 FR 4512, January 25, 1977), to advise the Secretary of Commerce on matters of a national policy, a national research and development program, and other aspects of weather modification as outlined in the National Weather Modification Policy Act of 1976 (Pub. L. 94-490), enacted on October 13, 1976. The Board consists of 17 members, with a balanced representation selected from scientific, academic, commercial, consumer, legal, and environmental groups who are appointed by the Secretary of Commerce.

The purpose of this meeting is to review and approve the draft sections that have been prepared for use in the Board's Final Report. The sections deal with weather modification science, operations, future research programs and budgets, statistical evaluations, Federal organization for weather modification, environmental assessment, economics, societal aspects, legal and regulatory matters, and international factors.

The agenda for the meeting is:

TUESDAY, MAY 30, 1978—CONFERENCE ROOM, ASPEN MEADOWS

4 to 6 p.m.—Reading period to study and review the draft statements to be considered for inclusion in the final report of the Board.

WEDNESDAY, MAY 31-FRIDAY, JUNE 2, 1978

9 a.m. to 6 p.m.—Discussion and approval of individual sections of the Final Report.
12 noon to 1 p.m. (each day)—Recess for lunch.

SATURDAY, JUNE 3, 1978

9 a.m. to 1 p.m.—Continuation of review and approval process.
1:00 p.m.—Adjournment.

The meeting will be open to the public and a period will be set aside at the discretion of the Chairman for oral comments or questions by the public which do not exceed 10 minutes each. More extensive questions or comments should be submitted in writing before May 26. Other public statements regarding Board affairs may be submitted at any time before the meeting. Seating will be available for the public on a first-come, first-served basis in the Conference Room of the Aspen Meadows.

Copies of the minutes will be available on request 30 days after the meeting.

Inquiries may be addressed to Dr. Ronald L. Lavoie, Director, Science and Academic Affairs Office, National Oceanic and Atmospheric Administration, Rockville, Md. 20852, phone 301-443-8721.

Dated: May 2, 1978.

R. L. CARNAHAN,
Deputy Assistant Administrator for Administration.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1978

Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received a proposal to add to Procurement List 1978 commodities to be produced by workshops for the blind and other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: June 7, 1978.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities to Procurement List 1978, November 14, 1977 (42 FR 59015):

NO NSN

Wheel Chock, Wood;
Standard 2 x 4 x 8";
Standard 6 x 8 x 18";
Standard 6 x 8 x 76";
U-Shaped 8 x 12"; and
U-Shaped 10 x 20".

The above for all requirements for facilities located west of the Mississippi river and any requirements for facilities located east of the Mississippi river which are not furnished by the Federal Prison Industries.

C. W. FLETCHER,
Executive Director.

PROCUREMENT LIST 1978

Additions

AGENCY: Committee for Purchase from the Blind and Other Serverly Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to Procurement List 1978 commodities to be produced by and services to be provided by workshops for the blind or other severly handicapped.

EFFECTIVE DATE: May 5, 1978.

ADDRESS: Committee for Purchase from the Blind and Other Severly Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: On March 3, 1978, December 23, 1977, and March 10, 1978, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (43 FR 8829, 42 FR 64399, and 43 FR 9842) of proposed additions to Procurement List 1978, November 14, 1977 (42 FR 59015).

After consideration of the relevant matter presented the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following commodities and services are hereby added to Procurement List 1978:

CLASS 8430

Footwear Cover, Radioactive, Contaminants (IB), 8430-00-890-2079.

SIC 7349

Janitorial Service (SH), Federal Building, Post Office and Courthouse, Leavenworth, Kans.
Janitorial Services (SH), Department of Transportation, Federal Aviation Administration, Tracon Facility, Steward Avenue, Westbury, Long Island, N.Y.

C. W. FLETCHER,
Executive Director.

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 78-2]

G. L. ELECTRIC FLASHEAT CO. AND GERVIS J. GALLOWAY

Hearing

In the matter of G. L. Electric Flasheat Co., a corporation and Gervis J. Galloway, individually and as an officer thereof, section 15, Consumer Product Safety Act enforcement proceeding.

Served: May 2, 1978.

On March 24, 1978, the Commission authorized the issuance of a complaint charging Respondents G. L. Electric Flasheat Co., and its president, Gervis J. Galloway, with having manufactured, sold and distributed three models of portable immersion electric water heaters known as the "Flasheat," the "AC and DC" and the "Fast Heat," which were so designed as to present the potential for a substantial shock hazard to persons entering water which is being heated by the said devices and contacting a ground. The complaint alleges that the potential shock hazard is a product defect within the meaning of section 15(a)2 of the Consumer Product Safety Act (15 U.S.C. 2064(a)(2)) which may create a substantial risk of injury to the public and thereby constitute a substantial product hazard. Relief is requested in the form of an order requiring Respondents to cease manufacturing, selling, distributing and importing the said water heaters, to give adequate notice to the public of the substantial product hazard presented and to elect within ten (10) days to repair, replace, or refund the purchase price of the heaters less a reasonable allowance for use.

On April 25, 1978, Counsel for Respondents filed an Answer denying knowledge or information sufficient to form a belief as to the truth of the principal allegations of the Complaint.

Issue having been joined, a public hearing thereon will be held commencing at 10 a.m. (EDST), Tuesday, May 23, 1978, in room 1194 of the McNamara Federal Building, 477 Michigan Avenue, Detroit, Mich. 48226.

Dated: May 2, 1978.

PAUL N. PFEIFFER,
Administrative Law Judge.

DELAWARE RIVER BASIN COMMISSION

WETLANDS PROTECTION POLICY

Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on proposed wetlands protection policies. The hearing will be held on May 24, 1978, at 2:30 p.m. in the Commission's office building at 25 State Police Drive, West Trenton, N.J. Persons wishing to testify are requested to register with the Secretary no later than 24 hours prior to the hearing. Written comments may be submitted in place of oral testimony.

If adopted, the proposed policy would become a part of the Commission's Comprehensive Plan. It supports preservation and protection of both fresh water and tidal wetlands areas by State and Federal agencies, and provides for Commission participation in review of proposed projects affecting wetlands under specified circumstances. The policy includes general standards defining conditions that could adversely affect wetlands, and a procedure for protecting the public interest where encroachments could impair environmental values.

Text of the proposed policy, and of two conforming amendments to the Commission's rules of practice and procedure, is available from the Commission upon request.

W. BRINTON WHITALL,
Secretary.

APRIL 28, 1978.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[10 CFR Part 211]

THUNDERBIRD RESOURCES, INC.

Application for the Use of Multiple Allocation Fractions

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of opportunity for public comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is considering an application from Thunderbird Resources, Inc. for use of multiple allocation fractions for motor gasoline pursuant to the provisions of 10 CFR 211.10(b). Notice is hereby given that ERA is providing an opportunity for interested parties to comment concerning the appropriateness of granting the relief requested in this application in whole or in part.

DATE: Comments must be submitted by May 24, 1978.

ADDRESS: Comments should be addresed to: Charles R. McCrea, Economic Regulatory Administration, Office of Product Allocation, Room 6222, 2000 M Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Charles R. McCrea or R. T. Gehring, Economic Regulatory Administration, Office of Product Allocation, Room 6222, 2000 M Street NW., Washington, D.C. 20461, 202-254-8583.

Ben McRae, Office of General Counsel, room 5146-b, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9565.

SUPPLEMENTARY INFORMATION: On August 30, 1977, the Federal Energy Administration (FEA) received an application from Thunderbird Resources, Inc. (T-Bird) for use of multiple allocation fractions (MAF) for motor gasoline pursuant to the provisions of 10 CFR 211.10(b). T-Bird indicated the existence of three marketing subsystems for its motor gasoline—namely, (1) "Big West-Western" (including portions of Washington, Idaho, and Oregon); (2) "Westco" (including portions of central and western Montana); and (3) "Westland" (including portions of North Dakota and eastern Montana). On the basis of the geographic locations of the three marketing subsystems and the alleged absence of practical methods to transfer motor gasoline among the marketing subsystems, T-Bird has requested permission to use a separate allocation fraction for each subsystem.

The functions of the FEA were assumed by the DOE pursuant to the Department of Energy Organization Act (Pub. L. 95-91, "DOE Act") and Executive Order 12009 (42 FR 46267, September 15, 1977). By Delegation Order 0204-4 the Secretary of Energy delegated to the Administrator of the ERA the responsibility for administering the Mandatory Petroleum Allocation Regulations. Under Section 705 of the DOE Act, pending proceedings are continued without being affected. Accordingly, ERA has continued consideration of the application by T-Bird.

10 CFR 211.10(b) states in pertinent part as follows:

V 4 3 | 8 8 M Y 5 7 8 UMI

• • • Suppliers with two or more distribution subsystems or regions independent of one another may apply to the [ERA] National Office, in accordance with Subpart G of Part 205 of this chapter, for permission to use multiple allocation fractions whenever use of a single allocation fraction would be impracticable or inconsistent with the objectives of the program.

ERA generally requires suppliers of an allocated product to maintain a single allocation fraction. This policy is designed to ensure, to the maximum practical extent, the equitable distribution of all allocated products throughout the domestic market. This policy of maintaining a single allocation fraction will, however, be waived when it is impractical or unduly burdensome to maintain a single allocation fraction in any particular situation and permission to use multiple allocation fractions would not frustrate the objectives of the program. The practicability of utilizing one or a combination of several normal business practices common to the industry in order to accomplish the necessary transfer or redistribution of product within a single allocation fraction is central to the ERA's determination to grant or deny a request for the use of multiple allocation fractions. If the transfer of product between and among the proposed subsystems is not impracticable, the purposes of having a single uniform allocation fraction would ordinarily override the mere convenience of having separate allocation fractions. Specifically, T-Bird must demonstrate that equalization of product disribution between subsystems so as to meet the requirements of a single allocation fraction by direct transport, exchange, borrow/payback, or other product arrangements are so impractical a method of allocation as to constitute a significant burden on T-Bird's operations. Accordingly, ERA is analyzing this request with respect to (1) the interdependence of systems served including any overlapping or marketing regions and any geographical features which would have a bearing on and/or inhibit the maintenance of a single allocation fraction in T-Bird's various marketing subsystems; and (2) the practices of T-Bird and its affiliated companies with respect to supply, marketing, distribution, management, and the maintenance of allocation fractions within their corporate structure.

To assist ERA in determining the appropriateness of T-Bird's request, interested parties are invited to submit views and comments concerning this matter to Charles R. McCrea, Department of Energy, Economic Regulatory Administration, Office of Product Allocation, Room 6222, 2000 M Street NW., Washington, D.C. 20461. All submissions should be made in five copies and should be received no later than 4:30 p.m., May 24, 1978. Comments should be identified on the outside envelope and on the document with the designation, "T-Bird Application for MAF."

Any information or data furnished that you consider confidential must be so identified and submitted in writing, in one copy only. ERA reserves the right to determine the confidential status of the information or data and to treat such information according to that determination.

A copy of the application submitted by T-Bird in this matter, with proprietary information deleted, is available for public inspection in the DOE Freedom of Information Office, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m: and 4:30 p.m., Monday through Friday.

Issued in Washington, D.C., May 2, 1978.

BARTON R. HOUSE,
Assistant Administrator for Fuels Regulation, Economic Regulatory Administration.

Federal Energy Regulatory Commission

BOSTON EDISON CO.

[Docket Nos. E-8855; ER76-90; ER76-854; ER77-84]

Order Accepting Settlement Agreement

APRIL 28, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.[1]

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

Presently before the Commission is the joint motion of Boston Edison Co. (Edison) and the Reading Municipal Light Board (Reading) for acceptance of their mutually agreed upon settlement agreement. As will be detailed in the body of this order, we accept the proffered settlement agreement.

BACKGROUND

On January 16, 1978, Edison and Reading filed with the Commission the aforementioned joint motion and the settlement agreement itself. These documents were publicly noticed on February 28, 1978. Comments on the settlement were received on March 21, 1978, from Staff and Edison's full requirements wholesale customers, the Towns of Concord, Norwood, and Wellesley, Mass. (The Towns). Staff fully supports the settlement, while the Towns have certain reservations. On April 12, 1978, Edison responded to the Towns' comments.

On April 11, 1978, Reading filed a request for Commission acceptance of the settlement by April 30, 1978. In support thereof, Reading asserts that the settlement includes certain new power supply arrangements between itself and Edison from which the monetary benefits to be gleaned would decline if not implemented by that date.

SETTLEMENT

This settlement agreement would resolve all disputes between Edision and Reading in three pending proceedings: (1) full requirements wholesale rate increase in Docket No. E-8855 (Rate S-3); (2) full requirements wholesale rate increase in Docket No. ER76-90 (Rate S-4); and (3) consolidated proceedings concerning a partial requirements Contract Demand rate in Docket No. ER76-854 and non-firm transmission rate in Docket No. ER77-84. The settlement constitutes a "package" arrangement by which Edison and Reading will graduate to a totally new power supply relationship. The settlement contains several features of present interest:

The S-3 and S-4 rate levels are to be reduced by $448,897 and $363,522, respectively, for the locked-in periods those rates were applicable to Reading.

The Contract Demand rate level will be reduced by $409,200 for the period November 1, 1976 through October 31, 1977. Proportionate Contract Demand refunds will be made for the period beginning Novemberr 1, 1977.

The notice provision in the Contract Demand rate schedule has been changed so that Reading may, upon giving a minimum notice of twenty-four months, (i) increase or decrease up to 10 percent of the amount of Contract Demand service the customer had previously committed to take from Edison for a power year and (ii) increase or decrease in any amount the previously specified non-firm transmission service for a power year. The provision does not apply to any power year[2] preceding that beginning November 1, 1981.

Edison will reduce by up to 50 percent the charges otherwise collectable for non-firm transmission service in circumstances where the transmission facilities of one or more other utilities are used to bring power to a customer's system and the other utilities offer a similar reduction.

The parties have resolved their differences with respect to the notice requirements for terminating all requirements service by agreeing to a combination of firm power and unit sale purchases extending through the Fall of 1982 by Reading from Edison. Those purchases will make unit power available to Reading and increase utilization of Edison generating facilities thus conferring financial benefits on both Reading and Edison.

Edison will consult with Reading concerning future rate increases in an effort to reach agreements with respect to such increases prior to their filing.

All disputes, claims and litigation between the parties as to matters covered by the Settlement Agreement are resolved. Excluded from the Settlement Agreement are disputes concerning the S-2 rate which was recently the subject of Commission Opinion No. 809-A[2] and which was effective in 1973 and 1974, the deferred fuel amortization charge which Edison has included in its rates since the end of February 1976 and which will terminate within a few weeks (Docket No. ER76-445), and the proper interest rate on amounts owed in Docket No. ER77-558. The parties agree that a Commission decision in Docket No. ER76-445 will govern as to the deferred fuel amortization charge proposed in that docket and carried over in certain succeeding dockets.

In the joint motion it is asserted that Edison is offering this settlement to the Towns as it applies to Rates S-3 and S-4 and that, while the Towns do not take Contract Demand or non-firm transmission service from Edison, such service as revised by the settlement will be available to them.

COMMENTS

As noted above, Staff after careful review supports the settlement. It finds that, while the settlement rate level for rate 3 is excessive under its cost of service analysis, it is deficient for both Rate 4 and the Contract Demand rates and that, when considered as a package, the settlement rate levels are not excessive. Staff stresses the need to consider the settlement as a negotiated whole: It is "a negotiated settlement in which losses by the customers under a past rate are compensated by benefits under ongoing and future rates."

The Towns state that they will not oppose the settlement, so long as (1) it does not settle their claims in these proceedings and (2) Edison makes interim refunds to them pending resolution of the S-3 and S-4 cases on the merits, these refunds to be based upon the settlement rate level as modified by previously approved rate design.[3] Absent this interim refund condition, the Towns argue that they would be discriminated against in favor of reading. In addition the Towns complain that the settlement violates due process and Commission regulations for they were not invited to the negotiations between Edison and Reading and as a result cannot ascertain the true basis for the settlement. The Towns proceed to reiterate their position on several rate issues in these dockets which they contend are not resolved by the settlement,[4] as a result of which they cannot accept the settlement as presently structured.

In its response, Edison first notes that it offered this settlement to the Towns, which declined to accept. Moreover, Edison asserts that the Towns were notified of an invited to the settlement negotiations. Edison adds that the settlement was not intended to pressure the Towns and that it expressly leaves unaffected the ongoing litigation in these several dockets. Finally, Edison opposes the Towns' proposed interim refund condition as improperly giving the Towns the advantages of the settlement without the requisite compromise of relinquishing claims to further litigation of these dockets.

DISCUSSION

We find that the settlement agreement between Edison and Reading, when regarded in its totality, is neither unduly preferential nor unduly advantageous, and it establishes a just and reasonable rate level. Under the instant circumstances of one wholesale customer, Reading, moving from full requirements to partial requirements to unit contract status, the overall revenue level of all the rates involved is clearly not excessive. Accordingly the settlement should be accepted.

The only real point of contention concerns the impact of this settlement upon Edison's other wholesale customers, the Towns. While this settlement has been offered to, but apparently rejected by, the Towns, it will have no controlling effect over our subsequent decisions on the merits in these several proceedings as such decisions would relate to the Towns. Our acceptance of this settlement is in no way a prejudgment of the Town's numerous positions held in these dockets.

While the Towns are dissatisfied with the settlement, even though offered to them, we do not find persuasive their proposed condition that pending decisions on the merits in these dockets they receive interim refunds. Apart from this proposed condition requiring a "prescription of rates" for which we have no authority,[5] there is no compelling justification for it. It is not necessarily unduly discriminatory for one customer to settle rate increase proceedings at a level unacceptable to other customers who in turn have rested their case upon a Commission decision on the merits. If they succeed on the merits, they will receive refunds accordingly on the basis of the just and reasonable rates found applicable to them. It is their decision in the first instance whether to accept this settlement. Having decided to await a Commission decision on the merits, they have no basis for insisting without having offered a *quid pro quo* for the privilege, nonetheless, that they should be entitled to the settlement refunds.

A fortiori, they are not entitled to interim settlement refunds as dramatically increased by an adjustment reflecting their view of the Rate S-3 and S-4 cases on the merits.

The Commission further finds: The settlement agreement filed on January 16, 1978, between Edison and Reading in Docket Nos. E-8855, ER76-90, ER76-854 and ER77-84 is just and reasonable and should be approved.

The Commission orders: (A) The settlement agreement summarized herein and filed on January 16, 1978, is hereby approved. Such approval is,

---

[1] The "Commission" when used in the context of an action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

[2] *Boston Edison Co.*, Opinion No. 809-A, Docket Nos. E-7738 and E-7784, issued December 9, 1977.

[3] Specifically, the Towns would have the settlement rate level adjusted by using Kw billing instead of the Kva billing included in the settlement. This would increase their refunds for Rate S-3 by some $300,000 per Town over their respective refunds under the settlement.

[4] These issues include price squeeze, 14 Kv surcharge, fuel clause, Kva versus Kv billing.

[5] Before we could prescribe rates for the Towns pursuant to section 206 of the Federal Power Act, we must find them to be just and reasonable and the existing rates unjust and unreasonable. This we are not prepared to do on the present record.

V 43 | 88

however, without prejudice to any subsequent Commission decision on the merits in these proceedings as related to the Towns.

(B) Within 45 days of this order Edison shall refund to Reading all rates collected in excess of the rates which would have been collected under the terms of the settlement agreement, together with interest at the rate of 9 percent per annum on all excess amounts collected in Docket Nos. E-8855, ER76-90, ER76-854 and ER77-84.

(C) Within 15 days after completion of the refunds set out in paragraph (B), Edison shall file with this Commission and all interested state commissions a full report detailing the refund procedure and accounting for all refunds made under the settlement agreement.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER78-311]

CENTRAL HUDSON GAS & ELECTRIC CORP.

Filing

MAY 1, 1978.

In the matter of Central Hudson Gas & Electric Corp.; Consolidated Edison Co. of New York, Inc.; Long Island Lighting Co.; New York State Electric & Gas Corp.; Niagara Mohawk Power Corp.; Orange and Rockland Utilities, Inc.; Rochester Gas & Electric Corp.; Power Authority of the State of New York.

Take notice that on April 14, 1978, the New York Power Pool (NYPP) filed on behalf of the above listed companies a revised Schedule C-2 to the New York Power Pool Agreement. NYPP states that this schedule will replace an existing schedule effective as of April 4, 1977, pursuant to Order of the Commission in Docket No. ER77-511. NYPP further states that the filing proposes that the revised schedule become effective June 1, 1978.

NYPP indicates that the schedule for changes in charges associated with economy energy transactions and paid into the transmission compensation account. NYPP further indicates that changes in the arrangement for sharing the proceeds of the transmission compensation account are also proposed.

Any person desiring to be heard or to make any protest with reference to the application should on or before May 19, 1978, file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All such protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons wishing to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12321 Filed 5-4-78; 8:45 am]

[6740-02]

[Docket No. ES78-32]

CLIFFS ELECTRIC SERVICE CO.

Application

MAY 1, 1978.

Take notice that on April 14, 1978, Cliffs Electric Service Co. ("Service Company"), a wholly owned subsidiary of The Cleveland-Cliffs Iron Co. filed an application seeking an order pursuant to section 204(a) of the Federal Power Act authorizing Service Company to guarantee the securities of another person or, in the alternative, an order determining that Service Company is not assuming any obligation as guarantor in respect of any security of any other person within the meaning of section 204(a) of the Federal Power Act.

Pursuant to the order issued by this Commission in Docket No. ES76-24, Service Company has acquired sufficient additional share of Common Stock of Upper Peninsula Generating Co. ("Generating Company") to enable Generating Company to finance the construction of the Seventh and Eighth units at its Presque Isle station. Service Company is entitled to all of the capacity and energy to be produced by those units. Pursuant to the First 1978 Supplement to 1974 Power Contract, Service Company has agreed to pay to Generating Company all of its costs associated with those units including amounts equal to any payment of principal and interest required to be paid by Generating Company on the bonds it has issued in connection with those units.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20425, in accordance with the Commission's rule of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 12, 1978. Protests will be considered by the Commission in determining the appropiate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12322 Filed 5-4-78; 8:45 am]

[6740-02]

[Docket No. RP78-52]

CONSOLIDATED GAS SUPPLY CORP.

Order Conditionally Accepting for Filing and Suspending Proposed Rate Increase, Waiving Notice Requirements, Initiating Hearing, Establishing Procedures, Requiring Additional Data and the Submission of a Revised Tariff Sheet, and Granting Interventions

APRIL 28, 1978.

On March 31, 1978, Consolidated Gas Supply Corp. (Consolidated) tendered for filing a proposed tariff sheet [1] reflecting an annual increase in jurisdictional rates of $61,598,529. Consolidated stated that the filing seeks to recover the costs of purchasing regasified LNG from its affiliate, Consolidated System LNG Co., commencing April 30, 1978, and other changes in costs relating to gas purchases. This abbreviated filing was tendered pursuant to section 154.63(b)(3) of the Commission's Regulations and thus was supported only by Statements L.[2]

Consolidated requested an effective date of April 30, 1978, and waiver of section 154.66 of the Regulations to permit this filing to be tendered on the last day of the five month period of suspension of the proposed rate increase filed by Consolidated in Docket No. RP77-140.

By letter dated April 12, 1978, the Secretary of the Commission advised Consolidated that this filing was deficient and that no filing date would be assigned until a proper filing in compliance with Part 154 of the Commission's Regulations was received. Specifically, Consolidated was advised that the provision for abbreviated filings in section 154.63(b)(3) of the Regulations permits adjustments only to purchased gas costs and that its deficient filing reflected adjustments to other costs of service items.

[1] First Revised Sheet No. 16 and Alternate First Revised Sheet No. 16 to Third Revised Volume No. 1 of Consolidated's FERC Gas Tariff.

[2] Section 154.63(b)(3) of the Commission's Regulations, 18 CFR Part 154, provides for the submission of an abbreviated filing, supported by Statements L, M, and N, in lieu of Statements A through M, to recover increases in purchased gas costs, if a major rate increase has been filed within the past twelve months, and if there has been no material change in the pipeline's facilities, sales volumes and cost of service.

On April 18, 1978, Consolidated tendered a revised tariff sheet [3] and revised Statements N, S, and R. Consolidated stated that the proposed sales rates, as revised, will generate increased annual revenues of $83.7 million over the rates proposed to be effective on April 1, 1978 in Docket No. RP77-140, but will be approximately $2 million below the sales rates originally filed in Docket No. RP77-140.[4] Consolidated also requested that the Commission take expedited action and grant necessary waiver of the regulations to permit these revised rates to become effective on April 30, 1978, subject to refund. Notice of the filing was issued on April 20, 1978, providing for protests or petitions to intervene to be filed on or before May 2, 1978. Timely petitions to intervene were filed by the parties listed in the Appendix to this order. Also, a notice of intervention was filed by the Pennsylvania Public Utility Commission. All of the petitioners have demonstrated an interest in this proceeding which warrants their participation. The petitions to intervene shall therefore be granted.

Consolidated's revised tariff sheet, tendered in this docket on April 18, 1978, will be accepted for filing on that date. Waiver of the thirty day notice requirement in section 4(d) of the Natural Gas Act and sections 154.22 and 154.51 of the Commission's Regulations will be granted to permit a proposed effective date of April 29, 1978. The proposed rates will be suspended and permitted to become effective, subject to refund, on September 29, 1978, or such earlier date, on or after April 30, 1978, when LNG deliveries to Consolidated commence. This filing will be accepted subject to compliance with the conditions outlined below. A hearing on the lawfulness of the propsed rates will be initiated.

The revised filing reflects the cost, sales, and rate base data included in Consolidated's original filing in Docket No. RP77-140, the elimination of the costs of facilities that were not in service by April 1, 1978, and the inclusion of LNG purchase costs. The proposed rates are based on a twelve month test period ending June 30, 1977, as adjusted for known and measurable changes through March 31, 1978, and for the commencement of LNG deliveries. Based on a review of Consolidated's filing, the Commission finds that the proposed increased rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or otherwise unlawful. Because this filing, as properly revised, reflects increases attributable only to the purchase of regasified LNG, the Commission finds that it is reasonable and appropriate to permit the rates to become effective, subject to refund and certain conditions, when LNG deliveries to Consolidated commence. Because of the apparent uncertainty over the expected date of initial deliveries, the exact suspension period cannot be fixed now. It shall be not less than one day, or until April 30, 1978, and not more than five months, or until September 29, 1978.

The Commission also finds that several conditions must be attached to the acceptance of this filing. First, if LNG deliveries have not commenced on a regularly scheduled basis before the end of the maximum five month suspension period, Consolidated, shall file, on or before September 29, 1978, revised tariff sheets reflecting the elimination of all costs associated with the purchase of regasified LNG. Second, to provide sufficient information for a full and adequate evaluation of the present proposed rates, within thirty days after the commencement of LNG deliveries, Consolidated shall file complete data in the form required by section 154.63 of the Regulations on the cost and revenues estimated for the first twelve months of operations from the date that LNG deliveries commence. By attaching this condition we are not suggesting that Consolidated shall be permitted to claim or recover any additional cost increases without the submission of a full and proper rate increase filing. This information is necessary because of the significant, unprecedented impact of initial LNG deliveries on Consolidated's operations and costs. Third, Consolidated shall advise the Commission, jurisdictional customers, affected State Regulatory Commissions, and other interested parties of the actual date of initial deliveries of regasified LNG to Consolidated, within three days after deliveries begin.

The Commission finds: It is necessary and proper in the public interest and in carrying out the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the rates proposed by Consolidated, that the same be accepted for filing as of April 18, 1978, that the thirty day notice requirement be waived to permit a proposed effective date of April 29, 1978, and that the proposed rates be suspended as hereafter ordered, subject to compliance with the conditions hereafter ordered.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 8, 9, and 15 thereof, and the Commissions rules and regulations, a public hearing shall be held concerning the lawfulness of the increased rates proposed by Consolidated.

(B) Pending hearing and decision, Consolidated's proposed rate increase, Substitute Alternate First Revised Tariff Sheet No. 16 to Third Revised Volume No. 1 of its FERC Gas Tariff, is accepted for filing as of April 18, 1978, and waiver of the thirty day notice requirement is granted to permit a proposed effective date of April 29, 1978. The proposed rate increase shall be suspended and then permitted to become effective, subject to refund, on September 29, 1978, or on such earlier date, on or after April 30, 1978, when the delivery of regasified LNG to Consolidated commences, upon motion filed by Consolidated in accordance with the provisions of the Natural Gas Act.

(C) Acceptance of this filing is subject to these conditions:

(1) If LNG deliveries to Consolidated do not commence on a regularly scheduled basis on or before September 29, 1978, then Consolidated shall file, on or before September 29, 1978, revised tariff sheets reflecting the elimination of all costs associated with the receipt of regasified LNG;

(2) Within thirty days after the commencement of LNG deliveries, Consolidated shall file full cost and revenue data, in the form required by section 154.63 of the regulations, providing estimated cost and revenue data for the first twelve months of operations after LNG deliveries commence;

(3) Within three days of commencement of LNG deliveries, Consolidated shall advise the Commission, jurisdictional customers, affected State Regulatory Commissions, and other interested parties of the actual date of commencement of LNG deliveries.

(D) The Commission Staff shall prepare and serve top sheets on all parties within ninety days after receipt of the additional cost and revenue data to be filed by Consolidated pursuant to ordering paragraph (C) above.

(E) A Presiding Administrative Law Judge, to be designated by the Chief

[3] Substitute Alternate First Revised Tariff Sheet No. 16 to Third Revised Volume No. 1 of Consolidated's FERC Gas Tariff.

[4] Consolidated's original filing in Docket No. RP77-140 included costs associated with the receipt of regasified LNG. By order issued October 31, 1977, the proposed rates were accepted for filing and suspended until April 1, 1978, upon condition that Consolidated file revised tariff sheets reflecting elimination of facilities not in service by April 1, 1978 and LNG costs if deliveries did not begin by April 1, 1978. This condition was reaffirmed in an order denying rehearing issued on February 1, 1978 and an order rejecting a compliance filing issued March 31, 1978. Pursuant to that condition Consolidated filed revised tariff sheets on April 4, 1978 and further revised tariff sheets on April 18, 1978. These revised sheets reflect a substantial reduction in the rate increase proposed to be effective on April 1, 1978, in Docket No. RP77-140.

MY 5 78 UMI

V 43 | 88 MY 5 78 UMI

Administrative Law Judge for that purpose (18 CFR 3.5(d)), shall convene a settlement conference in this proceeding to be held within 10 days after the service of top sheets by the staff, in a hearing or conference room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The Presiding Administrative Law Judge is authorized to establish such further procedural dates as may be necessary and to rule upon all motions (except motions to consolidate, sever, or dismiss), as provided for in the rules of practice and procedure.

(F) The petitioners listed in the Appendix to this order shall be permitted to intervene in this proceeding subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in their petitions to intervene: and, *Provided, further,* That the admission of said intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order of the Commission entered in this proceeding.

(G) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission. Commissioner Hall voted present.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ES78-33]

EL PASO ELECTRIC CO.

Application

MAY 1, 1978.

Take notice that on April 20, 1978, El Paso Electric Co. (Applicant), filed an application with the Federal Energy Regulatory Commission seeking authority pursuant to Section 204 of the Federal Power Act to issue unsecured promissory notes not to exceed $130,000,000 face value at any one time outstanding.

The Applicant is incorporated under the laws of the State of Texas with its principal business office at El Paso, Tex., and is engaged in the electric utility business in the States of Texas and New Mexico in an area in the Rio Grande Valley extending approximately 110 miles northwesterly from El Paso to the Cabello Dam in New Mexico, and 120 miles southeasterly from El Paso to Van Horn, Tex., with a population of approximately 480,000 of whom 385,000 reside in metropolitan El Paso.

According to Applicant, the notes, including bank notes and commercial paper, are to have maturities not exceeding twelve months from the dates of issuance, with final maturity dates not later than December 31, 1980.The Applicant indicates that the interest rate on the Notes to be issued to commercial banks are not for resale to the public will be at the prime rate in effect from time to time, plus, in some instances, provision for compensating balances of 20 percent. The interest rate for Commercial Paper will be the prevailing rate in effect at the time of its issuance for paper of comparative quality and term.

Applicant states that the proceeds from the sale of the Notes will be used (i) to provide interim financing for Applicant's construction program contemplated and now in progress, (ii) to provide temporary financing of current transactions, to maintain cash working funds at normal levels, to carry accounts receivable, to provide for periodic large cash needs, such as tax payments, to supply temporary funds for unexpected cash requirements, and (iii) to provide for other types of current operational business requirements. Applicant's construction program for the years 1978 through 1981 has an estimated cost of $412,272,310.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 12, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-282]

FLORIDA POWER & LIGHT CO.

Order Accepting Rate Schedule for Filing, Waiving Regulations and Consolidating Proceedings

APRIL 28, 1978.

On March 29, 1978, Florida Power & Light Co. (FP&L) filed with the Commission an unexecuted Service Agreement and Exhibit A to its FERC Electric Tariff for service to the Fort Pierce Utilities Authority (Fort Pierce). FP&L proposes to make available to Fort Pierce 33 MW of firm power, and the energy associated therewith, under its Rate Schedule PR, for the period March 27, 1978 through May 31, 1978. Since FP&L states that it commenced service to Fort Pierce on March 27, 1978, in accordance with its request, the company requests that the Commission waive the notice requirements of Section 35.3 of its Regulations in order to permit the rate schedule to become effective as of that date.

FP&L states that Fort Pierce is a fully self-sufficient utility which presently purchases power from it under Service Schedules A (Emergency Interchange Service), B (Scheduled Interchange Service), and C (Economy Energy Interchange Service), to an interchange contract dated May 1, 1974. Because Fort Pierce has sufficient generating capacity to supply its own bulk power requirements, FP&L maintains that it cannot estimate the amount of power and energy Fort Pierce will actually take under Rate Schedule PR. Consequently, the company states that it cannot estimate the revenues it will receive under the rate schedule.

On October 14, 1977, in Docket No. ER78-19, FP&L submitted for filing rate schedules which seek to limit the availability of total (Rate Schedule SR-2) and partial requirements service (Rate Schedule PR). Proposed Rate Schedule PR would only be available to those electric systems for partial power requirements if the systems have insufficient generating capacity and/or firm power purchases to meet their own loads. By order issued December 30, 1977, in Docket No. ER78-19, et al., the Commission suspended the availability clauses in SR-2 and PR for five months, until June 1, 1978.

FP&L asserts that in order to prevent the technical noncompliance with the tariff presently in effect from becoming an issue in Docket Nos. ER78-19, et al., it has made the service requested available to Fort Pierce until the proposed change in the availability clause of Rate Schedule PR becomes effective.

On April 17, 1978, Fort Pierce filed a Protest and Request For Relief. Fort Pierce argues that FP&L's submittal in this docket represents an attempt to eliminate the basis for effective enforcement of its wholesale service obligations and an absolute refusal to deal in basic power supply services. It maintains that the May 31, 1978 termination date is a violation of the present and proposed availability clauses of FP&L's tariff, which provides that service cannot be terminated other than by two years' written notice, and specifying that there should be an initial five year term. It states that it accepted FP&L's contract after striking the June 1, 1978 termination language and notified the company of its refusal to accept the termination date before service commenced. Fort Pierce states that FP&L began to render service anyway. Fort Pierce reasons that in providing service under the tariff FP&L has acquiesced to its rejection of the proposed limitation of service to June 1, 1978.

Fort Pierce then posits that FP&L's actions are unlawful on the following grounds:

1. FP&L's refusals to deal with Fort Pierce are unduly discriminatory, since it is willing to sell to existing new retail customers;

2. FP&L acts to impose blatant tie-in sales by refusing to provide wholesale service to Fort Pierce to allow it to distribute power;

3. FP&L's refusals to deal with Fort Pierce constitute an extreme form of price squeeze;

4. The service terms are unjust and unreasonable insofar as they constitute an attempt by FP&L to preserve its nuclear and base load monopoly; and

5. By seeking approval of its proposed contract, FP&L proposes an unlawful and unjustified abandonment of the service it has just instituted.

Fort Pierce requests:

(1) That it be granted intervention;

(2) That the Commission find that FP&L's refusals to sell wholesale power to it is contrary to FP&L's filed tariff and the Federal Power Act; and

(3) That the Commission accept FP&L's proposed filing in this docket, but order the proposed termination of service be ineffective.

The Commission shall accept FP&L's March 29, 1978 submittal for filing. FP&L shall be directed to file cost support pursuant to Section 35.13 of the Commission's Regulations for its service to Fort Pierce. Such support was not included in FP&L's filing in Docket No. ER78-19 nor in the instant docket. Since service commenced on March 27, 1978, the Commission finds good cause to waive the notice requirements of Section 35.3 of its Regulations.

The Commission finds good cause to consolidate the instant docket with Docket Nos. ER78-19, et al which concerns the reasonableness of FP&L's Rate Schedules SR-2 and PR. Because of the substantial nature of Fort Pierce's interests in this proceeding, the Commission will allow it to intervene herein.

The availability provision of Rate Schedule PR, which provides that service is only available to those systems having insufficient generating capacity to meet their own needs, was suspended for five months, until June 1, 1978, by Commission order issued December 30, 1977 in Docket Nos. ER78-19, et al. The Commission also ordered an expedited investigation to determine the lawfulness of FP&L's proposed service limitations. All other provisions of FP&L's tariff became effective on March 1, 1978, after a two month suspension.

FP&L initiated service on March 27, 1978, when the availability provision was not in effect.

By letter dated March 24, 1978, FP&L offered to commence service at any time after 6 p.m., Friday, March 24, 1978. Exhibit A of the Service Agreement transmitted to Fort Pierce provides in relevant part:

Notwithstanding any other term of the Service Agreement dated ——— to the contrary, service at this Point of Delivery will terminate on June 1, 1978 unless otherwise ordered by the Federal Energy Regulatory Commission.

On March 27, 1978, by telegram, Fort Pierce notified FP&L that it accepted its offer to sell partial requirements service. It further indicated that it did not assent to the above-quoted paragraph. Fort Pierce additionally wrote a letter dated March 27, 1978, explaining why it did not agree to the June 1, 1978 termination date. By letter dated March 29, 1978, Fort Pierce transmitted an executed Service Agreement to FP&L with the June 1, 1978 termination language crossed out. FP&L commenced service notwithstanding Fort Pierce's rejection of the termination provision.

On the basis of the foregoing discussion, it is clear that Fort Pierce disavows the notion that it acquiesced in the June 1, 1978 termination provision. However, Fort Pierce is presently receiving partial requirements service from FP&L.

It should be noted that before FP&L can terminate service to Fort Pierce, it must file pursuant to Section 35.15 of the Commission's Regulations, a notice of termination. Such notice should be filed at least 30 but not more than 90 days before the proposed termination is to take effect. Before service can be terminated, the proposed termination must be shown to be consistent with the public interest. *Pennsylvania Water & Power Co. v. Federal Power Commission,* 343 U.S. 414 (1952). Unless and until authority to terminate is granted under this procedure, FP&L is ordered to continue rendering service to Fort Pierce under the service agreement declared effective by this order notwithstanding any restrictive eligibility clause as would otherwise determine Fort Pierce ineligible to receive service under its tariff. Any provision of the service agreement which by its own terms would effect a termination of service to Fort Pierce is hereby found and declared to be inconsistent with the public interest.

The Commission further finds: (1) Good cause exists to waive the cost support requirements of Section 35.13 for the purpose of accepting FP&L's submittal for filing.

(2) Good cause exists to accept FP&L's submittal for filing as herein conditioned.

(3) Good cause exists to waive the notice requirements of Section 35.3 of the Commission's Regulations and allow FP&L's filing to be effective as of March 27, 1978.

(4) Good cause exists to consolidate the instant docket with Docket Nos. ER78-19, et al.

(5) Participation by Fort Pierce in this proceeding may be in the public interest.

The Commission further orders: (A) The Commission shall waive Section 35.13 of its Regulations for the purpose of accepting FP&L's submittal for filing. However, FP&L is hereby directed to file cost support pursuant to Section 35.13 of the Commission's Regulations for service to Fort Pierce within 20 days of the issuance of this order.

(B) FP&L's submittal in this docket is hereby accepted for filing as of March 27, 1978, subject to refund.

(C) FP&L shall continue to provide partial requirements service to Fort Pierce pursuant to the service agreement filed herein until otherwise ordered by the Commission.

(D) The Commission hereby waives Section 35.3 of its Regulations to allow an effective date of March 27, 1978, for FP&L's filing.

(E) Revenues collected by FP&L from Fort Pierce under Rate Schedule PR shall be subject to refund in Docket No. ER78-19.

(F) Docket No. ER78-282 is hereby consolidated with Docket Nos. ER78-19, et al.

(G) Fort Pierce is hereby permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission: *Provided, however,* that

V 43 — 88 MAY 5 78 UMI

participation of Fort Pierce shall be limited to the matters specficially set forth in its petition to intervene; and *Provided, further,* that the admission of Fort Pierce shall not be construed as recognition by the Commission that it might be aggrieved by any order issued in this proceeding.

(H) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[6740-02]

[Docket No. ES78-30]

IOWA SOUTHERN UTILITIES CO.

Application

MAY 1, 1978.

Take notice that on April 5, 1978, Iowa Southern Utilities Co. (Applicant) filed an application for an order pursuant to section 204 of the Federal Power Act requesting an amendment to its authority to issue common stock of the company pursuant to an Employees' Stock Ownership Plan (ESOP Plan) within the meaning of section 301 of the Tax Reduction Act of 1975 for as long as the ESOP Plan so qualifies.

Applicant is incorporated under the laws of the State of Delaware with its principal business office at Centerville, Iowa, and is engaged in the electric utility business in 24 counties in Iowa.

The Common Stock will be issued to a trust for the benefit of the company's employees qualifying for the plan.

The proceeds from the issuance of the common stock will be used to reduce the amount of income tax payable for the appropriate year to the extent of 1 percent of investment tax credit and up to one-half of an additional 1 percent investment tax credit to the extent matched by payments from participants of the Plan, and subsequent years, by the company.

Any person desiring to be heard or to make any protest with reference to the application should on or before May 12, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). The application is on file with the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-326]

KANSAS GAS AND ELECTRIC CO.

Filing

MAY 1, 1978.

Take notice that Kansas Gas and Electric Co. (KG&E), on April 21, 1978, tendered for filing an initial Agreement for Wholesale Electric Service with the city of Oxford, Kans. KG&E states that initial service is to commence on June 27, 1978.

KG&E further states that copies of the Agreement have been served upon the city of Oxford, Kans.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 9, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RP78-10 and RP72-32 (PGA77-2a)]

KANSAS-NEBRASKA NATURAL GAS CO. INC.

Further Extension of Time

APRIL 28, 1978

On April 19, 1978, Staff Counsel filed a motion to further extend the time for service of top sheets in the above referenced proceeding, pursuant to the Commission's Order issued November 25, 1977. An extension of time was previously granted by notice issued March 21, 1978.

Upon consideration, notice is herby given that an extension of time is granted to and including June 1, 1978, within which Staff Counsel shall serve top sheets on all parties. Pursuant to Ordering Paragraph (I) of the November 25, 1977 Order, the Presiding Administrative Law Judge shall convene a settlement conference within 10 days after the service of top sheets and will establish all further procedural dates.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc. 78-12328 Filed 5-4-78; 8:45 am]

[6740-02]

[Docket No. RP73-14; (PGA78-2) (DCA78-1)]

MICHIGAN WISCONSIN PIPE LINE CO.

Order Accepting for Filing and Suspending Proposed Rate Increase, Granting Interventions, Initiating Hearing and Establishing Procedures

APRIL 28, 1978.

On March 15, 1978, Michigan Wisconsin Pipe Line Co. (Mich-Wisc) filed a revised tariff sheet [1] containing PGA and DCA rate adjustments to be effective May 1, 1978, to reflect (1) a commodity increase of 8.25 cents per Mcf in the Purchase Gas Adjustment to reflect principally the combined effect of (a) the replacement of old sources of gas supply with higher priced new gas, (b) contractual increases and escalations due to producer increases under Opinion Nos. 699, 749, and 770, (c) an increase in the cost of Oklahoma gas production due to the Oklahoma Conservation tax of 7 cents per Mcf which became effective on January 1, 1978, and (d) a rate reduction by Midwestern Gas Transmission Co. due to variations in the Canadian exchange rate; (2) a commodity increase of 4.81 cents per Mcf in the surcharge level to 12.09 cents which will recover a reduced level of deferred costs from those recovered through the November 1, 1977 surcharge but over a lesser volume, and; (3) a commodity reduction of 0.86 cents per Mcf in the Demand Charge adjustment to 1.27 cents for the period May through October 1978.

Mich-Wisc concurrently filed an alternate tariff sheet [2] which excludes 0.02 cents from the surcharge adjustment representing the cost of emergency purchases above rates prescribed by Opinion No. 770-A. Mich-Wisc requests that this alternative tariff sheet be made effective for one day, May 1, 1978, in the event that the Commission suspends for one day its filing due to the inclusion of emergency purchases above the rates prescribed by Opinion No. 770-A.

The emergency purchases made by Mich-Wisc at issue herein are as follows:

(a) Purchase of 4,576 Mcf for $10,296 from Helmerich and Payne pursuant to a contract dated March 17, 1977.

(b) Purchase of 15,214 Mcf for $34,231 from Donald C. Slawson pursuant to a contract dated February 24, 1977.

(c) Purchase of 53,416 Mcf for $120,186 from Kennedy and Mitchell, Inc., pursuant to a contract dated September 29, 1977.

[1] Nineteenth Revised Sheet No. 27F to FPC Gas Tariff, Second Revised Volume No. 1.

[2] Alternate Nineteenth Revised Sheet No. 27F to FPC Gas Tariff, Second Revised Volume No. 1.

The volumes purchased under contracts (a) and (b) are a continuation of purchases included in Mich-Wisc's September 15, 1977, PGA filing which became effective November 1, 1977. The Commission approved that PGA filing by letter order dated November 18, 1977, in Docket Nos. RP73-14 and RP76-50 (PGA No. 77-3 and DCA No. 77-1). Accordingly, no further investigation of these emergency purchases is necessary. As to the remaining contract (c) which has not been the subject of previous Mich-Wisc PGA filings, we believe that Mich-Wisc should be allowed to include in its purchased gas costs the rate for such purchase which a reasonably prudent pipeline would pay for gas under the same or similar circumstances. Accordingly, we shall institute hearing procedures for the purpose of resolving this issue. The amounts shall also be collected subject to refund pending the outcome of the hearing.

Our review of the costs included in the filing, other than the costs associated with the Kennedy and Mitchell purchases indicates that they are just and reasonable or otherwise appropriate under the Natural Gas Act and should be approved. Accordingly, we shall reject the alternate tariff sheet filed by Mich-Wisc and proposed to be effective for one day, May 1, 1978, but permit Mich-Wisc to file a revised tariff sheet to become effective May 1, 1978, without refund obligation, which excludes those costs attributable to the Kennedy and Mitchell emergency purchases which are in excess of Opinion 770-A rate levels.

Public notice of the filing was issued on March 20, 1978 with protests or petitions for intervention due on or before April 7, 1978. Petitions to intervene was filed by the Wisconsin Gas Co. and the Wisconsin Natural Gas Co. The city of Albany, Mo., filed a protest requesting the Commission to review the rate increase closely and to disapprove any amounts not shown to be necessary.

The Commission finds: (1) Mich-Wisc's proposed increase should be accepted for filing and suspended for one day to become effective May 2, 1978, subject to refund.

(2) Mich-Wisc's alternative tariff sheet should be rejected.

(3) Mich-Wisc should be permitted to file a revised tariff sheet to be effective May 1, 1977, which excludes those costs attributable to the Kennedy and Mitchell emergency purchases which are in excess of Opinion 770-A rate levels.

(4) A hearing should be held to determine the prudency of the Kennedy and Mitchell emergency purchase.

The Commission orders: (A) Mich-Wisc's proposed tariff sheet, referenced herein, is accepted for filing and suspended for one day until May 2, 1978, at which time such sheet shall be permitted to become effective, subject to refund.

(B) Mich-Wisc may file, within 15 days of the issuance of this order, a revised tariff sheet effective May 1, 1978, without refund obligation reflecting the elimination of those costs attributable to the Kennedy and Mitchell emergency purchases which are in excess of Opinion 770-A rate levels.

(C) Pursuant to the authority of the Natural Gas Act, particularly, sections 4, 5, 7, 14, 15, and 16, and the Commission's Rules and Regulations, a hearing shall be held in this proceeding to determine the issue of the prudency of Kennedy and Mitchell emergency purchase.

(D) The Commission Staff shall prepare and serve top sheets on all parties on or before August 1, 1978.

(E) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge pursuant to 18 CFR 3.5(d), shall convene a prehearing conference in this proceeding within 10 days after the service of top sheets by the Staff, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, for the purposes of establishing procedures for the investigation and hearing to be held pursuant to this order. The Presiding Judge shall be authorized to modify all procedural dates and to establish further procedures as may in his judgment be required for purposes of the investigation and hearing pursuant to this order. The presiding Judge shall also be authorized to rule upon all motions except motions to consolidate, sever, or dismiss, as provided for in the Rules of Practice and Procedure.

(F) The above-noted petitioners to intervene are permitted to intervene in this proceeding subject to the Commission's Rules and Regulations; *Provided, however,* That the participation of the intervenors shall be limited to matters affecting asserted rights and interests specifically set forth in the petitions to intervene; and *Provided, further,* That the admission of such intervenors shall not be construed as recognition that they might be aggrieved by any order entered in this proceeding.

(G) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[6740-02]

[Docket No. ER77-348]

MISSOURI UTILITIES CO.

Proposed Settlement Agreement

MAY 1, 1978.

Take notice that on March 27, 1978, Missouri Utilities Company (MUCO) tendered for filing a proposed settlement agreement in the above cited docket. On March 31, 1978, Presiding Administrative Law Judge Stephen L. Grossman certified the settlement to the Commission.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

NORTHWEST PIPELINE CORP.

Order Accepting for Filing and Suspending Proposed Rate Increase Subject to Conditions, Initiating Hearing and Granting Interventions

APRIL 23, 1978.

On March 31, 1978, Northwest Pipeline Corp. (Northwest) filed in Docket No. RP78-50 revised tariff sheets [1] which would increase jurisdictional revenues by $32,621,067 annually based on costs and sales volumes for the twelve months ended December 31, 1977, as adjusted. Northwest requests that the proposed rate increase become effective on May 1, 1978. For the reasons stated below, the Commission shall accept the revised tariff sheets for filing, suspend them for five months and set the matter for hearing.

Public notice of Northwest's filing was issued on April 11, 1978, providing for the filing of protests or petitions to intervene on or before April 28, 1978. Timely petitions to intervene were filed by the Public Service Co. of Colorado, Western Slope Gas Co., Chey-

[1] Twentieth Revised Sheet No. 10 to Original Vol. No. 1 and First Revised Sheet Nos. 195, 241, 283, 309 and 365 to Original Vol. No. 2.

V 43 | 88

enne Light, Fuel and Power Co., Colorado Interstate Gas Co. and Pacific Gas Transmission Co. The Commission finds that all listed petitioners have demonstrated an interest in this proceeding which warrants their participation. The petitions to intervene shall therefore be granted.

Northwest states that its proposed increase in rates is required because of the increased costs associated with the expansion of the Clay Basin Storage Project, increased costs of gas supply projects, increased operation and maintenance expenses and taxes and decreased sales volumes. Northwest also claims an overall rate of return of 11.39 percent which is designed to yield a 16.50 percent return on equity capital.

Based on a review of Northwest's filing the Commission finds that the proposed rate increase has not been shown to be just and reasonable and may be unjust, unreasonable, and unduly discriminatory or otherwise unlawful. Accordingly, the Commission shall accept Northwest's revised tariff sheets for filing, suspend their use for five months to become effective October 1, 1978, subject to refund, and shall set the matter for hearing, as hereinafter conditioned.

Northwest's supporting cost of service includes the costs of the Clay Basin Storage Project, a project which has received Commission certificate authorization but which has not yet been placed in service. Northwest asks for waiver of section 154.63(e)(2)(ii) of the Commission's Regulations to permit inclusion of these costs in rates even if the facilities are not placed in service before October 1, 1978. Northwest also reflects in its rates costs related to the proposed expansion of the Jackson Prairie Storage Field and asks for waiver of section 154.63(e)(2)(ii) to permit these costs to be recovered in rates despite the fact that certificate authorization has not yet been applied for. Northwest has also reflected in rates the costs of certain other facilities which have not yet received certificate authorization but which are expected to be certificated and in service prior to October 1, 1978. The Commission shall grant waiver of section 154.63(e)(2)(ii) in that it shall accept for filing Northwest's revised tariff sheets which include the costs of non-certificated facilities. Northwest's request for waiver of section 154.63(e)(2)(ii) to permit recovery of the costs of facilities not certificated and placed in service on or before September 30, 1978, shall be denied, however, and Northwest shall be required to file, prior to October 1, 1978, revised tariff sheets to reflect elimination of all costs from its cost of service related to facilities not placed in service by October 1, 1978.

The proposed rates are designed to recover increases in royalty costs and related production taxes which may become payable by Northwest under procedures recently promulgated by the United States Geological Survey (USGS). Northwest explains that the USGS published a notice on May 4, 1977 (42 FR 22610) which establishes new rules for calculating royalty payments due under Federal and Indian lease agreements. Northwest claims that the new rules, which became effective on June 1, 1977, require that where a gas sales contract is not the product of arm's length bargaining (e.g., pipeline production) the royalties payable on that production shall be computed using a base figure equal to the higher of (a) the price received by the lessee or operator under the sales contract or (b) the highest applicable ceiling rate established by the FERC for the same vintage gas. Northwest maintains that the USGS may interpret the "highest applicable ceiling rate" to mean rates for renegotiated contracts set forth in 699-H and 770-A and not the flowing gas rate promulgated in Opinion No. 749 which has been the basis for Northwest's landowner royalty payments since June 1, 1977. Should Federal and Indian royalty costs be increased, Northwest states that it would be compelled to increase royalty payments to private as well as public lessors. Northwest requests waiver of section 154.63(e)(2)(i) of the Regulations to permit recovery, subject to refund, of increased royalty and related production tax expenses pending resolution of the royalty issue with USGS. The Commission shall not grant waiver of its regulations as requested. Based on information provided to the Commission by Northwest, the projected increases in royalty costs and production taxes may never be realized and, at the present time, constitute a speculative liability which is not "known and measurable" as required by the Commission's regulations. Under these circumstances, we shall allow Northwest to reflect in its proposed rates only that level of royalty and production tax expenses which are actually being incurred on September 30, 1978.

Finally, Northwest filed in this docket First Revised Sheet No. 365 which sets forth increased rates for Rate Schedule X-41. We note that Northwest's Rate Schedule X-41 and Original Sheet No. 365 is being considered in Northwest's pending certificate proceeding in Docket No. CP77-447. Section 154.22 of the Commission's Regulations provides that a natural gas company must obtain a certificate of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act before any new rate schedule or contracts for the performance of any new service may be filed. We shall waive the provisions of this Regulation in order to accept for filing the increased rates for Rate Schedule X-41, subject to the condition that Northwest shall file revised tariff sheets reflecting the elimination of Rate Schedule X-41 if a certificate for this service has not been issued by October 1, 1978.

The Commission finds: It is necessary and proper in carrying out the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the rates proposed by Northwest and that the proposed increased rates be accepted for filing and suspended as ordered below.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 8, and 15, and the Commission's regulations, a public hearing shall be held concerning the lawfulness of the increased rates proposed by Northwest.

(B) Pending hearing and decision, and subject to the conditions of this order, Northwest's proposed rate increase is accepted for filing and suspended for 5 months, until October 1, 1978, when it shall be permitted to become effective, subject to refund, upon motion filed by Northwest in accordance with the provisions of the Natural Gas Act.

(C) On or before October 1, 1978, Northwest shall file substitute tariff sheets and supporting cost and revenue data in accordance with the Commission's rules and regulations, to reflect the elimination of all costs associated with facilities not placed in service by October 1, 1978.

(D) Waiver of Section 154.63(e)(2)(ii) of the Regulations is granted subject to the condition set forth in Paragraph (C) above.

(E) The tariff sheets accepted by this order shall be revised to reflect elimination of all projected increases in royalty expenses and production taxes which do not become effective by October 1, 1978.

(F) Waiver of Section 154.22 of the Regulations is granted subject to the condition that Northwest shall file revised tariff sheets reflecting the elimination of Rate Schedule X-41 if a certificate for this service has not been issued by October 1, 1978.

(G) The petitioners to intervene listed in the body of this order shall be permitted to intervene in this proceeding subject to the Commission's rules and regulations;

Provided, however, that the participation of the intervenors shall be limited to matters affecting asserted rights and interests specifically set forth in the petitions to intervene; and *Provided, further,* that the admission of such intervenors shall not be construed as recognition that they might be aggrieved by any order entered in this proceeding.

(H) The Commission Staff shall prepare and serve top sheets on all parties on or before August 18, 1978.

(I) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose (18 CFR 3.5(d)) shall convene a settlement conference in this proceeding to be held within 10 days after the service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The Presiding Administrative Law Judge is authorized to establish such further procedural dates as may be necessary and to rule on all motions (except motions to sever, consolidate or dismiss) as provided for in the rules of practice and procedure.

(J) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER78-228]

PUBLIC SERVICE COMPANY OF INDIANA, INC.

Order Accepting for Filing and Suspending Proposed Rates and Services for Interchange Service Providing for Hearing and Establishing Procedures

APRIL 28, 1978.

On February 24, 1978, Public Service Company of Indiana, Inc. (PSI) tendered for filing an Interconnection Agreement (the Agreement) between PSI and the city of Crawfordsville, Ind. (City). The proposed Agreement cancels and replaces the Interconnection Agreement dated March 6, 1968, which has been designated as Rate Schedule FERC No. 21. Notice of the filing was issued on March 2, 1978, with protests or petitions to intervene due on or before March 24, 1978. No protests or petitions have been filed.

The proposed Agreement consists of general terms and conditions of Service Schedules A through E, providing respectively for the exchange of Firm Power, Emergency Service Maintenance Power, Interchange Power and Interim Power. As pertinent Service Schedule A, section 2, specifies a charge for firm power of $5.34 per kW-month of firm billing demand plus 6.59 mills per kWh subject to a fuel clause adjustment[1]. This schedule requires the City to take firm power and firm energy at a rate of delivery not less than the "Firm Reservation" Currently specified at 35 percent of the City's Maximum System Kilowatt Demand during the immediately preceding 12 months[2]. Service Schedule B, Section 3 provides that emergency energy shall be compensated by the return of equivalent energy, or at the supplier's discretion, by payments equal to 110 percent of the supplier's "out-of-pocket", incremental, cost. The Agreement also states that the fuel cost component of the supplier's out-of-pocket costs may include the replacement costs of fuel purchased for, or supplied from, the supplier's storage inventories.

A preliminary review indicates that the proposed rates discussed above have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential, or otherwise unlawful. PSI requests that the proposed rates go into effect on May 1, 1978. Considering the above, the Commission will accept the submittal for filing and suspend the rates for one day from the effective date after which the rates will go into effect subject to refund.

It is in the public interest to hold a prehearing conference among representatives of the PSI, the City, and the Commission Staff to provide and exchange additional facts and to work toward resolution of the issues raised by this filing.

The Commission finds: (1) Good cause exists to accept for filing the proposed rates and services and to suspend the use thereof for one day from May 1, 1978, when they shall become effective subject to refund.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the Federal Power Act that the Commission enter upon a hearing concerning the lawfulness of PSI's proposed rates and services.

(3) Good cause exists to hold a prehearing conference among representatives of PSI, the City, and Commission Staff to discuss issues regarding this filing.

The Commission orders: (A) PSI's proposed rates and services are hereby accepted for filing and suspended for one day from May 1, 1978, when they may become effective subject to refund.

(B) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (see Delegation of Authority, 18 CFR section 35.5(d)), shall convene prehearing conference in this proceeding on June 20, 1978, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The Law Judge is authorized to establish all procedural dates and to rule upon all motions (except petitions to intervene, motions to consolidate and sever, and motions to dismiss), as provided for in the Commission's Rules of Practice and Procedure.

(C) Pursuant to the authority of the Federal Power Act, particularly sections 205 and 206 thereof, and the Commission's Rules and Regulations, a public hearing shall be held concerning the justness and reasonableness of the rates and charges included in the subject filing of PSI.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[6740-02]

[Docket No. CP78-286]

TRANSPORT, INC.

Application

APRIL 27, 1978.

Take notice that on April 14, 1978, Transport, Inc. (Applicant), 109 North Broad Street, Lancaster, Ohio 43130, filed in Docket No. CP78-286 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction, during the twelve-month period May 1, 1978 through April 30, 1979, and operation of facilities to enable Applicant to take into its certificated main pipeline system natural gas which would be purchased from producers or other similar sellers thereof, all as more fully set forth in the application on file with the Commission open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which may become available from various producing areas generally coextensive with its pipeline system or the systems of other pipeline companies which may be authorized to transport gas for the account of or exchange gas with Applicant.

Applicant states that the total estimated cost of the proposed facilities is $800,000, which cost would be financed with internally-generated funds or short-term financing. Applicant states that it is aware that the total estimated cost of the proposed facilities exceeds 2 percent of plant account. However, Applicant states that it is engaged in essentially a gathering operation and needs to be able to attach reserves without extensive delays.

[1] These rates are the same as those at issue in Docket Nos. ER76-149 and E-9537 as applicable to PSI's agreements with certain municipal customers.

[2] PSI's agreements with its other municipal customers involved in dockets cited above specifies a Firm Reservation of 10 percent, as did the prior agreement with Crawfordsville.

MAY 5 1978 UMI

Consequently, Applicant requests that the Commission waive the maximum dollar limitation imposed by section 2.58(a) of its General Policy and Interpretations and section 157.7(b)(1) of its Regulations with regard to this application.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 17, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-294]

UNITED GAS PIPE LINE CO.

Pipeline Application

APRIL 27, 1978.

Take notice that on April 7, 1978, United Gas Pipe Line Co. (United), P.O. Box 1478, Houston, Tex. 77001, filed an application in Docket No. CP78-294, pursuant to section 7(c) of the Natural Gas Act, as amended, requesting authorization to transport gas for Arkansas Louisiana Gas Co. (Arkla), all as more fully set forth in the application which is on file with the Federal Energy Regulatory Commission (Commission).

United states that pursuant to a transportation agreement dated April 4, 1978, between United and Arkla, Arkla will deliver or cause to be delivered to United for transportation up to 27,000 Mcf per day at a point of receipt on United's offshore pipeline system in Eugene Island Area, Block 32, offshore Louisiana. United will redeliver equivalent volumes, less fuel and company-used gas, to Arkla at various existing and proposed points of interconnection between United and Arkla.

Any person desiring to be heard or to make any protest with reference to said application, on or before May 17, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing wil be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

Federal Energy Regulatory Commission

[Docket Nos. G—5236, et al.]

CABOT CORP., ET AL.

Applications for Certificates, Abandonment of Service and Petitions to Amend Certificates[1]

APRIL 26, 1978.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before May 23, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 110). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[1] Applicant requests its certificate of public convenience and necessity be amended to add 138 additional oil and gas leasehold acres.
[2] Applicant is willing to accept an initial rate pursuant to opinion No. 699-H and is filing under gas purchase contract dated Mar. 29, 1976. Prior gas purchase contract dated Nov. 1, 1966 terminated by its own terms on Nov. 30, 1973.
[3] Applicant is willing to accept the applicable national rate pursuant to opinion No. 770, as amended.
[4] Applicant requests its certificate of public convenience and necessity be further amended to add an additional delivery point from platform "B" in tract I pursuant to the unit plans, West Cameron 533 field, 3,200 ft Sand Unit No. 14-08-0001-16152 and 3,500 ft Sand Unit No. 14-08-0001-16153.
[5] Applicant is filing under gas purchase contract dated Nov. 16, 1977.
[6] Applicant is filing under gas purchase contract dated Mar. 6, 1978.
[7] Tenneco's interest in the W/2 of sec. 21, T29N, R13W, San Juan County, N. Mex. was assigned to Aztec Oil & Gas Co. by assignment dated June 30, 1969, effective Aug. 1, 1969. Tenneco's leases in sec. 17, T29N, R13W, San Juan County, N. Mex. expired by own terms due to nonproduction. No wells were drilled on this acreage.
[8] Applicant is filing under gas sales contract dated Jan. 3, 1978.
[9] Applicant is filing under gas sales contract dated Dec. 30, 1977.
[10] The available supply of natural gas underlying the H. T. Cline unit is depleted. The owner of oil rights has recompleted the well as an oil well.
[11] The basic contract expired on Jan. 1, 1978, and has been replaced by a percentage of proceeds type contract dated Jan. 1, 1978, with Phillips Petroleum Co. Phillips Petroleum Co. will gather and process the gas and resell the residue gas, under its FERC GRS No. 533, to Northern Natural Gas Co.
[12] Cessation of production occurred during October 1977. Attempts to recomplete well were unsuccessful. Shell offered assignment to Amoco. Amoco refused. There are no remaining reserves for well No. 1, OCS-0431. All new drilling attempts were completed as dry holes, both by Shell and Amoco. Amoco filed a release on Dec. 30, 1977 with lessor.
[13] Applicant is filing under gas purchase contract dated Mar. 3, 1978.

Filing code: A—Initial service. B—Abandonment. C—Amendment to add acreage. D—Amendment to delete acreage. E—Succession. F—Partial succession.

[6740-02]

[Docket Nos. RP75-35 and RP75-36]

TENNESSEE GAS PIPELINE CO., A DIVISION OF TENNECO INC.

Compliance Filing

MAY 3, 1978.

Take notice that on April 26, 1978, Tennessee Gas Pipeline Co., a division of Tenneco Inc. (Tennessee), tendered for filing proposed tariff sheets to its FERC Gas Tariff, Ninth revised Volume No. 1, to be effective May 27, 1978. The proposed tariff sheets consist of the following:

Original Sheet Nos. 213K1, 213K2, 213K3, and 213K4
First Revised Sheet Nos. 213E, 213F, and 213I
Second Revised Sheet Nos. 213D, 213G, 213H, and 213J
Third Revised sheet No. 213K

Tennessee states that the proposed tariff sheets are filed to comply with the Commission's January 26, 1978, order in this proceeding. According to Tennessee, the tariff sheets expand the language of the curtailment plan in article XXIV of the general terms and conditions of its tariff to explain more specifically its curtailment implementation procedures.

It appears reasonable and consistent with the public interest in this proceeding to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) on or before May 10, 1978. All protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons that have previously filed a notice or petition for intervention in this proceeding need not file additional notices or petitions to become parties with respect to the instant filing. This filing which was made with the Commission is available for public inspection.

KENNETH F. PLUMB,
Secretary.

Office of Hearings and Appeals

FEDERAL ENERGY GUIDELINES PAR. 80,026

Supplement to Exceptions and Appeals Guidelines

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Supplement to Exceptions and Appeals Guidelines.

FOR FURTHER INFORMATION CONTACT:

Thomas L. Wieker, Deputy Director, Office of Hearings and Appeals, 2000 M Street NW., Room 8014, Washington, D.C. 20461, 202-254-9681.

SUPPLEMENTARY INFORMATION: on November 18, 1976, the Federal Energy Administration published Guidelines which summarized the criteria used in granting exception relief pursuant to the applicable statutes and regulations. (41 FR 50856 (November 18, 1976)). A portion of those Guidelines relates to Price Exceptions for Crude Oil Producers—Part 212, Subpart D. Federal Energy Guidelines Par. 80,026.

Several inquiries have been received as to the meaning of the crude oil portion of the Guidelines. Those Guidelines are accordingly being supplemented at this time to make it clear that the Department of Energy will consider exception applictions when a producer is not able to recover its current operating expenses. The supplement to the Guidelines also makes it clear that a crude oil producer need not wait until it completes a fiscal quarter in which it incurs a loss before filing an exception application. If the firm is able to project on the basis of reliable and substantial data that either its current operations or its operations during its next fiscal quarter will result in a negative cash flow it may file an application which will be considered on its merits by the DOE Office of Hearings and Appeals.

The first paragraph of Paragraph 80,026 of the Federal Energy Guidelines is therefore amended by the insertion of the material which appears below following the last sentence of that paragraph:

If the record establishes that a firm cannot continue a crude oil extraction effort on a profitable basis because its operating costs exceed the revenues which it may receive under the DOE regulatory program then an exception will generally be approved. *Monsanto Co.*, 6 FEA Par. 83,060 (August 26, 1977); *Gulf Oil Corp.*, 6 FEA Par. 83,028 (July 8, 1977). The analysis used in arriving at this determination is generally based on the firm's projections of the costs which it will reasonably incur during the six month period that includes its present fiscal quarter. *Barber Oil Exploration, Inc.*, 1 DOE Par. 81,008 (November 2, 1977). The DOE will also grant exception relief on the basis of reliable and substantial data which indicates that the operating expenses of the firm for the property involved during the next fiscal quarter will result in a negative cash flow. *W. N. McMurry*, 6 FEA Par. 83,014 (June 17, 1977); *City of Long Beach, California*, 4 FEA Par. 83,040 (August 10, 1976). In addition, exception relief has been granted when a firm does not project a negative cash flow but is able to demonstrate that unless an exception is granted from the ceiling price regulations it has an economic incentive to abandon production and salvage its equipment. *Reading & Bates Oil and Gas Co.*, 1DOE Par. 81,048 (January 6, 1978).

Issued in Washington, D.C., May 1, 1978

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

Office of the Secretary

PROPOSED SUBSEQUENT ARRANGEMENT

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation Between the United States and the International Atomic Energy Agency for Cooperation in the Peaceful Application of Atomic Energy, and the Agreement for Cooperation Between the United States and Argentina Concerning Civil uses of Atomic Energy.

The subsequent arrangement, to be carried out under the above-mentioned agreements, involves a supply agreement negotiated by the Governments of the United States, Argentina, and Peru and the International Atomic Energy Agency (IAEA) whereby the United States agrees to approve the transfer of fuel elements containing 14,785.9 grams of U.S.-origin uranium enriched to approximately 20.09 percent from Argentina to Peru for use in an IAEA project consisting of a zero power research reactor supplied to Peru by Argentina. In accordance with section 131 of the Atomic Energy Act of 1954, as amended, the Secretary has determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect May 22, 1978.

For the Department of Energy.

Dated: May 3, 1978.

WALTER J. MCDONALD,
Acting Assistant Secretary, International Affairs.

CALIFORNIA STATE MOTOR VEHICLE POLLUTION CONTROL STANDARDS

Amended Notice of Public Hearing

On April 21, 1978, a notice of public hearing regarding three actions taken by the California Air Resources Board was published on pages 17044-17045 of volume 43 of the FEDERAL REGISTER. I hereby give notice of the following changes to the dates of this hearing and the corresponding revision of the agenda:

(1) The public hearing will be held on May 18-19, 1978;

(2) On Thursday, May 18, 1978, we will consider the highway cycle NO_x emission standard for 1980 and subsequent model year passenger cars and 1981 and subsequent model year light duty trucks and medium duty vehicles;

(3) On Friday, May 19, 1977, we will consider assembly-line test procedures for 1979 model year passenger cars, light duty trucks and medium duty vehicles, and tune-up label specifications for 1979 and subsequent model year passenger cars, light duty trucks, medium duty vehicles, heavy duty gasoline-fueled engines and heavy duty diesel fueled engines, and 1982 and subsequent model year motorcycles.

The location will be, as before, the Environmental Protection Agency Regional Office (Region IX) Conference room A-B, Sixth Floor, 215 Fremont Street, San Francisco, Calif. For all other particulars regarding said hearing, refer to 43 FR 17044 (April 21, 1978).

Dated: May 1, 1978.

BENJAMIN R. JACKSON,
Presiding Officer Director, Mobile Source Enforcement Division.

[FRL 891-8; OPP—33000/540]

RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of Section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ["Interim Policy Statement"]. On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" [41 FR 3339]. This document described the changes in the Agency's procedures for implementing Section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement which were effected by the enactment of the amendments to FIFRA on November 28, 1975 [Pub. L. 94-140], and the regulations governing the registration and reregistration of pesticides which became effective on August 4, 1975 [40 CFR Part 162].

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street SW., Washington, D.C. 20460. In the case of applications subject to the Section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for

M Y 5 7 8 UMI

V 43 | 88

the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, are being used to support an application described in this notice, (c) desires to assert a claim under Section 3(c)(1)(D) for such use of his data and wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, or (d) wishes to assert confidential status under Section 10 for his data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, and 13—202-755-9315
PM 21 and 22—202-426-2454
PM 24—202-755-2196
PM 31—202-426-2635
PM 33—202-755-9041
PM 15, 16, and 17—202-426-9425
PM 23—202-755-1397
PM 25—202-426-2632
PM 32—202-426-9486
PM 34—202-426-9490

The Interim Policy Statement requires that claims for compensation be filed on or before July 5, 1978. EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under Section 10 of FIFRA, as amended, should be made on or before June 5, 1978. Registration will be delayed pending resolution of Section 10 claims.

Dated May 1, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

FOOD ADDITIVE PETITION

Filing

Monsanto Agricultural Products Co., 800 North Linbergh Boulevard, St. Louis, Mo. 63166, has submitted a petition (FAP 8H5179) to the Environmental Protection Agency (EPA) which proposes to amend 21 CFR 193.235 by establishing a regulation permitting the use of the herbicide glyphosate [N-(phosphonomethyl)glycine] and its metalbolite aminomethlyphosphonic acid in a proposed experimental program involving application of the herbicide to growing sugarcane with a tolerance limitation of 0.15 part per million (ppm) in molasses. Notice of this submission is given pursuant to the provisions of Section 409(b)(5) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this petition to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M Street, SW., Washington, D.C. 20460.

Inquiries concerning this petition may be directed to Special Registration Branch, Registration Division (WH-567), Office of Pesticide Programs, EPA, at the above address, or by telephone at 202-755-4851. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: May 1, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

FOOD ADDITIVE PETITION AMENDMENT

Filing

On July 7, 1977, the Environmental Protection Agency (EPA) announced (42 FR 31181) that Elanco Products Co., a division of Eli Lilly & Co., P.O. Box 1750, Indianapolis, Ind. 46206, had submitted a petition (FAP 7H5165) which proposed to amend 21 CFR 561 by establishing a food additive regulation permitting the use of the fungicide tricyclazole [5-methyl-1,2,4-triazolo (3,4-*b*)-benzothiazole and its metabolite 1,2,4-triazolo (3,4-*b*)-benzothioazole-5-methanol in connection with a proposed experimental program involving application of said fungicide and its metabolite to growing rice with a tolerance limitation of 7 parts per million (ppm) in rice hulls, bran, polishings and straw. The applicant has submitted an amendment to this petition increasing the proposed tolerance of 7 ppm to 15 ppm and deleting the raw agricultual commodity rice straw. Notice of this submission is given pursuant to Section 409(b)(5) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this petition to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M Street SW., Washington, D.C. 20460. Inquiries concerning this petition may be directed to Special Registration Branch, Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telepone at 202-755-4851. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m., Monday through Friday.

Dated: May 1, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

PESTICIDE PROGRAMS; FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT SCIENTIFIC ADVISORY PANEL

Open Meeting

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Notice of open meeting.

SUMMARY: There will be a two-day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel from 9:30 a.m. to 4:30 p.m. daily on Thursday and Friday, May 25 and 26, 1978. The meeting will be held in the third floor Auditorium, Room 3129, University of Miami School of Medicine, 1600 Northwest 10th Avenue, Miami, Fla., and will be open to the public.

FOR FURTHER INFORMATION CONTACT:

Dr. H. Wade Fowler, Jr., Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (WH-566), Room 803, Crystal Mall, Building 2, 1921 Jefferson Davis Highway, Arlington, Va., telephone 703-557-7560.

SUPPLEMENTARY INFORMATION: In accordance with section 25(d) of the amended FIFRA, the Scientific Advisory Panel will comment on the impact on health and the environment of regulatory actions under sections 6(b) and 25(a) prior to implementation. The purpose of this meeting is to discuss the following topics:

1. Briefing on criteria for classification of pesticides under section 3 of FIFRA;

2. Review a recommendation to cancel registrations of chlorobenzilate products under section 6(b) of FIFRA;

3. Continue discussions relative to epidemiological data requirements for

UMI

V 43 | 88 MY 5 78 UMI

assessment of hazards to farmworkers from pesticides; and

4. In addition, the Agency may present status reports on other ongoing programs of the Office of Pesticide Programs.

Any member of the public wishing to attend or submit a paper should contact Dr. H. Wade Fowler, Jr., at the address or phone listed above. Interested persons are permitted to file written statements before or after the meeting, and may upon advance notice to the Executive Secretary, present oral statements to the extent that time permits. Written or oral statements will be taken into consideration by the Panel in formulating comments or in deciding to waive comments. Persons desirous of making oral statements must notify the Executive Secretary and submit copies of summary no later than May 19, 1978.

Individuals who wish to file written statements are advised to submit copies of statements to the Executive Secretary in a timely manner to ensure appropriate consideration by the Panel.

Dated: May 1, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

RECEIPT OF ENVIRONMENTAL IMPACT STATEMENTS

Pursuant to the President's Reorganization Plan No. 1, the Environmental Protection Agency is the official recipient for environmental impact statements (EIS's) and is required to publish the availability of each EIS received weekly. The following is a list of environmental impact statements received by the Environmental Protection Agency from April 24, 1978 through April 28, 1978. The date of receipt for each statement is noted in the statement summary. Under the Guidelines of the Council on Environmental Quality the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days; the date of submission of comments is June 19, 1978. The thirty (30) day period for each final statement begins the day the statement is made available to the Environmental Protection Agency and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

Dated: May 2, 1978.

JOSEPH M. MCCABE,
Acting Director, Office of Federal Activities.

DEPARTMENT OF AGRICULTURE

Contact: Mr. Barry Flamm, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 359A, Washington, D.C. 20250, 202-447-3965.

FOREST SERVICE

Draft

Leesburg Planning Unit, Salmon National Forest, Lemhi County, Idaho, Apr. 25: The proposal consists of the division of the Leesburg planning unit, located in Salmon National Forests, Lemhi County, Idaho. The unit is to first be divided into two major management areas with similar land types, terrain, major drainage and management qualities. These areas will then be further divided into smaller units for management requirements, protection needs, and use and development of various resources within the unit. The entire Leesburg unit is comprised of 86,390 acres, 2,009 of which are privately owned and another 1,584 acres of which are surface rights claims (USDA-FS-DES(ADM)R4-78-5). (ELR Order No. 80410.)

Final

Cooperative Gypsy Moth Suppression Program, 1978, Apr. 26: This EIS presents the selection criteria for regulatory programs and discusses each viable alternative which may be considered for State-Federal cooperative projects in suppressing gypsy moth infestations in the northeastern United States. The draft EIS was utilized as the decisionmaking instrument for selecting the most viable alternative(s) for gypsy moth suppression. This statement also discusses the regulatory programs of the Animal and Plant Inspection Service. Comments made by: DOT, EPA, DOC, and State agencies. (ELR Order No. 80416.)

Southern California National Forests, Timber Plan. Several Counties, California, Apr. 25: Proposed is the implementation of a timber plan for the Angeles, Cleveland, Los Padres, and San Bernardino National Forests. The plan is designed to protect or enhance recreational, watershed, wildlife, and other amenity values; silvicultural treatments included in the proposed plan will develop stand conditions which maintain an attractive, healthy forest. Though commodity production is not a major goal of this plan, wood products made available as a result of stand treatment will be utilized for firewood, posts, or sawlogs, as appropriate (USDA-FS-R5-FES(ADM)-77-08). Comments made by: USDA, AHP, DOI, EPA, State and local agencies, and organizations and individuals. (ELR Order No. 80411.)

Magpie-Confederate Planning Unit, Helena National Forest, Broadwater, Lewis, and Clark Counties, Mont., Apr. 25: Proposed is the implementation of a multiple use plan for the Magpie-Confederate planning unit, Helena National Forest. The unit encompasses 83,773 acres of national forest in the big belt mountains of Montana, the goal of the proposed plan is economic stability of the surrounding community with proper use of resources. The planning unit will continue to produce a constant flow of goods and services. Other areas will be managed to protect their unroaded nature and provide: watershed, scenic value, habitat for wildlife and to benefit man (USDA-FS-RI(12)FES-ADM-76-19). Comments made by: DOI, AHP, USDA, HUD, EPA, HEW, DOT, FPC, State and local agencies, organizations, industry, and individuals. (ELR Order No. 80408.)

Bear Planning Unit—Land Management Plan. Skamania County, Wash., April 24: The proposed action is the implementation of a comprehensive management plan for the 27,490-acre bear planning unit in Gifford Pinchot National Forest. The preferred alternative provides for almost every resource use except wilderness and domestic range. The Wind River experimental forest will be continued and 4,190 acres within the Columbia River Gorge would be recommended for classification as a special interest area. Timber management areas total 13,380 acres. These would be managed for a variety of uses including developed and dispersed recreation, timber havest, watershed and wildlife (USDA-FS-R6-FES (ADM) 77-1). Comments made by: FPC, USDA, DOT, DOC, AHP, COE, EPA, DOI, and State and local agencies. (ELR Order No. 80409.)

Draft supplement

King Planning Unit, Klamath National Forest (S-1). Siskiyou County, Calif., Apr. 26: This document supplements a final EIS filed in April 1977, concerning the management of the King Planning Unit, Klamath National Forest, Siskuyou County, Calif. The proposal consists of dividing the area into seven units of similar social, physical, and biological implications, to provide separate and coordinated management direction. The area includes approximately 49,000 acres in the Marble Mountain Wilderness, Johnson Wilderness Study Area, Titus Roadless Area, and the Ten Bear Roadless Area, (USDA-FS-R5-FES(ADM)76-03(s)). (ELR Order No. 80420.)

RURAL ELECTRIFICATION ADMINISTRATION

Final

Wyodak to Antelope, 230 KV Transmission Line. Campbell and Converse Counties, Wyo., April 28: Proposed is a loan from the Rural Electrification Administration to the Tri County Electric Association, Inc. (TCEA): TCEA proposes to construct and operate approximately 62 miles of 230 KV transmission line from the Wyodak Substation, adjacent to the coal-fired powerplant, to Antelope, located on the Campbell-Converse County Line, where it will tie in with a proposed 230 KV transmission line to be constructed by Pacific Power and Light. Related facilities include construction of a 230 KV bay at Wyodak substation and a new substation near Rend Junction (USDA-REA-EIS(ADM)-76-9-F). Comments made by: DOI, USDA, DOT, COE, EPA, and State and local agencies. (ELR Order No. 80428.)

DEPARTMENT OF COMMERCE

Contact: Dr. Sidney R. Galler, Assistant Secretary for Environmental Affairs, Environmental Affairs, Depatment of Commerce, Washington, D.C. 20230, 202-377-4335.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Draft

Project Stormfury, Atlantic Weather Modification, April 27: This project is a scientific experiment designed to explore the structure and dynamics of western Atlantic tropical cyclones and the potential of modification. The experimentation is to test the hypothesis that the maximum winds of hurricanes can be reduced by at least 10 to 15 percent by seeding the proper clouds with freezing nuclei (silver iodide). Each experiment will consist of 17 flights over a 60 hour period, with approximately 875 pounds of silver iodide being dispensed in four separate flights over an 8-10 hour period. The operational area is primarily located east of the Bahamas, north of Puerto Rico and south of Bermuda. (ELR Order No. 80426.)

New Jersey Coastal Management Program, New Jersey, April 27: The action proposed is the approval by Department of Commerce of the State of New Jersey's coastal zone management program, bay and ocean shore segment. The funding will be used for various actions which include improvement or development of: (1) mapping programs, (2) preparation of a coastal handbook, (3) educational and information programs, (4) energy facility siting criteria and policies, (5) beach and waterfront area access, and (6) coastal management enforcement and monitoring programs. (ELR Order No. 80425.)

U.S. ARMY CORPS OF ENGINEERS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attention: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington, D.C. 20314, 202-693-6795.

Draft

Mayo Electric Generating Plant, Person County, N.C., April 26: The proposed action is the application by Carolina Power & Light Co. for a permit to discharge fill materials into waters of the United States in connection with the proposed 1,440 megawatt Mayo electric generating plant, located in Person County, N.C. The actions include: (1) construction of a main reservoir dam and ash pond dam covering approximately 2,960 acres, (2) discharge of ash into waters behind the ash pond dam, and (3) relocation of a road. (Wilmington Distict.) (ELR Order No. 80419.)

Draft Supplement

Kings Island Turning Basin, Enlargement, Chatham County, Ga., April 26: This statement supplements a final EIS filed in June 1976, to consider alternate sites for the expansion of Kings Island turning basin located in the Savannah Harbor, Chatham County, Ga. The studies presented in the report are limited to reaffirming or modifying the authorized improvement of enlarging the basin. There are four alternate sites being considered. (Savannah District.) (ELR Order No. 80415.)

Missouri River, Review Report, South Dakota, North Dakota, Nebraska, and Montana, April 26: This statement supplements a draft EIS filed in February 1977, for proposed actions on the Misso uri River in the States of South Dakota, North Dakota, Nebraska, and Montana. This supplement is the review report submitted by the Board of Engineers for Rivers and Harbors. The actions of the proposed project are: (1) bank protection at selected locations; (2) additions to the hydro-electric power plants and construction of a pumped-storage plant; (3) development of the Missouri River as a recreational river under the provisions of the Wild and Scenic Rivers Act; and (4) construction and operation of on-Site northern pike fish rearing ponds.

DEPARTMENT OF DEFENSE

ARMY

Contact: George A. Cunney, Jr., Acting Chief, Environmental Office, Office of the Assistant Chief of Engineers, Department of the Army, Room 1E676, Pentagon, Washington, D.C. 20310, 202-694-4269.

Draft

Fort Ord Mission Change, California, April 28: This action involves the conversion of the Fort Ord Mission from a training center to a permanent station for the 7th Infantry Division and the transfer of the command of the installation from the Headquarters, U.S. Army Training Center and Fort Ord to Headquarters, 7th Infantry Division and Fort Ord. Under the old mission, the greater portion of the training dealt with the individual soldier. The new mission will deal primarily with unit type training since elements of the division must train together to function effectively. Fort Ord is located on the coast of California approximately 118 miles South of San Francisco. (ELR Order No. 80429.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: EPA Library (MD-35), Environmental Protection agency, Research Triangle Park, N.C. 27711, 919-541-5277.

Final

Standards for Lime Manufacturing Plants, April 24: Proposed is the implementation of standards of performance for new and modified rotary lime kilns and hydrators at lime manufacturing plants. The proposed standards limit emissions to 0.15 kilogram of particulate matter per megagram of limestone feed and 10 percent opacity. Beneficial impacts are anticipated. (EPA-450/2-77-007B.) Comments made by: EPA, DOI, HEW, ERDA, DOC, State and local agencies, organizations and individuals. (ELR Order No. 80431.)

Contact: Clinton Spotts, Environmental Protection Agency, Region VI, First International Building, 1201 Elm Street, Dallas, Tex. 75270, 214-767-2716.

Draft

San Antonio Wastewater Treatment System, Bexar County, Tex., April 25: The proposed action is the granting of funds to the City of San Antonio, Bexar County, Tex. for improvement of wastewater treatment facilities in order to meet the requirements of the Federal Water Pollution Control Act amendments of 1972. The proposal consists of five major actions: (1) abandonment of the Billing Road plant, (2) improvement of the Leon Creek and Salado Creek plants, (3) construction of a new plant, (4) emplacement of sewage transfer lines, and (4) expansion of sewage collector and interceptor system, (ELR Order No. 80407.)

EXTENSION OF REVIEW PERIOD

The Environmental Protection Agency has officially extended the review period for the Draft EIS entitled Criteria for Classification of Solid Waste Disposal Facilities (ELR Order No. 80345) to June 12, 1978. EPA will conduct a public hearing on the EIS in Cincinnati, Ohio at the USEPA Environmental Research Center Auditorium, 26 West St. Clair, on June 5, 1978 from 1 to 5:30 p.m. and 7 to 10:30 p.m. Registration will be from 12:30 to 1 p.m. and 6:30 to 7 p.m.

FEDERAL ENERGY RESEARCH COMMISSION

Contact: Dr. Jack M. Heinemann, Advisor on Environmental Quality, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, 202-275-6569.

Draft

Western LNG Project, Construction and Operation, Alaska, April 24: The proposed action involves an application filed for a certificate of public convenience and necessity authorizing the construction and operation of facilities to collect and liquefy natural gas: The transportation of liquefied natural gas (LNG) in interstate commerce, and the sale of natural gas to Pacific Gas Co. & Electric Co. (PG AND E) and to Southern California Gas Co. (SOCAL). Natural gas would be purchased from gas fields in the Cook Inlet region of Alaska and transported through a proposed 6 to 24-inch diameter 104.5 mile pipeline network to a proposed LNG plant in the Nikiski Industrial Co. 9 miles north of Kenai, Alaska. (FERC/EIS-0002.) (ELR Order No. 80405.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, 202-755-6308.

SECTION 104(H)

The following are community development block grant statements prepared and circulated directly by applicants pursuant to section 104(H) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local executive. Copies are not available from HUD.

Draft

Pedestrian walkway, upper Darby Township, Delaware County, Pa., April 25: The proposed action is the application for community development block grant funds from HUD. The proposal is the construction of an enclosed pedestrian walkway over West Chester Pike at the intersection with 69th Street to physically separate pedestrian movement between the 69th Street transit terminal and the 69th business area in the Upper Darby Township, Delaware County, Pa. This action is a multiyear project and is scheduled to be started in August 1978 and completed within 10 months. (ELR Order No. 80432.)

Disposition of Amos block, Syracuse, Onondaga County, N.Y., April 27: The proposed action is the application by the city of Syracuse, N.Y., for community development block grant funds from HUD. This proposal entails the demolition of the Amos block, encompassing the structures at 208-220 West Water Street, located in the city of Syracuse, Onondaga County, N.Y. This action is being considered in conjunction with the approved Clinton Square urban renewal project which outlines two possible objectives for the demolition area: (1) Additional right-of-way, and (2) landscaped entrance to Clinton Square and central Syracuse. (ELR Order No. 80423.)

Eastern North Philadelphia plan, Philadelphia County, Pa., April 27: The proposed action is the application by the city of Philadelphia for community development block grant funds from HUD. This proposal has identified the eastern north portion of the city of Philadelphia, Pa., for various

V 43 | 88

concentrated, long-term action. These activities include: (1) Housing rehabilitation, (2) loans and grants, (3) site improvements, (4) public services and facilities, and (5) economic development. (ELR Order No. 80427.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256, Interior Building, Department of the Interior, Washington, D.C. 20240, 202-343-3891.

BUREAU OF LAND MANAGEMENT

Draft

Upper Gila-San Simon livestock grazing, Arizona-New Mexico, April 24: This statement proposes to implement a livestock grazing management program based on multiple-use concepts. The grazing area is located in the States of Arizona and New Mexico and includes a total land area of 2,346,062 acres, which includes public, Federal, State, and private lands. The grazing area will total 193 units and be used for livestock grazing with incorporation of various resource uses and minimal conflict. (DES-78-13.) (ELR Order No. 80406.)

NATIONAL PARK SERVICE

Final

Tuskegee Institute management plan, Macon County, Ala., April 26: Proposed is the implementation of a general management plan for Tuskegee Institute national historic site in Tuskegee, Ala. The plan proposes to preserve and interpret this educational resource; protection and preservation of 22 Buildings (21 on the historic Tuskegee Campus and 1 adjacent to the campus) are involved. A proposal to acquire certain historic properties is also included. No adverse effects are anticipated. (FES-78-8.) Comments made by: AHP, USDA, HEW, HUD, DOI, DOT, EPA, COE, State and local agencies. (ELR Order No. 80413.)

Proposed wilderness, Everglades National Park, Dade and Monroe Counties, Fla., April 26: The statement refers to the proposed legislative designation of 1,296,500 acres (92.7 percent of the park's land and water area), of the Everglades National Park as wilderness. The proposal would result in the preservation of natural ecosystems, including the habitats for several rare and endangered species. Management, research, and development options will be restricted by the action. (FES-78-7.) Comments made by: AHP, COE, DOI, DOT, CGD, EPA, FPC, State and local agencies. (ELR Order No. 80412.)

NUCLEAR REGULATORY COMMISSION

Contact: Mr. Sheldon Meyers, Director, Division of Fuel Cycle and Material Safety, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Mail 396-SS, 301-427-4152.

Draft

Irigaray solution mining project, Johnson County, Wyo., April 27: This action concerns an application for a source material license by the Wyoming Mineral Corp. to conduct production-scale solution mining of uranium at the Irigaray site, Johnson County, Wyo., within the Powder River basin. The project will affect approximately 1,000 acres of land at the site. The actions consist of leaching uranium from subsurface ore-bearing sandstone by adding chemical reagents to existing ground water to reverse the natural uranium precipitation process. (NUREG-0399.) (ELR Order No. 80424.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street SW., Washington, D.C. 20590, 202-426-4357.

FEDERAL HIGHWAY ADMINISTRATION

Final

Albany to I-75 (South of Cordele) connector, Dougherty, Worth, and Crisp Counties, Ga., April 26: This proposed action involves the construction of a four-lane facility connecting Albany to I-75 south of Cordele. The proposed project is located in Dougherty, Worth, and Crisp Counties, Ga. The majority of the project is free access with the addition of two lanes to the existing SR 257. Only that portion on new location between U.S. 41 and I-75 (1.5 miles) south of Cordele is limited access. The project is approximately 37 miles in length, of which 6 miles (from SR 257 east to I-75) is on new location, the four-lane facility will provide a direct connector between Albany, Oakfield, Warwick, and Cordele as well as provide much improved traffic service. Comments made by: USDA, COE, HEW, FPC, DOI, EPA, State and local agencies, groups and individuals. (ELR Order No. 80417.)

Appalachian Highway in north Georgia, several counties in Georgia, April 26: Georgia project APD-056-1(31) Forsyth, Cherokee, Pickens, Gilmer, Fannin, and Union Counties is proposed to be the extension, on either new location or in common with certain existing highways of SR 400 from SR 308 in Forsyth County approximately 90 miles generally in a northerly direction into Union County and ending at a point approximately 2 miles north of the north city limits of Blairsville on U.S. 76. The route will consist of four lanes, two in each direction on about 300 feet of right-of-way with free access. (FHWA-GA-EIS-77-04-F.) Comments made by: TVA, USDA, HEW, CDE, DOT, HUD, EPA, State and local agencies, groups and individuals. (ELR Order No. 80418.)

Redwood Road, UT-68, Salt Lake County, Utah, April 26: The proposed project is the reconstruction of Redwood Road, State Route 68, located in Salt Lake County, Utah, actually two projects are covered in this EIS. The first begins at 6500 South Street on Redwood Road and extends northward for approximately 4.5 miles, ending at 3500 South Street. The other project, beginning at Redwood Road and North Temple Streets runs north for about 1.3 miles to 1000 North Street. The design concept is to widen the road to two lanes in each direction with parking, curb, and gutters and a painted median. (FHWA-UT-EIS-73-01-F.) Comments made by: EPA, DOT, USDA, DOI, State and local agencies. (ELR Order No. 80414.)

Knowlton Bridge and approaches (S.T.H. 34), Marathon County, Wis., April 26: Proposed is the construction of a new bridge over Lake Dubay and the updating of the approaches to that bridge to current standards. This bridge carries State Trunk Highway 34 and is called the Knowlton Bridge. The project begins just north of the community of Dancy in south-central Marathon County and proceeds north across Lake Dubay, ending at a recently constructed portion of Highway 34 north of Knowlton. The project is one segment of a minor arterial proposed in the 1990 State highway plan. (FHWA-WISC-EIS-76-02-F.) Comments made by: DOI, DOT, USDA, CGD, EPA, State agencies. (ELR Order No. 80421.)

Final Supplement

31 East 63rd Street line, Manhattan and Queens, N.Y., April 28: This statement supplements an EIS filed with CEQ in April 1973 and contains proposals by the New York City Transit Authority to amend the project. The proposed amendments are: (1) Extension of the project 780 feet and the addition of a passenger station at Northern Boulevard; (2) addition of an emergency ventilation facility in Manhattan on East 63rd Street between York and FDR Drive; and (3) construction of two condenser water lines in the emergency ventilation facility and the proposed station at 63rd Street-Lexington Avenue. Comments made by: EPA, HEW, DOI, State and local agencies groups, individuals, and businesses. (ELR Order No. 80430.)

Official Correction

The Environmental Protection Agency published in the FEDERAL REGISTER dated April 14, 1978, receipt of a final EIS entitled "I—565, Madison and Limestone Counties, Ala." (ELR Order No. 80341), prepared by the Federal Highway Administration. The statement summary prepared by EPA did not accurately describe the proposed project. Following is an accurate statement summary.

DEPARTMENT OF TRANPORTATION

FEDERAL HIGHWAY ADMINISTRATION

Final

I-565, Madison and Limestone Counties, Ala., March 7: Proposed is Alabama Project No. I-565-5(1) located in Madison and Limestone Counties. The proposed project begins at I-65 at existing Alabama 20 Interchange, or begins at I-65 approximately 1 mile north of its present junction with Alabama 20, with each alternative extending northeasterly to Huntsville. The project length is approximately 21 miles and is a four to six lane, limited access, interstate highway. Approval of the EIS for section 3 of I-565, Jordan Lane to the vicinity of Oakwood Avenue and Andrew Jackson Way, is being withheld pending completion of the review and acceptance of a relocation plan by DOT officials. At such time as the review is completed, an addendum to the EIS will be filed with the EPA indicating the decision for section 3.

FEDERAL RESERVE SYSTEM

FIRST CHANDLER CORP.

Formation of Bank Holding Company

First Chandler Corp., Chandler, Okla., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of the First National Bank, Chandler, Okla. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

First Chandler Corp., Chandler, Okla., has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of two de novo subsidiaries, First Chandler Business Trust and First Chandler Insurance Agency, both of Chandler, Okla. Notice of the application was published on March 2, 1978, in the Lincoln County News, a newspaper circulated in Chandler, Okla.

Applicant states that First Chandler Insurance Agency would engage in the activities of offering credit life insurance and credit accident and health insurance in connection with extensions of credit by the First National Bank, Chandler, Okla. First Chandler Business Trust would own the shares of First Chandler Insurance Agency. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonable be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should by submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than May 22, 1978.

Board of Governors of the Federal Reserve System, April 27, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary
of the Board.

FOREST HILL BANCSHARES, INC.

Formation of Bank Holding Company

Forest Hill Bancshares, Inc., Fort Worth, Tex., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of Forest Hill State Bank, Fort Worth, Tex. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (42 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than May 30, 1978.

Board of Governors of the Federal Reserve Systemn, May 1, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary
of the the Board.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

COMMENTS ON COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

Pursuant to Section 406(g)(2)(B), General Education Provisions Act, notice is hereby given as follows:

The National Center for Education Statistics, the Office for Civil Rights, and the U.S. Office of Education have proposed collections of information and data acquisition activities which will request information from educational agencies or institutions.

The purpose of publishing this notice in the FEDERAL REGISTER is to comply with paragraph (g)(2)(B) of the "Control of Paperwork" amendment which provides that each educational agency or institution subject to a request under the collection of information and data acquisition activity and their representative organizations shall have an opportunity, during a 30-day period before the transmittal of the request to the Director of the Office of Management and Budget, to comment to the Administrator of the National Center for Education Statistics on the collection of information and data acquisition activity.

These data acquisition activities are subject to review by the HEW Education Data Acquisition Coucil and the Office of Management and Budget.

Descriptions of the proposed collections of information and data acquisition activities follow below.

Written comments on the proposed activities are invited. Comments should refer to the specific sponsoring agency and form number and must be received on or before June 5, 1978 and should be addressed to Administrator, National Center for Education Statistics, ATTN: Manager, Information Acquisition, Planning, and Utilization, Room 3001, 400 Maryland Avenue SW., Washington, D.C. 20202.

Further information may be obtained from Elizabeth M. Proctor of the National Center for Education Statistics, 202-245-1022.

MARIE D. ELDRIDGE,
Administrator, National Center
for Education Statistics.

DATED: May 2, 1978.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISTION ACTIVITY

1. Title of proposed activity.—Higher Education General Information Survey XIII: Inventory of College and University Physical Facilities (as of September 15, 1978).

2. Agency/bureau/office.—National Center for Education Statistics.

3. Agency form number.—NCES 2300-7.

4. Legislative authority for this activity.—"* * * The (National) Center (for Education Statistics) shall—* * * collect, collate, and, from time to time, report full and complete statistics on the condition of education in the United States * * *" (Sec. 501. (a) of Pub. L. 93-380; Sec. 406 (g) of the General Education Provisions Act. 20 USC 1221 e-1).

5. Voluntary/obligatory nature of response.—Voluntary.

6. How information collected will be used.—The data to be acquired will be used for:

Program management, estimating the present national level of compliance with Section 504 of the Rehibilitation Act (Pub. L. 93-112 and 93-516), hereinafter referred to as Section 504.

Evaluation, (a) Assessing the degree of success of the system of voluntary compliance with Section 504 implemented by the Office for Civil Rights.

(b) Determining the need for modifications in higher education facilities to meet the requirements of Section 504 and of the Occupational Safety and Health Administration (OSHA).

Research, (a) Providing basic information as to the present level of accessibility to higher education facilities and programs by mobility impaired persons.

(b) Furnishing reasonably accurate estimates of the degree to which modifications of existing facilities are required in order to comply with Section 504 and OSHA requirements.

(c) Suggesting whether a statistical relationship exists between program accessibility and the level of facilities accessibility among institutions of higher education to determine what modifications the institutions must

M Y 5 7 8 UMI

V 43 | 88 MAY 5 78 UMI

make in order to come into compliance and to make cost estimates of these modifications.

(d) Establishing the number of mobility impaired students attending institutions during the 1978 fall term.

Condition of education, (a) Providing Congress, federal and state education agencies, and private education associations with basic information as to the present level of accessibility to higher education facilities and programs by mobility impaired persons.

(b) Helping institutions to identify what they need to do to fully comply with Section 504.

(c) Furnishing Congress with a reasonably accurate indication of the need for federal financial assistance to help institutions in their efforts to determine the least expensive means of complying with Section 504 and to make the facilities modifications which are necessary for Section 504 compliance.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time of collection: October 31, 1978; and (c) frequency: Biennially.

8. Respondents.—(a) Type: Colleges and universities (including 2-year institutions); (b) Number: 700 (sample); and (c) estimated average man-hour per respondent: 3.0.

9. Information to be collected.—Required of each respondent:

(1) Total number of buildings on campus on September 15, 1978 (by age groups),

(2) Number of buildings on campus which are accessible on September 15, 1978 (by age groups),

(3) Number of buildings on campus which have toilets for the mobility impaired on September 15, 1978 (by age groups),

(4) total amount of assignable floor space on campus on September 15, 1978 (by age groups),

(5) Amount of accessible floor space on campus on September 15, 1978 (by age groups),

(6) Total assignable floor space on campus on September 15, 1978 (by room use categories),

(7) Accessible floor space on September 15, 1978 (by room use categories),

(8) Total number of beds for students in institutionally owned or operated housing on September 15, 1978,

(9) Number of beds designed for mobility impaired students as of September 15, 1978,

(10) Total number of degree programs offered on September 15, 1978,

(11) Number of accessible degree programs offered on September 15, 1978, and

(12) Number of mobility impaired students 1978 fall term.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Fall 1978 Special Purpose Schools Civil Rights Survey.

2. AGENCY/bureau/office.—Department of Health, Education, and Welfare/Office of the Secretary/Office for Civil Rights.

3. Agency form number.—CR 202.

4. Legislative authority for this activity.—This survey is mandated by Order of the United States District Court in *Kenneth Adams, et al,* v. *Joseph A. Califano, Jr.,* Civil No. 3095-70 (D.D.C. filed December 29, 1977), and Section 42.406 of the Justice Department's Title VI Coordinating Regulations (42 CFR 42).

The following are the relevant legislative authorities:

Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.).

• • • Each recipient shall keep records and submit to the responsible Department official or his/her designee timely, complete and accurate compliance reports at such times, and in such form and containing such information, as the responsible Department official or his/her designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part • • • (45 CFR 80.6(b))

Title IX of the Education Amendments of 1972 (20 U.S.C. 1681 et seq.).

The procedural regulations applicable to Title VI of the Civil Rights Act of 1964 are adopted and incorporated by reference. These procedures may be found at 45 CFR 80.6-80.11 and 45 CFR Part 81. (45 CFR 86.71)

Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

The procedural provisions applicable to Title VI of the Civil Rights Act of 1964 are adopted and incorporated by reference. These procedures are found at 45 CFR 80.6-80.10 and 45 CFR Part 81.

5. Voluntary/obligatory nature of response.—Obligatory.

6. How information to be collected will be used.—The purpose of the survey is to help determine which special purpose schools for the deaf, blind, and other handicapped students will be reviewed under the principal civil rights jurisdictions of the Department. These are Title VI of the Civil Rights Act of 1964, which prohibits discrimination on the basis of race, color, or national origin by recipients of Federal financial assistance; Title IX of the Education Amendments of 1972, which prohibits discrimination on the basis of sex in federally assisted education programs; and Section 504 of the Rehabilitation Act of 1973, which prohibits discrimination based on handicapping conditions by recipients of Federal financial assistance.

OCR is authorized to monitor recipient institutions and investigate allegations or indications of discrimination prohibited by these statutes.

The primary plan for analysis of compliance with the statutes is dependent on statistics shown in:

(1) The assignment of children to facilities and the range of services offered by these facilities,

(2) The assignment of children to programs within each facility and the characteristics of the population served by the facility.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time of collection: Fall 1978; and (c) frequency: Biennally.

8. Respondents.—CR 202.

(a) Type: State operated and State Supported Schools for the Handicapped.

(b) Number: 4,000.

(c) Estimated average person hours per respondent: 4.

9. Information to be collected.—Each selected school will complete the appropriate Individual Facility Report form. The report for the handicapped requires that each facility report by race and sex, general information on the type of handicapped children served, program and service accessibility, residential and educational enrollment and types of alternative placement used. In addition there is a section which requests data on the participation of children in programs offered, including: special education, enrollment of children with limited English speaking ability, the number and design of vocational education, and specialized training programs. There also is a section which requests the number of professional teaching staff members, by race, sex, and presence of handicapping condition.

A public meeting on this survey will be held on May 31, 1978, Room 5051, HEW North Building, 330 Independence Avenue SW., Washington, D.C. 20201.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Standard application (nonconstruction) for parts B and C of the Indian Education Act.

2. Agency/bureau/office.—Office of Education/Office of Indian Education.

3. Agency form number.—OE form 267.

4. Legislative authority for this activity.—"Section 810(a) The Commissioner shall casrry out a program of making grants for the improvement of educational opportunities for Indian children • • • (f) Applications for a grant under this section shall be submitted • • •." (20 U.S.C. 887(c).)

"Section 314(a) The Commissioner shall carry out a program of making grants • • • for providing adult education for Indians • • • (c) Applications for a grant under this section shall be submitted • • •." (20 U.S.C. 1211a) Pub. L. 92-318.

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information collected will be used.—The information will be used to decide which applicants will receive awards.

7. Data acquistion plan.—(a) Method of collection: Mail; (b) time of collection: Winter; and (c) Frequency: Annually.

8. Respondents.—(a) Type: Indian tribes and organizations, educational agencies; (b) number: 400; and (c) estimated average man-hours per respondent: 15.

9. Information to be collected.—The standard application (nonconstruction) from OMB Circular No. A-102 will be used with modifications required by law and regulations.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISTION ACTIVITY

1. Title of proposed activity.—Standard Application (Construction) for Non-Commercial Educational Broadcasting Facilities.

2. Agency/bureau/office.—Office of Education/Bureau of Elementary and Secondary Education/Office of Libraries and Learning Resources/Educational Broadcasting Facilities Branch.

3. Agency form number.—OE form 323-1.

4. Legislative authority for this activity.—"Section 392(a) For each project for the construction of noncommercial educational television or radio broadcasting facilities there shall be submitted to the Secretary an application for a grant. • • •" (47 U.S.C. 392) Pub. L. 87-447.

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information collected will be used.—The information collected will be used to determine which applicants will receive awards.

7. Data acquistion plan.—(a) Method of collection: Mail; (b) time of collection: Winter; and (c) frequency: Annually.

8. Respondents.—(a) Type: States, nonprofit colleges or universities, nonprofit organizations (with qualification); (b) number: 100; and (c) estimated average man-hours per respondent: 60.

9. Information to be collected.—The standard Federal application (construction) will be used. In order to determine the need for facilities (including equipment) a supplementary questionnaire containing the following information must also be submitted: Federal Communications Commission information, population and school enrollment within service area, eligible apparatus and other eligible costs.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Standard Application (Nonconstruction) for Foreign Language and Area Studies.

2. Agency/bureau/office.—U.S. Office of Education, Bureau of Higher and Continuing Education, International Education.

3. Agency form number.—OE 324.

4. Legislative authority for this activity.—"Sec. 601(a) The Secretary is authorized to make grants to or contracts with institutions of higher education for the purposes of establishing, equipping, and operating graduate and undergraduate centers and programs for the teaching of any modern foreign language, for instruction in other fields needed to provide a full understanding of the areas, regions, or countries in which such language is commonly used, or for research and training in international studies and the international aspects of professional and other fields of study." (Pub. L. 85-864, as amended; 20 U.S.C. 511.)

"Sec. 602. The Commissioner is authorized, directly or by grant or contract, to make studies and surveys to determine the need for increased or improved instruction in modern foreign languages and other fields needed to provide a full understanding of the areas, regions, or countries in which such languages are commonly used, to conduct research on more effective methods of teaching such languages and in such other fields, and to develop specialized materials for use in such training, or in training teachers of such languages or in such fields." (Pub. L. 86-864, as amended; 20 U.S.C. 512.)

"Sec. 102.(b)(6) • • • the President is further authorized to provide for • • • promoting modern foreign language training and area studies in United States schools, colleges, and universities • • •" (Pub. L. 87-256, as amended; 22 U.S.C. 2451-1458.)

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information collected will be used.—The information will be used to determine which applicants will receive awards.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time of collection: Winter; and (c) frequency: Annually.

8. Respondents.—(a) Type: Institutions of Higher Education; (b) number: 800; and (c) estimated average man-hours per respodnent: 12.

9. Information to be collected.—The standard application (nonconstruction) of OMB Circular No. A-102 will be used with minor modification based on the law and the regulations.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Standard Application (Nonconstruction) for Environmental Education.

2. Agency/bureau/office.—Office of Education, Bureau of Elementary and Secondary Education, Office of Environmental Education.

3. Agency form number.—OE form 326.

4. Legislative authority for this activity.—"Sec. 3(b)(3)(A) Financial Assistance • • • may be made available only upon application to the Commissioner." (20 U.S.C. 1532) (Pub. L. 91-516.)

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information collected will be used.—The information collected will be used to decide which applicants will receive awards.

7. Data acquistion plan.—(a) Method of collection: Mail; (b) time of collection: Winter; and (c) frequency: Annually.

8. Respondents.—(a) Type: Public and private nonprofit agencies, organizations, and institutions; (b) number: 1,000; and (c) estimated average man-hours per respondent: 40.

9. Information to be collected.—The standard application (nonconstruction) from OMB Circular No. A-102 will be used with modifications required by law and regulations.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Standard Application (Short Form) for Environmental Education.

2. Agency/bureau/office.—Office of Education, Bureau of Elementary and Secondary Education, Office of Environmental Education.

3. Agency form number.—OE form 326-1.

4. Legislative authority for this activity.—"Sec. 3(b)(3)(A) Financial assistance • • • may be made available only upon application to the Commissioner." (20 U.S.C. 1532) (Pub. L. 91-516.)

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information collected will be used.—The information collected will be used to decide which applicants will receive awards.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) number: 500; and (c) estimated average man-hours per respondent: 20.

9. Information to be collected.—The standard application (short form) from OMB Circular No. A-102 will be used with mofifications required by law and regulations.

V 43 I 88

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Financial Status Report and Performance Report—Bureau of Occupational and Adult Education.

2. Agency/bureau/office.—Office of Education, Bureau of Occupational and Adult Education.

3. Agency form number.—OE form 360.

4. Legislative authority for this activity.—"Section 422(a) The Commissioner shall——

3. Collect data and information on applicable programs • • • (Pub. L. 91-230, Title IV; 20 U.S.C. 1231a.)

5. Voluntary/obligatory nature of response.—Required to maintain benefit.

6. How information to be collected will be used.—The financial status report will be used to monitor the status of funds under grants awarded by the Bureau of Occupational and Adult Education. The performance report will be used to monitor activities under the grant.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time of collection: for interim reports, 30 days after the end of each six month period of the project; for final reports, 90 days after the completion of the project; and (c) frequency: Semi-annually.

8. Respondents.—

(a) Type: Colleges and universities; (b) number: 145; and (c) estimated average man-hours per respondent: 9.

(a) Type: Local education agencies; (b) number: 180; and (c) estimated average man-hours per respondent: 9.

(a) Type: State education agencies; (b) number: 20; and (c) estimated average man-hours per respondent: 9.

(a) Type: Nonprofit organizations; (b) number: 20; and (c) estimated average man-hours per respondent: 9.

(a) Type: Other (Indian tribes and tribal organizations and State and local governmental organizations); (b) number: 45; and (c) estimated average man-hours per respondent: 9.

9. Information to be collected.—All grantees will use the standard financial status report from OMB Circulars No. A-102 and A-110. Information on the standard form not required by the programs will not be collected. The performance report will be based upon the instructions contained in OMB Circular No. A-102 and will collect information on the accomplishment of activities and objectives contained in the approved grant application. For grants under fellowship programs, grantees will report the amount of excess institutional allowance funds and how these funds have been used to improve their programs, as required by the law.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Standard Application (Nonconstruction) for Migrant Program, Title I, ESEA.

2. Agency/Bureau/office: Office of Education/Bureau of Elementary and Secondary Education/Compensatory Educational Programs/Division of Education for the Disadvantaged/Migrant Branch.

3. Agency form number.—OE form 362.

4. Legislative authority for this activity.—"Sec. 122: (a)(1) A State educational agency or a combination of such agencies, upon application, shall be entitled to receive a grant for any fiscal year under this section to establish or improve, either directly or through local educational agencies, programs of education for migratory children or migratory agricultural workers or of migratory fishermen. The Commissioner may approve such an application. • • • " (20 U.S.C. 241c-2) Pub. L. 93-380.

5. Voluntary/obligatory nature of response.—Required from State educational agencies to obtain benefit. The State has the option of using the application for local educational agencies.

6. How information collected will be used.—This information will be used to process grant applications.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time of collection: Fall; and (c) frequency: Annually.

8. Respondents.—(a) Type: State Educational Agencies; (b) number: 47; and (c) estimated average man-hours per respondent: 20.

(a) Type: Local Educational Agencies; (b) number: 1,200; and (c) estimated average man-hours per respondent: 20.

9. Information to be collected.—All respondents will be required to provide information requested on the standard non-construction application for Federal assistance, including the standard face page, SF-242. The Part IV, Program Narrative, incorporates requests for information based on statutory and regulatory needs.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Education for the Public Service program—application.

2. Agency/Bureau/Office.—Office of Education/Bureau of Higher and Continuing Education.

3. Agency form No.—OE 404.

4. Legislative authority for this activity.—"Sec. 901. (a) • • • (2) to establish, strength, and improve program designed to prepare graduate and professional students for Public Service • • • " (20 U.S.C. 1134a).

"Sec. 902. (a) The Commissioner is authorized to make grants of institutions of higher education • • • an institution of higher education shall submit an application • • • ." (20 U.S.C. 1134a).

5. Voluntary/obligatory nature of response.—Required to obtain or maintain benefits.

6. How information will be used.—For award purpose, the information will be used in the evaluation of an institution's graduate programs in education for the public service, for institutional grants, and allocations of fellowships to these institutions.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) Time of collection: January; and (c) Frequency: Annually.

8. Respondents. (a) Type: Colleges and universities; (b) Number: 170; and (c) Estimated average man-hours per respondent: 20.

9. Information to be collected.—The standard Form 424 is used. A proposed budget must be included for each planned activity.

For a fellowship grant, the following figures must be included: the number of new fellowships, and continuing fellowships requested.

A narrative statement is also required, covering:

(a) Nature and objectives of the fellowship program.

(b) Program description.

(c) Need for fellowship support.

(d) Selection of fellows, including procedures for determining financial need.

(e) Qualifications of the faculty.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Domestic Mining and Mineral and Mineral Fuel Conservation Fellowship program—application.

2. Agency/Bureau/Office.—Office of Education/Bureau of Higher and Continuing Education.

3. Agency Form No.—OE 405.

4. Legislative authority for this activity.—"Sec. 961. (b)(1) The Commissioner is authorized to award under the provisions of this part not to exceed five hundred fellowships for the fiscal year ending June 30, 1973, and for each of the succeeding fiscal years ending prior to October 1, 1979." (Pub. L. 92-318, as amended; 20 U.S.C. 1134n).

5. Voluntary/obligatory nature of response.—Required to obtain or maintain benefits.

6. How information collected will be used.—Information collected will be used in the evaluation of an institution's graduate programs in mining and mineral fuel conservation for allocations of fellowships to these institutions.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) Time of collection: Fall; and (c) Frequency: Annually.

8. Respondents. (a) Type: Colleges and universities; (b) Number: 60; and (c) Estimated average man-hours per respondent: 40.

9. Information to be collected.—The information required on Standard Form 424, plus the number of new fellowships, continuing fellowships, and dissertation year fellowships requested. A narrative statement is also required, covering:

(a) Nature and objective of the fellowship program.

(b) Program description.

(c) Need for fellowship.

(d) Selection of fellows, including procedures for determining financial need.

(e) Qualifications of faculty.

Grantees who had an award for fiscal year 1978 need only respond in the narrative in terms of changes.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Standard application for consumers' education and metric education.

2. Agency/Bureau/Office.—Office of Education, Bureau of Occupational and Adult Education.

3. Agency form No.—OE Form 425.

4. Legislative authority for this activity.—"Section 403(c)(1) Financial assistance under this section (Metric Education) may be made available only upon application to the Commissioner." (Pub. L. 93-380; 20 U.S.C. 1862).

"Section 811(b)(1)(C) Financial assistance under this subsection (Consumers' Education) may be made available only upon application • • • . (Pub. L. 92-318, sec. 505(a); 20 U.S.C. 887d).

5. Voluntary/obligatory nature of response.—Required to obtain benefits.

6. How information collected will be used.—The information collected will be used to decide which applicants will receive awards.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) Time of collection: Fall; and (c) Frequency: Annually.

8. Respondents.—(a) Type: Colleges and universities; (b) Number: 370; and (c) Estimated average man-hours per respondent: 20.

(a) Type: Local educational agencies; (b) Number: 360; and (c) Estimated average man-hours per respondent: 20.

(a) Type: State education agencies; (b) Number: 40; and (c) Estimated average man-hours per respondent: 20.

(a) Type: Nonprofit organizations; (b) Number: 370; and (c) Estimated average man-hours per respondent: 20.

(a) Type: Other public organizations and agencies; (b) Number: 75; and (c) Estimated average man-hours per respondent: 20.

9. Information to be collected.—All applicants will use the standard non-construction application from OMB Circular No. A-102. Departmental definitions are provided for the object class categories in the budget. Information not required by the programs on the standard application is deleted.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Application for Federal Assistance: Instruction for Part A, Title IV, Pub. L. 92-318.

2. Agency/Bureau/Office.—U.S. Office of Education, Office of Indian Education.

3. Agency Form No.—OE 444.

4. Legislative authority for this activity.—"Sec. 305.(a) A grant under this title, except as provided in section 303(b), may be made only to a local educational agency, or agencies, and only upon application to the Commissioner at such time or times, in such manner, and containing or accompanied by such information as the Commissioner deems necessary" (20 U.S.C. 241dd; Pub. L. 92-318).

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information to be collected will be used.—Information will be used to determine eligibility and amount of grant award.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) Time of collection: Winter; and (c) Frequency: Annually.

8. Respondents.—(a) Type: Local education agencies; (b) Number: 1,5000; and (c) Estimated average man-hours per respondent: 10.

9. Information to be collected.—All respondents will be required to provide information requested on the standard non-construction application for Federal assistance, including the standard face page, SF-424. Part IV, Progaram Narrative, incorporates requests for information based on statutory or regulatory needs as follows:

(1) Objectives and need for this assistance. Demonstrate the need for assistance in meeting the special educational needs of Indian children and state the principal and subordinate objectives of the project. Supporting documentation or other testimonies from concerned interests are required by law and or regulations: a copy of the notice of the Public Hearing, description of the Needs Assessment.

(2) Results or benefits expected.

(3) Approach.

(a) A plan of action pertaining to the scope and detail of how the proposed work will be accomplished for each function or activity, provided in the budget. Describe the selection of the Parent Committee and its involvement in terms of ongoing operation. Describe how the program will obtain and utilize the best available talents and resources including persons from the Indian community.

(b) Provide quantitative monthly or quarterly projections of the accomplishments to be achieved.

(c) Identify the kinds of data to be collected and the criteria to be used to evaluate the results and successes of the project.

(d) List organizations, cooperators, consultants, or other key individuals who will work on the project along with a short description of the nature of their effort or contribution.

(4) Geographical location. Give a precise location of the project or area to be served by the proposed project.

(5) If applicable, provide the following information:

(a) A biographical sketch of the program director which includes; name, address, phone number, background, and other qualifying experience for the project. Also, list the name, training and background for other key personnel.

(b) Discuss accomplishments to date and list in chronological order a schedule of accomplishments, progress or milestones anticipated with the new funding request.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Application for Federal Assistance for Arts Education Projects.

2. Agency/bureau/office.—Office of the Commissioner, Arts and Humanities Staff.

3. Agency form number.—OE 449.

4. Legislative authority for this activity.—"Sec. 409(a) The Commissioner shall, during the period beginning after June 30, 1972 and ending June 30, 1978, through arrangements made with the John F. Kennedy Center for the Performing Arts, carry out a program of grants and contracts to encourage and assist State and local education agencies to establish and conduct programs in which the arts are an integral part of elementary and secondary school programs." (20 U.S.C. 1867) Pub. L. 93-380.

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information to be collected will be used.—Information will be used to determine which applicant will receive award.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time: January; and (c) frequency: Annually.

8. Respondents.—(a) Type: State Education Agencies and Local Education Agencies; (b) number: 250; and (c)

MAY 5 1978 UMI

V 43 | 88 MY 5 78 UMI

estimated average man-hours per respondent: 15.

9. Information to be collected.—The standard application (non-construction) from OMB No. A-102 will be used with modifications required by law and regulations.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Application for Grants Under Library Training Program.

2. Agency/bureau/office.—U.S. Office of Education, Bureau of Elementary and Secondary Education, Office of Libraries and Learning Resources.

3. Agency form number.—OE-547.

4. Legislative authority for this activity.—"Section 222. (a) The Commissioner is authorized to make grants to institutions of higher education and library organizations or agencies to assist them in training persons in librarianship. Such grants may be used by such institutions, library organizations or agencies (1) to assist in covering the cost of courses of training or study (including short term or regular session institutes) for such persons, (2) for establishing and maintaining fellowships or traineeships with stipends for fellows and others undergoing training and their dependents, not in excess of such maximum amounts as may be prescribed by the Commissioner, and (3) for establishing, developing, or expanding programs or library and information science."

"(b) The Commissioner may make a grant to an institution of higher education and library organizations or agencies only upon application by the institutions and only upon his finding that such program will substantially further the objective of increasing the opportunities throughout the Nation for training in librarianship." (20 U.S.C. 1033) (Pub. L. 89-329, as amended.)

5. Voluntary/obligatory nature of response.—Required to obtain or maintain benefits.

6. How information to be collected will be used.—Information will be used to determine applicant's eligibility and that the proposed training activity meets the objectives of increasing the opportunities throughout the Nation for training in librarianship.

7. Data acquisition plan.—(a) Method of Collection: Mail; (b) time of Collection: Fall; and (c) frequency: Annually.

8. Respondents.—(a) Type: Institutions of higher education and nonprofit organizations; (b) number: 200; and (c) estimated average man-hours per respondent: 40.

9. Information to be collected.—The application consists of the standard face page for Federal applications, SF-424 and the standard Federal application (nonconstruction). Although the standard format is followed, Part IV, the Program Narrative is modified to request the following specific information which is required by law and regulation: (1) objectives of the project and need for the assistance, (2) results or benefits expected, (3) a plan of action as to how the proposed activity will be accomplished, (4) the geographic area to be served by the project and (5) a listing of the key personnel engaged in the project.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Graduate and Professional Study Fellowships and Institutional Grants—Application.

2. Agency/bureau/office.—Office of Education/Bureau of Higher and Continuing Education.

3. Agency form number.—OE 591.

4. Legislative authority for this activity.—For institutional grants: "There are authorized to be appropriated $50,000,000 for each of the fiscal years ending prior to October 1, 1979, for the purpose of this part." (Pub. L. 92-318, as amended by Pub. L. 94-482, 20 U.S.C. 1134)

For fellowships: "During the fiscal year ending June 30, 1973, and each of the succeeding fiscal years ending prior to October 1, 1979, the Commissioner is authorized to award not to exceed seven thousand five hundred fellowships to be used for study in graduate programs at institutions of higher education." (Pub. L. 92-318, as amended by Pub. L. 94-482, 20 U.S.C. 1134e)

5. Volunatry/obligatory nature of response.—Required to obtain or maintain benefits.

6. How information collected will be used.—This information will be used in the evaluation of applications by institutions of higher education for institutional grants and allocations of fellowships.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time of collection: Fall; and (c) frequency: Annually.

8. Respondents.—(a) Type: Colleges and Universities; (b) number: 350; and (c) estimated average man-hours per respondent: 40.

9. Information to be collected.—The information required on Standard Form 424, plus the amount of institutional grant requested by category of eligible activities and also the number of fellowships requested. A narrative statement is also required, covering: (a) Nature and objectives of the program, (b) curriculum description, (c) internship description, (d) library, laboratory, and other facilities and description, (e) qualifications of the faculty and staff, and (f) institutional commitment to program.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Teacher Centers Program Financial Status Report and Performance Report.

2. Agency/bureau/office.—U.S. Office of Education, Bureau of Occupational and Adult Education, Division of Educational Systems Development.

3. Agency form number.—OE Form 632.

4. Legislative authority for this activity.—"Section 422(a) The Commissioner shall—(3) collect data and information on applicable programs . . ." (Pub. L. 91-230. Title IV; 20 U.S.C. 1231a).

5. Voluntary/obligatory nature of response.—Required to maintain benefit.

6. How information to be collected will be used.—The information is to be used to: (a) judge the performance of noncompeting continuation projects to aid in and document funding decisions. (b) determine program effects for budget requests and recommended legislation, (c) identify promising practices and processes for further dissemination, especially from one State to another, and (d) monitor changes and accomplishments in projects.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) Time of collection: For final report, 90 days after the completion of the project; for interim reports, 30 days after the end of each six-month reporting period; and (c) Frequency: Semi-annual.

8. Respondents.—(a) Type: Local Educational Agency; (b) Number: 54; and (c) estimated average man-hours per respondent: 8.

(a) Type: Colleges and Universities; (b) Number: 6; and (c) Estimated average man-hours per respondent: 8.

9. Information to be collected.—Financial status report will collect only information prescribed by OMB circulars A-102 and A-110. Data items not needed by the program will be deleted. The performance report will collect information on the accomplishment of activities, objectives, and revisions to the approved application, as well as changes in staff and policy board membership. Activities related to the specific purposes of the statute will be treated separately, and the extent of participation in each reported by participant type.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Application for Special Programs for Students from Disadvantaged Backgrounds, Higher Education Act, as amended.

2. Agency/bureau/office.—U.S. Office of Education/Bureau of Higher and Continuing Education/Division of Student Services and Veterans Programs.

3. Agency form number.—OE Form 1251.

4. Legislative authority for this activity.—"Section 417A. (a) The Commissioner shall, in accordance with the provisions of this subpart, carry out a program designed to identify qualified students from low-income families, to prepare them for a program of post-secondary education, and to provide special services for such students who are pursuing programs of postsecondary education." (20 U.S.C. 1070d)

"Section 417B.(a) The Commissioner is authorized to make grants . . ." (20 U.S.C. 1070d-1) Pub. L. 92-318.

5. Voluntary/obligatory nature of response.—Required to obtain or maintain benefits.

6. How information to be collected will be used.—The form requests programmatic and budgetary information from eligible applicants so that Office of Education program officers and non-Federal reviewers will have adequate, relevant information with which to make funding decisions. The information collected will be used to determine compliance with the published funding criteria.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time of collection: Winter-Spring; and (c) frequency: Annually.

8. Respondents.—(a) Type: Institutions of higher education; (b) number: 877; and (c) estimated average man-hours per respondent: 5.

(a) Type: Other (public and private agencies, organizations, and secondary schools); (b) number: 123; and (c) estimated average man-hours per respondent: 5.

9. Information to be collected.—The following is collected from all respondents: Standard Form 424; number of students/clients proposed to be served; narrative—information called for in the program regulations: need for the proposed project, its design, and the resources and organization available and planned to carry out the project; budget summary—Personnel, Travel, Equipment, Room and Board, Stipends, Services, Indirect Costs.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Standard Application (Short Form) for Comprehensive Planning Grants and State Administration Funds for Administering State Plans under the Higher Education Act, as amended.

2. Agency/bureau/office.—Office of Education, Bureau of Higher and Continuing Education, State Planning Commissions Program.

3. Agency form number.—OE Form 1279.

4. Legislative authority for this activity.—"Section 1202(c)(2)(A). The Commissioner shall pay the State Commission the amount necessary for the proper and efficient administration of the Commission • • • ." (20 U.S.C. 1142a). "Section 1203(a). The Commissioner is authorized to make grants to any State Commission • • • to expand the scope • • • studies and planning • • • ." (20 U.S.C. 1142b) Pub. L. 92-318.

5. Voluntary/obligatory nature of response.—Required to obtain benefits.

6. How information collected will be used.—This information will be used in the processing of applications from both State Postsecondary Education Commissions for comprehensive planning grants under section 1203(a) of the Higher Education Act, and from State Commissions serving as the Higher Education Facilities Commissions for funds to administer the State plans under Titles VI-A and VII-A of the Higher Education Act.

7. Data acquisition plan.—(a) Method of collection: Mail, (b) Time be collection: Winter or spring, and (c) Frequency: Annually.

8. Respondents.—(a) TYPE: State Commissions, (b) Number: 57, and (c) Estimated average man-hours per respondent: 13.

9. Information to be collected.—The standard application (short form) will be used as the face page for both applications as required. Departmental definitions for the object class categories are used. A program narrative statement for comprehensive planning requests the following information: (a) The need for the proposed activities; (b) a description of the proposed activities; (c) the methodology to be used in carrying out the activities; and (d) the anticipated benefits and results of the activities. For State administration, description of any studies or inventories necessary to administer the State plans is requested.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Standard Application (Non-construction) for Special Community Services and Continuing Education.

2. Agency/bureau/office.—Office of Education/Bureau of Higher and Continuing Education/Division of Training and Facilities.

3. Agency form number.—OE 1280.

4. Legislative authority for this activity.—"Sec. 106.(b)(1) • • •, the Commissioner is authorized to make grants to, you contract with, institutions of higher education (and combinations thereof) • • •."(20 U.S.C. 1005a.)

5. Voluntary/obligatory nature of response.—Required to obtain benefits.

6. How information to be collected will be used.—Information will be used to determined which applicant will receive an award.

7. Data acquistion plan.—(a) Method of collection: Mail, (b) Time: Winter or spring, and (c) Frequency: Annually.

8. Respondents.—(a) Type: Institutions of Higher Education, (b) Number: 200, and (c) Estimated Average man-hours per respondent: 40.

9. Information to be collected.—The standard application from OMB Circular No. A-102 with modifications as required by law and regulations.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Application for College Work-Study Grant for Students of American Samoa or the Trust Territory of the Pacific Islands.

2. Agency/bureau/office.—Office of Education, Bureau of Student Financial Assistance, Division of Program Operations.

3. Agency form number.—OE 1285.

4. Legislative authority for this activity.—"Section 442(f) • • • for each fiscal year the Commissioner shall reserve an amount to provide work-study assistance to students who reside in, but who attend eligible institutions outside of, American Samoa or the Trust Territory of the Pacific Islands. The amount so reserved shall be allotted to eligible institutions • • •." (42 U.S.C. 2752) Pub. L. 92-318.

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information collected will be used.—The information collected will be used to allot funds to institutions to provide work-study assistance to students described in (4) above.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time of collection: Winter; and (c) Frequency: Annually.

8. Respondents.—(a) Type. Institutions of Higher Education; (b) Number: 80; and (c) Estimated average man-hours per respondent: 2.

9. Information to be collected.—The standard face page for applications in OMB Circular No. A-110 will be used. Number of students described in (4) above to be employed, the estimated average earnings per student, estimated total earnings, the Federal share and administrative expenses are data items to be collected. Student names and places of residence are also requested in a listing.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Application for State Student Incentive Grant Program.

2. Agency/bureau/office.—Office of Education/Bureau of Student Financial Assistance/State Student Incentive Grant Program.

V 4 3 | 8 8 MAY 5 78 UMI

3. Agency form number.—OE Form 1288.

4. Legislative authority for this activity.—"Section 415C(a). A State which desires to obtain a payment under this subpart for any fiscal year shall submit an application * * *." (20 U.S.C. 1070c-2) Pub. L. 92-318.

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information collected will be used.—By formula, to determine the amount of money a State will receive "to assist them in providing grants to eligible students in attendance at institutions of higher education."

7. Data acquisition plan.—(a) Method of collection: Mail; (b) time of collection: Spring; and (c) frequency: Annually.

8. Respondents.—(a) Type: State agencies; (b) number: 56; and (c) estimated average man-hours per respondent: 8.

9. Information to be collected.—Information to be collected concerns those data necessary to make the formula payment; i.e., the State request for Federal funds for initial and continuation awards, State matching funds available, State maintenance of effort, State criteria for determining financial need of students, numbers of students receiving assistance, and institutional eligibility.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Application for grants Under College Library Resources Program.

2. Agency/bureau/office.—U.S. Office of Education/Bureau of Elementary and Secondary Education/ Office of Libraries and Learning Resources.

3. Agency form number.—OE-3118.

4. Legislative authority for this activity.—"Section 201.(a). The Commissioner shall carry out a program of financial assistance—(1) to assist and encourage institutions of higher education in the acquistion of library resources * * *.

"Section 202 * * * A basic grant under this subsection may be made only if the application therefor is approved by the Commissioner upon his determination that the application (whether by an individual institution or a combination of institutions)—

(1) Provides satisfactory assurance that the applicant will expend during the fiscal year for which the basic grant is sought from funds other than funds received under this part—

(A) For all library purposes (exclusive of construction), an amount not less than the average annual amount it expended for such purposes during the two fiscal years preceding the fiscal year for which assistance is sought under this part, and

(B) For library resources, an amount not less than the average amount it expended for such resources during the two fiscal years preceding the fiscal year for which assistance is sought under this part, except that, if the commissioner determines, in accordance with regulations, that there are special and unusual circumstances which prevent the applicant from making the assurances required by this clause (1), he may waive that requirement for one or both assurances. (20 U.S.C. 1022-28) (Pub. L. 89-329, as amended.)

5. Voluntary/obligatory nature of response.—Required to obtain or maintain benefits.

6. How information to be collected will be used.—Information will be used to determine applicant's eligibility and for assurances that the applicant will expend during the fiscal year for which the grant is sought, an amount equal to the amount of the grant award and will equal or maintain its two year average for expenditures for all library purposes and library resources (maintenance of effort) and to provide a format for request for a waiver from maintenance of effort where the Commissioner may so approve.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) Time of collection: Winter; and (c) Frequency: Annually.

8. Respondents.—(a) Type: Institutions of higher education and public or private non profit library institutions whose primary purpose is to provide library and information services to institutions of higher education. (b) Number: 2,700; and (c) Estimated average man-hours per respondent: 1.

9. Information to be collected.—The application consists of two parts. Part 1 is the standard face page for Federal applications, SF-424. Part II is OE Form 3118 on which the applicant provides a maintenance of effort analysis cited above.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity.—Standard Application (Nonconstruction) Program for the Gifted and Talented Program.

2. Agency/bureau/office.—Office of Education, Bureau of Education for the Handicapped, Office of Gifted and Talented.

3. Agency form number.—OE Form 9048.

4. Legislative authority for this activity.—"Section 404(c)(2)(A). Any State educational agency or local educational agency desiring to receive a grant under this subsection shall submit an application to the Commissioner * * *." (20 U.S.C. 1863.)

"Section 404(a) The Commissioner is authorized to make grants to institutions of higher education and other appropriate non-profit organization * * *" (20 U.S.C. 1863.)

5. Voluntary/obligatory nature of response.—Required to obtain benefit.

6. How information will be used.—The information will be used to determine which applicants will receive awards.

7. Data acquisition plan.—(a) Method of collection: Mail; (b) Time of collection: Winter; and (c) Frequency: Annually.

8. Respondents.—(a) Type: State Education Agencies, Local Education Agencies, Institutions of Higher Education, and Nonprofit Organization; (b) Number: 500; and (c) Estimated average man-hours per respondent: 40.

9. Information to be collected.—The standard application (nonconstruction) from OMB Circular No. A-102 will be used with modification required by law and regulations. Information not required by the program will be deleted.

Food and Drug Administration

[FDA-225-78-4002]

INSPECTION OF DRUG MANUFACTURERS, REPACKAGERS, AND DISTRIBUTORS

Memorandum of Understanding with the Virginia Board of Pharmacy

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has executed a memorandum of understanding with the Virginia Board of Pharmacy. The purpose of the understanding is to set forth cooperative working arrangements between the two agencies to provide more effective consumer protection through more efficient inspectional coverage of Virginia drug manufacturers, repackagers, and distributors.

DATES: The agreement became effective March 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Gary Dykstra, Compliance Coordination and Policy Staff (HFC-13), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3470.

SUPPLEMENTARY INFORMATION: Pursuant to the notice published in the FEDERAL REGISTER of October 3, 1974 (39 FR 35697) stating that future memoranda of understanding and agreements between FDA and others would be published in the FEDERAL REGISTER, the Commissioner of Food and Drugs is issuing the following memorandum of understanding:

MEMORANDUM OF UNDERSTANDING BETWEEN VIRGINIA BOARD OF PHARMACY AND BALTIMORE DISTRICT U.S. FOOD AND DRUG ADMINISTRATION

I. PURPOSE

It is the purpose of this understanding to provide more effective consumer protection through more efficient inspectional coverage of Virginia drug manufacturers, repackagers and distributors. The Virginia Board of Pharmacy and the Food and Drug Administration, Baltimore District will coordinate their programs to maximize effectiveness of their compliance efforts. This understanding will provide a format for formal discussion and planning in the development of a cooperative inspectional program satisfactory to both agencies.

II. WORK-SHARING PROGRAM

A. Goals and Responsibilities: The Virginia Board of Pharmacy and the FDA Baltimore District Investigations Branch will attempt to develop a formal program for sharing the responsibility of the inspection of all Virginia drug, device, and cosmetic establishments of mutual obligation. Close coordination and communication will be developed; there will be joint planning to assure that manpower is more efficiently utilized and regulatory efforts are properly meshed to achieve a high level of industry compliance.

B. Inspectional Obligation: 1. Inspection Inventory: An inventory of firms covered by this understanding, hereafter referred to as the cooperative establishment inventory (CEI), will be developed by both agencies and maintained by FDA's data processing unit (DPU).

2. Registration Information: The Virginia Board of Pharmacy will supply Baltimore District FDA with drug and device registration information. FDA will supply the State with a listing of registered drug firms in Virginia.

3. Joint Inspections: During the term of this understanding, joint inspections will be conducted to give each agency the opportunity to observe its partner's inspectional procedures. The inspections will be planned during the first planning session and discussed during the second and last, as stated in section IV-A.

III. GENERAL PROVISIONS

A. Drug Sampling: 1. Collection: The Virginia Board of Pharmacy will assist the Baltimore District FDA in the collection of drug samples if requested and within the limits of its available manpower.

2. Assay: The Baltimore District drug laboratory will assay drug samples if requested by the Virginia Board of Pharmacy, within the limits of available resources.

B. Recall and Emergency: The agencies will cooperate to the fullest extent possible in handling emergency public health problems of drug and device origin and in checking the effectiveness of drug product recalls.

C. Complaint Investigations: When indicated, each agency will assist its partner to the extent possible in the investigation of complaints.

D. Cross-Commissioning: Consideration will be given by both agencies to the possibility of commissioning each other's inspectors to operate under the authority of State and Federal Acts. The need for such commissioning will be determined during the term of this understanding.

E. Training: Based on the results of the joint inspections, FDA and the State will identify training needs and, if needed, develop several possible training activities designed to meet the needs of implementing this understanding.

F. Personnel Exchange: An exchange of personnel will be accomplished during the term of this understanding to permit closer program coordination, better understanding of mutual responsibilities, and an insight into operational procedures and regulatory philosophies. An FDA official will be assigned for a two-week period to the Board of Pharmacy and a State official will be assigned to the Baltimore District FDA for a two-week period. The details will be conducted under the provisions of the Federal Intergovernmental Personnel Act at Federal expense.

IV. PROGRAM REVIEW

A. Planning Sessions: Three joint planning sessions will be held during the term of this understanding to discuss the cooperative program, establish effective communication, determine regulatory philosophy, and plan future objectives. The first session will be held within 4 months of the signing of this memorandum; the second will be held 4 months thereafter, and the third during the 11th month of this understanding. Each session will be arranged for and moderated by FDA's Region III Assistant Food and Drug Director for Intergovernmental Affairs.

B. Performance Evaluation: During the term of this understanding, a procedure for evaluation of the quality of program performance will be developed. The evaluation procedure will be established during the current term and set into operation during the second year of the program.

V. TERM OF UNDERSTANDING

This understanding will expire on March 31, 1979, unless renewed and signed by both cooperating agencies to continue it in effect for another year.

This understanding in its entirety, or in part, may be revised by mutual consent or terminated upon 30 days' written notice by either agency.

Approved and accepted for the Virginia Board of Pharmacy:

Dated: March 10, 1978.

J. B. CARSON,
Secretary,
Virginia Board of Pharmacy.

Approved and accepted for the Food and Drug Administration:

Dated: February 16, 1978.

M. L. STRAIT,
Director, Baltimore District Food and Drug Administration.

Effective date. This memorandum of understanding became effective March 10, 1978.

Dated: April 28, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[Docket No. 78D-0099]

SOURCE PLASMA (HUMAN)

Availability of Guideline

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document announces the availability of a revised guideline for red blood cell immunization of Source Plasma (Human) donors. The agency has revised the guideline in response to manufacturers' comments that the guideline as initially issued was difficult to follow.

DATE: Written comments by June 5, 1978.

ADDRESSES: Written comments and requests for copies of the guideline should be forwarded to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Joe K. Holloway, Bureau of Biologics (HFB-620), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, Md. 20014, 301-443-1306.

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs issued a notice published in the FEDERAL REGISTER of May 17, 1977 (42 FR 25381) advising manufacturers of the availability of a guideline for immunizing Source Plasma (Human) donors with Red Blood Cells (Human). He hereby gives notice that the guideline referred to in the May 1977 notice has been revised and updated and is now on display at the office of the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857,

The Food and Drug Administration (FDA) committee on red blood cell immunization found, through discussions and correspondence with the blood manufacturing industry, that the Bureau's current guideline, displayed May 1977 at the Hearing Clerk's Office, required revision and updating. Problems with the current guideline are that manufacturers found it difficult to (1) successfully immunize the donors at the recommended dosage and administering intervals, especially for de novo (initial) immunizaiton, and (2) adequately match the donor's blood with the recipient's blood using the recommended criteria. The revised guideline will alleviate these problems.

Interested persons may obtain copies of the guideline by contacting the office of the Hearing Clerk and identifying the guideline with the Hearing Clerk docket number found in brackets in the heading of this document.

V 43 1 88 MAY 5 78 UMI

Dated: May 1, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

Health Services Administration

PROJECT GRANTS FOR HOME HEALTH SERVICES

Announcement of Availability of Grants

Notice is hereby given that competitive applications are now being accepted from Home Health Services project grants under the authority of Section 602(a) of Pub. L. 94-63 (42 U.S.C. 1395x note). The Secretary will make grants to public and private nonprofit entities to support projects for the development and expansion of home health services.

Regulations applicable to these grants, published in the FEDERAL REGISTER on June 3, 1977 (42 FR 28692), state that the Secretary will give preference to applications for projects that will serve catchment areas in which a high percentage of the population is elderly, medically indigent, or both (42 CFR 51e.107).

On October 14, 1977, a notice was published in the FEDERAL REGISTER (42 FR 55371) announcing the first funding cycle for 1978. That notice established a deadline of January 2, 1978, for the receipt of completed applications and limited consideration of applications to applicants who proposed to serve preference areas.

The purpose of this notice is to announce the second funding cycle for 1978 for which approximately $2,500,000 is available. It is expected that these resources will be sufficient to support the award of some grants to applicants who proposed to serve non-preference areas.

Information may be obtained from and completed applications returned to the representative of the Home Health Services Grant Program at the appropriate Regional Office (listed below). The representative may be contacted for consultation and technical assistance relative to development of an application.

Completed applications must be received at the Regional Office by June 1, 1978, to be considered for funding.

Dated: April 26, 1978.

JOHN H. KELSO,
Deputy Administrator, Health Services Administration.

Ms. Rita Pope, DHEW/PHS/Region I, Division of Health Services Delivery, Primary Health Care, Room 1409, John F. Kennedy Federal Building, Boston, Mass. 02203, 617-223-5845.

Health Resources Administration

SCHOOLS OF PUBLIC HEALTH AND GRADUATE PROGRAMS IN HEALTH ADMINISTRATION

Application Announcement for Grants for Special Projects

The Bureau of Health Manpower, Health Resources Administration, announces that applications for fiscal year 1978 grants for Special Projects for Schools of Public Health and Graduate Programs in Health Administration are now being accepted under the authority of section 792 of the Health Professions Educational Assistance Act of 1976 (Pub. L. 94-484).

Section 792 authorizes grants to assist accredited schools of public health and other educational entities with accredited graduate programs in health administration, health planning, or health policy analysis and planning to develop new graduate programs or expand existing ones in biostatistics or epidemiology; health administration, health planning or health policy analysis and planning; environmental or occupational health; or dietetics and nutrition.

In the award of grants for projects in the area of health administration, health planning or health policy analysis and planning, funding preference will be given to:

(a) Programs preparing the graduate for employment in a wide variety of settings;

(b) Program expanding content in health planning, policy and regulation, health economics, and quantitative methods or financial management;

(c) Programs providing for field training in (a) and (b) above;

(d) Programs providing short courses for employed health services administrators and planners in special areas involving health policy, planning and regulation, health economics, quantitative methods, and financial management; or

(e) Programs to meet manpower needs in health services administration and planning by providing educational opportunities for students residing in States where there is no accredited program in health services administration and planning or where there is a documented shortage of health administrators and planners.

Requests for application materials and questions regarding grants policy should be directed to:

Grants Management Officer, Bureau of Health Manpower, Health Resources Administration, Center Building, Room 4-22, 3700 East-West Highway, Hyattsville, Md. 20782, phone 301-436-6564.

To be considered for fiscal year 1978 funding, applications must be received by the Grants Management Officer, Bureau of Health Manpower, Health Resources Administration, at the above address no later than June 1, 1978.

Should additional programmatic information be required, please contact:

Education Development Branch, Division of Associated Health Professions, Bureau of Health Manpower, Health Resources Administration, Center Building, Room 5-27, 3700 East-West Highway, Hyattsville, Md. 20782, phone 301-436-6800 or 436-6805.

Dated: April 24, 1978.

HENRY A. FOLEY,
Administrator, HRA.

National Institutes of Health

REPORT ON BIOASSAY OF TRIS (2,3-DIBROMOPROPYL) PHOSPHATE FOR POSSIBLE CARCINOGENICITY

Availability

Tris (2,3-dibromopropyl) phosphate (CAS 126-72-7) has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay of technical-grade tris (2,3-dibromopropyl) phosphate (TBP) for possible carcinogenicity was conducted using Fischer 344 rats and B6C3F1 mice. TBP ws administered in the feed, at either of two concentrations, to groups of 55 male and 55 female rats, and 50 male and 50 female mice. The high and low dietary concentrations of TBP administered were, respectively, 100 and 50 ppm for the male and female rats, and 1000 and 500 ppm for the male and female mice. After a 103-week dosing period, observation of the rats and mice continued for 1 or 2 additional weeks. For each species, 55 animals of each sex were placed on test as controls. No TBP was added to their diet.

In both species, adequate numbers of animals in all groups survived sufficiently long to be at risk from late-developing tumors.

It is concluded that under the conditions of this study orally administered TBP was carcinogenic to B6C3F1 mice, causing increased incidences of tumors in livers, lungs, and stomachs of female mice and in kidneys, lungs, and stomachs of male mice. TBP also carcinogenic in Fischer 344 rats, causing an increased incidence of kidney tumors in both sexes.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, room 10A21, National Institutes of Health, Bethesda, Md. 20014.

(Catalogue of Federal Domestic Assistance Program Number 13.393, Cancer Cause and Prevention Research)

Dated: April 27, 1978.

DONALD S. FREDRICKSON,
Director, National Institutes of Health.

CLINICAL CANCER EDUCATION COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Clinical Cancer Education Committee, National Cancer Institute, Jume 1 and 2, 1978, Building 31C, Conference Room 10, National Institutes of Health. The meeting will be open to the public on June 1, 1978, from 8:30 a.m. to 9:30 a.m. to review administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(6), Title 5, U.S. code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on June 1, 1978, from 9:30 a.m. to 5 p.m., and on June 2, 1978, from 8:30 a.m. until adjournment, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal personal information concerning individuals associated with the applications.

Mrs. Marjorie F. Early, Committee Management Officer, National Cancer Institute, Building 31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014, 301-496-5708, will provide summaries of the meeting and roster of committee members, upon request.

Dr. Margaret H. Edwards, Executive Secretary, National Cancer Institute, Westwood Building, Room 10A18, National Institutes of Health, Bethesda, Md. 20014, 301-496-7761, will furnish substantive program information.

REVIEW OF CONTRACT PROPOSALS AND GRANT APPLICATIONS

Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be open to the public to discuss administrative details or other issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5, United States Code an section 10(d) of Pub. L. 92-463, for the review, discussion and evaluation of individual contract proposals and grant applications, as indicated. These proposals and applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposals and applications.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014, 301-496-5708, will furnish summaries of the meetings and rosters of committee members, upon request. Other information pertaining to the meeting can be obtained from the Executive Secretary indicated. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. 20014, unless otherwise stated.

Name of Committee: Biometry and Epidemiology Contract Review Committee.
Dates: June 1-2, 1978; 7 p.m.
Place: Landow Building, Room A809, 7910 Woodmont Avenue, Bethesda, Md. 20014.
Times: Open: June 1, 7 p.m. to 10:30 p.m.
Closed: June 2, 8:30 a.m. to 5 p.m.
Closure Reason: To review research contract proposals.
Executive Secretary: Mr. Harvey Geller.

BOARD OF SCIENTIFIC COUNSELORS, NATIONAL EYE INSTITUTE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Eye Institute, June 8 and 9, 1978, Building 31, Room 6A-35, National Institutes of Health, Bethesda, Md.

This meeting will be open to the public on June 8 from 8:30 a.m. until 2:30 p.m. for general remarks by the Institute Director on matters concerning the intramural programs of the National Eye Institute. Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(6), Title 5, United States Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on June 8 from 2:30 p.m. until adjournment and the entire day on June 9 for review, discussion, and evaluation of individual projects conducted by the Laboratory of Vision Research, NEI. This evaluation and discussion could reveal personal information concerning individuals associated with the projects. Consequently, this meeting is concerned with matters exempt from mandatory disclosure.

Mr. Julian Morris, Chief, Office of Program Planning and Scientific Reporting, National Eye Institute, Building 31, Room 6A-25, telephone 301-496-5248, will furnish summaries of the meeting and rosters of committee members.

Substantive program information may also be obtained from Dr. Carl Kupfer, Director, National Eye Institute, Building 31, Room 6A-03, telephone 301-496-2234, National Institutes of Health, Bethesda, Md. 20014.

Dated: April 26, 1978.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

BOARD OF SCIENTIFIC COUNSELORS, NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Allergy and Infectious Diseases, June 13, 1978, in Building 31C, conference room 9, on June 14, 1978, in Building 5, room 216, and on June 15, 1978, in Building 31, room 7A24, National Institutes of Health, Bethesda, Md.

This meeting will be open to the public on June 13 from 9 a.m. until recess. During this open session, the permanent staff of the Laboratory of Infectious Diseases and the Laboratory of Biology of Viruses will present and discuss their immediate, past, and present research activities.

In accordance with the provisions set forth in sections 552b(c)(6), Title 5, U.S. Code, and section 10(d) of Pub. L. 92-463, the meeting of the Board will be closed to the public on June 14 from 9 a.m. until recess, and on June 15 from 9 a.m. to adjournment for the review, discussion, and evaluation of individual intramural programs and projects conducted by the National Institute of Allergy and Infectious Diseases, including consideration of personal qualifications and performance, and the competence of individual investigators.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, room 7A32, National Institutes of Health, Bethesda, Md., telephone 301-496-5717, will provide summaries of the meetings and rosters of the Board members.

Dr. Kenneth W. Sell, Executive Secretary, Board of Scientific Counselors, NIAID, NIH, building 5, room 137, telephone 301-496-2144, will provide substantive program information.

Office of Education

NATIONAL ADVISORY COUNCIL ON ADULT EDUCATION

Meeting

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Ad Hoc Committee on the 1978 Annual Report of the National Advisory Council on Adult Education. This notice also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92-463, Sec. 10(a)(2)).

DATES: May 25, 1978, 11 a.m. to 5 p.m. and May 26, 1978, 9 a.m. to 3 p.m.

ADDRESS: Pennsylvania Building, 425 13th Street NW., Suite 323, Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Dr. Gary A. Eyre, Executive Director, National Advisory Council on Adult Education, 425 13th Street NW., Washington, D.C. 20004, 202-376-8892.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 311 of the Adult Education Act (80 Stat. 1216.20 U.S.C. 1201). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal law relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Committee shall be open to the public.

The proposed agenda reflects the various topics to be discussed on the annual report which includes:

The Foreword
Council Activities/Concerns for the Year
Council Meeting
Council Membership
Council Structure/Committees
Committee Projects
Projected Council Activities

Records shall be kept of all Council proceedings, and shall be available for public inspection at the Office of the National Advisory Council on Adult Education, Room 323, Pennsylvania Building, 425 13th Street NW., Washington, D.C. 20004.

Signed at Washington, D.C., on May 1, 1978.

GARY A. EYRE,
Executive Director, National Advisory Council on Adult Education.

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

Amendment

This notice is to amend a portion of the notice of the meeting of the National Advisory Council on the Education of Disadvantaged Children which appeared in the FEDERAL REGISTER on Monday, April 24, 1978. The site visits scheduled for May 12, 1978, in the Washington, D.C., area schools, from 8:30 a.m. to 4:30 p.m, will now be held from 8:30 a.m to 2:30 p.m., followed by informal discussions on urban education to be held at the Presidential Building, Superintendent's Conference Room, 12th floor, 415 12th Street NW., from 2:30 to 4:30 p.m. The scheduled Seminar on Migrant Education has been canceled.

The National Advisory Council on the Education of Disadvantaged Children is established under section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

Signed at Washington, D.C., on May 3, 1978.

ROBERTA LOVENHEIM,
Executive Director.

[FR Doc. 78-12418 Filed 5-4-78; 8:45 am]

Office of the Secretary

PRESIDENT'S COMMITTEE ON MENTAL RETARDATION

Meeting

The President's Committee on Mental Retardation was established by Executive Order to provide advice and assistance in the area of mental retardation to the President including evaluation of the adequacy of the national effort to combat mental retardation; coordination of activities of Federal agencies; provision of adequate liaison between foundations and other private organizations; and development of information designed for dissemination to the general public.

The Committee will meet on June 1-3, 1978, 9 a.m. to 5 p.m., at the Chateau Motor Hotel, 201 Lake Street, Shreveport, La. At the meeting, the Committee will discuss full citizenship rights, humane service systems, trends in residential facilities, public awareness, and prevention of mental retardation.

These meetings are open to the public.

Further information on the President's Committee on Mental Retardation may be obtained from Mr. Fred J. Krause, Executive Director, President's Committee on Mental Retardation, Room 2614, ROB No. 3, 7th & D Streets SW., Washington, D.C. 20201, telephone 202-245-7634.

Dated: April 28, 1978.

RED J. DRAUSE,
Executive Director, President's Committee on Mental Retardation.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

[FDAA-3064-EM; Docket No. NFD-623]

ALABAMA

Emergency Declaration and Related Determinations

AGENCY: Federal Disaster Assistance Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of an emergency for the State of Alabama (FDAA-3064-EM), dated April 24, 1978, and related determinations.

DATED: April 24, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank J. Muckenhaupt, Chief, Program Support Staff, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410, 202-634-7825.

NOTICE: Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on April 24, 1978, the President declared an emergency as follows:

I have determined that the impact of tornadoes on the State of Alabama is of sufficient severity and magnitude to warrant a declaration of an emergency under Public Law 93-288. I therefor declare that such an emergency exists in the State of Alabama.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285, I hereby appoint Mr. Thomas P. Credle of the Federal Disaster Assistance Administration to act as the Federal Coordinating Officer for this declared emergency.

I do hereby determine the following areas of the State of Alabama to have been adversely affected by this declared emergency.

The Counties of:

Monroe and Montgomery.

MINNESOTA

Major Disaster and Related Determinations

AGENCY: Federal Disaster Assistance Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for the State of Minnesota (FDAA-555-DR), dated April 22, 1978, and related determinations.

DATED: April 22, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank J. Muckenhaupt, Chief, Program Support Staff, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410, 202-634-7825.

NOTICE: Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on April 22, 1978, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Minnesota resulting from severe storms, ice jams, snowmelt, and flooding beginning about March 13, 1978, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288. I therefore declare that such a major disaster exists in the State of Minnesota.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285, I hereby appoint Mr. Robert E. Connor of the Federal Disaster Assistance Administration to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following areas of the State of Minnesota to have been adversely affected by this declared major disaster.

The Counties of:

Becker, Clay, Kittson, Marshall, Norman, Pennington, Polk, Red Lake, Traverse, and Wilkin.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

IRRIGATION OPERATION AND MAINTENANCE CHARGES

Water Charges and Related Information on the Flathead Project, Mont.

This notice of operation and maintenance rates and related information is published under the authority delegated to the Assistant Secretary—Indian Affairs by the Secretary of the Interior in 230 DM 1 and redelegated by the Assistant Secretary—Indian Affairs to the Area Directors in 10 BIAM 3, and by authority delegated to the Project Engineer and to the Superintendent by the Area Director in 10 BIAM 7.0, Sections 2.70-2.75. The authority to issue regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and Sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9), and also under 25 CFR 191.1(e).

FLATHEAD PROJECT—PAYMENT AND PENALTY

Operation and maintenance charges stipulated in this regulation shall be paid as follows:

(a) For Indian Trust and Non District Land payment shall become due on April 1 of each year, and are payable on or before that date. Charges not paid on or before July 1 following the due date shall have added a penalty of one half of one percent per month or fraction thereof from the due date, April 1, so long as the delinquency continues.

(b) For land embraced in the several Irrigation Districts payment shall be made of one half the amount due on or before February 1 of each year, and one half of the amount due on or before July 1 of each year. Payments

or portions of payments not received when due will have added a penalty of one half of one percent per month or fraction thereof from the due date for as long as the delinquency continues.

INDIAN TRUST AND NON-DISTRICT LANDS

The basic operation and maintenance rate for a pro-rata share of irrigation water supply for the season of 1978 for Indian Trust land and land not included in an Irrigation District shall be as follows:

1. Minimum charge for all tracts	$10.00
2. Basic rate per acre for lands in the Jocko Division	6.10
3. Basic rate per acre for lands in the Mission Valley Division	6.97
4. Basic rate per acre for lands in the Camas Division	6.69

LANDS INCLUDED IN THE FLATHEAD IRRIGATION DISTRICT

The charge for operation and maintenance for lands included in the Flathead Irrigation District for the irrigation season of 1979 shall be approximately $598,750 for approximately 88,690 acres of irrigable land included in the Flathead Irrigation District. The minimum charge for any tract will be $10. Payment of said charges will entitle the said lands to a pro-rata share of available water for the season of 1979.

LANDS INCLUDED IN THE MISSION IRRIGATION DISTRICT

The charges for operation and maintenance for lands included in the Mission Irrigation District for the irrigation season of 1979 shall be approximately $113,750 for approximately 16,250 acres of irrigable land included in the Mission Irrigation District. The minimum charge for any tract will be $10. Payment of said charges will entitle the said lands to a pro-rata share of available water for the season of 1979.

LAND INCLUDED IN THE JOCKO VALLEY IRRIGATION DISTRICT

The charge for operation and maintenance for lands included in the Jocko Valley Irrigation District for the irrigation season of 1979 shall be approximately $52,325 for approximately 7,475 acres of irrigable land included in the Jocko Valley Irrigation District. The minimum charge for any tract will be $10. Payment of said charges will entitle the said lands to a pro-rata share of available water for the season of 1979.

Upon publication of these regulations Chapter I, Subchapter T of Title 25, Code of Federal Regulations is amended by deleting §§ 221.15, 221.16, 221.17, 221.18, 221.19, 221.20, 221.21, 221.22, 221.24, 221.25, 221.25a, 221.26, 221.27, 221.27a, 221.28, 221.29, 221.29a.

NOTE.—It is hereby certified that the economic and inflationary impacts of these regulations have been carefully evaluated in accordance with Executive Order 11821.

GEORGE L. MOON,
Project Engineer.

Bureau of Land Management

[Colorado 15142]

COLORADO

Partial Termination of Proposed Withdrawal and Reservation of Lands

APRIL 27, 1978.

Notice of a Forest Service, U.S. Department of Agriculture application, Colorado 15142, for withdrawal and reservation of lands for public purposes was published as FR Doc. 72-4500, on pages 6122-6123 of the issue of March 24, 1972, and republished pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976 in order to give opportunity to request public hearing. The second notice was published as FR Doc. 77-37175 on pages 65283-65284 of the issue of December 30, 1977. The applicant agency has canceled its application insofar as it affects the following described lands:

NEW MEXICO PRINCIPAL MERIDIAN

RIO GRANDE NATIONAL FOREST

Park Creek Administrative Site

T. 38 N., R. 3 E.,
Sec. 31, W½NE¼.

NEW MEXICO PRINCIPAL MERIDIAN

UNCOMPAHGRE NATIONAL FOREST

Highway 145 Roadside Zone

A strip of land 200 feet wide on each side of the Colorado State Highway 145 centerline through the following described lands:

T. 41 N., R. 9 W.,
Sec. 5, Lot 2, SW¼SW¼NE¼, E½SW¼, W½SE¼;
Sec. 7, E½SE¼
Sec. 8, NE¼NW¼; and
Sec. 18, NE¼, NE¼SW¼, NW¼SE¼.
T. 42 N., R. 9 W.,
Sec. 20, E½SW¼;
Sec. 28, SW¼SW¼;
Sec. 29, W½E½, NE¼NW¼, E½SE¼;
Sec. 32, NE¼NE¼, S½NE¼, E½SW¼, W½SE¼; and
Sec. 33, W½E½NW¼, W½NW¼.
Excluding portions of mineral patents M.S. 1005, 1167A, 7301, 8603A, 12342, 12416, 14048, 15590, and 20027.

The areas described aggregate approximately 330 acres.

Therefore, pursuant to the regulations contained in 43 CFR, Part 2300, such lands will be relieved of the segregative effect of the above-mentioned application 30 days from the date of filing of this notice with the FEDERAL REGISTER.

ALAN D. CAMPBELL,
Acting Leader, Montrose Team, Branch of Adjudication.

WYOMING

Application

APRIL 26, 1978.

Notice is hereby given that pursuant to Sec. 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co. of Colorado Springs, Colo., filed an application for a right-of-way to construct a 4½-inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 18 N., R. 93 W.,
Sec. 20, W½SW¼.
T. 18 N., R. 94 W.,
Sec. 10, SW¼NE¼, NW¼NW¼, S½NW¼, N½SE¼ and SE¼SE¼;
Sec. 14, NE¼ and NE¼NW¼;
Sec. 24, NE¼NE¼.

The proposed pipeline will transport natural gas from the Federal No. 20-18-93 well located in the SW¼ of Section 20, T. 18 N., R. 93 W., Carbon County to a point of connection with Colorado Interstate Gas Company's existing pipeline located in the NW¼ of Section 10, T. 18 N., R. 94 W., Sweetwater County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

INTERNATIONAL TRADE COMMISSION

[AA1921-180]

WELDED STAINLESS STEEL PIPE AND TUBING FROM JAPAN

Notice of Investigation and Hearing

Having received advice from the Department of the Treasury on April 20,

M Y 5 7 8 UMI

V 4 3 / 8 8

1978, that welded stainless-steel pipe and tubing from Japan, with the exception of that merchandise produced by Toa Seiki Co., Ltd., and Yamato Industries Co., Ltd., are being, or likely to be, sold at less than fair value the United States International Trade Commission on May 1, 1978, instituted investigation No. AA1921-180 under section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

A public hearing in connection with the investigation will be held in the Commission's hearing room, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, beginning at 9:30 a.m., e.d.t., on June 8, 1978. All persons shall have the right to appear by counsel or in person, to present evidence and be heard. Requests to appear at the public hearing, or to intervene under the provisions of section 201(d) of the Antidumping Act, 1921, shall be filed with the Secretary of the Commission at his office in Washington, D.C., not later than noon, Friday, June 2, 1978.

There will be a prehearing conference in connection with this investigation which will be held in Washington, D.C. at 9:30 a.m., e.d.t., on Friday, June 2, 1978, in room 117, U.S. International Trade Commission Building, 701 E Street NW.

Issued: May 2, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

Attorney General

CERTIFICATION OF THE ATTORNEY GENERAL

In accordance with section 6 of the Voting Rights Act of 1965, as amended, 42 U.S.C. 1973d (Supp. V) (Pub. L. 94-73). I hereby certify that in my judgment the appointment of examiners is necessary to enforce the guarantees of the Fourteenth and Fifteenth Amendments to the Constitution of the United States in Reeves County, Tex. This county is included within the scope of the determination of the Attorney General and the Director of the Census made on September 18, 1975, under section 4(b) of the Voting Rights Act of 1965 and published in the FEDERAL REGISTER on September 23, 1975 (40 FR 43746).

GRIFFIN B. BELL,
Attorney General of the United States.

MAY 2, 1978.

Drug Enforcement Administration

MANUFACTURE OF CONTROLLED SUBSTANCES

Application

Pursuant to 21 U.S.C. 823(a)(1), and § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on March 30, 1978, Regis Chemical Co., 8210 North Austin Avenue, Morton Grove, Ill. 60053, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the schedule I controlled substance mescaline.

Any other such applicant, and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections, or requests for a hearing may be addressed to the Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street NW., Washington, D.C. 20537, Attention: DEA Federal Register Representative, Room 1203, and must be filed not later than June 5, 1978.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

Dated: May 1, 1978.

[4410-01]

[Docket No. 77-22]

ROBERT C. BERWICK, M.D.

Revocation of Registration

On October 21, 1977, a hearing was held before Administrative Law Judge, Francis L. Young, on the issues raised by an Order to Show Cause directed to Robert C. Berwick, M.D. (Respondent) as to why his DEA registration should not be revoked.

The Order to Show Cause was based upon a seven-count felony violation of section 841(a)(1), Title 21, United States Code and a four-count felony violation of section 846, Title 21, United States Code.

On March 31, 1978, the Administrative Law Judge certified to the Administrator, pursuant to 21 CFR 1316.65, his opinion and recommended ruling, findings of fact, conclusion of law, and decision.

The Administrative Law Judge concluded as a matter of law that there is a lawful basis for the revocation of Respondent's DEA registration. He found no evidence in the record sufficient to show any mitigating circumstances and recommended that Respondent's DEA registration be revoked.

The Administrator hereby adopts the findings of fact and conclusion of law as set forth in the Administrative Law Judge's opinion. Respondent has failed to show cause why his registration should not be revoked. (See In the Matter of Armand Lozano, M.D. 43 FR 11618.)

Having reviewed the entire record in this matter, the Administrator is satisfied that it would not be in the public interest to permit Respondent to retain his DEA registration.

Accordingly, under the authority vested in the Attorney General by the Comprehensive Drug Abuse Prevention and Control Act, redelegated to the Administrator of the Drug Enforcement Administration, it is ordered that Dr. Berwick's DEA registration AB1348475 be, and hereby is, revoked, effective immediately.

Dated: May 1, 1978.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within 2 weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D Street NW., Washington, D.C. 20213.

Signed at Washington, D.C. this 1st day of May 1978.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

APPLICATIONS RECEIVED DURING THE WEEK ENDING APRIL 28, 1978

NAME OF APPLICANT, LOCATION OF ENTERPRISE AND PRINCIPAL PRODUCT OR ACTIVITY

Warren County News, Inc., McMinnville, Tenn.—Biweekly newspaper with related sales of advertising, notices, etc.

Employment and Training Administration

NATIONAL TRAINING AND EMPLOYMENT EFFORT

Skill Training Improvement Program

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice announces availability of funds for a second solicitation of grant applications for the Skill Training Improvement Program (STIP), a national effort to provide skill training and private sector employment for unemployed and underemployed persons.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Anderson, Administrator, Office of Comprehensive Employment Development, Room 6000, 601 D Street NW., Washington, D.C. 20213, phone 202-376-6254.

SUPPLEMENTARY INFORMATION:

1. *Scope and Program initiation.* The Employment and Training Administration (ETA) under Title III of the Comprehensive Employment and Training Act (CETA) solicited from CETA prime sponsors during August 1977, applications for the Skill Training Improvement Program and awarded grants to those applicants whose program designs met the objectives of the program.

CETA Title I prime sponsors are hereby being advised that additional STIP funds are now available for new STIP programs which will provide skill training in advanced skill occupations for long-term unemployed (15 weeks or more), low income persons and certain low income employed workers. This effort is being undertaken through competitive procurement procedures at the regional level of the Employment and Training Administration. A Solicitation for Grant Application (SGA) is being issued to all eligible applicants.

2. *Eligibility for a grant.* Only CETA fiscal year 1978 title I prime sponsors are eligible to apply for a grant. Included may be prime sponsors which have already received a STIP grant but which may apply for additional funds within the cost restrictions specified in the SGA. Prime sponsors may subgrant or contract certain program operations to organizations which are capable of effectively providing STIP services and are encouraged to contract with private employers to provide STIP training. Organizations or private employers which are interested in participating in this program may contact the prime sponsor for the area in which the organization or business is located.

3. *Application procedures.* A grant application is being mailed to each prime sponsor by the appropriate ETA regional office on or before April 28, 1978. Prime sponsors which have not received a grant application may contact their ETA regional office. Applications must be submitted to the appropriate ETA Regional Administrator no later than July 14, 1978.

4. Prime Sponsors may direct inquiries to the Regional Administrator for Employment and Training in the 10 regional offices listed below:

REGIONAL ADMINISTRATORS, EMPLOYMENT AND TRAINING ADMINISTRATION

Luis Sepulveda, Regional Administrator, Employment and Training Administration, U.S. Department of Labor, Room 1703, J. F. Kennedy Building, Boston, Mass. 02203
Thomas Komarek, Acting, Regional Administrator, Employment and Training Ad-

ministration, U.S. Department of Labor, Room 3713, 1515 Broadway, New York, N.Y. 10036

J. Terrell Whitsitt, Regional Administrator, Employment and Training Administration, U.S. Department of Labor, P.O. Box 8795, Philadelphia, Pa. 19101.

David T. Duncan, Acting, Regional Administrator, Employment and Training Administration, U.S. Department of Labor, Room 405, 1371 Peachtree Street NE., Atlanta, Ga. 30309.

Richard C. Gilliland, Regional Administrator, Employment and Training Administration, U.S. Department of Labor, Sixth Floor 230 South Dearborn Street, Chicago, Ill. 60604.

William S. Harris, Regional Administrator, Employment and Training Administration, U.S. Department of Labor, 555 Griffin Square Building, Room 316, Dallas, Tex. 75202.

Richard G. Miskimins, Regional Administrator, Employment and Training Administration, U.S. Department of Labor, Room 1000, 911 Walnut Street, Federal Building Kansas City, Mo. 64106.

Floyd E. Edwards, Regional Administrator, Employment and Training Administration, U.S. Department of Labor, 16122 Federal Office Building, 1961 Stout Street, Denver, Colo. 80202.

William J. Haltigan, Regional Administrator, Employment and Training Administration, U.S. Department of Labor, Box 36084, San Francisco, Calif. 94102.

Jess C. Ramaker, Regional Administrator, Employment and Training Administration, U.S. Department of Labor, Room 1145, Federal Office Building, 909 First Avenue, Seattle, Wash, 98174.

5. Availability of funds. It is anticipated that a total of $158 million will be available for this effort. Signed at Washington, D.C. this 25th day of April 1978.

ROBERT J. MCCONNON,
Deputy Assistant Secretary for Employment and Training.

YOUTH COMMUNITY CONSERVATION AND IMPROVEMENT PROJECTS (YCCIP) AND YOUTH EMPLOYMENT AND TRAINING PROGRAMS (YETP) FOR YOUTHS WHO ARE MEMBERS OF MIGRANT AND OTHER SEASONALLY EMPLOYED FARMWORKER FAMILIES

Potential Section 303 YCCIP and YETP Grantees

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: Pursuant to 29 CFR 97.913 and 97.1013, the Employment and Training Administration announces the selection of potential fiscal year 1978 sponsors for funds under title III, subpart J—Youth community conservation improvement project (YCCIP) and subpart K—Youth employment and training program (YETP) of the Comprehensive Employment and Training Act (CETA) of 1973, as amended and title II, subpart 2—Youth community conservation improvement projects (YCCIP) and subpart 3—Youth employment and training program (YETP) of the Youth Employment and Demonstration Projects Act (YEDPA) of 1977. Only current fiscal year 1978 sponsors receiving funds under Title III, Section 303 of the Comprehensive Employment and Training Act (CETA) of 1973, as amended can receive these YCCIP and YETP funds.

FOR FURTHER INFORMATION CONTACT:

Mr. Paul A. Mayrand, Director, Office of Farmworker Programs, Department of Labor, Employment and Training Administration, Room 7122, 601 D Street NW., Washington, D.C. 20213, telephone No. 202-376-7288.

SUPPLEMENTARY INFORMATION: *Potential sponsor designations.* The following section 303 fiscal year 1978 sponsors are to be designated as potential sponsors to provide services to youths who are members of migrant and other seasonally employed farmworker families with funds authorized under YEDPA, subparts 2—YCCIP and 3—YETP. Each section 303 applicant so designated as a potential YCCIP and/or YETP sponsor shall be notified in writing of the amount of YCCIP and/or YETP funds which may be granted the target areas to be served, the items to be negotiated and the time and place of negotiations. These designations are being made pursuant to 29 CFR 97.913 and 97.1013. Designation as a potential YCCIP and/or YETP sponsor does not commit the Department of Labor to award YCCIP and/or YETP funds to the designee, only to enter into negotiations. If negotiations fail to produce an acceptable grant, the Secretary reserves the right to terminate the negotiations.

Office of Federal Contract Compliance Programs

WOMEN AND MINORITIES IN CONSTRUCTION

Goals and Timetables for Female and Minority Participaiton in the Construction Industry; Correction

AGENCY: Office of Federal Contract Compliance Programs, Labor.

ACTION: Correction.

SUMMARY: This notice is a correction of the notice establishing goals and timetables for female and minority utilization for construction contractors and subcontractors subject to Executive Order 11246, as amended (30 FR 12319, 32 FR 14303).

EFFECTIVE DATE: May 8, 1978.

FOR FURTHER INFORMATION CONTACT:

William Raymond, Associate Director, OFCCP, 202-523-9447.

SUPPLEMENTARY INFORMATION: In FR Doc. 78-9084 appearing at 43 FR 14899 (April 7, 1978), the Department of Labor published a notice establishing goals and timetables for female and minority utilization for construction contractors subject to Executive Order 11246, as amended. The April 7, 1978, notice contained Appendix A which established goals and timetables for female utilization and Appendix B which established goals and timetables for minority utilization. A number of errors were contained in the appendices, and because the appendices are expected to be used constantly by procurement officers and full documents are republished in full as corrected.

Dated: April 25, 1978.

WELDON J. ROUGEAU,
Director, OFCCP.

APPENDIX A

The following goals and timetables for female utilization shall be included in all Federal and federally assisted construction contracts and subcontracts in excess of $10,000. The goals are applicable to the contractor's aggregate on-site construction workforce whether or not part of that workforce is performing work on a Federal or federally-assisted construction contract or subcontract.

Area covered: Goals for Women apply nationwide.

Goals and timetables

Timetable	Goals (percent)
From Apr. 1, 1978 until Mar. 31, 1979	3.1
From Apr. 1, 1979 until Mar. 31, 1980	5.0
From Apr. 1, 1980 until Mar. 31, 1981	6.9

APPENDIX B

Until further notice, the following goals and timetables for minority utilization shall be included in all Federal or federally-assisted construction contracts and subcontracts in excess of $10,000 to be performed in the respective covered areas. The goals are applicable to the contractor's aggregate on-site construction workforce whether or not part of that workforce is performing work on a Federal or federally-assisted construction contract or subcontract.

Mine Safety and Health Administration

ADVISORY COMMITTEE TO REVIEW ADVISORY METAL AND NONMETALLIC MINE HEALTH AND SAFETY STANDARDS

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act, Pub. L. 92-463, and under section 301(b)(2) of the Federal Mine Safety and Health Amendments Act of 1977, Pub. L. 95-164, enacted November 9, 1977, notice is hereby given that the Advisory Committee to Review Advisory Metal and Nonmetallic Mine Health and Safety Standards will convene beginning at 9 a.m. on Monday, May 22, 1978, and continue each day thereafter, through Thursday, May 25, 1978, at Conference Room N5437, New Labor Department Building, 3rd and C Streets NW., Washington, D.C. 20210. The meetings of the Advisory Committee are open to the public and approximately 50 seats are available on a first-come first-served basis. Any member of the public may file a written statement with the Advisory Committee before and during the public meetings. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meetings.

Copies of the agenda are available for examination by the public at the office of Frank J. Delimba, Executive Secretary, Room 704, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Va. 22203, telephone 703-235-8597. For further information, or for submission of written statements and comments, contact the Executive Secretary.

Dated: April 25, 1978.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

Office of the Secretary

[TA-W-3100]

GENERAL ELECTRIC CO. GAINESVILLE, FLA.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3100: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 9, 1978 in response to a worker petition received on January 26, 1978 which was filed on behalf of the International Brotherhood of Electrical Workers on behalf of workers and former workers producing nickel cadmium battery packs at the Gainesville, Fla. plant of the General Electric Co.

The Notice of Investigation was published in the FEDERAL REGISTER on February 24, 1978 (43 FR 7743). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the General Electric Company, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of rechargeable batteries increased absolutely from $11.6 million in 1975 to $13.4 million in 1976 and increased to $15.6 million in 1977.

General Electric produces all of its requirements for nickel cadmium rechargeable batteries at it Gainesville, Fla. plant. Because of increasing price competition from foreign competitors, General Electric began the transfer of its final assembly of battery packs to a foreign facility in the fourth quarter of 1977. By the end of the first quarter of 1978 General Electric was importing 100 percent of its requirements for assembled battery packs from its foreign facility.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with rechargeable battery packs produced at General Electric contributed importantly to the decline in sales or production and to the total or partial separations of the workers at the Gainesville plant. In accordance with the provisions of the Act, I make the following certification.

All workers engaged in employment related to the production of rechargeable battery packs at the Gainesville, Fla. plant of General Electric who became totally or partially separated from employment on or after December 24, 1977 and before April 2, 1978 are eligible to apply for adjusment assistance under Title II, Chapter 2 of the Trade Act of 1974.

All employees separated after April 1, 1978 are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C., this 26th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 19, 1978.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 19, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 25th day of April 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-3057]

U.S. STEEL CORP., U.S. STEEL PRODUCTS DIVISION, PETROLEUM, OHIO

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3057: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 6, 1978, in response to a worker petition received on January 16, 1978, which was filed by the United Steelworkers of America on behalf of workers producing carbon steel products at the Petroleum, Ohio (Sharon), plant of the U.S. Steel Products Division of the U.S. Steel Corp. The investigation revealed that the petitioners produce steel shipping containers.

The Notice of Investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7064). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the U.S. Steel Corp., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The investigation revealed that, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

Average employment at the plant increased in each quarter of 1977 compared to the respective quarter of 1976 and continued to increase during the first 2 months of 1978 compared to the like 1977 period. The average weekly number of hours worked per worker also increased in 1977 compared to 1976. There were no layoffs at the plant in 1977 or in the first 2 months of 1978.

CONCLUSION

After careful review I conclude that all workers at the Petroleum, Ohio (Sharon), plant of the U.S. Steel Products Division of the U.S. Steel Corp. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 26th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

Occupational Safety and Health Administration

VERMONT STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator), under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the act and 29 CFR Part 1902. On October 1, 1973, notice was published in the FEDERAL REGISTER (38 FR 28658) of the approval of the Vermont plan and the adoption of subpart U to part 1952 containing the decision.

The Vermont plan provides for the adoption of Federal Standards as State standards. On May 3, 1977, the Occupational Safety and Health Administration (OSHA) adopted, pursuant to section 6(c) of the act, an emergency temporary standard for benzene. On September 9, 1977, OSHA adopted an emergency temporary standard for 1,2-dibromo-3-chloropropane (DBCP) (42 FR 45536). By letter dated February 9, 1978, from Joel R. Cherington, Commissioner, Vermont Department of Labor and Industry, to Gilbert Saulter, Regional Administrator, and incorporated as part of the plan, the State submitted emergency temporary standards for benzene and DBCP. These standards, which are contained in section 1910 of Vermont's administrative rules were promulgated on December 12, 1977, in accordance with applicable State law.

2. *Decision.* Having reviewed the state submission in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards and accordingly should be approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, U.S. Department of Labor—OSHA, Room 1804, J. F. Kennedy Federal Building, Government Center, Boston, Mass. 02203; State Office Building, Montpelier, Vt. 05602; and the Technical Data Center, Room N-2439, 200 Constitution Avenue, Washington, D.C. 20210.

4. *Public participation.* 29 CFR 1953.22(b)(1) provides that temporary standards which are identical to or "at least as effective as" the comparable Federal standards may be approved effective upon publication in the FEDERAL REGISTER. Under the Administrative Procedure Act, 5 U.S.C. 553(b)(3)(B), good cause exists for approval without further notice or public procedure, for the following reasons:

(1) The standards were adopted in accordance with the procedural requirements of State law which authorizes promulgation without public participation for emergency standards and participation at the Federal level would be impracticable.

(2) The emergency nature of the standards requires that approval be implemented immediately.

This decision is effective May 5, 1978.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Boston, Mass., this 2nd day of March 1978,

EDWIN J. RILEY, Jr.,
Assistant Regional Administrator.

WASHINGTON STATE STANDARDS

Notice of Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called Regional Administrator), under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the act and 29 CFR Part 1902. On January 26, 1973, notice was published in the FEDERAL REGISTER (38 FR 2421) of the approval of the Washington plan and the adoption of subpart F to part 1952 containing the decision.

The Washington plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the act.

Section 1952.120-124 of subpart F sets forth the State's schedule for the adoption of at least as effective State standards. By letter, dated December 14, 1977, from James Sullivan, Assistant Director, Department of Labor and Industries, to James Lake, Regional Administrator, and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR 1910.1029, Subpart Z—Coke Oven Emissions, as published in the FEDERAL REGISTER (41 FR 46742), dated October 22, 1976, and corrections published in the FEDERAL REGISTER (42 FR 3304), dated January 18, 1977. These standards, which are contained in chapter 296-62-200 WAC were promulgated after public hearing in Olympia on June 7, 1977, pursuant to 34.04 RCW and of the Open Public Meetings Act of 1971, Chapter 42.30.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards and accordingly are hereby approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 First Avenue, Seattle, Wash. 98274: Department of Labor and Industries, General Administration Building, Olympia, Wash. 98504; and Office of the Associate Assistant Secretary for Regional Programs, Room S-6212, 200 Constitution Avenue NW., Washington, D.C. 20210.

4. *Public participation.* Section 1953.2(c) of this chapter provides that where State standards are identical to or "at least as effective" as comparable Federal standards and have been promulgated in accordance with State law, approval may be effective upon publication without an opportunity for further public participation. As the standards under consideration are identical to the Federal standards and have been promulgated in accordance with State law including an opportunity for public comment and/or a public hearing, they are approved without an opportunity for further public comment.

This decision is effective May 5, 1978.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Seattle, Wash., this 7th day of April 1978.

JAMES W. LAKE,
Regional Administrator—OSHA.

WASHINGTON STATE STANDARDS

Notice of Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called Regional Administrator) under a delegation of authority from the Assistant Secretary of labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On January 26, 1973, notice was published in the FEDERAL REGISTER (38 FR 2421) of the approval of the Washington plan and the adoption of Subpart F to Part 1952 containing the decision.

The Washington plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act.

Section 1952.120-124 of Subpart F sets forth the State's schedule for the adoption of at least as effective State standards. By letter dated December 14, 1977, from James P. Sullivan, Assistant Director, Department of Labor and Industries, to James W. Lake, Regional Administrator, and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR 1928.21, Agricultural Operations, as published in the FEDERAL REGISTER (39 FR 23780) dated June 27, 1974. These standards, which are contained in Chapter 296-306 WAC Safety Standards for Agriculture, were promulgated initially by emergency adoption of Temorary Labor Camp standards, as published in the FEDERAL REGISTER (42 FR 40278) dated August 9, 1977, and promulgated by permanent adoption after due notice and a public hearing held at Olympia, Wash., on June 23, 1977, pursuant to RCW 34.04 and of the Open Public Meetings Act of 1971, Chapter 42 30 RCW. State standards comparable to the remainder of 29 CFR 1928.21 were promulgated after public hearing in Yakima, Wash., on January 16, 1975.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards and accordingly are hereby approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 First Avenue, Seattle, Wash. 98274; Department of Labor and Industries, General Administration Building, Olympia, Wash. 98504; and Office of the Associate Assistant Secretary for Regional Programs, Room S-6212, 200 Constitution Avenue NW., Washington, D.C. 20210.

4. *Public participation.* Section 1953.2(c) of this chapter provides that where State standards are identical to or "at least as effective" as comparable Federal standards and have been promulgated in accordance with State law, approval may be effective upon publication without an opportunity for further public participation. As the standards under consideration are identical to the Federal standards and have been promulgated in accordance with State law including an opportunity for public comment and/or a public

hearing, they are approved without an opportunity for further public comment.

This decision is effective may 5, 1978.

Wage and Hour Division

CERTIFICATES AUTHORIZING THE EMPLOYMENT OF LEARNERS AT SPECIAL MINIMUM WAGES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act (52 Stat. 1062, as amended; U.S.C. 214), Reorganization Plan No. 6 of 1950 (3 CFR 1949-53 Comp., p. 1004), and Administrative Order No. 1-76 (41 FR 18949), the firms listed in this notice have been issued special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates otherwise applicable under section 6 of the Act. For each certificate, the effective and expiration dates, number or proportion of learners and the principal product manufactured by the establishment are as indicated. Conditions on occupations, wage rates, and learning periods which are provided in certificates issued under the supplemental industry regulations cited in the captions below are as established in those regulations; such conditions in certificates not issued under the supplemental industry regulations are as listed.

The following certificates were issued under the apparel industry learner regulations (29 CFR 522.1 to 522.9, as amended and 522.20 to 522.25, as amended). The following normal labor turnover certificates authorize 10 percent of the total number of factory production workers except as otherwise indicated.

Bernice Industries, Bernice, La.; 1-1-78 to 12-31-78 (boys' shirts and girls' blouses).

Corbin, Ltd., Huntington, W. Va.; 1-22-78 to 1-21-79 (men's pants).

Crystal Springs Shirt Corp., Crystal Springs, Miss.; 1-1-78 to 12-31-78 (boys' shirts).

Donlin Sportswear, Inc., New Tazewell, Tenn.; 2-21-78 to 2-20-79 (men's shirts).

Flushing Shirt Mfg. Co., Inc., Grantsville, Md.; 1-18-78 to 1-17-79 (men's shirts).

H. & U., Inc., Avondale, Ariz.; 2-13-78 to 2-12-79; 10 learners for normal labor turnover purposes (women's blouses).

Hamburg Shirt Corp., Hamburg, Ark.; 1-1-78 to 12-31-78 (men's and boys' shirts).

Middleburg Sportswear, Inc., Middleburg, Pa.; 3-16-78 to 3-15-79; 10 learners for normal labor turnover purposes (women's dresses).

Steele Apparel Co., Steele, Mo.; 1-18-78 to 1-17-79; 10 learners for normal labor turnover purposes (ladies' dresses).

Utica Industries, Utica, Miss.; 2-13-78 to 2-12-79 (men's and boys' shirts).

The following plant expansion certificate was issued authorizing the number of learners indicated.

Flushing Shirt Mfg. Co., Inc., Waynesburg, Pa.; 1-24-78 to 7-23-78; 20 learners for plant expansion purposes (women's blouses).

Each learner certificate has been issued upon the representations of the employer which, among other things were that employment of learners at special minimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificate may be annulled or withdrawn as indicated therein, in the manner provided in 29 CFR Part 528. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof on or before May 22, 1978.

Signed at Washington, D.C., this 1st day of May 1978.

ARTHUR H. KORN,
Authorized Representative of the Administrator.

DEPARTMENT OF LABOR

Pension and Welfare Benefit Programs

DEPARTMENT OF THE TREASURY

Internal Revenue Service

CERTAIN TRANSACTIONS INVOLVING EMPLOYEE BENEFIT PLANS AND BROKER-DEALERS

Proposed Extension of Existing Exemption; Hearing

AGENCIES: Department of Labor, Department of the Treasury/Internal Revenue Service.

ACTION: Notice of proposed extension of existing exemption and notice of hearing.

SUMMARY: This document contains a notice of pendency before the Department of Labor and the Internal Revenue Service (hereinafter referred to collectively as the Agencies) of a proposed extension, until December 1, 1978, of that portion of an existing class exemption which permits securities broker-dealers, until May 1, 1978, to provide brokerage and incidental services, under certain circumstances, to employee benefit plans with respect to which they are fiduciaries. It is also proposed to make the exemption applicable with respect to transactions occurring between May 1, 1978, and such date as the proposed extension might be adopted. The proposed extension, if granted, might affect broker-dealers providing services to employee benefit plans, and participants and beneficiaries of such plans. In addition, this document contains a notice of hearing on the proposed extension.

DATES: Written comments on the proposed extension and requests for time to present oral comments at the hearing must be received by the Department of Labor on or before June 1, 1978.

ADDRESSES: Written comments and requests for time to present oral comments should be addressed to the Office of Regulatory Standards and Exceptions, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20216 Attention: Extension of Exemption for Certain Brokerage Transactions. All such communications and applications for exemption relating to this proposed extension will be available for public inspection at the Public Documents, Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue NW., Washington, D.C., and at the Internal Revenue Service National Office Reading Room, 1111 Constitution Avenue NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Daniel J. Shapiro, Esq., Office of the Solicitor, Plan Benefits Security Division, Room C-4508, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210, 202-523-7931, or Ivan Strasfeld, Esq., Prohibited Transactions Staff, Employee Plans Division, Internal Revenue Service, 111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: E:EP:PT), 202-566-3045. These are not toll free numbers.

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Agencies of a proposed extension of an existing class exemption from the restrictions of section 406 of the Employee Retirement Income Security Act of 1974 (the Act) and the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) of the code. The class exemption relates to certain securities transactions effected on behalf of employee benefit plans by persons who are fiduciaries of the plan. The existing class exemption applicable to these transactions, which is set forth as paragraph I(a) of Prohibited Transac-

V 4 3 1 8 8 M Y 5 7 8 M

tion Exemption 75-1,[1] will expire May 1, 1978. It is proposed to extend the exemption until December 1, 1978, and it is proposed also to make the extension apply retroactively from its effective date to May 1, 1978. It should be noted that the action being proposed herein by the Agencies relates only to that portion of Prohibited Transaction Exemption 75-1 which expires May 1, 1978. The other portions of that exemption would not be affected by this proposal. The extension is proposed pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Proc. 75-1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75-26, 1975-1 C.B. 722.

A class application for an extension of paragraph I(a) of Prohibited Transaction Exemption 75-1 has been filed by the Securities Industry Association (SIA).[2] The SIA also has requested, in effect, a permanent extension and modification of paragraph I(a) of that exemption. In addition, the Agencies have received four applications for individual exemptions which might relate to the proposed extension.[3] To the extent that the transactions which are the subject of those applications are of the type described in this proposed extension of an existing class exemption, such transactions will be exempted if they satisfy the terms and conditions of such extension as might be granted. Because the Agencies believe that it would be administratively feasible to deal with these applications on a class basis, the Agencies, pursuant to section 3.01 of ERISA Proc. 75-1 and Rev. Proc. 75-26, have determined to group such applications in a class.

As stated in section 3.04 of ERISA Proc. 75-1 and Rev. Proc. 75-26, an application for an individual exemption will not ordinarily be considered separately if a class exemption which may encompass the applications for individual exemption is under consideration by the Agencies. Accordingly, the Agencies are notifying directly each applicant for an individual exemption of the fact that such applicant's application is not presently being considered separately from this proceeding, and that following disposition of the above noted class application for permanent modification, such application might be closed, and, therefore, that such applicant's comments with respect to this proposed extension of a class exemption are sought by the Agencies.

In granting the pertinent portion of Prohibited Transaction Exemption 75-1, the Agencies determined that securities broker-dealers regularly provide research, information and advice concerning securities, and effect agency transactions for the purchase or sale of securities, in the ordinary course of their business as broker-dealers, and that the provision of a combination of such services by a fiduciary with regard to employee benefit plans would constitute prohibited transactions under the Act and the Code unless a statutory or administrative exemption is available. The Agencies took note that in the future most transactions by plan fiduciaries that would be covered by this portion of Prohibited Transaction Exemption 75-1 also would, in effect, be prohibited by section 11(a) of the Securities Exchange Act of 1934 (Exchange Act), as amended by the Securities Acts Amendments of 1975 (Pub. L. 94-29, 89 Stat. 110). That section prohibits any member of a national securities exchange from effecting any transaction on such exchange for an account with respect to which it or an associated person thereof exercises investment discretion.[4]

The Agencies noted also that section 11(a) of the Exchange Act provides an exception from the prohibition described above until May 1, 1978 for members of a national securities exchange who were members on May 1, 1975. The Conference Report relating to the Securities Acts Amendments of 1975 (H.R. Rep. No. 94-229, 94th Cong., 1st Sess. (1975)) indicated, at page 107, that it was the view of the conferees that the Agencies should grant an exemption from the prohibited transaction provisions of the Act and the Code to permit broker-dealers to continue to provide brokerage services to plans with respect to which they exercise investment discretion until May 1, 1978, in order to conform the pertinent provisions of the Act and Code to section 11(a) of the Exchange Act and thereby permit broker-dealers to phase out in an orderly fashion the business of both serving as investment advisers to plans and providing brokerage services to such plans.[5]

Therefore, with respect to a person who is a plan fiduciary, Prohibited Transaction Exemption 75-1 provided, in part, an exemption for effecting securities transactions on behalf of employee benefit plans and for functions performed incidental to the effecting of such transactions. The pertinent part of the exemption was available whether or not the transaction was effeted on a national securities exchange, but it applied only to persons who were ordinarily and customarily effecting securities transactions on May 1, 1975, and it was available only until May 1, 1978. The availability of Prohibited Transaction Exemption 75-1 was also subject to certain other conditions. In addition to the exemption requests noted above, legislation has recently been introduced in Congress to postpone the full effectiveness of section 11(a) of the Exchange Act until November 1, 1979.[6] This legislation has been passes by the House of Representatives.[7] The Senate has also passed a bill which, inter alia, would postpone the full effectiveness of section 11(a), but for a period of time shorter than that provided in the bill passed by the House.[7a] Furthermore, the Securities and Exchange Commission (SEC) has recently adopted a temporary rule[8] which has the effect of permitting certain transactions which might otherwise be prohibited by section 11(a) of the Exchange Act after May 1, 1978. Such transactions, if they involve employee benefit plans, would be prohibited by the Act and the Code after the pertinent portion of Prohibited Transaction Exemption 75-1 expires on that date unless, under the particular facts and circumstances surrounding the transactions, they do not constitute acts of self-dealing under section 406(b)(1) of the Act and section 4975 (c)(1)(E) of the Code. The SEC has requested that the Agencies consider coordinating their activities in this area with those of the SEC.[9]

The applicant SIA suggests that, in view of the developments described above, it is appropriate for the Agencies to reconsider their earlier determination that the transactions described above should not be permitted by special exemption after May 1, 1978.

It is proposed to extend the pertinent portion of Prohibited Transaction Exemption 75-1 through the period ending December 1, 1978. During this period, the Agencies could observe any legislative developments in the area, and could consider other factors relevant to the question of whether additional exemptive relief should be provided after December 1, 1978, either in the form presently provided in paragraph I(a) of Prohibited Transaction Exemption 75-1 or in some other form. A separate issue is whether the extension, if granted, should be made retroactive to May 1, 1978, so as to avoid making the prohibitions of the Act and the Code applicable to transactions of the type described which might take place between May 1, 1978 and such date as the proposed extension might be adopted.

The Agencies note that, in the Conference Report accompanying the Act, the conferees indicated that they had not granted a statutory exemption to permit the provision to a plan of both discretionary investment management and brokerage services by the same broker-dealer, at least in part becuase of the difficulty of establishing precise statutory standards for protecting against potential abuses.[10] The conferees indicated the view that exemptive relief, to the extent it was consistent with the standards of the Act and the Code, would more appropriatedly be granted administratively provided that the Agencies determined that such arragements were in the interest plan participants and beneficiaries and satisfactory safeguards were provided.[11] In addition, the conferees noted that the general issue of institutional investment management by brokers was under consideration in separate legislation, and they made clear their expectation that any action taken by the Agencies on requests for exemptions in this area should be consistent with the outcome of such legislation.[12]

The Agencies are not at this time prepared to conclude, on the basis of the applications on file, that granting the proposed extension would be in accord with the relevant statutory standards and the legislative direction discussed above, and they specifically request that commentators discuss possible reasons why the expiration of paragraph I(a) of Prohibited Transaction Exemption 75-1 might adversely affect employee benefit plans. Interested persons should be cognizant of the fact that the Agencies will determine whether to grant all or any part of the proposed extension only after considering the written comments received and the testimony given at the public hearing.

All interested persons are invited to submit written comments concerning the proposed extension to the address noted above by June 1, 1978.

A public hearing with respect to the proposed extension will be held on June 12, 1978 beginning at 10 a.m. in Room N-3437-A, B, C and D, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C.

Any interested person who desires to present oral comments at the hearing and who wishes to be assured of being heard should submit a statement to that effect, an outline of the topics to be discussed (at least six copies), and the time to be allocated to each topic by June 1, 1978. The statement and outline should be submitted to the address noted above.

An agenda will be prepared containing the order of presentation of oral comments and the time allotted to each commentator. Information with respect to the contents of the agenda may be obtained on or after June 7, 1978, by telephoning Daniel Shapiro, Esq., Washington, D.C. 202-523-7931. This is not a toll free number.

At the conclusion of oral comments by persons listed in the agenda, to the extent time permits, other persons will be permitted to make oral comments. The public hearing will be transcribed.

PROPOSED EXTENSION OF EXEMPTION

Accordingly, it is proposed that Prohibited Transaction Exemption 75-1, published on October 31, 1975 in the FEDERAL REGISTER (40 FR 50845), be modified by changing the date May 1, 1978 in paragraph I(a) thereof (relating to agency transactions and services) to December 1, 1978.

Signed at Washington, D.C. this 1st day of May 1978.

IAN D. LANOFF,
Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration.

T. R. KERN,
Deputy Assistant Commissioner, Employee Plans and Exempt Organizations, Internal Revenue Service.

[FR Doc. 78-12228 Filed 5-1-78; 4:02 pm]

[1] Notice of the granting of the exemption currently in effect was published in the FEDERAL REGISTER on October 31, 1975 (40 FR 50845).

[2] Exemption Application No. D-1026. The SIA does not specify in its application how long it requests the extension to be. Rather, the SIA requests that the extension be of sufficient duration to permit the Agencies to consider matters relevant to its application for permanent modification of paragraph I(a) of Prohibited Transaction Exemption 75-1.

[3] Exemption Application Nos. D-724, D-862, D-888 and D-981.

[4] The term "investment discretion" is defined in section 3(a)(35) of the Exchange Act. In general, a person who exercises investment discretion with respect to a plan within the meaning of that definition would also be a fiduciary with respect to the plan as defined in section 3(21) of ERISA and section 4975(e)(3) of the Code. A person also would be a fiduciary as a result of rendering investment advice for compensation (within the meaning of 29 CFR 2510.3-21(c) and section 54.4975-9 of the Pension Excise Tax Regulations) to a plan. It should be noted that the relief provided in paragraph I(a) of Prohibited Transaction Exemption 75-1 is available with respect to any fiduciary of the plan who meets the conditions of that paragraph, whether such person is a fiduciary by reason of exercising investment discretion or for some other reason. However, a broker-dealer which provides investment advice but does not exercise investment discretion with respect to a plan would, under certain circumstances, be able to effect brokerage transactions for the plan without relying upon the relief afforded by paragraph I(a) of Prohibited Transaction Exemption 75-1. This is because section 408(b)(2) of the Act and section 4975(d)(2) of the Code and regulations 29 CFR 2550, 408b-2 and section 54.4975-6 of the Pension Excise Tax Regulations thereunder provide, in effect, that a fiduciary does not engage in a transaction prohibited by section 406(b)(1) of the Act and section 4975(c)(1)(E) of the Code if the fiduciary does not use any of the authority, control or responsibility which makes such person a fiduciary to cause a plan to pay additional fees for a service furnished by such fiduciary.

National Commission on Unemployment Compensation

Meeting

The third meeting of the National Commission on Unemployment Compensation will be held at the Concourse Hotel in Madison, Wis. The meeting will begin at 9 am., Friday, May 12, 1978, concluding at 5:30 pm., and will resume at 8:30 am., Saturday, May 13, and adjourn at approximateiy 4 p.m.

It has been impossible to give the standard period of notice because scheduling was not finalized until April 27. Notice is hereby given that the June meeting of the Commission will be held in Washington, D.C., on June 26 and 27, 1978. Notice of the agenda will be published in a future issue of the FEDERAL REGISTER.

TENTATIVE AGENDA—MAY MEETING

FRIDAY, MAY 12

9 a.m.
Review of minutes of April meeting.
Old business.
Tour of Wisconsin Employment Security Agency and presentation by Wisconsin senior staff.

12:15 p.m.—Lunch—Open.

1:30 p.m.
Discussion: Original objectives of unemployment compensation; background and history of Wisconsin experience—Paul Rauschenbush, Ellis Taff, Saul Blaustein, and David Pearson.

4:30 p.m.
Commission business meeting (old business continued).

5:30 p.m.—Adjournment.

SATURDAY, MAY 13

8:30 a.m.
Commission Business Meeting: (a) Future subcommittee meetings.
(b) Plans for June meeting/hearings for Washington-based national organizations.

10 a.m.
Presentation: Differing Perspectives on Unemployment Compensation—Dr. Ray Munts, Dr. Irvin Garfinkel, and Dr. Robert Lampman, University of Wisconsin.

12:15 p.m.
Luncheon meeting with Wisconsin advisory council presentation by labor and management spokespersons of the council.

2:30 p.m.
Commission business meeting (continued): (c) Plans for summer meetings.

V 4 3 / 8 8

(d) New business.

4 p.m.—Adjournment.

Telephone inquiries and communications concerning this meeting should be directed to: Mr James M. Rosbrow, Interim Executive Director, National Commission on Unemployment Compensation, Room 7000, Patrick Henry Building, 601 D Street NW., Washington, D.C. 20213.

Mr. Rosbrow's telephone number is Area Code 202-376-7034.

Signed at Washington, D.C., this 1st day of May 1978.

JAMES M. ROSBROW,
Interim Executive Director, National Commission on Unemployment Compensation.

NATIONAL SCIENCE FOUNDATION

ADVISORY COMMITTEE FOR POLICY RESEARCH AND ANALYSIS AND SCIENCE RESOURCES STUDIES

Meeting

In accordance with the Federal Advisory Committee Act, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Policy Research and Analysis and Science Resources Studies.

Date and Time: May 23, 1978; 9 a.m. to 4:30 p.m.; May 24, 1978; 9 a.m. to 12 noon.

Place: Room 543 on May 23, and Room 338 on May 24, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of meeting: Open.

Contact person: Mrs. Agnes Rhodes, Administrative Officer, Division of Policy Research and Analysis, STIA Directorate, Room 1233, National Science Foundation, Washington, D.C. 20550, telephone 202-632-5990. Anyone who plans to attend should contact Mrs. Rhodes by May 15, 1978.

Summary Minutes: May be obtained from the Committee Management Coordinator, Division of Financial and Administrative Management, Room 248, National Science Foundation, Washington, D.C. 20550.

Purpose of Committee: To provide advice, recommendations, and oversight concerning program emphasis and directions of the Divisions of PRA and SRS.

Agenda:

MAY 23, 1978

Introductory remarks by the Chairman and NSF Senior Management; Review of SRS activities; Review of PRA activities;SRS/PRA Subcommittees will meet separately for a discussion of respective divisional issues.

MAY 24, 1978

Report of Subcommittees and joint discussion of issues; Committee member assignments and planning for next meeting.

M. REBECCA WINKLER,
Committee Management Coordinator.

MAY 2, 1978.

[FR Doc. 78-12281 Filed 5-4-78; 8:45 am]

[7555-01]

SUBCOMMITTEE ON GENETIC BIOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee on Genetic Biology of the Advisory Committee for Physiology, Cellular and Molecular Biology.

Date and time: May 22-24, 1978; 9 a.m. to 6 p.m. each day.

Place: Room 321, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Philip D. Harriman, Program Director, Genetic Biology Program, Room 326. National Science Foundation, Washington, D.C. 20550, telephone 202-632-5985.

Purpose of subcommittee: To provide advice and recommendations concerning support for research in genetic biology.

Agenda: To review and evaluated research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (8) of 5 U.S.C. 552B(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Directors, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Committee Management Coordinator.

MAY 2, 1978.

[FR Doc 78-12282 Filed 5-4-78; 8:45 a.m.]

[7555-01]

SUBCOMMITTEE ON METABOLIC BIOLOIGY

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee on Metabolic Biology of the Advisory Committee for Physiology, Cellular and Molecular Biology.

Date and time: May 22 and 23, 1978; 9 a.m. to 5 p.m. each day.

Place: Room 338, National Science Foundation, 1800 G Street, NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Elijah B. Romanoff, Program Director, Metabolic Biology Program, Room 331, National Science Foundation, Washington, D.C. 20550, telephone 202-632-4312.

Purpose of subcommittee: To provide advice and recommendations concerning support for research in Metabolic Biology.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (8) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. l. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Committee Management Coordinator.

MAY 2, 1978.

[FR Doc. 78-12283 Filed 5-4-78; 8:45 am]

[7555-01]

SUBCOMMITTEE ON MOLECULAR BIOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee on Molecular Biology, Group A, of the Advisory Committee for Physiology, Cellular and Molecular Biology.

Date and time: May 22 and 23, 1978; 9 a.m. to 5 p.m. each day.

Place: Room 421, National Science Foundation, 1800 G Street, NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Frederick I. Tsuji, Program Director, Biochemistry Program, Room 330, National Science Foundation, Washington, D.C., 20550, telephone 202-632-4260.

Purpose of subcommittee: To provide advice and recommendations concerning support for research in Molecular Biology.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Committee Management Coordinator,

MAY 2, 1978.

[7555-01]

SUBCOMMITTEE ON PSYCHOBIOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee on Psychobiology of the Advisory Committee for Behavioral and Neural Sciences.

Date: May 23, 24, and 25, 1978.

Time: 9 a.m. to 5 p.m. each day.

Place: Rooms 628 and 642, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of meeting: Part Open:

Open May 25; closed May 23 and May 24.

Contact person: Dr. Fred Stollnitz, Program Director, Psychobiology Program, Room 320, National Science Foundation, Washington, D.C. 20550, telephone 202-632-4264.

Summary minutes: May be obtained from the Committee Management Coordinator, Division of Financial and Administrative Management, Room 248, National Science Foundation, Washington, D.C. 20550.

Purpose of subcommittee: To provide advice and recommendations concerning support for research in Psychobiology.

Agenda: May 23 and 24: To review and evaluate research proposals as part of the selection process for awards.

MAY 25

1. Executive Committee's oversight review.
2. Issues posed by certain types of proposals.
3. Interfaces with other NSF programs.
4. NSF role in National Primate Plan.
5. Budget outlook for 1979.
6. Making the case for 1980 and beyond.
7. Selection of panelists and reviewers.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Committee Management Coordinator.

[7590-01]

NUCLEAR REGULATORY COMMISSION

AGREEMENTS FOR COOPERATION BETWEEN THE STATES OF NEW YORK, SOUTH CAROLINA AND VIRGINIA AND THE UNITED STATES NUCLEAR REGULATORY COMMISSION

The Commission, in mid-January 1976 adopted the policy of entering into agreements with States that have been delegated responsibility by EPA for issuance of National Pollutant Discharge Elimination System (NPDES) permits under section 402 of the FWPCA.

Although considerable latitude is provided, generally such agreements will embody the principles of the second Nuclear Regulatory Commission/Environmental Protection Agency Memorandum of Understanding (F.R. Vol. 40, No. 251, p. 60115 ff, December 31, 1975) for cooperation in the licensing of nuclear powerplants. In general, agreements will provide for:

The State and NRC to work together to identify and consolidate the environmental information needed for the early issuance by the State of NPDES (section 402) discharge permits.

The State to exercise its best efforts to issue NPDES permits prior to the planned date of issuance by NRC of the final environmental impact statement for the early site approval, construction permit or operating license for each nuclear powerplant.

The State to work closely with NRC to assure that water quality certifications under section 401 of the FWPCA are issued in advance of the planned date of issuance of NRC's final environmental impact statement.

NRC and the State to consider the feasibility of holding joint or concurrent hearings on the State's NPDES permits and NRC's construction permits for nuclear powerplants.

The State and NRC to explore means by which joint or cooperative preparation of parts of environmental impact statements for nuclear powerplants could be accomplished.

The State and NRC to maintain close contact on water quality matters throughout the entire environmental review process.

To date, three such agreements have been consummated. These agreements which are published below are as follows:

"Agreement Between the Virginia State Water Control Board and the U.S. Nuclear Regulatory Commission Pursuant to the Federal Water Pollution Control Act Amendments of 1972 (FWPCA)"—effective October 26, 1977.

"Memorandum of Understanding Between the New York State Board on Electric Generation Siting and the Environment and the Departments of Environmental Conservation and Public Service and the U.S. Nuclear Regulatory Commission"—effective March 30, 1978.

"Agreement Between the State of South Carolina and the U.S. Nuclear Regulatory Commission Pursuant to the Federal Water Pollution Control Act of 1972 (FWPCA)"—effective April 21, 1978.

FOR FURTHER INFORMATION CONTACT:

Bennett L. Harless, Division of Site Safety and Environmental Analysis, U.S. Regulatory Commission, Washington, D.C. 20555, telephone 301-492-8421.

Dated at Washington, D.C., this 1st day of May 1978.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

MEMORANDUM OF UNDERSTANDING BETWEEN THE NEW YORK STATE BOARD ON ELECTRIC GENERATION SITING AND THE ENVIRONMENT AND THE DEPARTMENTS OF ENVIRONMENTAL CONSERVATION AND PUBLIC SERVICE AND THE U.S. NUCLEAR REGULATORY COMMISSION

PURPOSE

This Memorandum of Understanding between the New York State Departments of Environmental Conservation and Public Service, and the New York State Board on Electric Generation Siting and the Environment (Siting Board) and the United States Nuclear Regulatory Commission (NRC), sets forth mutually agreeable principles of cooperation between the Siting Board, the two State agencies, and the NRC which relate to their respective obligations for environmental matters in areas subject to concurrent jurisdiction under State of New York and Federal laws and regulations governing approvals, licensing and regulation of nuclear electric generating facilities.

It is the intent of this Memorandum that the Siting Board, the two State agencies and the NRC regluarly consult and cooperate in exploring and implementing appropriate procedures designed to assure that delays in the siting of electric generation facilities and duplication of effort will be minimized and that effective use will be made of resources of the two State agencies and the NRC, particularly in the areas of professional expertise.

Close cooperation between the signatories will help assure that the goals and policies of State and Federal law and regulation will be carried out efficiently and expeditiously.

IMPLEMENTATION

1. The staffs of the two State agencies and the NRC will explore means whereby the staffs of the State agencies would prepare

M Y 5 7 8 M

V 4 3 / 8 8

analyses for NRC in areas of concurrent jurisdiction, such as, but not necessarily limited to, need for baseload facility, water quality, air quality, terrestrial and aquatic ecology, and land use and aesthetics. The analyses performed by the staffs of the State agencies would be prepared in accordance with specific supplemental agreements and under guidelines and criteria mutually acceptable to both the staff of the State agency preparing the evaluation and the NRC in order to assure that the needs of both are met. Any such agreement(s) will be subject to review and modification by the signatories as necessary.

2. The Siting Board and NRC will consider the feasibility of holding combined or concurrent hearings on the environmental aspects of proceedings before the Siting Board and the NRC, on a case-by-case basis.

3. The staffs of the two State agencies and the NRC will maintain close contact on environmental matters of concurrent jurisdiction during the entire environmental review, including:

(a) Open interagency communications, and mutual cooperation and coordination on all relevant environmental matters; and

(b) A status meeting(s), where appropriate, during the course of the environmental review or subsequent thereto, on any significant new considerations that develop, e.g., a major change in plant design or the identification of factors that could have a significant effect on the environment in areas that were not previously evaluated.

4. In areas of concurrent jurisdiction involving environmental impact where there are significant differences of opinion between the staffs of the two State agencies and NRC, every reasonable attempt will be made to identify and resolve these differences prior to the planned date of issuance of NRC's final environmental statement or the submission of the State agencies prefiled testimony to the Siting Board proceeding, whichever comes first.

5. The parties will explore means by which compensation may be made available to the Siting Board and the two State agencies for activities performed specifically for NRC under specific supplemental agreements to this Memorandum. The terms of any such agreement for compensation to the Board and the two State agencies shall be specified in writing in each supplemental agreement.

6. Nothing in this Memorandum is intended to restrict the statutory authority of either NRC or the Siting Board.

7. This Memorandum shall take effect immediately upon signing by the Chairman of the Siting Board, who is also Chairman of the Department of Public Service, the Commissioner of the Department of Environmental Conservation and the Nuclear Regulatory Commission, and may be terminated upon 30 days notice by any party.

8. This Memorandum shall apply to all pending and future applications for licenses or permits for nuclear electric generating facilities except that, with respect to applications for licenses or permits for facilities docketed prior to the effective date of this Memorandum, it shall only be applied to the maximum extend practicable.

9. The principal NRC contact under this Memorandum shall be the Assistant Director for Environmental Projects. The principal State contact under this Memorandum shall be the Secretary of the Siting Board or his designee.

10. If any provision of this Memorandum, or the application thereof to any person or circumstance is held invalid, the remainder of this Memorandum, and the application of such provisions to other persons or circumstances, other than those as to which it is held invalid, shall not be affected thereby.

Dated: March 8, 1978.

For the New York State Board on Electric Generation Siting and the Environment and Department of Public Service.

CHARLES A. ZIELINSKI,
Chairman.

Dated: March 20, 1978.

For the Department of Environmental Conservation.

PETER A. A. BERLE,
Commissioner.

Dated: March 30, 1978.

For the United States Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

AGREEMENT BETWEEN THE STATE OF SOUTH CAROLINA AND THE U.S. NUCLEAR REGULATORY COMMISSION PURSUANT TO THE FEDERAL WATER POLLUTION CONTROL ACT OF 1972 (FWPCA)

The State of South Carolina, hereinafter referred to as the State, is a permit issuing State under section 402 of the Federal Water Pollution Control Act of 1972. As such the State is not directly affected by the "Second Memorandum of Understanding Regarding Implementation of Certain Nuclear Regulatory Commission and Environmental Protection Agency Responsibilities Under the Federal Water Pollution Control Act (FWPCA) and the National Environmental Policy Act of 1969." However, the State agrees with the principles embodied in the Second Nuclear Regulatory Commission (NRC)/Environmental Protection Agency (EPA) Memorandum and wishes to cooperate with NRC in implementing these principles.

Specifically, these cooperative efforts will extend to requirements for the control and consideration of impacts on water quality and biota associated with the licensing and regulation, including early site approval[1] of the following plants or facilities within South Carolina:

(a) Nuclear power and test facilities,
(b) Nuclear fuel reprocessing facilities,
(c) Uranium isotope enrichment facilities,
(d) Nuclear fuel fabrication plants,
(e) Nuclear waste treatment and storage plants if subject to licensing by NRC.

1. The State and NRC will work together to identify and consolidate the environmental information needed for early evaluations related to impacts on water quality and biota under the FWPCA with the objective that the scope, form and timeliness of the information to be submitted by the applicant satisfy the requirements of both the State and NRC. This will include information needed for issuance of State water quality certifications pursuant to section 401 and NPDES permits pursuant to section 402 (including where applicable section 316(b) considerations regarding best technology available as applied to cooling water intake structures and section 316(a) determinations regarding the granting of alternative effluent limitations for the thermal component of discharges) and information needed to evaluate the environmental impact of the facility based on compliance with FWPCA requirements.

2. The State and NRC will meet, as appropriate, at an early time prior to and/or during the environmental review process for each facility or plant subject to this Agreement to discuss potential impacts on water quality and biota.

3. The State will exercise its best efforts to evaluate the levels of discharges and impacts on water quality and biota pursuant to section 402 and 316(a), as appropriate, and complete cooling water intake structure evaluations pursuant to section 316(b) as far as possible in advance of the planned date of issuance by NRC of the final environmental impact statement for the construction permit for each nuclear power reactor. The State also will exercise its best efforts to make such evaluations as far as possible in advance of the planned date of issuance of the final environmental impact statement for any other plant or facility subject to this Agreement or issuance of early site approvals associated with nuclear power and other facilities.

Further, where possible, the State's comments on NRC's draft environmental impact statement for each such facility or plant will reflect such evaluations. The State will undertake to issue a complete section 402 permit as soon as possible prior to the planned date of authorization by the NRC of any commencement of construction[2] or issuance by NRC of any license, or early site approval, whichever is applicable.

Such permits will contain appropriate terms and conditions for all discharges of pollutants expected during the life of the permit (five years maximum) and terms and conditions with regard to cooling water intake structures and section 316(a) determinations concerning thermal discharges. Additional permit terms and conditions for discharges not contemplated during the life of the permit (such as certain chemical and other releases not expected until operation startup) may be derived from applicable State water quality standards and applicable new source performance standards contained in 40 CFR, Chapter I, Subchapter N. Permits may be reissued, or modified as appropriate, and any reissued or modified permit, to be effective at the commencement of actual discharge as provided above may require additional limitations and controls based on data gathered during the initial permit or may require additional section 316 (a) and (b) studies for the purpose of confirming conclusions reached from previous predictive studies. Applications for permit reissuance as provided above will be evaluated by the State in light of the policy to assure to the maximum extent possible that subsequent considerations regarding impacts on water quality and biota will not result in the need for significant changes in plant design or in cost and benefits of the operation of the facility subsequent to the completion of NRC's environmental review.[3]

4. The State will work closely with NRC to assure that water quality certifications

[1] See 10 CFR Part 2, Appendix A, Paragraph I(c).

[2] The term "commencement of construction" means commencement of construction as defined in 10 CFR 50.10(c).

[3] A facility which has been given § 316(a) alternative effluent limitations is not entitled to the 10-year grace period (or applicable amortization period) provided for in § 306(d) for new sources or in 316(c) for modified sources.

M Y 5 7 8

pursuant to section 401 for the facilities subject to this Agreement that require such certification are issued in advance of the planned date of issuance of NRC staff's final environmental impact statement for the facility.

5. The State and NRC will maintain close contact on water quality and related matters during the entire environmental review, including:

(a) Open interagency communications, and mutual cooperation and coordination on all relevant water quality matters;

(b) A status meeting, where appropriate, after completion of the environmental review or subsequent thereto, of any significant new considerations that develop, e.g., a major change in plant design or the identification of significant considerations regarding impacts on water quality or biota that were not previously evaluated as may result from a major change in plant design.

6. The State and NRC will consider the feasibility of holding combined or concurrent hearings on the State's section 402 permits and NRC's construction permits, or other actions, on a case-by-case basis. If there are areas involving impact on water quality or biota where there are significant differences of opinion between the State and NRC, every reasonable attempt will be made to identify and resolve these differences prior to the planned date of issuance of NRC's final environmental statement.

7. The principal NRC contact under this Agreement shall be the Assistant Director for Environmental Projects. The principal State contact under this Agreement shall be the Deputy Commissioner for the Office of Environmental Quality Control of the South Carolina Department of Health and Environmental Control or his designee.

8. Nothing in this Agreement is intended to restrict the statutory authority of either NRC or the State.

9. This Agreement shall take effect immediately upon signing by the State and the Nuclear Regulatory Commission. The Agreement shall apply to all pending and future applications for licenses or permits subject to this Agreement except that, with respect to applications for licenses or permits for facilities and plants docketed prior to the effective date of the Agreement, it shall only be applied to the maximum extent practicable.

Dated at Columbia, S.C., this 21st day of April 1978.

For the United States Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

Dated at Columbia, S.C., this 21st day of April 1978.

SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL

JOHN E. JENKINS, P.E.,
Deputy Commissioner.

AGREEMENT BETWEEN THE VIRGINIA STATE WATER CONTROL BOARD AND THE U.S. NUCLEAR REGULATORY COMMISSION PURSUANT TO THE FEDERAL WATER POLLUTION CONTROL ACT AMENDMENTS OF 1972 (FWPCA)

The Commonwealth of Virginia, by and through the State Water Control Board, hereinafter referred to as the Board, is a permit issuing State under section 402 of the Federal Water Pollution Control Act Amendments of 1972. As such the Board is not directly affected by the "Second Memorandum of Understanding Regarding Implementation of Certain Nuclear Regulatory Commission and Environmental Protection Agency Responsibilities Under the Federal Water Pollution Control Act (FWPCA) and the National Environmental Policy Act of 1969." However, the Board agrees with the principles embodied in the Second Nuclear Regulatory Commission (NRC)/Environmental Protection Agency (EPA) Memorandum and wishes to cooperate with NRC in implementing those principles.

Specifically, these cooperative efforts will extend to requirements for the control and consideration of impacts on water quality and aquatic biota associated with the licensing and regulation, including early site approval[4] of nuclear power plants within the Commonwealth.

1. The Board and NRC will work together to compile, identify and consolidate the environmental information needed for early evaluations related to impacts on water quality and aquatic biota, with the objective that the scope, form and timeliness of information to be submitted by the applicant satisfy the requirements of both the Board and NRC. This will include information needed for issuance of State water quality certifications pursuant to section 401 and NPDES permits pursuant to section 402 of the FWPCA and the State Water Control Law (including, where applicable, section 316(b) considerations regarding best technology available as applied to cooling water intake structures, and section 316(a) determinations regarding the granting of alternative effluent limitations for the thermal component of discharges), and information needed to evaluate the environmental impact of the facility based on compliance with FWPCA and State Water Control Law requirements.

2. The Board and NRC will meet, as appropriate, at an early time prior to and/or during the environmental review process for each nuclear power plant to discuss potential impacts on water quality and aquatic biota.

3. The Board will exercise its best efforts to evaluate the levels of discharges and impacts on water quality and aquatic biota pursuant to sections 402 and 316(a), as appropriate, and complete cooling water intake structure evaluations pursuant to section 316(b) as far as possible in advance of the planned date of issuance by NRC of the final environmental impact statement for the early site approval, construction permit or operating license for each nuclear power plant.

Further, where possible, the Board's comments on NRC's draft environmental impact statement for each nuclear power plant will reflect such evaluations. The Board will undertake to issue a complete permit pursuant to the State Water Control Law and Section 402 of the FWPCA as soon as possible prior to the planned date of authorization by the NRC of any commencement of construction[5] or issuance by NRC of any license, or early site approval, whichever is applicable.

Such permits will contain appropriate terms and conditions for all discharges of pollutants expected during the life of the permit (five years maximum) and terms and conditions with regard to cooling water intake structures and section 316(a) determinations concerning thermal discharges. Additional permit terms and conditions for discharges not contemplated during the life of the permit (such as certain chemical and other releases not expected until operation startup) may be derived from applicable State water quality standards and applicable new source performance standards contained in 40 CFR, Chapter I, Subchapter N. Permits may be reissued, or modified as appropriate, and any reissued or modified permit, to be effective at the commencement of actual discharge as provided above may require additional limitations and controls based on data gathered during the initial permit or may require additional section 316(a) and (b) studies for the purpose of confirming conclusions reached from previous predictive studies. Applications for permit reissuance as provided above will be evaluated by the Board in light of the policy to assure to the maximum extent possible that subsequent considerations regarding impacts on water quality and aquatic biota will not result in the need for significant changes in plant design or in cost and benefits of the operation of the facility subsequent to the completion of NRC's environmental review.[6]

4. The Board will work closely with NRC to assure that water quality certifications pursuant to section 401 for nuclear power plants are issued in advance of the planned date of issuance of NRC staff's final environmental impact statement for the facility.

5. The Board and NRC will maintain close contact on water quality and related matters during the entire environmental review, including:

(a) Open interagency communications, and mutual cooperation and coordination on all relevent water quality matters;

(b) A status meeting after completion or during the course of the environmental review, to assess any significant new considerations that develop, e.g., a major change inplant design or the identification of significant considerations regarding impacts on water quality or aquatic biota that were not previously evaluated as may result from a major change in plant design.

6. The board and NRC will consider the feasibility of holding combined or concurrent hearings on the Board's section 402 permits and NRC's construction permits, or other actions, on a case-by-case basis. If there are areas involving impact on water quality or aquatic biota where there are significant differences of opinion between the Board and NRC, every reasonable attempt will be made to identify and resolve these differences prior to the planned date of issuance of NRC's final environmental statement.

7. The Board and NRC will explore means by which joint or cooperative preparation of parts of environmental impact statements for nuclear powerplants could be accomplished. NRC will stand ready to assist the Board in every proper fashion with information and technical support.

8. The principal NRC contact under this Agreement shall be the Assistant Director for Environmental Projects. The principal State contact under this Agreement shall be the Deputy Executive Secretary of the State Water Control Board or his designee.

[4] See 10 CFR Part 2, Subpart F.

[5] The term "commencement of construction" means commencement of construction as defined in 10 CFR 50.10(c).

[6] A nuclear power plant which has been given 316(a) alternative effluent limitations is not entitled to the 10-year grace period (or applicable amortization period) provided for in 306(d) for new sources or in 316(c) for modified sources.

V 4 3 / 8 8

9. Nothing in this Agreement is intended to restrict the statutory authority of either NRC or the Board.

10. This Agreement shall take effect immediately upon signing by the Board and the Nuclear Regulatory Commission. This Agreement may be terminated upon 30 days notice by either party. This Agreement shall apply to all future applications for licenses or permits subject to this Agreement.

Dated at Washington, D.C., this 7th day of September 1977.

For the United States Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

Dated at Richmond, Va. this 26th day of October 1977.

For the Virginia State Water Control Board.

R. V. DAVIS,
Executive Secretary.

[Docket No. 50-333]

POWER AUTHORITY OF THE STATE OF NEW YORK

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 35 to Facility Operating License No. DPR-59, issued to Power Authority of the State of New York (the licensee), which revised Technical Specifications for operation of the James A. FitzPatrick, Nuclear Power Plant (the facility) located in Oswego County, N.Y. The amendment is effective as of its date of issuance.

This amendment revises the Technical Specifications to increase the operating minimum critical power ratio (MCPR) based on a reanalysis of Cycle 2 operation between End-of-Cycle minus 2000 megawatt days per ton and End-of-Cycle 2. The amendment also adds an additional exposure dependent MCPR at End-of-Cycle 2 minus 1000 MWD/T.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and, that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated April 5, 1978, (2) Amendment No. 35 to License No. DPR-59, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's public document room, 1717 H Street NW., Washington, D.C. and at the Oswego County Office Building, 46 East Bridge Street, Oswego, N.Y. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 28th day of April 1978.

For the Nuclear Regulatory Commission.

[Docket Nos. 50-443 and 50-444]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE, ET AL. (SEABROOK STATION, UNITS 1 AND 2)

Reconstitution of Board

John M. Frysiak, Esq., was Chairman of the Atomic Safety and Licensing Board for the above proceeding. Mr. Frysiak has tranferred to another Government agency, where he is serving as an Administrative Law Judge.

Accordingly, Ivan W. Smith, Esq., whose address is Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, is appointed Chairman of this Board. Reconstitution of the Board in this manner is in accordance with Section 2.721 of the Commission's Rules of Practice, as amended.

Dated at Bethesda, Md., this 1st day of May 1978.

JAMES R. YORE,
Chairman, Atomic Safety and Licensing Board Panel.

[7590-01]

[Docket No. 40-8502]

WYOMING MINERAL CORP.

Availability of Draft Environmental Statement for Irigaray Uranium Solution Mining Project

Notice is hereby given that a Draft Environmental Statement prepared by the Commission's Office of Nuclear Material Safety and Safeguards related to the proposed Irigaray uranium solution mining project to be located in Johnson County, Wyo., is available for inspection by the public in the Commission's Public Document room at 1717 H Street NW., Washington, D.C. 20555. The Draft Statement is also being made available at the State Clearinghouse, State Planning Coordinator, Office of the Governor, Capitol Building, Cheyenne, Wyo. 82001. Requests for copies of the Draft Environmental Statement (identified as NUREG-0399) should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Division of Technical Information and Document Control.

The Applicant's Environmental Report submitted by Wyoming Mineral Corp. is also available for public inspection at the above-designated locations. Notice of availability of the Applicant's Environmental Report was published in the FEDERAL REGISTER on September 1, 1977 (42 FR 44040).

Interested persons may submit comments on the Draft Environmental Statement for the Commission's consideration. Federal and State agencies are being provided with copies of the Draft Environmental Statement (local agencies may obtain these documents upon request). Comments by Federal, State, and local officials, or other persons received by the Commission will be made available for public inspection at the Commission's Public Document Room in Washington, D.C. Comments are due by June 19, 1978. Upon consideration of comments submitted with respect to the draft environmental statement, the Commission's staff will prepare a final environmental statement, the availability of which will be published in the FEDERAL REGISTER.

Comments on the Draft Environmental Statement from interested persons of the public should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Fuel Cycle and Material Safety.

Dated at Silver Spring, Md. this 26th day of April, 1978.

For the Nuclear Regulatory Commission.

LELAND C. ROUSE,
Chief, Fuel Processing & Fabrication Branch, Division of Fuel Cycle and Material, Safety.

SMALL BUSINESS ADMINISTRATION

LOCAL DEVELOPMENT COMPANY LOANS, HANDICAPPED ASSISTANCE LOANS AND BUSINESS LOANS

Waiver of Administrative Ceilings

SBA has adopted administrative ceilings limiting the amount of financial assistance generally available to applicants for local development company loans (LDC), handicapped assistance loans (HAL) and regular business loans. [§§ 108.502-1(d)(3), 118.31(a)(1) and 122.5(b) of Title 13 CFR].

SBA has also adopted regulations authorizing the waiver of the applicable ceilings upon a determination by SBA that the particular loan furthers a "National, Agency or Regional program objective." [§ 108.502-1(d)(4), 118.31(a)(2) and 122.5(c)]. These sections further provide that SBA may publish from time to time standards or examples illustrating National, agency or regional objectives, and that SBA will not recognize any such objective until it has been published in the FEDERAL REGISTER.

In accordance with the above-cited regulations, the following examples of National, agency and regional objectives are published. To justify waiver of the applicable administrative ceiling, it must appear to SBA's satisfaction that any two of the listed objectives will be advanced by the loan in question. The objectives are:

1. Construction of medical facilities, the need for which has been certified by appropriate local authority;
2. Conservation or production of energy;
3. Creation or preservation of jobs;
4. Performance of a specific Government contract;
5. Stimulation of the economy of a labor surplus area;
6. Conservation of natural resources;
7. Improvement of mass transit facilities;
8. Economic development of depressed urban or rural area;
9. Assistance to broadcasting and cable TV operations;
10. Revitalization of SBA-designated neighborhood business areas.

[8025-01]

[License No. 05/05-5124]

NEIGHBORHOOD FUND, INC.

Issuance of License To Operate as a Small Business Investment Company

On December 20, 1977, a notice was published in the FEDERAL REGISTER (42 FR 63841), stating that The Neighborhood Fund, Inc., located at 7054 South Jeffery Boulevard, Chicago, Ill. 60649, had filed an application with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1977), for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended.

Interested parties were given until the close of business January 4, 1978, to submit their comments to SBA. No comments were received.

Notice is hereby given that having considered the application and all other pertinent information, SBA issued License No. 05/05-5124, on April 3, 1978, to operate as a small business investment company pursuant to Section 301(d) of the Act.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: April 27, 1978.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

[8025-01]

[Application No. 03/03-5137]

SCI MEDIA VENTURES, INC.

Application for License to Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 et seq.), has been filed by SCI Media Ventures, Inc. (applicant), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1977).

The officers, directors, and stockholders of the applicant are as follows:

Herbert P. Wilkins, 5560 Shepherdess Court, Columbia, Md. 21045, President, Treasurer, and Director.
Ronald A. Brown, 1721 Corcoran Street NW., Washington, D.C. 20009, Vice President, Secretary, and Director.
Curtis T. White, 7515 Morningside Drive NW., Washington, D.C. 20012, Director.
Syndicated Communications, Inc., 100 percent Stockholder.

The applicant, a District of Columbia corporation, with its principal place of business located at 1625 I Street NW., Washington, D.C. 20006, will begin operations with $500,000 of paid-in capital and paid-in surplus, derived from the sale of 500,000 shares of common stock.

The applicant will conduct its activities primarily in the District of Columbia, but will consider proposals for assistance in other areas within the United States of America in order to increase diversification of control and ownership of broadcast media.

Applicant intends to provide assistance to all qualified socially or economically disadvantaged small business concerns as the opportunity to profitably assist such concerns is presented.

As a small business investment company under section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed management and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and SBA Rules and Regulations.

Any person may, not later than May 22, 1978, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Washington, D.C.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: April 27, 1978.

Peter F. McNeish,
Deputy Associate Administrator for Investment.

DEPARTMENT OF THE TREASURY

Office of the Secretary

VISCOSE RAYON STAPLE FIBER FROM FRANCE

Antidumping Proceeding

AGENCY: United States Treasury Department.

V 43 / 88

ACTION: Initiation of Antidumping Investigation.

SUMMARY: This notice is to advise the public that a petition in proper form has been received and an antidumping investigation is being initiated for the purpose of determining whether or not imports of viscose rayon staple fiber from France are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael E. Crawford, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On March 28, 1978, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of Avtex Fibers, Inc., Valley Forge, Pa., a domestic producer of the subject merchandise, indicating a possibility that viscose rayon staple fiber from France is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

For purposes of this notice, the term "viscose rayon staple fiber" refers to viscose rayon staple fiber, except solution dyed, in non-continuous form, not carded, not combed and not otherwise processed, wholly of filaments (except laminated filaments and plexiform filaments).

Margins of dumping are alleged which, based on a comparison of sales to the U.S. to sales in the home market, range from 13 percent to 16 percent. Petitioner has alleged, however, that sales in France of viscose rayon staple fiber are being made at prices below the cost of production as defined in section 205(b) of the Act (19 USC 164). A comparison of sales to the U.S. and the constructed value of rayon staple fiber in France as calculated and alleged by petitioner yields possible dumping margins from 64 percent to 67 percent. Treasury's investigation will seek to determine whether French home market sales are being made at prices below the cost of production as defined in section 205(b) and, if so, will disregard such sales in the calculation of foreign market value. If insufficient sales, either in the home market or to countries other than the U.S., remain at not less than the cost of production, then constructed value will be employed as a basis of fair value.

There is evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States that produces viscose rayon staple fiber. This information indicates that imports of viscose rayon staple fiber from France are underselling domestic manufacturers by margins that are completely accounted for by the alleged dumping margins. Petitioner has supplied information indicating that it has incurred significant losses from 1975-1977, that it has been operating at far below operating capacity over the same period and that it has been unable to raise its prices due to lower priced imports.

Imports of viscose rayon staple fiber from France increased in both absolute and relative terms in 1977 compared to 1976. In addition, Treasury is simultaneously initiating three antidumping investigations with regard to this product from Finland, Italy, and Sweden and is presently conducting an antidumping investigation of this product from Austria. Imports from Belgium of this product were also recently subjected to an antidumping investigation in which a "Determination of Sales at Less Than Fair Value" was published in the FEDERAL REGISTER on May 1, 1978 (43 FR 18619).

The cumulative effect of imports of a single fungible product from more than one country must, when appropriate, be considered in assessing the injurious effects of alleged "less than fair value" imports. When imports from France are cumulated with those alleged to exist from Finland, Italy, Sweden, Austria and Belgium, the level of import penetration is approximately 10 percent of current U.S. consumption. Accordingly, based upon available information of injury resulting from sales at less than fair value, no "substantial doubt" of injury exists and no reference of this case to the ITC will be made.

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29) and having determined that there are grounds for doing so, the United States Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

This notice is published pursuant to section 153.30 of the Customs Regulations (19 CFR 153.30).

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

APRIL 28, 1978.

[FR Doc. 78-12270 Filed 5-4-78; 8:45 am]

[4810-22]

VISCOSE RAYON STAPLE FIBER FROM FINLAND

Antidumping Proceeding

AGENCY: United States Treasury Department.

ACTION: Initiation of Antidumping Investigation.

SUMMARY: This notice is to advise the public that a petition in proper form has been received and an antidumping investigation is being initiated for the purpose of determining whether or not imports of viscose rayon staple fiber from Finland are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael E. Crawford, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On March 28,1978, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of Avtex Fibers, Inc., Valley Forge, Pa. a domestic producer of the subject merchandise, indicating a possibility that viscose rayon staple fiber from Finland is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

For purposes of this notice, the term "viscose rayon staple fiber" refers to viscose rayon staple fiber, except solution dyed, in non-continuous form, not carded, not combed and not otherwise processed, wholly of filaments (except laminated filaments and plexiform filaments).

Margins of dumping are alleged which, based on a comparision of sales to the United States to sales in the home market, range from 20 percent to 23 percent. Petitioner has alleged, however, that sales in Finland of viscose rayon staple fiber are being made at prices below the cost of production as defined in section 205(b) of the Act (19 U.S.C. 164). A comparison of sales to the United States and the constructed value of rayon staple fiber in Finland as calculated and alleged by petitioner yields possible dumping margins from 57 percent to 61 percent. Treasury's investigation will seek to determine whether Finnish home market sales are being made at prices below the cost of production as defined in section 205(b) and, if so, will disregard such sales in the calculation of foreign market value. If insufficient sales, either in the home market or to countries other than the United States, remain at not less than the cost of production, then constructed value will be employed as a basis of fair value.

There is evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States that produces viscose rayon staple fiber. This information indicates that imports of viscose rayon staple fiber from Finland are underselling domestic manufacturers by margins that are completely accounted for by the alleged dumping margins. Petitioner has supplied information indicating that it has incurred significant losses from 1975-1977, that it has been operating at far below operating capacity over the same period and that it has been unable to raise its prices due to lower priced imports.

Imports of viscose rayon staple fiber from Finland increased in both absolute and relative terms in 1977 compared to 1976. In addition, Treasury is simultaneously initiating three antidumping investigations with regard to this product from France, Italy and Sweden and is presently conducting an antidumping investigation of this product from Austria. Imports from Belgium of this product were also recently subjected to an antidumping investigation in which a "Determination of Sales at Less Than Fair Value" was published in the FEDERAL REGISTER on May 1, 1978 (43 FR 18619).

The cumulative effect of imports of a single fungible product from more than one country must, when appropriate, be considered in assessing the injurious effects of alleged "less than fair value" imports. When imports from Finland are cumulated with those alleged to exist from France, Italy, Sweden, Austria and Belgium, the level of import penetration is approximately 10 percent of current U.S. consumption. Accordingly, based upon available information of injury resulting from sales at less than fair value, no "substantial doubt" of injury exists and no reference of this case to the ITC will be made.

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29) and having determined that there are grounds for doing so, the United States Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

This notice is published pursuant to § 153.30 of the Customs Regulations (19 CFR 153.30).

VISCOSE RAYON STAPLE FIBER FROM ITALY

Antidumping Proceeding

AGENCY: United States Treasury Department.

ACTION: Initiation of Antidumping Investigation.

SUMMARY: This notice is to advise the public that a petition in proper form has been received and an antidumping investigation is being initiated for the purpose of determining whether or not imports of viscose rayon staple fiber from Italy are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael E. Crawford, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On March 28, 1978, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of Avtex Fibers, Inc., Valley Forge, Pa., a domestic producer of the subject merchandise, indicating a possibility that viscose rayon staple fiber from Italy is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

For purposes of this notice, the term "viscose rayon staple fiber" refers to viscose rayon staple fiber, except solution dyed, in non-continuous form, not carded, not combed and not otherwise processed, wholly of filaments (except laminated filaments and plexiform filaments).

Margins of dumping are alleged which, based on a comparison of sales to the United States to sales in the home market, range from 17 percent to 20 percent. Petitioner has alleged, however, that sales in Italy of viscose rayon staple fiber are being made at prices below the cost of production as defined in section 205(b) of the Act (19 USC 164). A comparison of sales to the U.S. and the constructed value of rayon staple fiber in Italy as calculated and alleged by petitioner yields possible dumping margins from 59 percent to 63 percent. Treasury's investigation will seek to determine whether Italian home market sales are being made at prices below the cost of production as defined in section 205(b) and, if so, will disregard such sales in the calculation of foreign market value. If insufficient sales, either in the home market or to countries other than the United States, remain at not less than the cost of production, then constructed value will be employed as a basis of fair value.

There is evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States that produces viscose rayon staple fiber. This information indicates that imports of viscose rayon staple fiber from Italy are underselling domestic manufacturers by margins that are completely accounted for by the alleged dumping margins. Petitioner has supplied information indicating that it has incurred significant losses from 1975-1977, that it has been operating at far below operating capacity over the same period and that it has been unable to raise its prices due to lower priced imports.

Imports of viscose rayon staple fiber from increased in both absolute and relative terms in 1977 compared to 1976. In addition, Treasury is simultaneously initiating three antidumping investigations with regard to this product from Finland, France and Sweden and is presently conducting an antidumping investigation of this product from Austria. Imports from Belgium of this product were also recently subjected to an antidumping investigation in which a "Determination of Sales at Less Than Fair Value" was published in the FEDERAL REGISTER on May 1, 1978 (43 FR 18619).

The cumulative effect of imports of a single fungible product from more than one country must, when appropriate, be considered in assessing the injurious effects of alleged "less than fair value" imports. When imports from Italy are cumulated with those alleged to exist from Finland, France, Sweden, Austria and Belgium, the level of import penetration is approximately 10 percent of current U.S. consumption. Accordingly, based upon available information of injury resulting from sales at less than fair value, no "substantial doubt" of injury exists and no reference of this case to the ITC will be made.

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29) and having determined that there are grounds for doing so, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

VISCOSE RAYON STAPLE FIBER FROM SWEDEN

Anitdumping Proceeding

AGENCY: U.S. Treasury Department.

ACTION: Initiaton of antidumping investigation.

SUMMARY: This notice is to advise the public that a petition in proper form has been received and an antidumping investigation is being initiated for the purpose of determining whether or not imports of viscose rayon staple fiber from Sweden are being, or are likely to be, sold at less than fair value within the meaning of the Anitdumping Act of 1921, as amended.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael E. Crawford, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On March 28, 1978, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of Avtex Fibers, Inc., Valley Forge, Pa., a domestic producer of the subject merchandise, indicating a possibility that viscose rayon staple fiber from Sweden is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

For purposes of this notice, the term "viscose rayon staple fiber" refers to viscose rayon staple fiber, except solution dyed, in noncontinuous form, not carded, not combed, and not otherwise processed, wholly of filaments (except laminated filaments and plexiform filaments).

Margins of dumping are alleged which, based on a comparison of sales to the United States to sales in the home market, range from 13 percent to 16 percent. Petitioner has alleged, however, that sales in Sweden of viscose rayon staple fiber are being made at prices below the cost of production as defined in section 205(b) of the Act (19 U.S.C. 164). A comparison of sales to the United States and the constructed value of rayon staple fiber in Sweden as calculated and alleged by petitioner yields possible dumping margins from 60 percent to 64 percent. Treasury's investigation will seek to determine whether Swedish home market sales are being made at prices below the cost of production as defined in section 205(b) and, if so, will disregard such sales in the calculation of foreign market value. If insufficient sales, either in the home market or to countries other than the United States, remain at not less than the cost of production, then constructed value will be employed as a basis of fair value.

There is evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States that produces viscose rayon staple fiber. This information indicates that imports of viscose rayon staple fiber from Sweden are underselling domestic manufacturers by margins that are completely acoounted for by the alleged dumping margins. Petitioner has supplied information indicating that it has incurred significant losses from 1975-1977, that it has been operating at far below operating capacity over the same period and that it has been unable to raise its prices due to lower priced imports.

Imports of viscose rayon staple fiber from Sweden increased in both absolute and relative terms in 1977 compared to 1976. In addition, Treasury is simultaneously initiating three antidumping investigations with regard to this product from Finland, France, and Italy and is presently conducting an antidumping investigation of this product from Austria. Imports from Belgium of this product were also recently subjected to an antidumping investigation in which a "Determination of Sales at Less Than Fair Value" was published in the FEDERAL REGISTER on May 1, 1978 (43 FR 18619).

The cumulative effect of imports of a single fungible product from more than one country must, when appropriate, be considered in assessing the injurious effects of alleged "less than fair value" imports. When imports from Sweden are cumulated with those alleged to exist from Finland, France, Italy, Austria, and Belgium, the level of import penetration is approximately 10 percent of current U.S. consumption. Accordingly, based upon available information of injury resulting from sales at less than fair value, no "substantial doubt" of injury exists and no reference of this case to the ITC will be made.

Having conducted a summary investigation as required by § 153.29 of the Customs regulations (19 CFR 153.29) and having determined that there are grounds for doing so, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

INTERSTATE COMMERCE COMMISSION

[Notice No. 653]

ASSIGNMENT OF HEARINGS

MAY 2, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the official docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

No. MC 133937 (Sub-No. 22), Carolina Cartage Co., Inc., is now assigned for hearing July 11, 1978 (4 days), at Columbia, SC, at a location to be later designated.

No. MC-F 13266, Mason & Dixon Lines—Purchase—J. W. Craig, doing business as City Transfer & Storage Co., and MC 59583 (Sub-Nos. 163 and 164), the Mason & Dixon Lines, Inc., are now assigned for hearing July 17, 1978 (1 week), at Columbia, SC, at a location to be later designated.

No. MC 720 (Sub-No. 36), Bird Trucking Co., Inc., is now assigned for hearing June 6, 1978 (2 days), at Madison, WI, at a location to be later designated.

No. MC 75281 (Sub-No. 9), Righter Trucking Co., Inc., now being assigned June 5, 1978 (1 week), at St. Louis, MO, in a hearing room to be later designated.

No. MC 126679 (Sub-No. 6), Dennis Truck Lines, Inc., is now assigned for hearing July 17, 1978 (1 week), at Atlanta, GA, at a location to be later designated.

No. MC 87109 (Sub-No. 25), Tidewater Inland Express, Inc., doing business as T.I.E., Inc., is now assigned for hearing July 24, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 38]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission by June 5, 1978. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s) or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-F-C 78444. By order dated March 14, 1978, Division 3, acting as an Appellate Division approved the transfer to TRANS-NATIONAL FREIGHT, INC., 1200 Spruce Street, Roselle, NJ 07203, of that portion of the operating rights of Truck Transport, Inc., 29 Clayton Hills Lane, St. Louis, MO 63131, set forth in No. MC 115331 E-25, E-26, E-27, E-30, and a portion of E-44, published June 9, 1975, February 10, 1975, April 8, 1975, June 9, 1975, and April 28, 1976, respectively, which became effective 15 days after publication unless that day was a Saturday, Sunday, or legal holiday in DC, in which case the effective date is the next working day, and a portion of the operating rights of transferor as set forth in No. MC 115331 (Sub-No. 189), issued October 12, 1971, as follows: *Chemicals*, in containers, from and to points in NJ, AR, IL, IA, KS, MN, MO, NE, OK, WI, IN, KY, WV, PA, OH, MI, CA, TN, and NV. Leonard A. Jaskiewicz, 1730 M Street NW., Washington, DC 20036, and William J. Hanlon, 55 Madison Avenue, Morristown, NJ 07960, attorneys for transferor and transferee, respectively.

[No. 36437]

DEPARTMENT OF DEFENSE—PETITION FOR DECLARATORY ORDER

Establishing Effective Date of 3 Percent Increase

AGENCY: Interstate Commerce Commission.

ACTION: Notice of order to carriers having made charges other than specified in tariffs in effect at the time.

SUMMARY: Upon petition of the administrator of General Services (GSA) in a proceeding where it was found that collection of 3 percent increased charges on household goods prior to the effective date of a valid tariff constituted overcharges in violation of the Interstate Commerce Act the Commission issued the order reproduced below. By this Notice, the Commission wishes to protect the rights of any persons not parties to this proceeding and to give them an opportunity to be heard. Opening statements of fact and argument in opposition to the order reproduced below must be filed on or before May 25, 1978, with any replies due 20 days thereafter.

It is ordered: Within 90 days from publication in the FEDERAL REGISTER, each motor carrier member of HGCB shall:

1. Identify each shipper who paid charges pursuant to the "conversion chart" applied in lieu of the suspended tariff supplements identified in the division's report served October 14, 1977;

2. Notify each such shipper of the difference between the amount paid, and the charges computed on the basis of tariffs in effect on May 14, 1976;

3. With this notice, provide instructions for filing claims and furnish the necessary forms.

ADDRESS: Send notice of intent to participate and address to Office of Proceedings, (Room 5342), Interstate Commerce Commission, Washington, D.C., 20423.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, Deputy Director, or Harvey Gobetz, Assistant Deputy Director, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, 202-275-7693.

Issued in Washington, D.C., April 26, 1978.

By the Commission, Division 1, Acting as an Appellate Division, Commissioners Brown, Gresham, and Christian.

H. G. HOMME, Jr.,
Acting Secretary.

DEPARTMENT OF DEFENSE—PETITION FOR DECLARATORY ORDER

RE: ESTABLISHING EFFECTIVE DATE OF 3 PERCENT INCREASE

In a report served October 14, 1977, Division 2 found that collection of 3 percent increased charges on household goods prior to the effective date of a valid tariff constituted overcharges in violation of Section 217 of the Interstate Commerce Act.

By petition filed November 14, 1977, Household Goods Carriers' Bureau, Inc. (HGCB), seeks administrative review of this report. Replies were filed by the Department of Defense on December 5, 1977 and by Aerospace Industries Association of America, Inc., on December 14, 1977. The petition does not show any material errors in the division's statement and evaluation of the facts, conclusions of law, or findings, and does not raise any matters of fact or law not adequately considered and properly disposed of in the division's report.

By petition filed November 14, 1977, the Administrator of General Services (GSA), seeks leave to intervene in this proceeding pursuant to Rule 70 of the Commission's General Rules of Procedure (49 CFR 1100.70), and to file a petition to "remove uncertainties arising" out of our report served October 14, 1977, finding that the lawful effective dates for the 3 percent increase filed by HGCB, contemplated in I. & S. Docket No. M-29035, were July 12 and July 25, 1976. This petition is treated as a petition for specific relief, rather than modification of the outstanding declaratory order.

A reply was filed by HGCB alleging (1) that GSA has not met the requirements of Rule 70 and (2), that the Commission has no jurisdiction to grant the substantive relief sought by GSA.

GSA substantially meets the requirements of Rule 70 and it is permitted to intervene and its tendered petition is accepted for filing.

The relief specifically sought by GSA is an order by this Commission with respect to the overcharges arising during the period from May 15, 1976, to July 12, or July 25, 1976, as applicable, making the following requirements:

1. Respondent carriers should identify each affected shipper;

2. Respondent carriers should notify each shipper of the amount of refund due on grounds of overcharge;

3. Respondent carriers, at time of notification, should give instructions for filing claims, and furnish necessary forms.

The Aerospace reply to HGCB's petition also supports these requests by GSA.

Although, under section 204a(2) of the act, we do not have jurisdiction to order motor carriers to pay overcharges, our general authority extends to discovery in aid of claims shippers may make of motor carriers pursuant to section 204a(2) of the Act. Cf. Loss and Damage Claims, 340 ICC 515, 539-543 (1972). Under the national transportation plicy, it is our responsibility to "promote safe, adequate, economical and efficient service * * *." Section 204(a)(6) orders us to "administer, execute and enforce all provisions of [Part II]" and "to make all necessary orders in connection therewith * * *." This includes the provision in section 217(b) that no motor carrier shall "collect or receive a greater or less or different compensation * * * than the rates, fares and charges specified in the tariffs in effect at that time * * *." As indicated in *American Trucking Assns. v. United States*, 344 U.S. 298, 313 (1952), "the power under § 204(a)(6) is geared to and bounded by the limits of the regulatory system of the Act which it suplements." We do not require the payment of money but merely direct the carriers to identify and notify affected shippers and provide them with the necessary instructions and forms to file overcharge claims. If, after the claims are filed, the carriers refuse to return the overcharged amounts to the shippers, the shippers' only recourse is still to seek money judgments against the carriers in court pursuant to section 204a(2). Identification and notification requirements in no way impinge on the jurisdiction of the courts. These are not burdensome because the information to be furnished is in the possession of the carriers.

It is ordered: Within 90 days from publication in the FEDERAL REGISTER, each motor carrier member of HGCB shall:

1. Identify each shipper who paid charges pursuant to the "conversion chart" applied in lieu of the suspended tariff supplements identified in the division's report served October 14, 1977;

2. Notify each such shipper of the difference between the amount paid, and the charges computed on the basis of tariffs in effect on May 14, 1976;

3. With this notice, provide instructions for filing claims and furnish the necessary forms.

4. This order shall be published in the FEDERAL REGISTER to protect the rights of other persons who might have an interest in this issue, with an invitation to intervene.

Decided April 26, 1978.

By the Commissions, Division 1, Acting as an Appellate Division, Commissioners Brown, Gresham, and Christian.

H. G. HOMME, Jr.,
Acting Secretary.

[M-127, Amdt. 1, pub. May 2, 1978]

CIVIL AERONAUTICS BOARD.

NOTICE OF ADDITION OF ITEMS TO THE MAY 5, 1978 AGENDA

TIME AND DATE: 1 p.m.—May 5, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 7a. Docket 32520, excess baggage charges proposed by United (BPDA); 7b. Passenger fare increases in the Honolulu-Pago Pago market proposed by Pan American (BPDA).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION:

May 5 is the last regularly scheduled meeting at which the Board can consider these proposals. Item 7a must be decided by May 10, and Item 7b by May 5. Accordingly, the following Members have voted that agency business requires the addition of these items to the May 5, 1978, agenda and that no earlier announcement of these additions was possible:

Chairman Alfred E. Kahn
Vice Chairman G. Joseph Minetti
Member Lee R. West
Member Richard J. O'Melia
Member Elizabeth E. Bailey

10

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.

TIME AND DATE: 10 a.m., Wednesday, May 10, 1978.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Summary Agenda: Because of their routine nature, no substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board requests that an item be moved to the discussion agenda.

V 43 / 88

1. Proposed expansion of the System's computer hardware monitoring program.
2. Proposed interpretation of Regulation A (Extensions of Credit by Federal Reserve Banks) to provide that a bankers' acceptance secured by a field warehouse receipt covering readily marketable staples is eligible for discount by a Federal Reserve Bank despite the fact that the warehouseman is an employee of the owner of the goods. (Proposed earlier for public comment; Docket No. R-0135).

Discussion Agenda:

1. Proposed adoption of a Uniform Interagency Bank Rating System.
2. Proposal to publish for comment as an additional permissible nonbanking activity for bank holding companies: underwriting property and casualty insurance related to extensions of credit.
3. Proposed amendments to Regulations C (Securities Credit by Persons Other Than Banks, Brokers, or Dealers), T (Credit by Brokers and Dealers), and U (Credit by Banks for the Purpose of Purchasing or Carrying Margin Stocks) to provide that only those dealers submitting bid and offer quotations to an automated quotation system will be counted in preparing the Board's Over the Counter list of margin stocks. (Proposed earlier for public comment; Docket No. R-0147).
4. Any agenda items carried forward from a previously announced meeting.

UNITED STATES POSTAL SERVICE (BOARD OF GOVERNORS).

NOTICE OF VOTE TO CLOSE MEETINGS

On May 2, 1978, the Board of Governors of the United States Postal Service unanimously voted to close to public observation a portion of its meetings currently scheduled for May 19 and June 6, 1978. Each of the members of the Board voted in favor of partially closing these meetings, which are expected to be attended by the following persons: Governors Wright, Holding, Ching, Codding, Hardesty, and Robertson; Postmaster General Bolger; Deputy Postmaster General Conway, and Secretary to the Board Cox.

The portion of the meeting to be closed will consist of a discussion of the Postal Service's possible strategies and positions in current collective bargaining negotiations involving parties to the 1975 National Agreement between the Postal Service and four labor organizations representing certain postal employees, which is scheduled to expire in July of 1978.

The Board of Governors is of the opinion that public access to any discussion of possible strategies that Postal Service management may decide to adopt, or the positions it may decide to assert, in any collective bargaining sessions that may take place would be likely to frustrate action to carry out those strategies or assert those positions successfully. In making this determination, the Board is aware that the effectiveness of the collective bargaining process in labor-management relations has traditionally depended on the ability of the parties to prepare strategies and formulate positions without prematurely disclosing them to the opposite party. The public has a particular interest in the integrity of this process as it relates to the Postal Service, since the outcome of the negotiations between the Postal Service and the various postal unions, and consequently the cost, quality and efficiency of postal operations, may be adversely affected if the process is altered.

Accordingly, the Board of Governors has determined that, pursuant to section 552b(c)(3) of title 5, United States Code, and § 7.3(c) of title 39, Code of Federal Regulations, the portion of the meeting to be closed is exempt from the open meeting requirement of the Government in the Sunshine Act (5 U.S.C. 552b(b)), because it is likely to disclose information prepared for use in connection with the negotiation of collective bargaining agreements under chapter 12 of title 39, United States Code, which is specifically exempted from disclosure by section 410(c)(3) of title 39, United States Code. The Board has determined further that, pursuant to section 552b(c)(9)(B) of title 5, United States Code, and § 7.3(i) of title 39, Code of Federal Regulations, the discussion is exempt, because it is likely to disclose information the premature disclosure of which is likely to frustrate significantly proposed Postal Service action. Finally, the Board of Governors has determined that the public has an interest in maintaining the integrity of the collective bargaining process and that the public interest does not require that the Board's discussion of its possible collective bargaining strategies and positions be open to the public.

In accordance with section 552b(f)(1) of title 5, United States Code, and § 7.6(a) of title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in his opinion the portion of the meeting to be closed may properly be closed to public observation, pursuant to sections 552b(c)(3) and 552b(c)(9)(B) of title 5 and section 410(c)(3) of title 39, United States Code, and §§ 7.3(c) and 7.3(i) of title 39, Code of Federal Regulations.

LOUIS A. COX,
Secretary.

[42 CFR Part 51f]

PROJECT GRANTS FOR GENETIC DISEASES TESTING AND COUNSELING PROGRAMS

Notice of Proposed Rulemaking

AGENCY: Public Health Service, HEW.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice sets forth proposals for implementing the administration of project grants for genetic diseases testing and counseling programs under the amendments to title XI of the Public Health Service Act. Interested parties are invited to submit written comments and recommendations concerning the proposals, as well as suggestions for alternative methods of implementing the programs. After consideration of the material received in response to this notice, the Secretary of Health, Education, and Welfare will issue final regulations.

DATE: Comments must be received by July 5, 1978.

ADDRESS: Written comments and recommendations should be submitted to the Director, Division of Policy Development, Bureau of Community Health Services, Health Services Administration, Room 6-17, 5600 Fishers Lane, Rockville, Md. 20857. All comments received in timely response to this notice will be considered and will be available for public inspection in the above-named office on weekdays between the hours of 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT:

Audrey Manley, M.D., Acting Chief, Genetic Services Branch, Office of Maternal and Child Health, Bureau of Community Health Services, Room 6-40, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-1080.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Health, with the approval of the Secretary of Health, Education, and Welfare, proposes to issue regulations to implement amendments to title XI of the Public Health Service Act (42 U.S.C. 300b et seq.). These amendments were enacted by title IV of Pub. L. 94-278, the "National Sickle Cell Anemia, Cooley's Anemia, Tay-Sachs, and Genetic Diseases Act." The provisions of this Act replace former parts A and B of title XI of the Public Health Service Act, which authorized grants to programs for sickle cell anemia and Cooley's anemia. The new Act provides a broader and more flexible authority, enabling the Secretary to make grants for testing and counseling services for a wide range of genetic diseases.

The issues raised by the Act and the Department's proposed approaches for resolving them are as follows:

1. *Diseases to be included in program coverage.* The Act authorizes the Secretary to make grants for testing and counseling programs for genetic diseases, but does not explicitly require coverage of any particular disease, or group of diseases, under these programs. Over 2,000 different genetic diseases have been identified, so that coverage of each of these diseases under any program would be highly impractical, if not impossible, However, efficient utilization of genetic expertise and laboratory facilities is not limited to one disease, and, on a realistic basis, efficient utilization of such resources dictates the inclusion of as many diseases as feasible. Therefore, a determination is needed as to how many and which diseases are to be covered under the programs.

Nine diseases are specifically mentioned in the Act—sickle cell anemia, Cooley's anemia, Tay-Sachs disease, cystic fibrosis, dysautonomia, hemophilia, retinitis pigmentosa, Huntington's chorea, and muscular dystrophy. It is recognized that these nine genetic diseases are a heterogeneous group: (1) they are not necessarily the most prevalent or serious; (2) accurate screening and diagnostic procedures are not available for all; and (3) the service needs created by these nine diseases are disparate because of wide variations in such factors as the age of onset and the degree of disability. It is clear, however, that the statutory intent is to provide services for a broad range of genetic disorders inclusive of, but not limited to, the nine diseases listed in the Act, and the Secretary believes that coverage of these nine, as an initial requirement for each grantee, is a reasonable way to assure that the programs carry out the law. Therefore, the Secretary proposes that each project be required to provide services with respect to at least the nine specified diseases. If, however, there has been only a case or two of any one of those diseases in a project's catchment area within the past several years, the project would be required only to establish a plan for, and be capable of immediately implementing services for, that particular disease.

The Secretary proposes to develop a broad-based genetic disease program inclusive of, but not limited to, the nine diseases specified in the statute. The grantee would determine the additional conditions to be addressed based upon (1) a determination of priority needs within the proposed catchment area, and (2) the availability of reliable screening and diagnostic techniques for the detection of genetic disorders in the prenatal, neonatal, or early childhood periods, and the detection of carrier states. The Secretary would approve extended program coverage of additional genetic disorders in categories of early detection and carrier status, taking into account: (1) the need for such services; (2) the prevalence of the disease; (3) availability of reliable testing methods; and (4) availability of resources. Comments are solicited on the feasibility of this approach.

2. *Essential program services.* The Secretary believes that each grantee must be required to provide a certain minimum set of essential services, to insure maximum program effectiveness and uniformity. The Secretary proposes that the essential services of an approvable project include testing and confirmatory diagnostic procedures, counseling, referral for medical management, followup to assure that referrals have been accomplished, and facilitating services (such as transportation) when needed. Such services could be provided directly or indirectly, and at more than one location. The Secretary also proposes that each grantee be required to provide these services by appropriately qualified personnel who meet applicable certification and/or licensure requirements, and also that each grantee be required to make the services available to all residents of the catchment area.

3. *Catchment area.* The Act contains no explicit requirements as to the size of a catchment area to be served by a project. However, the Act does require the testing and counseling programs to be established and operated "primarily in conjunction with other existing health programs, including programs assisted under Title V of the Social Security Act." Fifty States currently have a statewide Maternal and Child Health and Crippled Children's Services Program; approximately 44 States have statewide screening programs for inborn errors of metabolism in newborn infants; and approximately 33 States have university-based genetic centers under State plans for genetic services, 21 of which are assisted under Title V of the Social Security Act. The Secretary feels that utilization of these existing programs and resources would facilitate the establishment of statewide networks of genetic disease services, and allow for the most rapid and effective use of funds under a grant or contract (Section 1104(b)). Therefore, the Secretary proposes that the minimum catchment area be no smaller than a State. Suggestions are solicited as to the appropriateness of this or any other catchment area proposal.

4. *Administrative requirements.* Section 1104(a) of the Act sets forth several requirements for project administration. For example, each project must be administered by or under the supervision of the applicant, each applicant must provide for community representation where appropriate in the development and operation of the project, and each applicant must establish proper fiscal controls and accounting procedures. Similar requirements were in effect under the previous title XI sickle cell and Cooley's anemia programs. Comments relating to past experience, as well as suggestions for current implementation of these requirements, are invited.

Section 1104(a)(2) of the Act, relating to confidentiality of medical records and other information, also closely parallels a similar provision under the former legislation, with one significant modification. Section 1104(a)(2) specifically requires "informed consent" of the patient (or his guardian) to release identifying information. The Secretary invites suggestions as to how this requirement should be implemented and identification of foreseeable problems in its application, particularly when program services are provided by a third party.

5. *Criteria for evaluation of grant applications.* The act requires that in making a grant for testing and counseling programs, the Secretary shall "take into account the number of persons to be served by the program • • • and the extent to which rapid and effective use will be made of grant funds" (section 1104(b)). The Secretary proposed to interpret the latter half of this provision through use of the following specific criteria: (1) how well the requirements set forth in the regulations for approval of applications have been met; (2) the cost effectiveness of the proposal; (3) the feasibility of the plan for providing services and the rapidity with which services can be made available; (4) the extent to which services will be integrated with other existing programs, including title V programs and federally assisted sickle cell clincis in the catchment area; (5) the extent to which the program is part of a network of services which covers the catchment area; and (6) the soundness of the management capability of the applicant. The Secretary invites comments as to the utility of these standards, and suggestions as to other appropriate criteria.

6. *Priority for areas in greatest need.* Section 1104(b)(2) requires the Secretary to "give priority to programs operating in areas which the Secretary determines have the greatest number of persons who will benefit from and are in need of the services provided under such programs." Precise determination of the number of people in need of these programs is impossible, because uniform prevalence data for genetic diseases are not available. A significant proportion of genetic diseases, however, is found in the general population and is not specific to any one identifiable population group. Consequently, the Secretary believes that, if the programs do address coverage of a group of diseases, the primary determination of greatest need should be based on the population density of the proposed catchment area.

As stated above, the Secretary must also take into consideration the estimated unmet need for the services in the area. Suggestions are invited as to what factors should be considered in making this determination.

7. *Special consideration for prior sickle cell grantees.* Section 1104(c) requires the Secretary, in making grants under section 1101, to "give special consideration to applications from entities that received grants from, or entered into contracts with, the Secretary for the preceding fiscal year for the conduct of comprehensive sickle cell centers or sickle cell screening and education clinics." One of several different interpretations of the "special consideration" requirement could be adopted.

One possible approach, for example, would allow for "special consideration" in terms of a priority, in the event that the previous sickle cell grantee has fully satisfied all other statutory and regulatory requirements and is otherwise equal in all respects to alternative applicants. A different approach would allow continued funding for such applicants on a transitional basis if: (1) It is determined that the individual program has been effective and is still needed, (2) that the sickle cell services would be terminated or otherwise rendered ineffective during a transitional period of establishing new, more inclusive programs, and (3) that the applicant shows that it will investigate and, where in the judgment of the Secretary it is feasible and appropriate, take steps to become a comprehensive project as described above. The Secretary invites suggestions on how to implement this statutory provision.

Dated: March 20, 1978.

JULIUS B. RICHMOND,
Assistant Secretary for Health.

Approved: April 24, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary.

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

V 43 / 88

[4510-27]

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

NEW GENERAL WAGE DETERMINATION DECISIONS

ALABAMA—AL78-1045.

GROUP III	9.55	.60	.50	.75	.10
GROUP IV	9.75	.60	.50	.75	.10
GROUP V	10.05	.60	.50	.75	.10

CLASSIFICATION DEFINITIONS

LABORERS:

GROUP I - Carpenter tenders; salamander tenders; dump man and ticket takers on stock piles; flagman; loading trucks under bins, hoppers and conveyors track men and all other general laborers

GROUP II - Air tool operators; cement handler (bulk or sack); chain or concrete saw; deck hands; dump man on earth fill; grade checkers on cuts and fills; georgie buggies man; material batch hopper man; scale man; material mixer man (except on manholes, coffer dams, abutments and pier hole men working below ground); riprap pavers rock, block or brick; signalman; scaffolds over 10 ft. not self-supported from ground up; skip-man on concrete paving; vibrator man; wire mesh setters on concrete paving; all work in connectin with sewer, water, gas gasoline, oil, drainage pipe, conduit pipe, tile and duct lines and all other pipe lines; power tool operator; all work in connection with hydraulic or general dredging operations; form setter helpers; puddlers (paving only)

GROUP III - Crusher feeder; men handling creosote ties or creosote materials; men working with and handling epoxy material or materials (where special protection is required); head pipe layer on sewer work; topper of standing trees; batter board man on pipe and ditch work; feeder man on wood pulverizers; board and willow mat weavers and cable tiers on river work; all laborers working underground tunnels where compressed air is not used.

GROUP IV - Spreader or screed man on asphalt machine; asphalt raker; laser beam man; barco tamper; jackson or any similar tamp wagon driller; churn drills; air track drills and all other similar drills; form setters; cutting torch man; liners and stringline man on concrete paving, curbs, gutters and etc.; hot mastic kettleman; hot tar applicator; hand blade operator; manhole builders helpers and mortar menon brick or block manholes; sandblasting and gunnite nozzlemen; rubbing concrete; air tool operator in tunnels

GROUP V - Manhole builder (brick or block); dynamite and powder man

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS

GROUP I - Asphalt paver and spreader; asphalt plant mixer operator; asphalt plant operator; back fillers; backhoe, all types; barber-greene loader (similar type); blade-power, all types; boats-power; boilers (2); boring machines (all types); cableways; cherry pickers (all types); chip spreader; concrete ready-mixed plant, portable (job site); concrete mixer paver; crane-overhead; crusher, rock; derricks and derricks cars (power operated); ditching machines; dozers; dredges - any type power; grade-all - similar type; hoist, endless chain-power operated with power travel; loaders - all types; mechanic and welder; mucking machine; orange peels; pumps - material all types; push cats; scoops all types; self-propelled rotary drill; shovel, power side boom; skimmer scoop; testhole machine; throttle man

GROUP II - Boilers (1); brooms - power operated (all types); chip spreader (front man); clef plane operator; compressors (1) 150' or over; concrete saws, self-propelled); crab - power operated; curb finishing machine; firemen on rigs; flex plane; floating machine; form grader; greaser hoist; hoist, endless chain - power operated; hopper - power operated; hydra hammer (all types); lad-a-vator - similar type; rollers - all types; siphons, jets, and jennies, sub-grader; tractors over 50 h.p.; compressors (2) 105 ft. or over not more than 20' apart; compressors-tandem (any sizes); compressors single, truck mounted; elevator; finishing machine

GROUP III - Oiler

GROUP IV - Fork lift-masonry; oiler drivers - all types

GROUP V - Tractors (except when hauling material) less than 50 h.p.; "A" frame trucks; fork lift-all types & sizes (except masonry); mixers (with side loaders); pumps (with well points) dewatering systems, test or pressure pumps

GROUP VI - Clamshells, 80 ft. of boom or over (including jib); crane or rigs 80 ft. of boom or over (including jib); draglines, 80 ft. of boom or over (including jib); piledrivers, 80 ft. of boom or over (including jib

GROUP VII - Crane or rigs, over 200 ft. of boom

GROUP VIII - Hoists each additional drum over 1 drum

GROUP IX - Master mechanic

GROUP X - Crane - tower or climbing

GROUP XI - Ready mixed concrete plants;
(a) Crane operator
(b) Loader operator & plant man
(c) Conveyor operator

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
POWER EQUIPMENT OPERATORS (Contd:)					
Site preparation and grading, Heavy and Highway Construction					
Zone 1 - Johnson and Wyandotte Counties, Kansas					
GROUP I	11.30	.75	1.00	.75	.10

GROUP VII	11.30	.75	1.00	.75	.10

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS

GROUP I - Asphalt paver and spreader; asphalt plant console operator; auto grader; backhoe; blade operator, all types; boilers - 2; booster pump on dredge; boring machine (truck or crane mounted); bulldozer operator; clamshell operator; compressor maintenance operator - 2; concrete plant operator, central mix; concrete mixer paver; crane operator; derrick or derrick trucks; ditching machine; dragline operator; dredge engineman; dredge operator; drillcat with compressor mounted on cat; drilling or boring machine, rotary, self-propelled; high loader - fork lift; hoistline engine - 2 active drums; locomotive operator, standard gauge; mechanics and welders, field or shop; maintenance operator; mucking

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS - GROUP I (CONT'd)
machine; pile driver operator; pitman crane operator; pump - 2; push cat op.; quad-track; scoop operator - all types; scoops in tandem; self-propelled rotary drill (leroy or equal - not air trac); shovel operator; side discharge spreader; sideboom cats; skimmer scoop operator; slip - form paver (CMI, REX, or equal); throttle man; truck crane; welding machine maintenance operator - 2

Group II - A-frame truck; asphalt hot mix silo; asphalt plant fireman, drum or boiler; asphalt plant mixer operator; asphalt plant man; asphalt roller operator; back filler operator; chip spreader; concrete batch plant, dry-power operated; concrete mixer operator, skip loader; concrete pump operator; crusher operator; elevating grader; greaser; hoisting engine - 1 drum;latourneau rooter; multiple compactor; pavement breaker, self-propelled, of the hydra-hammer or similar type; power shield; pug mill operator; stump cutting machine; towboat operator tractor operator over 50 h.p.

Group III - Boilers - 1; chip spreader (front man); churn drill operator; compressor maintenance operator - 1; concrete saws, self-propelled; conveyor operator; distributor operator; finishing machine operator; fireman, rig; float operator; form grader oprator; pump; pump maintenance operator, other than dredge; roller operator, other than high type asphalt; roller opr., other than dredge; screening and washing plant operator; self-propelled street broom or sweeper; siphons and jets; sub-grading machine operator; tank car heater operator - combination boiler and booster; tractor, 50 h.p. or less, without attachments; vibrating machine operator, not hand; welding machine maintenance operator -1

Group IV - Mechanic's helpers; oilers

Group V - Oiler driver, all types

Group VI - Clamshells, 3 yds. capacity or over; crane or rigs, 80 ft. of boom or over (including jib); draglines, 3 yds. capacity or over; piledrivers, 80 ft. of boom or over (including jib); shovels & backhoes, 3 yds. capacity or over

Group VII - Hoists (each additional drum over 1 drum)

Men working in tunnels or shafts (not air shafts or coffer dams) of twenty-five (25) ft or more in length or depth will be paid fifty cents (50¢) per hour above the regular classification.

CLASSIFICATION DEFINITIONS

TRUCK DRIVERS

Group I - Warehousemen and stock man

Group II - Flat beds; pick-ups; dump trucks, under 10 yds.

Group III - Dump trucks, 10 yds. and over; steel trucks; semi truck drivers

Group IV - Straddle trucks, steel tractors (when used for towing); hydro lift trucks, hydraulically operated aerial lifts; heavy hauling, a-frame winch and fork lifts; heavy excavating (dumpter, euclid, etc.); double bottom units (20 tons capacity and over)

Group V - Distributor truck drivers and oprators; oilers, greasers and mechanics' helpers

GROUP VI - Mechanics

GROUP VII - Transit mix, 5 yds. and over

GROUP VIII - Transit mix, under 5 yds.

	Basic Hourly Rates	Fringe Benefits Payments

GROUP I - Asphalt paver and spreader; asphalt plant console operator; auto grader; backhoe; blade operator, all types; boilers - 2; booster pump on dredge; boring machine (truck or crane mounted); bulldozer operator; clamshell operator; compressor maintenance operator - 2; concrete plant operator, central mix; concrete mixer paver; crane operator; derrick or derrick trucks; ditching machine; dragline operator; dredge engineman; dredge operator; drillcat with compressor mounted on cat; drilling or boring machine, rotary, self-propelled; high loader - fork lift; hoistline engine - 2 active drums; locomotive operator, standard gauge; mechanics and welders, field or shop; maintenance operator; mucking machine; pile driver operator; pitman crane operator; pump - 2; push cat op.; quad-track; scoop operator - all types; scoops in tandem; self-propelled rotary drill (leroy or equal - not air trac); shovel operator; side discharge spreader; sideboom cats; skimmer scoop operator; slip - form paver (CMI, REX, or equal); throttle man; truck crane; welding machine maintenance operator - 2
Group II - A-frame truck; asphalt hot mix silo; asphalt plant fireman, drum or boiler; asphalt plant mixer operator; asphalt plant man; asphalt roller operator; back filler operator; chip spreader; concrete batch plant, dry-power operated; concrete mixer operator, skip loader; concrete pump operator; crusher operator; elevating grader; greaser; hoisting engine - 1 drum; latourneau rooter; multiple compactor; pavement breaker, self-propelled, of the hydra-hammer or similar type; power shield; pug mill operator; stump cutting machine; towboat operator tractor operator over 50 h.p.
Group III - Boilers - 1; chip spreader (front man); churn drill operator; compressor maintenance operator - 1; concrete saws, self-propelled; conveyor operator; distributor operator; finishing machine operator; fireman, rig; float operator; form grader oprator; pump; pump maintenance operator, other than dredge; roller operator, other than high type asphalt; roller opr., other than dredge; screening and washing plant operator; self-propelled street broom or sweeper; siphons and jets; sub-grading machine operator; tank car heater operator - combination boiler and booster; tractor, 50 h.p. or less, without attachments; vibrating machine operator, not hand; welding machine maintenance operator -1
Group IV - Mechanic's helpers; oilers
Group V - Oiler driver, all types
Group VI - Clamshells, 3 yds. capacity or over; crane or rigs, 80 ft. of boom or over (including jib); draglines, 3 yds. capacity or over; piledrivers, 80 ft. of boom or over (including jib); shovels & backhoes, 3 yds. capacity or over
Group VII - Hoists (each additional drum over 1 drum)

Men working in tunnels or shafts (not air shafts or coffer dams) of twenty-five (25) ft or more in length or depth will be paid fifty cents (50¢) per hour above the regular classification.

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITION

GROUP I

Concrete paving curing machine

GROUP II

Belt type conveyors (material & concrete); broom (self propelled); fork lift; grease truck operator; head oiler; hydro lift; tractor (under 50 drawbar HP with or without attachment); Industrial locomotive brakeman; front end loader (2 cy or less); fireman; oiler; screedman; roller (pull type); mulching machine; roller (self-propelled)

GROUP III

Concrete paving form grader; concrete paving gang vibrator; concrete paving joint or saw machine; concrete paving sub grader; tractor with backhoe attachment; subgrade or base finisher; power plant (electric general or welding machine)

GROUP IV

Bulldozer (including self-propelled roller with dozer attachment); batch or continuous mix plant (concrete soil-cement, or asphalt); roller (steel wheel); front end loader (2 cy thru 10 cy); scraper operator; motor grader

GROUP V

Asphalt distributor; asphalt paving or laydown machine; asphalt retort heater; mixer, heavy duty, asphalt or soil cement; trenching machine; clam type shaftmucker; backhoe, clamshell, dragline, gradall, shovel (under 3/4 cy); elevating grader or belt loader; cranes (crawler or mobile) under 20 ton; air compressor (300 CFM & over); crushing screening and washing plants; drilling machine (cable core or rotary); mixer, concrete (1 cy and less); pump (6" intake or over); winch truck; hoist (1 drum); industrial locomotive motorman; lumber stacker; tractor (50 drawbar HP or over)

NOTICES

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITION (CONT'D)

GROUP VI
Concrete paver mixer; hoist (2 drum and over); sideboom; traveling crane; piledriver; backhoe, clamshell, dragline, gradall, shovel (3/4 cy to 3 cy); cranes (crawler or mobile) 20 ton to 40 ton; front end loader (over 10 cy); mixer, concrete (over 1 cy); mechanic and/or welder)

GROUP VII
Concrete slip-form paving machine; concrete paving finishing machine; concrete paving longitudinal float; gunite machine; refrigerator; jumbo form or drilling stage; slusher; concrete paving spreader; pumpcrete machine; grout pump operator

GROUP VIII
Mine hoist; bulldozer (multiple units); scraper (multiple units); mucking machine; backhoe, clamshell, dragline, gradall, shovel (over 3 CY); cranes (crawler or mobile) over 40 tons

GROUP IX
Belt loader (CMI types) operator; derrick, cableway

GROUP X
Pipemobile operator; mole operator

LINE CONSTRUCTION AREA DEFINITIONS

AREA I - Line construction work for electric and telephone utilities, REA Co-ops, railroads and municipalities:
AREA I-A -- BERNALILLO COUNTY
AREA I-B -- STATEWIDE, EXCEPT BERNALILLO COUNTY

AREA II - Other Line construction work including switching stations and sub-stations adjacent to power plants
AREA II-A -- From nearest basing point cities, towns and mileage from main post office

Albuquerque -- 15 miles from main post office
Santa Fe -- 15 miles from main post office
Las Vegas -- 8 miles from main post office
Farmington -- 8 miles from main post office
Raton -- 6 miles from main post office
Tucumari -- 6 miles from main post office
Aztec -- 6 miles from main post office
Roswell -- 12 miles from main post office
Ruidoso -- 12 miles from main post office
Portables -- 12 miles from main post office
Carrizozo -- 12 miles from main post office
Clovis -- 12 miles from main post office
Gallup -- 10 miles from main post office
*Pojoaque - 2 miles from main post office
*All areas adjacent to Pojoaque that are over two miles distant from the main post office in that town will be zoned out of Santa Fe.

AREA II-B - Extending up to 20 miles beyond Area II-A
AREA II-C - Extending up to 30 miles from Area II-A
AREA II-D - Anything beyond 30 miles from Area II-A

All work in Los Alamos County use Area II-C rates.

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS

Occupational Exposure to Inorganic Arsenic

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Final Standard for Occupational Exposure to Inorganic Arsenic.

SUMMARY: This rule limits occupational exposure to inorganic arsenic to 10 $\mu g/m^3$ (micrograms per cubic meter of air) based on an 8 hour time-weighted average. The basis for this action is evidence that exposure to inorganic arsenic poses a cancer risk to workers. The purpose of this rule is to minimize the incidence of lung cancer among workers exposed to inorganic arsenic. Employees protected by this standard work principally in the nonferrous metal smelting, glass and arsenical chemical industries. Provisions for monitoring of exposures, recordkeeping, medical surveillance, hygiene facilities and other requirements are also included. The 10 $\mu g/m^3$ limit has been set because it will provide significant employee protection and is the lowest feasible level in many circumstances.

DATES: Effective date: August 1, 1978.

Startup dates:
August 1, 1978—Respirator use for employees exposed above 500 $\mu g/m^3$.
As soon as possible but no later than September 15, 1978—Completion of initial monitoring.
October 1, 1978—Complete establishment of regulated areas.
Respirator use for employees exposed above 50 $\mu g/m^3$.
Completion of Initial Training.
Notification of use.
December 1, 1978—Respirator use over 10 $\mu g/m^3$.
Completion of initial medical.
Completion of compliance plan.
July 1, 1979—Completion of lunch rooms and hygiene facilities.
December 31, 1979—Completion of engineering controls.

All other requirements of the standard have as their startup date August 1, 1978.

ADDRESS: For additional copies of this regulation contact: OSHA Office of Publications, U.S. Department of Labor, Room N-3423, Washington, D.C. 20210, telephone 202-523-8677.

FOR FURTHER INFORMATION CONTACT:

Mr. Gail Brinkerhoff, Office of Compliance Programs, OSHA, Third Street and Constitution Avenue NW., Room N-3112, Washington, D.C. 20210, telephone 202-523-8034.

SUPPLEMENTAL INFORMATION:

Introduction

This permanent occupational safety and health standard is issued pursuant to sections 6(b) and 8(c) of the Occupational Safety and Health Act of 1970 (the Act) (84 Stat. 1593, 1599; 29 U.S.C. 655, 657), the Secretary of Labor's Order No. 8-76 (41 FR 25059) and 29 CFR Part 1911. The new standard on occupational exposure to inorganic arsenic which appears at 29 CFR 1910.1018, applies to all employments in all industries covered by the Act with the following exceptions. For the reasons explained below, the standard does not apply to pesticide application, agriculture, and the treatment and use of arsenically preserved wood.

This document also amends Table Z-1 of 29 CFR 1910.1000. Entries for calcium arsenate and lead arsenate are deleted because they are replaced by the new standard. The existing entry, "Arsenic and its compounds (as As)—0.5 mg/m^3," is amended to read "Organic arsenic and its compounds (as As)—0.5 mg/m^3." The existing entry covers both organic and inorganic arsenicals. As the new standard covers inorganic arsenic, the entry in Table Z-1 is accordingly amended to clarify that it only covers organic arsenicals. The existing entry in Table 1 for arsine remains unchanged for the reasons discussed below.

Pursuant to section 4(b)(2) of the Act, The Occupational Safety and Health Administration (OSHA) has determined that this standard is more effective than the corresponding standards now applicable to the maritime and construction industries and currently contained in Subpart B of Part 1910, and Parts 1915, 1916, 1917, 1918, and 1926 of Title 29, Code of Federal Regulations. Therefore, those corresponding standards are superseded by the new inorganic arsenic standard in § 1910.1018. A new paragraph (e) is added to § 1910.19 to clarify the applicability of this new inorganic arsenic standard to the construction and maritime industries.

I. Background

Arsenic (As) is commonly present in amounts ranging from less than 0.001 percent to 6 percent in sulfide ores mined for their copper, lead, zinc, gold, and silver content. Arsenic is also widely distributed naturally in small amounts (2-5 ppm) throughout the earth's crust. For example, it is found in iron ore and coal. Further, trace amounts of organic arsenic (less than 1 ppm) are naturally present in most living organisms including those man uses for food.

Approximately 97 percent of arsenic enters end-product manufacture in the form of arsenic trioxide (As_2O_3 or "white arsenic"). This compound, which is used in the synthesis of many other arsenic compounds, is released by and obtained as a by-product of the smelting of sulfide ores of copper, lead, and zinc. Arsenic is generally regarded, however, as a troublesome impurity in these metals which is eliminated through the smelting process. The Tacoma, Wash., facility of ASARCO, Inc. (formerly the American Smelting & Refining Co.) is the sole U.S. producer of arsenic trioxide.

ASARCO's arsenic production capacity is estimated to be 11,000 tons per year. World arsenic trioxide production averages approximately 60,000 tons per year, while U.S. consumption averages 30,000 tons per year. Most of the 36 copper, lead, and zinc smelters produce some amount of arsenic-bearing flue dust as a by-product of their operations. In the past, some of this flue dust was reprocessed by ASARCO-Tacoma, in order to reclaim the amounts of precious metals and arsenic it contains. Recent information, however, indicates that ASARCO has been reducing the amount of flue dust it will accept for reprocessing, and that much of the dust is being stored by the originating smelters.

Arsenic and its compounds have a variety of applications. The major use (comprising approximately 69 percent of U.S. consumption) is for insecticides and herbicides. Before World War II inorganic arsenic compounds (primarily calcium arsenate and lead arsenate) were the most widely used pesticides. Substitutes have now replaced arsenicals in many uses. However, the record of this proceeding indicates that two arsenicals are used in the raising of cotton, especially dry field production in Texas. Arsenic acid, an inorganic pentavalent arsenical, is used as a desiccant. Methane arsonates, organic arsenicals (not covered by the standard), are used as pesticides. Approximately 40 percent of the U.S. consumption of arsenic trioxide (12,000 tons) is utilized in the synthesis of these two chemicals.

Approximately 11 percent of total U.S. arsenic trioxide consumption is used in glass production as a clarifying and reducing agent. Only small quantities (a few pounds per ton) are usually used in some forms of glass. This use has been reduced as substitutes have been developed.

Approximately 7 percent (2,100 tons) of the total U.S. consumption of arsenic trioxide is used in the synthesis of arsenical wood preservatives, principally chromated copper arsenate (CCA). Wood preservatives make wood more resistant to termites, fungi, and

rot. In doing so, they extend the useful life of the wood (from 6 to 36 years) helping conserve a natural resource and lessening the need for persistent insecticides for termite control. There are several types of wood preservatives, but for some uses, the record indicates that arsenical preservatives are preferred. (See the Final Environmental Impact Statement (FEIS) and its references.)

Other uses of inorganic arsenicals are for lead alloys (5 percent), flotation reagents for concentrating copper ores (5 percent), and feed additives (2 percent). Small quantities are used in the production of drugs, semi-conductors, light omitting diodes, devices to turn solar energy into electricity and in other electronic applications. Lengthier discussions of role of arsenicals can be found in the FEIS and in the Technological Feasibility Analysis and Inflationary Impact Statement (IIS) by Arthur Young & Co. (AY).

The exact number of workers exposed to inorganic arsenicals is unknown at this time. AY estimated that approximately 660,000 employees were involved in the commercial cycle of arsenic, and that 7,400 employees were exposed to over 4 $\mu g/m^3$ of inorganic arsenic. This latter number is an underestimate because of employee turnover and limited data in some areas and for some facilities.

II. Pertinent Legal Authority

The primary purpose of the Act is to assure, so far as possible, safe and healthful working conditions for every working man and woman. One means prescribed by Congress to achieve this goal is the authority vested in the Secretary of Labor to set mandatory safety and health standards. Occupational safety and health standards provide notice of the requisite conduct or exposure level and provide a basis for assuring the existence of safe and healthful workplaces. The Act provides that:

> The Secretary, in promulgating standards dealing with toxic materials or harmful physical agents under this subsection, shall set the standard which most adequately assures, to the extent feasible, on the basis of the best available evidence, that no employee will suffer material impairment of health or functional capacity even if such employee has regular exposure to the hazard dealt with by such standard for the period of his working life. In addition to the attainment of the highest degree of health and safety protection for the employee, other considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws. (s. 6(b)(5))

Sections 2(b)(5) and 6, 20, 21, 22, and 24 of the Act reflect Congress' recognition that conclusive medical or scientific evidence including causative factors, epidemiological studies or dose-response data may not exist for many toxic materials or harmful physical agents. Nevertheless, standards cannot be postponed because definitive medical or scientific evidence is not currently available. Indeed, standards need only be supported by the best available evidence. The legislative history makes it clear that: "it is not intended that the Secretary be paralyzed by debate surrounding diverse medical opinion." House Committee on Education and Labor, Report No. 91-1291, 91st Cong., 2d Session, p. 18 (1970). This Congressional judgment is supported by the courts which have reviewed standards promulgated under the Act. In sustaining the standard for occupational exposure to vinyl chloride (29 CFR 1910.1017), the U.S. Court of Appeals for the Second Circuit stated that: "it remains the duty of the Secretary to act to protect the working man, and to act even in circumstances where existing methodology or research is deficient." *Society of the Plastics Industry Inc.* v. *Occupational Safety and Health Administration*, 509 F. 2d 1301, 1308 (C.A. 2, 1975), *cert den sub nom, Firestone Plastics Co.* v. *United States Department of Labor*, 95 S. Ct 1998, 4 L.Ed. 2d. 482 (1975).

A similar rationale was applied by the U.S. Court of Appeals for the District of Columbia Circuit in reviewing the standard for occupational exposure to asbestos (29 CFR 1910.1001). The Court stated that:

> Some of the questions involved in the promulgation of these standards are on the frontiers of scientific knowledge, and consequently as to them insufficent data is presently available to make a fully informed factual determination. Decision-making must in that circumstance depend to a greater extent upon policy judgments and less upon purely factual judgments.

Industrial Union Department, AFL-CIO v. *Hodgson*, 499 F. 2d 467, 474 (C.A.D.C. 1974).

In setting standards, the Secretary is expressly required to consider the feasibility of the proposed standards. Senate Committee on Labor and Public Welfare, S. Rep. No. 91-1282, 91st Cong., 2d Sess., p. 58 (1970). Nevertheless, considerations of technological feasibility are not limited to devices already developed and in use. Standards may require improvements in existing technologies or require the development of new technology. *Society of the Plastics Industry, Inc.* v. *Occupational Safety and Health Administration*—supra at 1309; *American Iron & Steel Inst.* v. *OSHA*, No. 76-2358 (3rd Cir., 3/28/78).

Where appropriate, the standards are required to include provisions for labels or other forms of warning to apprise employees of hazards, suitable protective equipment, control procedures, monitoring and measuring of employee exposure, employee access to the results of monitoring, and appropriate medical examinations. Moreover, where a standard prescribes medical examinations or other tests, they must be made available at no cost to the employees (section 6(b)(7)). Standards may also prescribe recordkeeping requirements where necessary or appropriate for enforcement of the Act or for developing information regarding occupational accidents and illnesses (section 8(c)).

III. History of the Regulation

In 1943, the American Standards Association (now the American National Standards Institute or ANSI) proposed a standard for arsenic of not more than 15 micrograms of elemental arsenic per cubic meter of air (hereinafter $\mu g/m^3$). However, by 1945, this standard was increased by a factor of 10 to 150 $\mu g/m^3$.

In 1947, the American Conference of Governmental Industrial Hygienists (ACGIH) recommended a Maximum Airborne Concentration (MAC) of 100 $\mu g/m^3$. In 1948 this was changed to a Threshold Limit Value (TLV) of 500 $\mu g/m^3$. It appears that this level was set to protect against the hazard of dermatitis from arsenic trioxide, without consideration of carcinogenicity.

In 1976, based on its evaluation of evidence of carcinogenicity ACGIH adopted two new TLV's for arsenic trioxide. In the smelting environment, a level of 50 $\mu g/m^3$ (as arsenic) along with a ceiling of 5 ppm for sulfur dioxide and a level of 50 $\mu g/m^3$ for antimony trioxide (as antimony) was recommended. In non-smelting environments a level of 250 $\mu g/m^3$ (as arsenic) was recommended. The detailed basis for arriving at these levels is not clear on the record.

The ACGIH has separate standards for lead arsenate and calcium arsenate. A limit for lead arsenate of 150 μg lead arsenate/m^3 has remained in effect since 1957. (There are at least six distinct lead arsenate compounds. Depending on the molecular formula, this limit expressed as elemental arsenic (As) can range from approximately 20 to 55 $\mu g/m^3$). According to ACGIH documentation, lead arsenate was considered to present the double threat of chronic toxicity due to its lead content and acute toxicity due to its arsenic content. The limit for calcium arsenate of 100 $\mu g/m^3$, adopted by ACGIH in 1957, was later changed to the present 1,000 μg (1 mg) calcium arsenate/m^3 (equivalent to 380 μg As/m^3).

In 1969, the Secretary of Labor promulgated the 1968 Threshold Limit Values of the ACGIH including the limit for "arsenic and its compounds" (500 $\mu g/m^3$ as arsenic) lead arsenate (150 $\mu g/m^3$ as lead arsenate) and calcium arsenate (1,000 $\mu g/m^3$ as calcium arsenate), under the Walsh-Healy

V 4 3 / 1 8 8

Public Contracts Act (41 U.S.C. s35 et seq.) (34 FR 788-796) after an opportunity for a public hearing and written comments (33 FR 14258). These standards were subsequently adopted as established Federal Standards under section 6(a) of the Occupational Safety and Health Act of 1970 (36 FR 10466, 36 FR 15101) and included in what is now table Z-1 of § 1910.1000.

The Occupational Safety and Health Administration began the process of revising the current standard governing occupational exposure to inorganic arsenic after receipt of the National Institute for Occupational Safety and Health (NIOSH) document, "Criteria for a Recommended Standard • • • Occupational Exposure to Inorganic Arsenic," in January 1974. On September 20, 1974, after notice published in the FEDERAL REGISTER, OSHA conducted an informal fact-finding hearing[1] on the possible health hazards associated with occupational exposure to arsenic and its inorganic compounds. Findings presented at the hearing and through post-hearing comments implicated inorganic arsenic as a human carcinogen. Recent mortality studies conducted both in the United States and abroad furnished strong additional evidence to corroborate previous studies which showed excess respiratory and lymphatic cancer mortality among workers exposed to inorganic arsenic.

In view of this additional information, NIOSH submitted revised recommendations to OSHA on November 8, 1974, advocating that occupational exposure to arsenic and its inorganic compounds be limited to "no detectable level." NIOSH later published a new criteria document containing these modified recommendations and a discussion of the new information considered. The new NIOSH recommendations called for controlling occupational exposure to inorganic arsenic so that no worker is exposed to a concentration of arsenic in excess of 0.002 mg (2 μg) per cubic meter of air as determined by a 15-minute sampling period.

On January 21, 1975, a proposed standard to control occupational exposure to inorganic arsenic was published in the FEDERAL REGISTER (40 FR 3392). The proposal included a detailed preamble describing the necessity for the proposed standard, the information relied upon in its development and the terms of the proposal in its entirety. The notice requested the submission of written comments, data, views and arguments on the issues raised by the proposal and scheduled an informal hearing pursuant to section 6(b)(3) of the Act (29 U.S.C. 655(b)(3)) for April 8, 1975. The hearings lasted 6 days.[1]

On November 8, 1974, a notice of OSHA's intent to prepare an environmental impact statement was published in the FEDERAL REGISTER (39 FR 39617) pursuant to 29 CFR 1999.3(d). Subsequent to the publication of that notice, a draft environmental impact statement (DEIS) was prepared and on March 21, 1975, the Council on Environmental Quality published a notice of availability of the inorganic arsenic DEIS (40 FR 12841). In addition to the 45 day comment period specified in 29 CFR 1999.4(g), the environmental impact, if any, of the proposed standard was also an issue for the informal hearing as provided by 29 CFR 1999.4(h) and the notice of proposed rulemaking (40 FR 3392).

In addition to the DEIS, OSHA also prepared the "Technological Feasibility Analysis and Inflationary Impact Statement" (IIS). On June 24, 1976 a notice was published in the FEDERAL REGISTER (41 FR 26029) announcing the availability of the document. This notice also announced that the second phase of the rulemaking hearing on the economic impact and technological feasibility of the proposed standard, as well as certain new scientific evidence which had been developed or obtained since the April 1975 hearing, would be held.

On July 16, 1976, a second FEDERAL REGISTER notice announced the intention to include, as an issue in the forthcoming hearing, testimony and information on the advisability of including sputum cytology as part of required medical surveillance provisions in the final standard for inorganic arsenic (41 FR 29425). Following this second hearing (September 8-14, 1976)[1] post-hearing comments were received until November 2, 1976.

On November 5, 1976, a notice announcing the availability of certain new analyses of the potential carcinogenicity of pentavalent arsenic, as well as other information, was published (41 FR 48746). This notice provided for the submission of comments on the new materials by December 9, 1976.

The entire record, including 193 exhibits and approximately 2,500 transcript pages was certified by the Presiding Administrative Law Judges on January 27, 1977, and February 3, 1977, respectively, in accordance with 29 CFR 1911.17.

Prior to promulgation of the final standard, OSHA prepared a final environmental impact statement (FEIS) in accordance with 29 CFR 1999.5. Notice of the availability of the FEIS was published by the Council on Environmental Quality on February 11, 1977 (42 FR 8690).

This standard on occupational exposure to inorganic arsenic is based on a full consideration of the entire record of this proceeding including materials discussed or relied on in the proposal, the record of the informal hearing, all written comments and exhibits.

[1]Throughout this document references will be made to hearing transcript pages as follows: Fact-finding hearing (September 20, 1974)—FTR; Hearing, April 8-15, 1975—ATR; Hearing, September 8-14, 1976—STR.

IV. OCCUPATIONAL HEALTH IMPLICATIONS

The impetus for this new inorganic arsenic standard is evidence of its carcinogenicity. This section analyzes that evidence in depth and is divided into seven parts as follows:

A. *Summary and General Considerations.* A discussion of some of the general considerations appropriate to the evaluation of epidemiologic studies.

B. *Respiratory Cancer.* A discussion of the study designs and the authors' conclusions; and OSHA's conclusion based on its analysis of the studies as well as some of the criticisms and comments contained in the record of the arsenic proceeding.

C. *Lymphatic Cancer.* Presentation of available data on the causal agents implicated in the lymphatic cancer deaths observed in two of the studies.

D. *Dose-Response.* A presentation of dose-response data derived from some of the studies, criticisms and adjustments where appropriate, as well as OSHA's analysis.

E. *Animal Studies.* A presentation of, and evaluation of animal studies pertinent to the evaluation of occupational carcinogenesis.

F. *Valence Considerations.* A discussion and comparison of acute toxicity, mechanistic interactions and interconversion between trivalent and pentavalent arsenic, and an evaluation of the present relevance of this information on the assessment of carcinogenic risk.

G. *Conclusion.* Separate summaries, analyses and conclusions on the carcinogenic risk of exposure to trivalent and pentavalent arsenic.

A. SUMMARY AND GENERAL CONSIDERATIONS

OSHA has carefully reviewed the substantial body of evidence relating to the carcinogenicity of inorganic arsenic and has concluded that it is clearly a human carcinogen. There is virtually no dispute as to the carcinogenicity of trivalent arsenic. There is a substantial body of epidemiologic studies of arsenic-exposed workers in varying environments showing excess risk of lung cancer where the one common factor is exposure to inorganic arsenic. Moreover, excess risk increases consistently with increasing degree and exposure to inorganic arsenic. In addition as discussed in detail below, both the available evidence and policy considerations have led OSHA to conclude that pentavalent arsenic should be regulated as a human carcinogen.

The following sections analyze in depth the most important epidemiologic studies which are part of the record. A brief review of the nature of epidemiology may clarify that analysis.

Epidemiology is the study of the distribution and determinants of disease in humans. It focuses not on any single individual but on groups of individuals. Evidence of carcinogenicity in humans can be derived from two types of epidemiological studies (1) descriptive epidemiological studies in which the morbidity or mortality of cancer in human populations is found to vary (spatially or temporally) with exposure to the agent and (2) analytical epidemiological studies (e.g., case-control or cohort studies) in which individuals' exposure to the agent are found to be associated with an increased risk of cancer. Epidemiological studies, when done properly, are the most direct measure of the carcinogenicity of an agent since man himself is the subject of these studies.

In contrast to the controlled experimental study of animal species, epidemiological studies of necessity rely upon the untoward effects of unplanned events in the past. For that reason, it may be difficult, in any one epidemiological study, to account for all potential confounding variables. Thus while a single epidemiological study may in some cases demonstrate a cause-effect relationship, the most convincing evidence of causality from epidemiological studies comes when several independent studies done under diverse circumstances result in positive findings.

Any epidemiological study showing or not showing a positive association between an agent and an increased risk of cancer may be weighted to a greater or lesser extent insofar as the following criteria are met:

(1) *Definition of Study Population.* A clear description is made of the population from which the study group was selected, the method of selecting the subjects of the study group, the criteria and rationale for inclusion or exclusion of study subjects and the procedure and rationale by which the study subjects were classified according to presence or absence and degree of exposure.

(2) *Reference Population.* A clear description is made of the reference or standard population against which the study group is contrasted and the procedure and rationale for selecting that reference or standard population.

(3) *Disease Ascertainment and Classification.* A clear statement is made of the specific procedures and sources for disease ascertainment including the degree of completeness of that ascertainment track for the study and the reference population. The criteria are specified for classification of morbidity and mortality (e.g., nosology) and a statement is made addressing the comparability of study and reference population regarding this classification scheme.

(4) *Positive or Negative Bias or Confounders.* As the operation of factors in the study design or execution may lead erroneously to an observed excess or deficit of cancer risk among exposed individuals, a clear statement is made of the magnitude of over or underestimating disease risk in the study group. Such factors to be considered are selection of healthy individuals for work and ethnicity and life-style differentials.

(5) *Dose-Response Relationship.* A dose-response relationship is demonstrated, that is an increase in cancer morbidity or mortality with an increase in degree of exposure. Demonstration of such a relationship provides strong evidence for incriminating the agent under study as a causal factor in the etiology of cancer causation. However, because of difficulty in the quantification of actual degree of exposure (dose-rate, deposition, retention, excretion) such relationships may not always be apparent. For that reason the lack of a demonstrated dose-response relationship may not negate the carcinogenicity of an agent.

In addition to these criteria, it must be recognized that any epidemiological study will have confidence limits around estimates of association or relative risks (e.g., around Standardized Mortality Ratios etc). In a study reported as "negative", the upper confidence limit may fall at a relative risk considerably above unity and thus the study cannot be regarded as negative but only as excluding a relative risk that is above this upper limit. Finally a "negative" epidemiological study may be relevant only to dose levels within or below the range of those observed in the study and is pertinent only if sufficient time has elapsed since first human exposure to the agent. Experience with human cancers of known etiology suggests that the period from first exposure to a chemical carcinogen to development of clinically observed cancer is usually measured in decades and may be in excess of 30 years.

Epidemiologic evidence must be viewed in its entirety. Such evidence is strengthened when similar findings are repeated or occur in different settings and environments. Accordingly, after discussing and analyzing individual studies, OSHA draws its conclusions based on all studies taken as a whole, scientific opinion, and OSHA policy.

B. RESPIRATORY CANCER

Two significant studies became available before the fact-finding hearing. The first, a study by Ott, Holder, and Gordon (Ex. 1A 3-1) concerning the relationship between respiratory cancer and occupational exposure to dry arsenicals was submitted to OSHA by the Dow Chemical Company in response to the advance notice of proposed rulemaking (39 FR 10494). According to the study report, the dry arsenicals to which the workers were exposed were the following, listed in order of decreasing production: lead arsenate (59 percent), calcium arsenate (34 percent), copper aceto-arsenite (5 percent) and magnesium arsenate (2 percent).

The Dow study compared the proportionate mortality rate of arsenic-exposed employees with that of non-exposed employees over a 37-year period (1919-1956). The "exposed" employee group included those workers who had spent 1 or more days in the arsenical production area, while the "control" group had never worked in the arsenic exposure area.

An increased percentage of cancer deaths was observed among the exposed worker population (32.9 percent) versus the nonexposed (20.7 percent). The authors' analysis of the data indicated an approximate threefold increase in lung cancer for the exposed population (16.2 percent) over the nonexposed (5.7 percent). Lymphatic cancer occurred 2.5 times the expected rate (3.5 percent versus 1.4 percent). Fewer cancers of the digestive system were found in the exposed population than were expected.

To supplement the results of the first analysis, Ott also performed a cohort analysis by examining mortality data for 603 men who had worked for at least 1 month in the exposure area. Ott observed 35 cancer deaths among the exposed group versus 19.4 deaths expected on the basis of the U.S. white male age-calender time-cause specific rate. Of the 35 total cancer deaths among the exposed population, 20 lung cancer deaths were observed where only 5.8 would have been expected. Additionally, there were 5 deaths attributable to lymphatic cancer where 1.3 were expected. Thus, the results of the cohort analysis confirmed the findings of excess respiratory cancer mortality in the earlier analysis.

Of interest was the fact that of 173 deaths recorded for workers in the exposed population, 138 of the workers had worked in the exposure area for a period of less than 1 year, and of these 138, 16 died of lung cancer.

The National Academy of Science (NAS) report (Ex. 180, p. 313) noted that 60 percent of the respiratory cancer deaths reported in the Ott study were observed among those workers who had worked in the plant 1 year or less. Since the study included only those workers who remained with the company, the report recommended that the excess in this group be verified by following all short term work-

M Y 5 7 8 M

V 4 3 / 8 8

ers. The report also noted that while the excess respiratory cancer mortality among these short-term workers might or might not be ascribable to arsenic, 4- to 6-fold excess respiratory cancer mortality was observed among the longer-term workers.

OSHA agrees it is conceivable that the excess among the short-term workers might not be ascribable to arsenic. However, there is no data to support this hypothesis and the long-term workers were at elevated risk of dying of respiratory cancer. OSHA thus accepts the study findings of excess respiratory cancer mortality among workers in the Dow plant.

The Allied Chemical Corp. submitted an epidemiological study to OSHA which contained findings of an excess of respiratory and lymphatic cancer deaths similar to the Dow studies (Ex. 1A-24). The Allied facility had also been engaged in the manufacture of dry arsenicals for pesticides. Further, like the Dow process, arsenic trioxide was the starting compound for the subsequent synthesis of lead arsenate, calcium arsenate, and other chemicals.

The Allied study, performed by Baetjer et al., compared the mortality experience of retired arsenic workers with that of the general population of Baltimore, Md., the location of the Allied pesticide facility. It focused on 27 deaths occurring between 1960 and 1972. Of the total deaths, 19 were due to cancer, including 10 from respiratory cancer and 3 from leukemia or lymphosarcoma. The expected numbers of deaths, however, based on figures adjusted for the combined age, race, and sex-specific relative frequencies of the general population of Baltimore, were only 5.6, 1.5, and 0.18, respectively.

When an analysis was made of mortality among only male retirees from the pesticide plant, Baetjer found even greater differences between observed and expected deaths from all types of cancer, as well as respiratory and leukemia-lymphatic cancers. Specifically, there were 17 deaths from all forms of cancer versus 1.35 expected, 10 respiratory cancer deaths versus 0.4 expected, and 3 deaths from leukemia-lymphatic cancers versus 0.05 expected.

OSHA recognizes that the Baetjer study is a preliminary study which will be followed by a more thorough analysis. OSHA agrees with Arthur D. Little, Inc. (Ex. 26B, p. 36) that the study does not eliminate other potential associations of workers with respiratory cancer such as smoking, common ethnicity or demography. As ADL noted, the lack of such analysis weakens the inference of a relationship between the plant environment and death by cancer. However, OSHA concludes that the magnitude of the excess of respiratory cancer mortality (28 and 17 times the expected Baltimore rates for 1960 and 1970, respectively) makes this study strong evidence of excess risk among workers exposed to arsenicals.

The studies by Ott et al. and Baetjer et al. because of their significant impact on the assessment of carcinogenic risk to exposure to arsenicals, have come under the most detailed scrutiny of any studies in the record. In the context of deciding the issue of carcinogenicity of pentavalent arsenic, many analyses have focused on the fact that workers were exposed to both trivalent and pentavalent arsenicals as well as other chemicals. In April 1975 OSHA asked the Allied and Dow Chemical Companies what chemicals the workers in the two studies were exposed to and what was their estimate of the degree and duration of exposure to each chemical (Ex. 101, Ex. 102).

Allied responded "we cannot establish with certainty the exact nature of exposures to which our people were subjected. Some were predominantly exposed to arsenic trioxide plus sodium arsenite, Paris Green and the Arsenates, while the female packers (not included in the Baetjer Phase I study, but among whom is a cancer survivor in remission) were exposed only to calcium arsenate, lead arsenate, and Paris Green." (Ex. 55.)

Dow responded:

> Unfortunately, at this time we cannot assess the relative importance of trivalent vs pentavalent arsenic. The men were exposed to the following materials: arsenic acid, lead arsenate, calcium arsenate, copper acetoarsenite, acetic acid, gum arabic, Rhodamin B, and finally lead oxide.
>
> Since the insecticide department was somewhat seasonal in its operation, the turnover of employees was considerable. It was, for many, the entry job into the company from which a considerable number of employees went on to other jobs with other exposures. The random nature of this movement is such that it is impossible to establish any pattern of exposure to other chemical entities. (Ex. 102.)

Ott's response to a question at a 1975 symposium on the health effects of arsenic and lead helps clarify this further.

> Arsenic trioxide was present in one building which was apart from the packaging building where most of the employees worked. Lead oxide was mixed with the arsenic trioxide and the arsenic was converted to the pentavalent form in the first building. The material was then pumped over to the finishing building in a slurry and dried and processed for packaging. (Ex. 182.)

Furthermore, as noted earlier, nearly 95 percent of the arsenicals produced in the Dow plant were pentavalent arsenicals.

Based on the Allied and Dow responses, it appears that the workers in the Allied study were primarily exposed to trivalent arsenic while those in the Dow study were primarily exposed to pentavalent arsenic. It is the case that workers in these two studies were exposed to other chemicals besides inorganic arsenic. However, their primary exposure was to trivalent and pentavalent arsenic, as these were the primary starting materials and primary products of the two plants. At the same symposium, Ott later stated:

> We have evaluated, using proportionate mortality techniques, every production unit in that location. The judgment was made, based on having looked at all these production units in relation to the arsenicals one, that the experience in the arsenicals area was unique to that unit. This is not to say that those people did not have other observed chemical exposure and I do not think we attributed all the effects to arsenicals. It was felt that regardless of whether there was some synergism present or not, the experience we were seeing was unique and not duplicated in any other production. (Ex. 182E, p. 314.)

While exposures to other chemicals (none of which are known to be carcinogenic) may have contributed to the excess cancer mortality observed, OSHA believes that is is appropriate to conclude that inorganic arsenic is the primary causal agent for the excess cancer mortality observed because of the large magnitude of excess risk and because the predominant exposure was to arsenicals. As discussed below, the conclusion is reinforced by the other studies indicating excess risk among arsenic-exposed workers.

For further presentation and analysis of the data in the Ott study see section IV-D of this preamble.

In 1969, Lee and Fraumeni, (Ex. 5D) in an effort to clarify the role of arsenic in human carcinogenesis, studied and compared the mortality data of 8,047 white, male Anaconda copper smelter workers in Montana exposed to both arsenic trioxide and sulfur dioxide and other co-contaminants during 1938-1963, with that of the white male population in the State of Montana. As of December 1963, 5,397 of these 8,047 workers were known to be alive; 1,877 were deceased; and 773 were unknown status. When compared to the control population (white, male Montanans) there were 1,877 observed smelter worker deaths as contrasted with 1,634 expected deaths (P less than 0.01).

The authors analyzed the study group according to duration and degree of exposure to arsenic trioxide and sulfur dioxide. The excessive lung cancer mortality among the copper smelter workers was found to increase consistently with increasing lengths of employment at the smelter. These increases ranged from 2.03 times the expected for those employed from 1 to 4 years, to 4.7 times the expected rates for those employees working 15 years or more prior to 1938.

Lee and Fraumeni further divided the groups into "heavy," "medium," and "light" exposures to arsenic trioxide, based on the amount of arsenic trioxide to which the employees had been exposed. According to testimony given by H. F. Morris (Ex. 28B) the Anaconda workers studied by Lee and Fraumeni would have been exposed to the following average levels of arsenic trioxide from 1943 to 1957: heavy—11.27 mg/m³; medium—0.58 mg/m³; light—0.29 mg/m³. As Morris stated, respirators were supplied in the heavy and some of the medium exposure areas and "used with varying degrees of faithfulness."

Additionally the authors discovered that lung cancer mortality increased consistently with increasing degree and duration of exposure in each of the "heavy," "medium," and "light" categories. Lung cancer mortality ranged from 4.4 to 8 times expected in the "heavy" exposure group, 2.63 to 6.7 times expected in the "medium" group, and 2.1 to 2.5 times expected in the "light" exposure category. Further, it is significant that the 2,862 men who worked less than 12 months in their category of maximum arsenic exposure category, were found to have an incidence of lung cancer 2.86 times that of the control population.

Similarly, workers were grouped according to the duration and degree of their exposures to sulfur dioxide. Again, excess lung cancer mortality was found with increasing exposure to sulfur dioxide. The greatest excess of lung cancer was found among the workers exposed to both high concentrations of arsenic trioxide and medium or high concentrations of sulfur dioxide. Lee and Fraumeni concluded that their findings were "consistent with the hypothesis that exposure to high levels of arsenic trioxide, perhaps in interaction with sulfur dioxide or unidentified chemicals in the work environment, is responsible for the threefold excess of respiratory cancer deaths among smelter workers." For a more detailed analysis of this dose—response data in this study, see section IV-D of this preamble.

The finding of excess lung cancer mortality is of great significance because this study meets most of the criteria of an ideal epidemiological study. The study carefully followed up the population at risk for a substantial period of time. The size of the population at risk, allowed for both a high degree of statistical significance, as well as for breakdown into large exposure categories for gradients of risk of exposure to arsenic trioxide and other agents to be examined. The exposure categories were further substantiated by contemporaneous measurements, which were submitted to the record of this proceeding.

Certain other factors such as smoking and place of birth were only qualitatively evaluated. However, as discussed below, these were not of sufficient magnitude to eliminate the excesses observed.

The strength of the Lee and Fraumeni study was also discussed by Arthur D. Little, a consulting firm hired by Kennecott Copper, to review the evidence. ADL, in comparing this study to other studies discussed in the body of the study pointed out the other "studies which neither in volume, duration or methodological excellence could compete with this exceptional investigation." (Ex. 26B, p. 32).

There have been three studies which examined the mortality experience of ASARCO, Tacoma, Wash., copper smelter workers. The first, Pinto and Bennett (Ex. 3Z) suffers from the inappropriate choice of nonexposed control groups for the arsenic-exposed population (ATR 772-73). The second study, Milham and Strong (Ex. 1A-7H) shows excess lung cancer mortality. The third, by Pinto and Enterline (Ex. 29B and Ex. 111, Attachment 4) presents the most thorough examination of ASARCO, Tacoma worker mortality. Consequently, only the latter study is examined in detail.

At the April 1975 rulemaking hearing, Pinto and Enterline (Ex. 29B) presented results of a mortality study of retirees receiving pensions from ASARCO, Tacoma. The retiree population included those who were alive on January 1, 1961, and who had reached age 65 prior to December 31, 1973 (Ex. 29B). An updated report (Ex. 111, Attachment 4) included pensioners who were alive as of January 1, 1949, and who had reached age 65 before December 31, 1960. For the years 1949 to 1973, 324 deaths were recorded, with 69 due to cancer. Of the 69 cancer deaths, 32 were due to lung cancer, a rate 3 times that of the Washington State population.

Pinto and Enterline considered the lifetime arsenic exposure of each member of the study population from two aspects—total exposure duration and average exposure—the exposure values being constructed from separate departmental averages of a large number of employee urine samples taken in 1973. These levels were used to calculate an arsenic exposure index for each pensioner studied. The pensioners were then divided into four groups based on their exposure indexes.

Pinto and Enterline found that respiratory cancer was related to the average urinary arsenic levels. No excess lung cancer mortality was observed in workers employed less than 25 years prior to retirement, who had average urinary arsenic levels less than 200 micrograms/liter. However, statistically significant excess lung cancer mortality was observed in all groups exposed 25 years or more.

On the basis of their findings Pinto and Enterline concluded, "results thus far indicate that there is a relationship between exposure to arsenic trioxide, or associated agents in the smelter atmosphere, and increased risk of respiratory cancer."

In the updated report (Ex. 111, Attachment 4), the authors also analyzed the effect of smoking on a population of 419 retirees alive on January 1, 1961. Among the 377 workers in this group for whom smoking histories were available, 191 were smokers and 186 were not (nonsmokers were defined as those who had not smoked in the last 10 years). Respiratory cancer mortality rates for the smoking retirees were compared with smokers in the general population of Washington State (1961-70) and the rates of nonsmoking retirees were compared with nonsmokers in the general Washington population. As a result, the authors were able to provide a numerical estimate of the adjustment for smoking on the lung cancer mortality rates observed in the study.

It should be noted that the Pinto and Enterline study, like the Lee and Fraumeni study, is an excellent study and deserves considerable credence. The study was based upon careful followup of a group of long-term exposed workers. Exposure indices, based on 1973 values, provided for a maximum utilization of the data. The consistent dose-response relationship between 1973-based urinary arsenic levels and lung cancer mortality strengthens the association of the disease with worker exposure to arsenic. Thus, OSHA accepts, the overall findings of excess lung cancer mortality observed in the study. The data from this study is analyzed in greater detail in Section IV-D of this premble.

There was considerable analysis in the record of the effects of smoking and place of birth on the findings of Pinto and Enterline, and Lee and Fraumeni, and other studies. Pinto and Enterline found the lung cancer rate among the smoking retirees to be 2.6 times that of the general population smokers, and the rates of the nonsmoking retirees to be 4.6 times that of the general population of nonsmokers. Pinto and Enterline, on the basis of a 1975 survey of current worker smoking habits, calculated that a 17 percent adjustment of lung cancer mortality was necessary to adjust for the smoking patterns of present Tacoma smelter workers. Dr. Enterline concluded:

> There appears to be some interaction between smoking and arsenic exposure, but not the multiplying effect observed for some other substances. Smokers have slightly higher total arsenic exposures at retirement, but definitely not enough to account for the added deaths. Table 3 (of the study) provides only very rough estimates, but it

MAY 5 1978 M

V 4 3 / 8 8

does suggest that the excess in SMR's for respiratory cancer are not due to smoking.

As noted by Dr. Weir (Ex. 29N) smoking should be considered in the evaluation of the Lee and Fraumeni and Pinto and Enterline studies. Dr. Weir has coauthored several studies which investigated the smoking patterns of various occupational classes of workers. Weir indicated the greatest adjustment necessary to account for increased degree of smoking among the skilled occupational laborers studied was 18 percent. In these circumstances, OSHA is unwilling to assume that smoking alone accounted for more than a 17 percent excess in lung cancer mortality.

OSHA accepts the fact that some adjustment to standardized mortality ratio in other studies, needs to be made, as in the case of the Tacoma workers to take into account for possibly higher smoking pattern (relative to the general population) among smelter workers. But if the 17 percent adjustment at Tacoma is typical, this would not significantly modify the findings of 2 to 8 times excess mortality found in this and other studies. Therefore, OSHA agrees with Dr. Fraumeni (ATR 182) that smoking could not account for the excess mortality in the "light" category of the Lee and Fraumeni study and of course, would not account for the larger excesses in the "medium" and "heavy" exposure categories.

Another factor known to affect excess respiratory cancer observed in the two studies is place of birth (Ex. 29N, 26B). As noted and displayed in table 7 of the Lee and Fraumeni study, foreign-born workers had higher SMR's for respiratory cancer than native-born workers, but exhibited similar gradients by degree and duration of exposure. Lee and Fraumeni stated,

> The greater excess of respiratory cancer mortality among foreign-born workers can be attributed, at least in part, to the fact that the periods of employment were generally longer than those for the native-born. In addition, the extent of the overall excess of respiratory cancer and the mortality gradients associated with specific exposures in the smelter cannot be explained by other factors which affect cancer mortality, such as socio-economic status, genetic susceptibility, availability of medical care, accuracy of death certificates, and urbanization. (Ex. 5D pp. 1049-50.)

Because the paper provided no data to assess the effect of duration of employment on foreign born worker respiratory cancer mortality, Weir analyzed the effect of birthplace on mortality risk for all causes. Weir stated that the figures based on mortality risk of all causes do not necessarily mean that the authors were incorrect in assigning the excess respiratory cancer risk to occupational exposure. However, if these two groups are similar, Weir calculated that as much as 15 percent of the respiratory cancer risk could be reassigned to place of birth (Ex. 29N, p. 21). It should be noted that this is only an approximation. The approach one would prefer (assuming one had access to the original data) would be to assess the influence of birth on the disease being assessed, lung cancer, and not make approximations based upon deaths from all causes. Since 33.7 percent of the deaths of Lee and Fraumeni and approximately 40 percent in the Pinto and Enterline were among foreign-born, Weir believed that the effect was at least as great in the Pinto and Enterline study (Ex. 29N, p. 21).

OSHA accepts Weir's analysis that this birthplace variable may influence the excess respiratory cancer mortality among these workers in these two studies. The exact degree is unknown but 15 percent seems a reasonable high-side estimate. As Weir later noted, the absolute value of the risk gradients by exposure level, would be reduced, the relative values would be unchanged.

Even if the adjustments for smoking (17 percent) and upper bound estimate for place of birth (15 percent were applied, there still would be a substantial excess respiratory cancer mortality in all categories (heavy, medium, and light) of the Lee and Fraumeni study and those in which a statistically significant excess lung cancer mortality was observed in 3 categories in the Pinto and Enterline study.

It can be speculated that these adjustments should be higher and that therefore a greater portion of the excess mortality in the exposed groups is accounted for by smoking and place of birth. But such speculation is not supported by concrete data. OSHA does not judge it appropriate when analyzing studies for the purpose of adopting health standards to apply all speculative hypotheses that might reduce reported risk. Accepting such hypotheses is, in effect, a bias against worker protection. Thus, OSHA concludes that the evidence indicates that some adjustment to the mortality rates is needed to take into account smoking and place of birth. But even allowing for adjustment for smoking and place of birth, there is still substantial excess respiratory cancer mortality among the exposed workers in the Lee and Fraumeni, and Pinto and Enterline Studies. Exposure to arsenic still remains the best explanation for the observed excess risk.

A two-part investigation of the worker population of an English factory which manufactured a sodium arsenite sheep dip was published in 1948. The first part of this study, reported by Hill and Faning, (Ex. 5B) compared mortality data of the factory worker population with that of workers in other occupations in the same community, during the years 1910 to 1943. Hill and Faning found 22 cancer deaths (29.3 percent) among 75 deceased workers, compared to 157 cancer deaths (12.9 percent) among 1,216 deceased workers from other occupations. The percentage of cancer deaths due to cancer of the respiratory system was 31.8 percent for the sodium arsenite workers compared to 15.9 percent for the control group, and from skin cancer, 13.6 percent compared with 1.3 percent for workers from other occupations.

The second part of the study, reported by Perry et al. (Ex. 5C), consisted of a clinical and environmental investigation of the same factory during 1945 and 1946. Although the study was limited in scope and design, Perry's results showed some correlations between the levels of arsenic found in the hair and urine of workers, and the levels of airborne arsenic contamination to which workers were exposed.

The Hill and Faning study is an example of a carefully done case-control study. The control group, a group of comparable socio-economic status with that of the exposed group, provided for internal control of many variables (smoking, place of birth) important for the evaluation of relative risk due to exposure to chemicals. The excesses, although based on a small sample size, are given added importance when considered in conjunction with the findings of the Ott and Baetjer studies (discussed previously) and taken together strongly supports the findings of excess cancer mortality risk among nonsmelter workers exposed to arsenicals.

In 1951 Snegireff and Lombard (Ex. 5E) conducted a statistical study of cancer mortality in the metallurgical industry. They concluded that the frequency of cancer deaths of all types among the employees of a plant handling arsenic trioxide was not significantly different from that of a control population (workers in a plant stated to be identical to the first except that it handled no arsenic trioxide). As a result of this lack of statistical significance, the authors concluded that arsenic trioxide was not carcinogenic.

Both NIOSH (Ex. 99, p. 32-35) and ADL (Ex. 26B, p. 15-20) analyses found the author's statistical analysis and conclusions to be of questionable validity. Using a number of assumptions, NIOSH observed that both worker populations were subject to large excess respiratory cancer mortality. NIOSH concluded that the authors should have chosen a more suitable control population, and focused their analysis on respiratory cancer mortality. ADL in a detailed analysis of the statistics of the paper noted several serious misapplications of statistical analysis as well as errors in interpretation (Ex. 26B, p. 18-20). OSHA concludes along with ADL and NIOSH that the statistics and analysis do not support the authors' conclusions. Accordingly, OSHA places no weight on this study.

M Y 5 7 8 M

In October 1974, the Kennecott Copper Corporation (KCC) submitted a survey of mortality from respiratory diseases observed among its active and retired employees for the period 1950 to 1972 (Ex. 1A-30). The study, performed by Milby and Hine, compared the ratios of observed employee deaths to the expected deaths and the proportion of deaths due to cancers of all types, respiratory cancer, and nonmalignant respiratory diseases among KCC employees with corresponding data for the United States and for the State of Utah. They found that the proportion of respiratory cancer deaths among KCC employees was not very different from either the total U.S. respiratory cancer death rate or that of the State of Utah.

Both NIOSH (Ex. 99, p. 47-8) and ADL (Ex. 26B, p. 38) noted that a major flaw in the Milby-Hine study was the inclusion of all workers from all Kennecott facilities in the mortality analysis. NIOSH noted that approximately 80 percent of the study population were miners, concentrator workers, and refinery workers. Miners and concentrator workers were not exposed to arsenic but rather to complex ore in which arsenic is bound in such a manner that workers are exposed to the "ore" and not free, unbound arsenic compounds. The arsenic in such ores might not be biologically available and therefore might not elicit a carcinogenic response. As noted in the Rencher-Carter study, none of these groups of workers have been shown to be at increased risk. This resulted in a significant dilution effect in which the mortality experience of smelter workers was masked by the inclusion of workers at other work sites. NIOSH also noted that insufficient time may have elapsed to allow for the latency period of arsenic-associated carcinogenesis. Thus, NIOSH felt that the study did not reliably evaluate the effects of exposure at the Kennecott, Utah, smelter.

OSHA concludes that the overbroad inclusion of workers at work sites not at excess risk, diluted results which would have been associated with smelter workers. Additionally, more information than provided in the study is necessary to evaluate whether sufficient time has elapsed to allow for latency period. In view of these difficulties, less weight can be placed on the findings of the Milby-Hine study, particularly in relation to the Lee and Fraumeni, and Pinto and Enterline studies.

A study by Kuratsune et al. (Ex. 1A-7G) published in 1974, reported a high frequency of respiratory cancer mortality among workers at a Japanese copper smelter. On the basis of Kuratsune's findings, the Japanese Ministry of Labor judged that the cases of lung cancer were due to occupational exposure to arsenic trioxide and other compounds released during the smelting of copper ores. Kuratsune's study is consistent with the findings of excess mortality among workers in some American smelters.

In 1976 Tukadome and Kuratsune (Ex. 191), in a follow-up to their 1974 study, published a study of the mortality in an experience of 2,675 male Japanese smelting and refinery workers for the period 1949 to 1971. The workers were divided into 5 cohorts according to their jobs, considering both the areas and tasks to which they were assigned. Standardized Mortality Ratios (SMR's) were calculated by applying the age-specific death rates to the mid-year populations by each year from 1949 to 1971 and summing over all calendar years.

Among copper smelter workers, statistically significant mortality excesses were observed for cancer of all sites, cancer of the colon and lung cancer. The ratio of observed to expected deaths for lung cancer was 11.9 (29 deaths observed, 2.44 expected) cancer of the liver 3.4 (11 observed, 3.26 expected), and cancer of the colon 5.1 (3 observed, .59 expected). In contrast, no excess cancer mortality was observed in any of the other cohorts.

The authors then grouped the copper smelter workers by duration (length of employment) and degree of exposure to arsenic and other compounds. These relative exposure designations were made without any quantitative exposure data, but were based on the relatively high arsenic content of the ores and judgments of persons familiar with the process. The excessive risk of lung cancer mortality was found to increase consistently with increasing length of employment at the smelter. This risk ranged from 5.63 times the expected for those working 1 to 9 years, to 19 times the expected for those working 20 or more years. Similarly, mortality increased consistently with increasing degree of exposure to arsenic ranging from 6.35 times the expected in the "light" exposure category to 14.9 times the expected in the "heavy" exposure category.

While noting the excess mortality due to liver cancer; the authors stated, "Since the majority of these deaths were unspecified malignant neoplasms of liver without adequate diagnostic validity, any further reference can hardly be made with confidence. It seems highly desirable that similar epidemiologic studies with particular attention to this site of cancer should be made at other copper refineries."

Based on their findings, the authors concluded that the findings of increased lung cancer mortality and demonstrable dose-response relationship supports the findings of Lee and Fraumeni and Ott et al. of increased lung cancer risk among workers exposed to arsenicals (Ex. 191, p. 315).

Kennecott Copper stated (Ex. 190-1) the Tukudome study provided no further information beyond the other studies previously examined which indicate a causal relationship between inorganic arsenic and respiratory cancer. Kennecott further noted that there was no environmental data available to indicate what chemicals and to what degree workers were exposed, and that the authors appeared to rely solely on their judgment in deriving the relative exposure classifications. Finally, Kennecott noted that the authors had no data to support their judgment that arsenic compounds and sulfur dioxide as well as possibly other carcinogens such as polycyclic aromatic hydrocarbons are responsible for the excess respiratory cancer observed.

OSHA accepts some of the above criticisms of the study. One of the weaknesses of the study is there is no quantitative exposure data. Thus, great weight cannot be placed on the exposure classifications used. What is useful, however, is the fact that only the cohort of smelter workers were subject to excess risk. Consequently in the absence of exposure data and in light of the relatively primitive processes used in the plant from 1919 to 1946, one can state that these findings are consistent with the findings of other studies of excess respiratory cancer mortality among smelter workers exposed to arsenic trioxide and other compounds.

ASARCO suggested that employees placed in the cohort of refinery workers observed to have no excess mortality, may indeed have had some exposure to arsenic based on analogy with similar operations at their Tacoma plant (Ex. 190-3). Again little weight can be placed on this suggestion because no quantitative data is available to confirm the degree and duration of exposure.

In January 1975, OSHA received the Rencher-Carter (BYU) study of worker mortality in the Utah Division of the Kennecott Copper Corp. (Ex. 5F). For the period 1959 to 1969, 965 deaths were identified and divided into four categories: Smelter workers, mine workers, concentrator workers, and others. The authors then calculated the percentages of deaths from specific causes in each category, and compared their findings with the 1968 mortality data for the State of Utah.

Smelter workers were found to have the highest percentage of deaths due to lung cancer (7 percent), while mine and concentrator workers had 2.2 percent of deaths due to lung cancer. As noted earlier in the discussion of the

V 4 3 1 8 8

Milby-Hine study, it is uncertain whether mine and concentrator workers are exposed to biologically available arsenic. No lung cancer deaths were observed in the "other" category (refinery, office, and research center workers). The corresponding 1968 lung cancer mortality figure for Utah was 2.7 percent.

Next, the authors investigated the influence of smoking on lung cancer mortality. Based on a complete survey of the smoking habits of the deceased smelter workers, and random samples of the deceased mine and concentrator workers, they found that nearly the same percentage of all three groups were smokers (approximately 60 percent). After dividing each of the three groups into smokers and non-smokers, Rencher and Carter observed that both smoking and non-smoking smelter workers had lung cancer mortality rates in excess of their counterparts in the mine and concentrator groups.

After determining the age of the workers at death, the authors calculated age-adjusted death rates and compared them to the State rates. Smelter workers were found to have a rate of lung cancer mortality three times that of the State population (10.1 versus 3.3). The mine workers had a lower lung cancer rate than the State population (2.1 versus 3.3). An examination of work histories revealed that all but one of the smelter workers who died of lung cancer had worked in one of four plant areas having the highest average exposure levels for five contaminants (arsenic, sulfur dioxide, sulfuric acid mist, lead, and copper). After calculating cumulative exposure indices for each smelter worker, for each contaminant, and averaging each category, it was found that all five average cumulative exposure indices were higher for the lung cancer group. This indicates that these smelter workers had either worked longer at the smelter or in areas of higher exposure. The findings of this study are consistent with findings of excess lung cancer mortality of smelter workers exposed to arsenic.

In 1973, W. C. Nelson et al. (Ex. 1A-28) of the Environmental Protection Agency (EPA), published a followup mortality study for a cohort of 1,231 individuals in Wenatchee, Wash., who had participated in a 1938 mortality survey of the effects of exposure to lead arsenate insecticide spray (Neal et al., Public Health Bulletin 267, 1941). The population surveyed was classified by spray exposure, duration of exposure, age and sex. Additionally, three exposure groups were identified: Orchardists, those having the highest exposure; consumers, those having no exposure; and a third group, having intermediate exposures.

Nelson located over 97 percent of the original 1938 study group. The Standard Mortality Ratio (SMR) technique was used to compare the total death rate to the expected death rate in the State of Washington. The authors concluded that excess mortality did not occur consistently with the degree of exposure to lead arsenate spray. In fact, the orchardists, the most highly exposed group, had the lowest SMR of the three groups analyzed.

The American Wood Preservers Institute (AWPI) (Ex. 115, p. 15-18) and others suggest that the Nelson study provides convincing evidence that lead arsenate specifically, and pentavalent arsenic in general, are not carcinogenic. They indicated that the study is a careful followup of the cohort of orchardists studied by Neal et al. (Ex. 62) exposed to substantial quantities of lead arsenate spray during their working lives. Due to the "substantial" exposure and careful methodology, AWPI concluded that lead arsenate is not carcinogenic (Ex. 115, p. 18).

NIOSH on the other hand stated:

> We question also the pertinence of the study by Nelson et al. All that is known about the exposure of those people to arsenates is that during 1938 they were exposed for 8-14 hours per day for not more than 12 weeks, and some for as little as 2 weeks, to airborne concentrations of arsenic somewhere between 0.02 and 261.2 mg/10 cu m. The group considered to be the most heavily exposed orchardists, had a mean concentration of arsenic in their urines at some unspecified time during the day and at unspecified dates in relation to their actual contacts with arsenic that was about 2.2× that in the urines of a control group. We know nothing about their previous or later exposures to arsenates and cannot assume that they continued to have annual exposures to similar environmental concentrations of arsenate throughout the 30 years from 1938 to 1968, when the retrospective study was performed. The exposure during 1938 could be the only one that some of the subjects ever had. The finding of no excess cancer in the most heavily exposed group cannot be assigned any high significance in consideration of the many unknown factors in the study (Ex. 192A).

In its analysis of this paper ADL noted (Ex. 26B, p. 45) "The most serious deficiency of this study deals with the difficulty in identifying the actual level and duration of lead arsenate exposure of its subjects. Frequent and serious errors in such classification of subjects relative to their exposure can mask a relationship that might exist between exposure and mortality."

OSHA concludes that the Nelson study is not a valid basis for judging the potential carcinogenicity of lead arsenate. While it was a careful followup of persons included in the 1938 study, the exposure classifications were based solely on measurements made in 1938. As the authors noted (Ex. 1A-28, p. 110) the 1938 categories were kept constant, regardless of subsequent work or retirement. As NIOSH indicated, exposures may have differed dramatically from those measured in 1938.

Especially noteworthy, also, is the authors' discussion of their own study design. In this discussion, the authors noted that it was difficult to be sure of the exposure dosage categories, and that they lacked data for individual exposure measurements. Nelson stated that they could not be positive about whom the most exposed individuals were, and that the dosage levels were especially a problem for the intermediate group, who had the most heterogeneous exposures. Nelson also stated that it is difficult to interpret the study results due to the relatively small number of individuals involved. In fact, Nelson stated that some of the more suggestive excesses in mortality cannot be considered significant because of small numbers and that many of the volunteers in the 1938 study "are still too young to have reached high risk mortality age" (Ex. 1A-28).

NIOSH attempted to independently evaluate the Nelson study findings using two types of data sources, the first data being occupational mortality data for adult white males in the State of Washington for the period 1950-71 (Ex. 1A-34). The other source reviewed was the age-adjusted mortality rates for specific types of cancer for the three-county area from which the Nelson orchardist sample was drawn. Here again, because of many unknown factors, including lack of data necessary to determine degree and duration exposure to lead arsenate as well as documented use of a variety of other pesticides (Ex. 31C), OSHA feels that this data cannot be relied on to make a judgment on the carcinogenicity of pentavalent arsenic.

In July 1976, American Wood Preservers Institute submitted the finalized form of a mortality study of Hawaiian carpenters, conducted for AWPI by the Pacific Biomedical Research Center of the University of Hawaii (Ex. 137-6). Preliminary results of the study had been submitted during the April 1975 hearings. (Ex. 31C, Attach. 71) The study was undertaken to analyze the mortality experience of carpenters in Hawaii before and after the introduction of water soluble arsenical wood preservatives.

In making this study, the death records of 227 carpenters who died between June 1947, and May 1951 (Group A), and 293 carpenters who died between January 1970, and December 1973, (Group B), were matched with the death records of non-carpenters of the same sex, race and age (within 5 years). Although arsenical wood preservatives had been used in Hawaii since 1935, prior to World War II the use of arsenate-treated wood was negligible. After World War II, however, according to this study, most

M Y 5 7 8 M

of the lumber used in construction was treated. Therefore, the investigators assumed that the carpenters who died in the early period (Group A) constituted an unexposed control group with respect to arsenate-treated wood, and that the carpenters who died in the later period (Group B) had substantial exposure to arsenical-based preservatives.

Comparison of the death rates among carpenters with the total death rate in the general population showed a significant increase in deaths among carpenters. The relative risk for all causes of death for carpenters was 2.15 for Group A and 2.29 for Group B. The relative risk for cancer death among carpenters was 3.58 for Group A and 2.72 for Group B. The authors concluded that there was no significant difference in cancer mortality between Group A and Group B. Similarly, the authors found that there were no significant differences in cancer of trachea, bronchus and lung, or lymphatic and hematopoietic system between the carpenters and non-carpenters and that the differences between Group A and Group B were not significant.

Based on their findings the authors concluded, "Our study is in agreement with Milham's and others with respect to excess cancer deaths among carpenters. However, the relative risk for cancer among carpenters exposed to arsenate-treated wood does not show a significant excess for the periods studied."

Unfortunately, there is no data on individual carpenter exposure of the exposed group. Thus, we cannot define who was "exposed", who was "nonexposed", and what the degree of exposure was. Specifically, it is not clear that the Group B carpenters had higher exposures to inorganic arsenic than the "nonexposed" group. Additionally, there is some question whether the Group B carpenters had been followed for a sufficient number of years to allow for the long latency period (20 years or more) observed in other studies for the development of arsenic-related respiratory cancer. (See also the analyses of this study by E. Baier of NIOSH, Dr. Kraybill of NCI, Dr. Lloyd of the Steelworkers (Ex. 192).) Consequently, the conclusions of this study are not sufficiently documented to support a conclusion that pentavalent arsenic is not a carcinogen. As discussed in the scope and application section, however, OSHA has concluded that it is not appropriate to include arsenically treated wood within the scope of this standard.

In 1969, Denk et al. (Ex. 109C-87) reported the autopsy findings of 100 Moselle vineyard workers exposed to arsenical pesticides. From 1923 until 1942 vines were sprayed from May to June with "Urania Green" and "Silesia Green", two pesticides containing 54 to 56 percent arsenic trioxide, and also with calcium arsenate. In addition to inhalation exposure, workers consumed large quantities of "home brew" (a wine residue) containing 2.0 to 8.9 mg arsenic trioxide per liter.

Cases were selected from among those petitioning from 1960 to 1966 to the Rhine Agricultural Professional Society for recognition of the effects of arsenic as an occupational disease. One hundred cases were chosen, without regard to expert evaluation, from among those autopsied for which precise medical diagnoses were available for evaluation. Cancer was listed as cause of death in 75 of the 100 cases, and as a secondary disease in 10 others. The 85 cases were distributed over the various organ sites as follows: 65 cases of lung cancer, 29 cases of skin cancer, 3 of laryngeal cancer, 2 of stomach cancer and 2 of pancreatic cancer, and one each for 8 other sites.

In 1957 and 1958, Roth (Ex. 65, 109C No. 88) published the results of his autopsy findings of vine growers from the Moselle region in Germany who were exposed by inhalation of pesticides containing 4.3 to 56 percent arsenic trioxide and by drinking wine containing 1.5 to 8.2 mg arsenic trioxide per liter. In the 1958 report, cancer was listed as the cause of death in 39 of the 47 cases (64 percent), 18 of which were due to lung cancer (38 percent), 6 to liver sarcomas (12.8 percent), 5 to cancer of the esophagus (10.8 percent), and 1 to bile duct cancer (2.1 percent). Arsenic cirrhoses were listed as the cause of death in 8 of the 47 cases and were observed in 15 other cases. Roth also found 10 cases of multiple tumors of the skin and 4 cases of melanoses of the skin. Roth also surveyed the lung cancer mortality rate in the general population of vineyard and nonvineyard areas of the Moselle and vineyard areas of the Ahr districts of Germany. In general, Roth found higher rates of lung cancer mortality in vineyard areas using arsenical insecticides than in all other areas.

The Denk and Roth studies have been discussed in detail, because of the considerable analyses on them made during the record of this proceeding. The major route of exposure for these pesticide workers was ingestion of arsenic contaminated wine. These studies thus, provide further evidence of the carcinogenic potential of inorganic arsenic by another route of exposure, ingestion.

C. LYMPHATIC CANCER

With the exception of the Allied and Dow studies, no excesses of lymphatic cancer mortality were reported in the arsenic epidemiological literature. In many studies, no analyses were made for the risk of lymphatic cancer. In letters to Allied (Ex. 101) and Dow (Ex. 102) OSHA asked whether they had any reason to suspect exposure to a particular agent or agents used in their plants, and not found in the environment of nonferrous smelters, as a causative agent or agents for lymphatic cancer. Allied responded,

> That the difference is either due to route of exposure (skin contact versus inhalation) or to the specific properties of sodium arsenite and/or Paris green (copper aceto-arsenite). In our earlier reviews and reports to you, we did not recognize the significance of the fact that sodium arsenite was produced concurrently as a product in a separate operation in the arsenic acid plant area, and was also used as a raw material in the insecticide plant. Doctor Baetjer advises us that the clinical literature supports the position that sodium arsenite is a systemic carcinogen, whether by skin absorption or by ingestion.
>
> We have also learned from personal interrogation that at least some of the people contracting non-pulmonary cancer had prior conditions of arsenical keratoses subsequent to skin irritation or contaminated wounds. We have determined that among the dry products only the Paris green acted as a skin irritant under normal conditions of personal cleanliness and hygiene. The arsenates of lead and calcium were essentially non-irritating. We are somewhat reassured by the fact that both skin irritation and keratoses are historical in nature, and that no new keratoses have been logged for at least twenty years. This corresponds roughly in point of time with our revisions to the arsenic acid/sodium arsenite processes and to our termination in 1947 of Paris green manufacture and packaging.

The Allied response continued,

> We consider it significant that arsenites were involved in the two American studies and the English "sheep dip" study, whereas arsenates were apparently not involved in the British experience. According to Hunter ("Diseases of Occupations: 4th Edition, pp. 337-342) both Paris green and sheep dip have produced skin cancers by contact, some of which progressed to other sites.
>
> We have also been able to retrieve two rather ancient clinical studies: Archives of Dermatology and Syphilology 32: 218-33 (1935), Montgomery: Arsenic as an Etiologic Agent in Certain Types of Epithelioma, and American Journal of Cancer 22: 287-207 (1934) Franseen and Taylor: Arsenical Keratoses and Carcinomas. These papers, which relate mainly to medicinal use of sodium or potassium arsenites, both comment on the fact that a significant fraction of those patients with skin cancer at the site of arsenical keratoses later developed lymphatic and other "metastases" after apparently successful removal of the original lesions.
>
> These reports, considered jointly, all seem to corroborate the inferences we have drawn from the limited number of cases among our own people on which we have been able to secure reasonably complete case histories: i.e. that there is no objective evidence that arsenates have produced human cancer when arsenites were not also present, and that irritation, generally followed by keratoses resulting from skin contact, is an important factor in non-pulmonary arsenical cancers. (Ex. 55)

Dow Chemical Co. responded that they could not identify any agent responsible. (Ex. 102)

V 4 3 / 8 8

Thus, based on the above limited data and data from the clinical literature, it appears that copper-acetoarsenite, sodium arsenite, and potassium arsenite may be the causal agents in the observed lymphatic cancer cases. By regulating inorganic arsenic for purposes of reducing respiratory cancer mortality, exposures will be maintained sufficiently low so that the potential risk of lymphatic cancer will also be minimized.

D. DOSE-RESPONSE

Two of the epidemiologic studies (Pinto and Enterline, and Lee and Fraumeni), provide evidence of a dose-response relationship for the carcinogenic effects of arsenic, i.e., higher exposures for longer periods is associated with higher incidence of disease.

As discussed earlier, Pinto and Enterline conducted a mortality study of retirees receiving pensions from the ASARCO Tacoma smelter. Pinto and Enterline considered the lifetime arsenic exposure of each member of the Tacoma smelter study population from two aspects, total exposure duration and average exposure. The exposure values were constructed from departmental averages of a large number of urine samples taken in 1973. These levels were used to calculate an arsenic exposure index ($\mu g/1$-years) for each pensioner studied. The pensioners were divided into 4 groups based on their exposure indexes.

Pinto and Enterline found that respiratory cancer mortality was related to both the arsenic exposure index and the average intensity of urinary arsenic value. This is clearly demonstrated by data presented in Table 1 and 2 of their study (Attachment 4, Exhibit 111) which showed that SMR's for respiratory cancer increased consistently with increasing arsenic exposure index.

TABLE 1 (EXCERPTED)

Urinary arsenic exposure index (yrs-μg/1 urine)	Observed deaths	SMR
Under 3000	5	185.8
3000-5999	11	279.4**
6000-8999	7	306.9**
9000-11999	4	568.5**
12000+	5	810.5**

**Significant at the 5% level.

Respiratory cancer mortality also increased consistently with increasing average intensity of exposure and duration of exposure.

TABLE 2 (EXCERPTED)

1. EXPOSED FOR LESS THAN 25 YEARS

Average Intensity (μg/1 Urine)	Number of Retirees	Observed Deaths	SMR
50-199	99	2	95.8
200-349	77	4	257.2
350 and over	25	3	595.3**

2. EXPOSED FOR 25 YEARS OR MORE

Average Intensity (μg/1 Urine)	Number of Retirees	Observed Deaths	SMR
50-199	191	10	237.7**
200-349	106	8	368.7**
350 and Over	28	5	859.5**

** Significant at the 5 pct level

There is a weak to moderate correlation between urinary arsenic levels and airborne arsenic levels. This is discussed in exhibit 111 attachment 4, which indicates that a urinary level of 100 $\mu g/1$ is roughly equivalent to 31 $\mu g/m^3$ in air. As shown above, no excess lung cancer mortality was observed in those workers employed at the smelter less than 25 years having average urinary arsenic levels less than 200 $\mu g/1$ (mean of 123 $\mu g/1$). However, excess lung cancer mortality was observed in all groups of pensioners who had worked at the smelter for 25 years or more.

From the results of this study Pinto and Enterline concluded, "results thus far indicate that there is a relationship between exposure to arsenic trioxide, or associated agents in the atmosphere, and increased risk of respiratory cancer."

On December 5, 1975, Dr. Enterline submitted a further analysis of the evidence of the existence of a threshold for arsenic exposure.

"As you know, the tables we prepared on retired smelter workers show no excess for men working less than 25 years and with mean urinary arsenic values less than 200. The SMR of 95.8 for this group, while based on only 2 observed deaths, is supported by SMR's in adjacent intensity exposure levels. The relationships appear to be linear with 97 percent of the variation in SMR's explained by the combination of intensity and duration. Thus, the findings for men exposed less than 25 years (mean 20.1) and at levels between 50-199 $\mu g/1$ (mean 123) seem to be real enough (if linear relationships exists). This is not to say, however, that our data are ideal. Any interpretations must be conditioned by their limited nature (e.g.; older males, unknown cigarette smoking histories, etc.).

There are at least two interpretations that can be placed on our data for men working less than 25 years with urinary arsenic under 200:

(a) Exposure at the level produces cancer but we simply were unable to follow these men long enough to observe an excess or;

(b) This truly represents a threshold limit value.

In support of the first interpretation, there are data which suggest that latency in cancer is a function of dose, with low doses requiring very long latent periods (e.g.: $t=(1/d)^{1/4}$ power). The low dose retirees were followed an average of 8.7 years after retirement and since they had worked an average of 20.1 years, the mean latent period observed is 28.8 years. For most carcinogens with which I am familiar, 20 years is long enough to observe effects in humans. If arsenic exposure which cause mean urinary levels of 123 over a period of 20 years also cause lung cancer, the median latent period must be very long indeed in this population of older males probably longer than they're likely to live.

In support of the second interpretation, an examination of SMR's among retirees for respiratory cancer by age shows a decline with time since termination of exposure (retirement) so that further follow-up may not show any effect:

Age	Observed	Expected	SMR
65 to 69	14	4.1	345.0
70 to 74	11	3.5	315.5
75 to 79	5	2.0	250.0
80 plus	2	1.0	200.0

This looks like the experience with cigarette smoking. That is, lung cancer risk for persons who stop smoking seems to approach normal with the passage of time. Do I think there is a TLV for airborne arsenic? It's unfortunate that we must have an answer at this moment. We have now microfilmed personnel records at the Tacoma smelter for all men who worked a year or more during the period 104-01963 and in about a year should have the answer. The only relevant data now available, however, suggests that there is a TLV for men who retired from the smelter, and if the effects of arsenic tend to disappear with time (as cigarettes) this may apply to other age groups as well." (Ex. 133)

For an analysis of the threshold question, see the analysis below.

In 1969 Lee and Fraumeni published a study of the mortality experience of 8,047 white male smelter workers who had been employed at the Anaconda, Montana smelter for at least 1 year prior to 1957. From January 1, 1938 to December 31, 1963, 1,877 deaths were recorded, 147 deaths of which were due to respiratory cancer, a rate 3.3 times the respective rate in the Montana population (p less than 0.01).

For each year of the study period, workers were assigned to one of five cohorts on the basis of duration of

M Y 5 7 8 M

their employment in smelter. These cohorts were defined as follows:

Cohort 1, 15 or more years with 15th year completed before 1938
Cohort 2, 15 or more years with 15th year completed 1938-1963
Cohort 3, 10 to 14 years
Cohort 4, 5 to 9 years
Cohort 5, 1 to 4 years

The study group was further divided according to heavy, medium and light exposure to arsenic trioxide, sulfur dioxide and other chemicals based on measurements made at the smelter at the time of the study. The authors stated, "While measurements in work areas may have varied over time, it seems reasonable to assume that these 3 broadly defined categories denoting relative exposure remain fixed." This statement was supported by testimony presented by H. F. Morris, Consulting Engineer for Anaconda (Exhibit 28B). Based on measurements made by Anaconda, the mean arsenic exposure from 1943 to 1959 were as follows: Heavy (11.27 mg/m3), medium (0.58 mg/m3), and light (0.29 mg/m3). Thus, as the authors stated, these categories appear to represent relative exposures.

Lee and Fraumeni found that respiratory cancer mortality increased consistently with increasing duration and degree of exposure to arsenic trioxide. This gradient is clearly demonstrated by data presented in Table 5 of their study.

Cohort	Respiratory cancer mortality	Maximum exposure to arsenic (12 mo or more)		
		Heavy	Medium	Light
All cohorts combined	Observed	18	44	45
	Expected	2.7	9.2	18.8
	SMR	*667	*478	*239
1	Observed	8	22	14
	Expected	1	3.3	5.6
	SMR	*800	*667	*250
2	Observed	8	12	9
	Expected	.9	2.2	2.9
	SMR	*667	*545	*310
3 to 5 combined	Observed	4	10	22
	Expected	.9	2.8	10.3
	SMR	**444	**263	*214
Number of persons in arsenic category***		462	1,926	3,257

*Significant at the 1 pct level.
**Significant at the 5 pct level.
***The remaining 2,842 men in the study worked less than 12 mo in their category of maximum arsenic exposure and had an SMR of 286*.

Sulfur dioxide exposure and respiratory cancer mortality were also positively related, with observed deaths ranging from 6.0 to 2.6 times expected in the heavy, medium, and light categories. This is demonstrated in table 6 of the study.

Cohort	Respiratory cancer mortality	Maximum exposure to SO_2 (12 or more months)		
		Heavy	Medium	Light
All cohorts combined	Observed	46	26	39
	Expected	7.7	8.0	16.2
	SMR	*597	*286	*257
1	Observed	24	10	12
	Expected	3	1.7	5.1
	SMR	*706	*586	**235
2	Observed	13	6	8
	Expected	1.7	2.4	2.2
	SMR	*765	250	*364
3 to 5 combined	Observed	9	7	19
	Expected	2.6	3.9	7.8
	SMR	*346	179	*244
Number of persons in SO_2 category***		1,144	1,506	2,444

*Significant at the 1 pct level.
**Significant at the 5 pct level.
***The remaining 2,953 men in the study worked less than 12 mo in their category of maximum SO_2 exposure and had an SMR of 283*.

The authors stated, "exposures to both arsenic trioxide and sulfur dioxide were found to be associated with an excess of respiratory cancer deaths in this study. It is difficult to separate the effects associated with these two exposure variables, since most work areas having "heavy" arsenic exposure were also "medium SO_2" and conversely, all jobs with "heavy SO_2" exposure were "medium arsenic". However, further investigation revealed that per-

sons with heaviest exposure to arsenic and moderate or heaviest exposure to SO_2 were most likely to die of respiratory cancer" (Ex. 5D, p. 1047).

As described in detail in section IV-B of this preamble, Ott, Holder and Gordon showed that workers exposed to primarily pentavalent inorganic arsenic were at a 3.5-fold excess risk of dying of respiratory cancer and 3.8-fold excess risk of dying of lymphatic cancer. (Ex. 1A 3-1)

The authors divided the arsenical workers into 4 groups based on estimated arsenic exposures. This data is presented in Table 1 (page 251 of the study) which is reproduced below.

TABLE 1.—*Estimated arsenic levels by job category*

Job category	8-hr TWA[1]
Group 1	5.0
Group 2	3.0
Group 3 (jobs associated with arsenical production out of the area of high dust exposure)	1.0
Group 4 (jobs involving either the formulation of nonarsenicals within the production unit or requiring only intermittent time in the areas of high exposure)	0.1

[1]Mg As/m³.

The authors described the derivation of these categories as follows:

"Over the course of 37 years, numerous modifications in job classification terminology were encountered. Fifty different job titles were identified, including those later found to refer to the same job. Next, job descriptions and exposure measurements were used to combine the jobs into four exposure classifications. Time-weighted average concentrations were assigned to the various groupings with emphasis on maintaining properly spaced ratios between the exposure groups. The estimates shown in Table 1 were obtained through the consensus of two industrial hygienists familiar with the processes, the available industrial hygiene data, and job descriptions.

The concentrations of arsenic experienced by employee while in group 1 jobs were quite variable, and included the likelihood of brief exposures to very high levels. Respirators were available, but were not worn consistently. Individuals on group 2 jobs were exposed to dust levels generally at lower, less variable concentrations, but over longer periods of time. Some employees, for example, spent up to 6 hours a day performing tasks near the packaging machines. Few measurements were available for group 3 or group 4 jobs because the exposure was apparently thought to be of relatively less concern. Thus, the greatest subjectivity was used in estimating time-weighted average concentrations for these groups. Since no adjustments were made for the wearing of respirators, or for the fact that production occurred on a somewhat intermittent basis, it is likely that actual exposure dosages were overstated rather than understated by the above estimates. However, the imprecision in the time-weighted average estimates would not be expected to lead to appreciable distortions in the relative dosage exposure rankings, since duration of exposure, which was determined quite precisely, varied considerably from individual-to-individual."

In a letter submitted to Mr. David Miller, an attorney for ASARCO (submitted as Exhibit 29(0)), Dr. Gordon presented a further breakdown of respiratory cancer mortality by exposure intensity group. This data is reproduced below.

SUMMARY OF 173 DEATHS BY EXPOSURE INTENSITY GROUPS

Highest exposure intensity	Total decedents	Respiratory malignancy deaths
Total	173	28
Group 1	30	8
Group 2	92	14
Group 3**	44	6
Group 4	7	0

**Groups 3 and 4 include individuals exposed only at those levels.

Groups 1 and 2 include individuals who experienced limited exposure intensities, as a result of having changed jobs during their employment in the arsenicals production unit.

In a subsequent letter to Dr. Gordon, OSHA asked whether he considered the findings of 0 respiratory malignancy deaths among the 7 decedents in Group 4 to be evidence of a threshold effect. Dr. Gordon responded, "The small number of individuals in Group 4 does not permit the establishment of a threshold; however, it encourages one to think that a threshold may exist." (Exhibit 102.)

Using a six-term equation, Ott et al., calculated the number of respiratory cancer deaths and ratio of observed to expected respiratory cancer deaths in various arsenic exposure categories (see table 4 of the study). The authors described this derivation as follows:

The expected proportion of deaths due to respiratory malignancy in relation to year of death and age of death was estimated based on a weighted least squares analysis of the control population. The 1,809 deaths among the controls were categorized by 10-year age groups and intervals of 5 calendar years within each age group. A six-term equation, utilizing age and year of death, explained 57 percent of the variability between the categories and provide a reasonable fit to the data in the region of interest.

The limitations inherent in data contained in table 4 must be analyzed. As stated previously, 16 respiratory cancer deaths were observed among the 138 decedents who had worked in arsenic exposure areas for 1 year or less. Consequently, it is not appropriate to extrapolate short-term dosages in terms of long-term "equivalent" career dosages.

Furthermore, as ADL noted (Ex. 26B) although work histories seemed well documented, the quantitative exposure could not be accurately specified. The authors based the four daily exposure categories on limited exposure data and a consensus judgment among individuals familiar with the operation. ADL stated, "They fail to acknowledge here that their most dramatic conclusion relates excessive incidence of death by respiratory cancer to a distribution of career dosages, where both the death excess and the career dosage depend on the value assumed by the four daily exposure levels" (Ex. 26B, p. 33). ADL also noted that the six-term regression equation which yielded the weights for the least squares fit of dose-response was not sufficiently documented to permit evaluation.

OSHA agrees with the ADL analysis. We have no way of evaluating individual worker exposure for potential error. Application of the six-term equation to this data, thus can provide no acceptable data for an estimate of dose-response. In contrast to the Lee and Fraumeni and Pinto and Enterline studies, we have insufficient exposure data to provide verification of exposure categories. Accordingly, OSHA cannot rely on the dose-response data or analyses thereof as a basis for the final standard. As noted in section IV-B of this preamble, OSHA does rely however on the study findings of excess mortality risk among arsenic-exposed workers.

As discussed in respiratory cancer section of this preamble, both the Lee and Fraumeni and Pinto and Enterline studies meet many requirements of an ideal epidemiological study and great weight can be placed on their findings. Their further finding of a consistent dose-response relationship provides strong and convincing evidence of the carcinogenicity (or co-carcinogenicity) of some inorganic arsenicals. As also discussed above, the exposure classifications and analyses thereof in the Ott study and therefore the Blejer-Wagner analysis of the Ott study (Ex. 99, p. 55-6) have major methodological limitations and therefore it is not appropriate to draw firm conclusions as to the exact nature of the dose-response curve. However, the Ott study provides firm evidence of excess lung cancer mortality of workers exposed to arsenicals.

Based upon the above data, several participants at the hearing believed that there was a threshold level, below which no increased cancer risk would be observed. Representative of this discussion, was the following discussion by ASARCO (Ex. 118, p. 42-3):

In the Dow study it was estimated that employees in Group 4 had a time-weighted average exposure to inorganic arsenic of 100 $\mu g/m^3$. As we have previously noted, none of the employees who remained in Group 4 for their employment period in the study died of lung cancer. While there are only seven persons in this group and their experience does not conclusively establish a threshold, it encourages one to think that a threshold may exist.

Similarly, the Pinto and Enterline data suggest the existence of a safe level. The

group whose exposure index was under 3,000 in table 1 of Dr. Enterline's letter (Ex. 111, Attach. 4) had a SMR of 165.6 for respiratory cancer, a value not different statistically from 100 * * *.

The group in table 2 whose average intensity of exposure was under 200 $\mu g/l$ and who worked less than 25 years had an SMR for respiratory cancer of 95.6. The data concerning the experience of retirees from 1961-1973, who probably had lower exposures than the 1949-1973 group, contain SMR's even closer to the norm (Ex. 29B). The SMR for respiratory cancer for the group whose exposure index was under 3,000 was 130.6, and for those with an average intensity of exposure under 175 with 25 years or less experience the SMR was 117.4—neither figure being significantly different from 100 by standard statistical tests.

ASARCO concluded, citing the Dow and Pinto and Enterline studies as the best available evidence. "Those materials would support a finding that there is a no-effect level, or at least a level of respiratory cancer risk reduced to the insignificant, at inorganic arsenic concentrations of about 100 $\mu g/m^3$ in air or 250 $\mu g/l$ in urine" (Ex. 118, p. 45).

A number of witneses, however, gave their expert opinions that there is not yet enough knowledge about the mechanisms of carcinogenicity to determine a threshold level.

Dr. Kraybill stated:

There is a general policy or concept among epidemiologists that there is no safe level. Why do we say that? Because we have no scientific method as of yet—1975—to prove otherwise (ATR p. 186).

This was Dr. Radford's view also (ATR 562).

Dr. Wagoner concluded:

I think the overwhelming body of scientific judgment in the United States and internationally is of the opinion—and it has been very aptly put by the Surgeon General's ad hoc Committee on low level environmental carcinogens—that the present state of technology does not permit the determination of safe levels for a carcinogen (ATR 334-335).

OSHA believes it is not appropriate to set an exposure limit based on the belief that a threshold may exist because of these considerations. As noted above, OSHA does not regard the exposure categories of the Dow study to be sufficiently supported to make further judgments on dose-related effects. Furthermore, the last category (Group 4), composed of seven deaths, is far too small for conclusions as to a threshold to be made.

The Pinto-Enterline data is more satisfactory (Ex. 29B). However, workers exposed more than 25 years in all exposure categories including those with average intensity less than 200 $\mu g/l$ had statistically significant excess respiratory cancer mortality. In this study, as well, the limited number of workers in the exposure category in which no excess was observed is far too small to statistically test whether a threshold exists for the entire population at risk (arsenic-exposed workers). Therefore, no level has been satisfactorally demonstrated that will eliminate increased lung cancer mortality among all arsenic-exposed workers.

Further, this limited amount of epidemiologic evidence is not sufficient to overcome the substantial body of scientific opinion that there is not sufficient knowledge to determine a threshold for a carcinogen.

In view of OSHA's obligation to protect workers and the substantial body of scientific opinion that no safe level of exposure to a carcinogen can be shown, OSHA must exercise its discretion in favor of assuring worker protection. OSHA and other Federal agencies responsible for protecting individuals from the hazards posed by carcinogenic substances have consistently followed the view that no safe level of exposure can be established based on current scientific knowledge.

E. ANIMAL STUDIES

In its 1973 criteria document, NIOSH evaluated 18 animal studies involving inorganic arsenic exposures. However, only two of these were studies of the effects of exposure to airborne concentrations, and neither of these were designed to observe lung cancer.

The first was an inhalation study, by Rozenshtein (14), of albino rats exposed to arsenic trioxide for 24 hours per day, for 3 months. The study was designed to observe the effects of atmospheric pollution. The second study, by Bencko and Symon (2), involved an evaluation of hairless mice exposed to fly ash containing 0.1 percent arsenic trioxide. The authors observed an accumulation of arsenic in the animals' livers and kidneys from exposure to the fly ash.

Dr. Kraybill of the National Cancer Institute presented testimony at both the fact-finding and April 1975 hearings in which he discussed the failure of experimental animal studies to confirm the epidemiological findings concerning arsenic exposure. Some of the reasons for this failure could be, according to Dr. Kraybill, that "(a) the proper animal model has not been tried, (b) the proper route of administration has not been tried, i.e., inhalation, (c) sufficient numbers of animals have not been in the study for statistical validation of results, and (d) the role of arsenic as an interactant or synergist and establishment of it as a possible co-carcinogen has not been determined" (Ex. 16A). Dr. Kraybill stated during the fact-finding hearing, "Arsenic stands out as the one substance for which human carcinogenicity has been demonstrated, but for which an animal model has yet to be found to reproduce this effect" (FTR p. 40).

Though there are no positive animal studies which confirm the epidemiological findings of excess respiratory cancer mortality among workers exposed to inorganic arsenic, OSHA believes that the epidemiological studies clearly establish the carcinogenicity of inorganic arsenic. Once epidemiological findings are found to be convincingly related to exposure to particular substance(s), OSHA must regulate in such a manner to minimize such risk to workers.

F. VALENCE CONSIDERATIONS

The acute toxic effects of inorganic arsenic compounds on man following ingestion are well known. It is also known, that the severity of toxic reaction varies significantly with inorganic arsenic's valence states. According to the published literature (Ex. 31C-41) and testimony by Drs. Wacker and Peoples (Ex. 31A and 31D), trivalent arsenic (arsenite) is more toxic when ingested than pentavalent arsenic (arsenate).

Schroeder and Balassa (Ex. 31C-41) and Wacker (Ex. 31A) and Peoples (Ex. 31D) stated that trivalent arsenic's greater toxicity is due to its rapid binding with sulfhydryl groups. This binding results in the inhibition of many important enzymes such as alcohol dehydrogenase, enzymes which synthesize the components of DNA and RNA, and enzymes which synthesize DNA and RNA. In contrast, pentavalent arsenic (arsenate) does not react with sulfhydryl groups, but is known to inhibit the synthesis of ATP, an important metabolite, by uncoupling oxidative phosphorylation.

Based on his evaluation, Dr. Wacker concluded, "I find the conclusions reached by OSHA in its proposal (to treat both pentavalent and trivalent inorganic arsenic as carcinogens) to be highly implausable on scientific grounds, considering the chemical and toxicological characteristic of the various arsenical compounds in question. Indeed, I am baffled by the absence of any extensive consideration of the chemical and toxicological differences between these compounds as the differences are so great. I am convinced * * * they should be considered separately." (ATR 845.)

Dr. Radford commented (Exhibit 192B) that, "the acute toxicity of pentavalent arsenic compounds given parenterally is much less than for trivalent compounds. This well-accepted difference implies that if pentavalent compound are reduced to trivalent compounds in the body, either the conversion is slow, or they are converted to inactive forms or the distribution of the trivalent compounds is to relatively insensitive issues (i.e. conversion in the kidneys and rapid excretion in the urine). Another interpretation possible is that no significant conver-

V 4 3 1 8 8

sion to trivalent arsenic occurs, and pentavalent forms have toxic actions different from trivalent."

Dr. Radford later stated, "We do not know the mechanism of action of arsenites as carcinogens, but it is at least conceivable that they act by conversion to the pentavalent form and displacing phosphate in nucleic acids as Rosen has suggested." (Ex. 192B, p. 3.)

Dr. Kraybill of NCI concluded, "Doctors Wacker, Peoples and perhaps others have made interesting comments on the relative toxicity of the trivalent and pentavalent arsenic. The proposition concerning the relative avidity of trivalent and pentavalent ion SH groups (sulfhydryl groups) or glutathione as the protective mechanism is a most attractive and interesting concept. While this appears attractive to us on theoretical grounds, we would like to see some basic data (biochemical, pharmokinetic) in this area which would be helpful in describing the relative carcinogenic potential of trivalent and pentavalent arsenic on a mechnistic basis. Having such information and data could provide some evidence to better assess the significance of epidemiological studies. Perhaps this is the strongest reason for doing some good studies with appropriate animal models and using relevant routes of administration." (Ex. 192C.)

The most thorough analysis of the issue whether pentavalent arsenic is converted in the body to trivalent arsenic was presented by Dr. Peoples (Exhibit 193, Attachment B). Dr. Peoples reviewed findings by Winkler that after feeding rats trivalent arsenic, arsenic in their liver was largely pentavalent. When fed pentavalent arsenic, no trivalent arsenic was found in rat livers. He reported that the findings of Ginsburg (Ex. 63, Ex. 64) in which he reported some reduction of pentavalent arsenic to trivalent arsenic in the kidney of dogs after feeding with arsenate, could not be relied on because the analytical method was not accurate in the range of the reported sample size. Finally, he reviewed the findings of Crecelius (Exhibit 193, Attach. B) that no trivalent arsenic was found in the urine of a human who had drunk water containing 200 μg of pentavalent arsenic. He stated, "The level of As(III) remained at the control level. There was an increase in As(V) peaking at 5 hours then returning to normal in 10 hours. The mono methylarsonate remained near the control but the dimethylarsonate (cacodylic acid) rose to a high level and remained so during the 80-hour observation period. In other words, As(V) is not reduced in the body to As(III). It is almost entirely metabolized to cacodylic acid."

Thus OSHA concludes, that the presently available evidence indicates that there is little or no conversion of pentavalent to trivalent arsenic in the body. Given the unknown relevance of acute toxicity and biochemical reactions of trivalent and pentavalent arsenic to the assessment of carcinogenic risk and the findings that pentavalent arsenic is not converted to trivalent arsenic, OSHA concludes that it must, principally rely on the findings of the epidemiological studies, expert opinion, and general policy considerations in determining whether to regulate pentavalent arsenic as a carcinogen.

G. CONCLUSIONS

(1) *Trivalent Arsenic.* Based on the entire set of studies, OSHA believes that exposure to trivalent arsenic has been shown to cause respiratory cancer. Studies in the copper smelting industry (Lee and Fraumeni, Pinto and Enterline, Rencher, and Carter) have shown statistically significant increased lung cancer mortality among workers exposed to arsenic trioxide, sulfur dioxide and other cocontaminants released during the smelting of copper ores. As Lee and Fraumeni stated, it is impossible to differentiate in these cases between the effects of exposure to arsenic and these other cocontaminants. However, the finding that lung cancer mortality increased consistently with degree and duration of exposure to arsenic trioxide provides substantial evidence that exposure to trivalent arsenic is a cause of respiratory cancer (as was discussed in detail in the dose-response section). This data, particularly that of Lee and Fraumeni and Pinto and Enterline has been discussed in detail in section IV-D of this preamble and accordingly will not be repeated here.

The findings of studies by Baetjer et al. and Hill and Faning serve as positive controls for the findings in the smelting industry. That is, these workers studied by Baetjer et al. were exposed principally to trivalent and some pentavalent arsenicals, and Hill and Faning sodium arsenite (a trivalent arsenical); and to a limited number of other chemicals (Ex. 5B). They were not exposed, however, to most of the other cocontaminants found in the smelter environment.

There have been many analyses by experts during the hearing. Both Dr. Fraumeni (ATR 168) and Dr. Kraybill (ATR 161) stated that inorganic arsenic is strongly incriminated as an occupational carcinogen. NIOSH recognized that each epidemiological study alone has its limitations, but stated: "However, when all reports of occupational exposure to inorganic arsenic are considered together, NIOSH believes it undeniable that there have been carcinogenic effects which must be attributed to inorganic arsenic." (ATR 54-5).

During April 1975, Dr. Enterline was asked whether, based on the whole constellation of studies, inorganic arsenic is a carcinogen. Dr. Enterline responded:

> Yes, I think that it's certainly related to respiratory cancer based on reading these studies. Obviously, I can't tell whether it's something that goes with it or it's arsenic itself. But, the studies—and particularly the more recent studies, the Allied and Dow studies, the Allied in particular—are very impressive studies. They present in my mind pretty overwhelming evidence. (ATR 775.)

Dr. Weir of the Johns Hooper Foundation on the basis of his evaluation stated that there is an association of moderate overall magnitude between arsenic exposure and respiratory cancer (ATR 1381). He based his conclusion on a detailed analysis of the epidemiologic studies and on his evaluation of seven general factors for evaluating whether exposure to chemical agents such as arsenic and observed health outcomes (i.e., lung cancer mortality) is a causal relationship (Ex. 29N). These seven factors are as follows:

(1) Strength of association.
(2) Time sequence.
(3) Consistency with findings in other research areas.
(4) Failure to find alternative explanations.
(5) Gradient of risk.
(6) Consistency of association over several studies.
(7) Specificity.

In summary, Dr. Weir noted that the strength of association between exposure to arsenic and lung cancer mortality was moderate (2 to 3 times expected lung cancer mortality). He noted that lack of an animal model somewhat lessened the confidence which one could place on the degree of association. He further noted that the association is strengthened by the occurrence of a gradient of risk (dose-response), repeated findings over several studies and settings, and failure to find other explanations which could account for the excess risk. He concluded:

> The surest route to reducing unnecessary mortality is to apply standards on the belief that arsenic is a probable cause of mortality increase, and is, therefore, the best available factor by which we can expect to successfully intervene in the causal network, and then to proceed expeditiously to make whatever commitment of human and financial resources is necessary to establish with reasonable scientific certainty the definitive factor in the observed association. (ATR 1385-6.)

Arguments have been made that the relationship between arsenic and respiratory cancer cannot be presently stated to be causal (ATR 1381-6, Ex. 26B, p. 5) due to the fact that workers were exposed to other workplace contaminants. OSHA agrees, at least in the case of the copper smelting industry, that one cannot conclude with complete certainty, that the association is causal. The degree of association is strengthened by the findings in pesticide plants (Baetjer et al., Ott et al., Hill, and Faning). OSHA recognizes that, these workers too were exposed to other chemicals. However their work environment was substantially different from that of smelter workers and they were not exposed to most of the other chemicals to which workers are exposed in the smelting industry (compounds of lead, antimony, cadmium, sulfur, etc.). The fact that workers exposed to arsenic in substantially different environments were subject to excess respiratory cancer mortality is strong evidence that arsenic was an important etiologic factor in the observed excess mortality. OSHA cannot rule out the possibility that these other chemicals may have influenced excess respiratory cancer and lymphatic cancer mortality. However, even if it should later be shown that arsenic is not the sole factor, the regulation and resultant minimization of worker exposure to inorganic arsenic will, we believe, intervene in the causal network and reduce, to the extent feasible, worker risk of lung cancer. Thus in agreement with experts from NCI, NIOSH and industry, OSHA has concluded that trivalent arsenic must be regulated as an occupational carcinogen.

Confirming animal studies would be helpful, but OSHA believes that the best available evidence is the observed effects on man, himself as a compelling indication of risk and the lack of an animal model does not detract from this conclusion.

(2) *Pentavalent arsenic.* One of the most controversial and difficult issues during the arsenic hearings is whether pentavalent arsenic should be regulated as a carcinogen. The National Cancer Institute and NIOSH have recommended that pentavalent arsenic should be treated as a carcinogen; while the American Wood Preservers Institute has argued that the evidence is not strong enough for such a determination to be made. Three types of evidence have been submitted in the record: epidemiologic evidence, chemical evidence, and opinions of experts in the field.

A brief review of the epidemiological studies may be helpful. The Ott study showed a substantial excess cancer mortality among workers exposed principally to pentavalent arsenicals. The study includes a reasonable analysis of exposed and nonexposed workers. The AWPI suggested that pentavalent arsenic should not be implicated as a causal factor because there was some degree of exposure to trivalent arsenic and suggests that further research be done. On the other hand, NIOSH stated:

> With relation to the paper by Ott et al., it seems to be a reasonably valid study of the results from exposure to arsenates. Although it is true that the employees involved were exposed to both arsenites and arsenates, the authors state that 95 percent of the exposure was to arsenates and only 5 percent to arsenites. It seems not to be illogical or unjustified to attribute most, if not all, the excess of malignancies in the exposed group (incidence rate almost 60 percent greater than that in the control group) to the pentavalent arsenical compounds (Ex. 192A).

OSHA agrees with NIOSH that in view of the relative degree of exposure to pentavalent arsenic in comparison to trivalent arsenic, it is reasonable to accept the Ott study as evidence that pentavalent arsenic should be regulated as a carcinogen.

The Baetjer study also shows excess cancer mortality, but it is clear that many of these workers were exposed primarily to trivalent arsenicals. Because the predominant exposure was to trivalent arsenic, it would be inappropriate to implicate pentavalent arsenic on the basis of this study. In this instance, all one can state is that exposure to inorganic arsenic is the most reasonable explanation for the observed excess cancer mortality.

The AWPI places principal reliance on 2 studies, Nelson and Budy-Rashad, where excess respiratory cancer mortality was not observed. But the former study suffers from the deficiency that actual degree and duration of exposure to lead arsenate was not identified. In the Budy-Rashad study, the carpenters were not exposed to pentavalent arsenic, but rather to a stable arsenic-wood complex. Thus, carpenter exposure to this arsenic-wood complex cannot be considered a priori, equivalent to exposure to unbound pentavalent arsenic. No data is available on individual carpenter exposures to verify degree and duration of exposure. Additionally, insufficient time has elapsed to allow for sufficient latency period, for arsenic induced respiratory cancer. For the above reasons, it is difficult to make conclusions based upon these two studies.

Although the epidemiologic evidence does not as clearly indicate the carcinogenicity or cocarcinogenicity as in the case of trivalent arsenic, the Ott study provides epidemiologic support for the proposition that pentavalent arsenic, for the purposes of regulatory action to protect employees should be treated as a carcinogen.

The chemical questions discussed in the record principally relate to the differences in biochemical mechanisms between trivalent and pentavalent arsenic, and whether pentavalent arsenic is converted to trivalent arsenic in the body.

Peoples and Wacker discussed the well-accepted fact that while trivalent arsenic reacts with sulfhydryl groups, pentavalent arsenic can substitute for phosphate groups, thus decoupling oxidative phosphorylation. Peoples reviewed his studies and the literature and concluded that pentavalent arsenic is not converted to trivalent arsenic in the body. Studies by Ginsburg suggest that there is some conversion.

OSHA believes that the Peoples studies are more extensive and analytically reliable and therefore are more convincing. However, as the causal mechanisms of arsenic-related carcinogenesis are not known, OSHA must conclude that the fact that trivalent and pentavalent arsenic have different biochemical mechanisms, is not in itself sufficient evidence to indicate that respiratory cancer is not caused by both. The actual mechanism(s) may be substantially different from any of those suggested.

Dr. Peoples and Wacker stated that in view of the different mechanisms, pentavalent arsenic should not be treated as a carcinogen. Dr. Radford concluded:

> Because inorganic pentavalent arsenic is not yet known to produce cancer in man either directly or from conversion to trivalent arsenites, I do not believe that arsenates should be included with the inorganic trivalent forms as carcinogens. Thus a separate standard may be appropriate for pentavalent arsenic, just as is required for arsine. It may be that a reevaluation of the distinction between the two valence states of arsenic in relation to their exposure limits may be necessary as better evidence is obtained. It would seem to be imperative to obtain more experimental and epidemiologic data to resolve the questions concerning the health effects of pentavalent arsenic. (Ex. 192B.)

On the other hand, NIOSH stated that while trivalent arsenic is clearly a carcinogen, pentavalent arsenic should be so treated until convincing evidence is presented to the contrary (Ex. 192A). Similarly, Dr. Kraybill stated:

> But in essence the sorting out of trivalent from pentavalent arsenic with regards to their carcinogenic activity on the basis of the epidemiological studies is not facilitated since several studies impugned pentavalent possibly confounded with trivalent exposures. Thus, at the present time, we are left with a situation wherein we cannot help but implicate the pentavalent arsenic ion.

Doctors Wacker and Peoples present some interesting toxicological evidence on the relative difference between trivalent and pentavalent arsenic. These postulates of the "tri" and "penta" states although interesting do not provide the actual verification in animal carcinogenicity studies. If we have overlooked some reports in the area, we would welcome them for our review. Until then, we have to make our assessments on the basis of available data and specific evidence. (Ex. 192C.)

The situation presented is identical to the one in *I.U.D.* v. *Hodgson:*

> "the questions involved are on the frontiers of scientific knowledge and consequently as to them insufficient data is presently available to make a fully informed factual judgment. Decision making must in that circum-

MAY 5 1978

stance depend to a great extent upon policy judgments and less upon purely factual analysis * * *.

For example, in this case the evidence indicated that reliable data is not currently available with respect to the exposure to asbestos dust; nevertheless, the Secretary was obligated to establish some specific level as the maximum permissible exposure. After considering all the conflicting evidence, the Secretary explained his decision to adopt, over strong employer objection, a relatively low limit in terms of the severe health consequences which could result from over-exposure. Inasmuch as the protection of the health of employees is the overriding concern of OSHA, this choice is doubtless sound, but it rests in the final analysis on an essentially legislative policy judgment, rather than a factual determination, concerning the relative risks of underprotection as compared to overprotection.

In summary the Ott study provides epidemiologic evidence that pentavalent arsenic is a carcinogen, and a significant body of expert opinion including representatives of the National Cancer Institute and the National Institute for Occupational Safety and Health recommends that pentavalent arsenic be regulated as an occupational carcinogen. Further, in view of the long latency period and irreversible nature of lung cancer, it is OSHA's policy to act in the manner most protective of employee health. Although there are chemical differences between pentavalent and trivalent arsenic, viewing all the considerations and evidence as a whole, including the strong evidence that trivalent arsenic is a carcinogen, OSHA believes it necessary to regulate pentavalent arsenic as a carcinogen. Further research is always useful, but there has to be a stage when a decision is taken, since there always remain byways of possible research.

V. Permissible Exposure Limit

The final standard establishes a permissible exposure limit (PEL) of 10 $\mu g/m^3$ averaged over an eight hour period. This represents the lowest level which OSHA believes is feasible. In determining the appropriate PEL, OSHA relies in part on the record of the proceeding and in part on policy considerations which lead the Agency to conclude that in dealing with a carcinogen or other toxic substances for which no safe level of exposure has been demonstrated, the permissible exposure limit must be set at the lowest level feasible. Such a determination OSHA believes is justified by the nature of the hazard being dealt with, and the intent of the Act.

As already discussed, insufficient evidence has been introduced into this proceeding to demonstrate the existence of a safe level of exposure to inorganic arsenic. In the absence of a demonstrated safe level, OSHA will not assume that one exists because of the irreversibility and long latency period for lung cancer. An erroneous determination that a threshold exists would cause an irreversible illness leading to death. This would be inconsistent with OSHA's statutory responsibility to set a level that will assure that no employee will suffer material impairment of health.

The statutory requirement also mandates that OSHA set a feasible level. A zero level, although ideal, is not feasible given arsenic's utilization in large scale, high temperature processes which cannot be completely enclosed. The record indicates that 10 $\mu g/m^3$ is the lowest level which generally can be achieved in most copper smelters and many of the other processes in which inorganic arsenic is used primarily by joint use of engineering and work practice controls.

OSHA has determined that the 10 $\mu g/m^3$ exposure limit is the level which properly balances the above factors and most adequately assures to the extent feasible, the protection of workers exposed to inorganic arsenic. This level will provide a dramatic reduction in the lung cancer mortality of workers exposed to inorganic arsenic. It is also a level which is generally achievable through engineering and work practice controls, the preferable control strategy. This level is achievable almost entirely through engineering and work practice controls at 11 of the 16 U.S. copper smelters, and for the large majority of employees in other industries and facilities. Moderate or limited use of respirators will be needed in 4 copper smelters, and in a relatively few locations in other industries. One smelter will require extensive respirator use and is discussed at length below.

The scientific and policy determinations underlying the regulation of inorganic arsenic as a carcinogen were mentioned in the preamble to the proposal and were discussed in the course of this rulemaking. These determinations are consistent with other OSHA regulatory actions for carcinogens made after considerable scientific debate. For example, see the preambles to OSHA's carcinogen standard, applicable to 14 selected substances, 29 CFR 1910.1003-1910.1016 (39 FR 3758) aff'd. *Synthetic Organic Chemical Manufacturers Assn.* v. *Brennan*, 503 F. 2d 1155 (3rd Cir. 1974); the vinyl chloride standard, 29 CFR 1910.1017 (39 FR 35892), aff'd, *The Society of the Plastics Industry* v. *OSHA* 509 F. 2d 1301 (2nd Cir.) cert. den. 421 U.S. 992 (1975); the coke ovens emissions proposal (40 FR 32268 (1975)) and final, 29 CFR 1910.1029 (41 FR 46742 (1976)), aff'd. *American Iron and Steel Institute, et al.* vs. *OSHA*, No. 76-2358 (3rd Cir., 3-28-78); and the DBCP emergency temporary standard, 29 CFR 1910.1044 (42 FR 45536 (1977)).

OSHA has followed a similar course on regulation of carcinogens, including a detailed discussion of the scientific evidence supporting such regulation, in the proposed rules on identification, classification, and regulation of toxic substances posing a potential occupational carcinogenic risk ("Cancer Policy") which was published in the Federal Register on October 4, 1977 (42 FR 54148). In the proposed Cancer Policy, OSHA restates the determination that as a prudent policy matter, in the absence of a demonstrated safe level or threshold for exposure to a carcinogen " * * * (o)nce a qualitative presumption of carcinogenicity has been established for a substance, any exposure to the substance must be considered to be attended by risk when considering any given population. No exception to this point has yet been demonstrated." (42 FR at 54166).

The record of the arsenic proceeding independently clearly supports this general policy. Dr. Wagoner concluded:

> I think the overwhelming body of scientific judgment in the United States and internationally is of the opinion—and it has very aptly put by the Surgeon General's ad hoc Committee on low level environmental carcinogens—that the present state of technology does not permit the determination of safe levels for a carcinogen. (ATR 334-5.)

Dr. Kraybill stated:

> There is a general policy or concept among epidemiologists that there is no safe level. Why do we say that? Because we have no scientific method as of yet—1975—to prove otherwise. (ATR 186.)

This was Dr. Radford's view also (ATR 562). And NIOSH has taken the position that in regulating cancer-causing substances it is not possible to determine a safe exposure level (Revised Arsenic Criteria Document, 1975 (Exhibit 99)).

The exposure limit is based upon what can be achieved by the affected industries taken as a whole using available technology or technology looming on todays horizon. Alternatives to this approach have been considered in the context of the arsenic proceeding. As will be discussed, arsenic exposure in the most affected industry, copper smelting varies significantly among the 16 U.S. copper smelters due to variability in smelting conditions and variability of arsenic content in the ore.

Difficulties which may arise at individual facilities or processes in particular plants will be considered at the compliance level which is specifically oriented to consider problems at individual locations. The compliance plan process provides the mechanism to resolve these problems.

One alternative would be to establish the lowest feasible level for each of the 16 smelting plants as well as for each of the many other plants in the other affected industries. Such an approach would be extremely difficult to implement. It would strain limited agency resources including trained manpower and time. By concentrating on the arsenic issue, the Agency would have to reduce efforts in other important health areas. Accordingly, this feasibility determination is based upon analysis of the entire affected industries taken as a whole.

Another alternative would be to base the determination on a worst case basis, that is those situations where the level is most difficult to meet. This alternative is also unacceptable. It would allow most workers to be exposed to much higher exposure levels, than could generally be achieved through engineering and workpractice controls and thus subject them to a potentially increased risk of arsenic-induced lung cancer.

A third alternative is to set the level based on what could be achieved by these facilities with the least problems. In the case of the copper smelters, this would be based on the level achievable for those smelters with the lowest arsenic content in the feed and with the processes most adaptable to control. Such an approach would make it impossible to achieve such a limit for the majority of affected workers in the majority of plants without resort to full time respirator use by most employees. Because of problems inherent in their use (see Section on Respiratory Protection), this alternative is not ideal, though in certain circumstances it may be necessary to give needed health protection.

The approach OSHA believes appropriate and has chosen for this and other standards is the lowest level achievable through engineering controls and work practices in the majority of locations. This approach is intended to provide maximum protection without excessively heavy respirator use. Respirator use in the interval when engineering controls are being installed is more acceptable because their use is temporary. Further, their use is acceptable for those employees in peak exposure areas. Adequate supervision can be given if respirator use is concentrated in a few peak exposure areas and programs can be devised for a relatively few locations to minimize the full time use of respirators. (See the discussion of the Tacoma smelter below where such a strategy is outlined.)

The level achievable is based on available engineering controls and those controls which can be adapted from other uses or which are looming on the horizon and can reasonably be expected to be developed. The OSHA Act is a technology forcing act as discussed in Section II of this preamble. However, OSHA does not interpret this to mean an open ended commitment to research and develop unforeseeable new technologies, but rather the adaptation and development of controls from existing known practices and principles.

OSHA contracted for two detailed studies of technological and economic feasibility considerations:

1. D. B. Associates (D.B.), "Feasibility and Estimated Costs of Compliance for Three U.S. Smelters," (Ex. 18).

2. Arthur Young & Co. (AY), "Technological Feasibility and Inflationary Impact Statement," (Ex. 135A).

The AY study was based upon analysis of data in the D.B. report, industry studies and data from industry sources. The AY analysis was further amplified in the document entitled, "Detailed Account of Certain Compliance Costs," (Ex. 148A, 173A). Testimony indicated that certain costs were under-estimated in the D.B. study. AY corrected for those underestimates.

ASARCO, Inc. commissioned a study by Industrial Health Engineering Associates (IHEA, Ex. 29M) which presented a detailed analysis of technical feasibility and costs of engineering controls at ASARCO facilities. Additionally, ASARCO hired Arthur D. Little, Inc. (ADL Ex. 111-7) to integrate the cost data of IHEA with other cost data provided in testimony by ASARCO management and to estimate the proposed standard's impact on its Tacoma smelter and on ASARCO as a whole.

The Anaconda Co. presented a report by Phillip A. McKee & Associates (Ex. 28B). Kennecott Copper supplied a less detailed estimate of the costs of compliance and Phelps Dodge supplied an overall estimated cost figure without supplying any documentation (Exs. 12, 156A, 157). A combined cost estimate for these four major copper smelting firms was presented in Exhibit 156A.

Industries other the copper smelting, generally did not submit specific studies, but did give some testimony on feasibility issues. In addition to specific studies, a substantial amount of testimony and some written submissions addressed feasibility questions.

The copper smelting industry is the industry most affected by the standard. Analysis of feasibility in that industry is complicated not only because exposure varies significantly between processes in a given smelter but they also vary substantially among smelters. A major reason is the differing percentages of arsenic in the smelter feed ranging from 5 percent to under 0.001 percent. The following Table indicates that variation.

V 4 3 / 8 8

TABLE I.—*Percent arsenic in feed, U.S. copper smelters*

Smelter	Percentage arsenic in—		Approximate annual tons copper concentrates, 1971-73
	Overall feed	Copper concentrates	
ASARCO:			
El Paso, Tex	0.8	0.21	295,600
Hayden, Ariz	0.04	0.005	529,812
Tacoma, Wash	5.2 (12.8 max)	4.2	273,603
Phelps Dodge:

[1] Not available.

Other factors also affect existing levels such as layout of plant, smelting process, and age of equipment. Some smelters use a roasting process, which results in additional sources of arsenic exposure during roasting and during transfer of the hot roasted material (calcine). Some of the recently modernised or new smelters make use of processes such as the Noranda Process or electric smelting which reduce the number of sources of exposures or make the control of such emissions less difficult. Exposures are also affected by the uniformity of the arsenic content. A uniform feed usually results in a smelting process which is easier to control and this tends to make it easier to control emissions.

There is a substantial body of evidence on the record to aid in analyzing feasibility in copper smelters. In addition to the DB, IHEA, AY, and McKee studies mentioned above, fairly extensive exposure data is available in Exhibits 6, 7, 12, 28A, 29G, 31C, and 188. Further, Burton of DBA, Caplan of IHEA, and Brazie of AY specifically addressed these points in their testimony.

The Arthur Young, Inc. analysis indicated that the 4 $\mu g/m^3$ level could be achieved with engineering controls and extensive use of respirators at Tacoma, moderate use of respirators in smelters which they grouped into categories 2 and 3, very limited use of respirators in category 4 smelters and essentially without respirators in category 5 and 6 smelters. Sometimes they gave specific estimates of the number of employees required to wear respirators. In other instances their estimate can be approximately computed by dividing $4,000 into their estimate of respirator annual costs.

Brazie of AY also pointed out that in those smelters with low levels of arsenic in the material stream, very low levels of exposure can be achieved solely be engineering and work practice controls (STR 120). The details of the AY analysis can be found in Exhibits 148A and 173A. Their smelter categories are listed on page 2 of Exhibit 148A.

Caplan, an ASARCO witness, indicated the difficulties in achieving 50 $\mu g/m^3$ for the Tacoma smelter with engineering controls alone and stated that extensive use of respirators would be needed to reach a 4 $\mu g/m^3$ level there and at the El Paso smelter. He also discussed generally the difficulty of reducing exposures to 50 $\mu g/m^3$ in uranium processing and compared this to copper smelters. At various places he seemed to imply that these difficulties could apply to copper smelting generally.

It is accepted that at Tacoma engineering controls in a number of places (though not all) will have difficulty reducing exposures below 50 $\mu g/m^3$. It is also accepted that in large scale, high-temperature, heavy-industry processes, reducing exposure levels below 50 $\mu g/m^3$ may be difficult for substances which are present in relatively high percentage in the material streams. This analysis is clearly applicable to Tacoma with 5 percent arsenic in the concentrate feed. But Caplan's analysis has only very limited applicability in smelters with approximately 1 percent arsenic in the feed and is not applicable at all to smelters with feed typically ranging from 0.1 percent to .001 percent arsenic, where the large majority of exposure levels are already lower than 50 $\mu g/m^3$ and still further reductions are clearly achievable. Caplan himself has stated (ATR, p. 1310) that lower levels are achievable when toxic substances are present as only a small fraction of the material stream. Further this report did not cover in detail those smelters with lower percentages of arsenic in the feed, nor did it take into account the existing lower levels of exposure (see Ex. 12 for example) for many employees.

Burton of D. B. Associates did not make specific judgments as to levels achievable but did make predictions as to whether there was a good, fair, or poor chance of reaching a 4 $\mu g/m^3$ level with engineering controls alone at various locations in the three smelters he studied. Generally his analyses indicated a greater likelihood of reaching a 4 $\mu g/m^3$ level through engineering controls alone than Caplan's analysis.

Burton also testified as to general degree reduction in exposure achievable through engineering controls. He stated that as a rule of thumb, 95 to 99 percent reduction in the concentration of an air contaminant is possible for emissions from definable sources, while 80 percent reduction in emissions may be achieved when more sources and more ill-defined sources

are added (STR 278). Given the age of most smelter facilities, and the numbers of the major emission sources, OSHA believes it prudent to utilize Burton's lower estimate of the effectiveness of engineering controls.[1] It should be noted, however, that as smelters are modernized and newer more continuous processes are adopted, engineering controls should succeed in reducing exposures to lower levels.

In some operations the 80 percent reduction will be achieved, and in others it will not. It is not possible to predict the exact degree of improvement to be obtained from engineering controls until they are actually implemented. Further, the degree of additional control possible depends on how extensive existing controls are.

Applying the above testimony and principles to the data presented in the record, the Tacoma smelter will require extensive respirator use at the 10 $\mu g/m^3$ level. Because of that, a specific compliance strategy is discussed below which will alleviate the hardships of wearing respirators and reduce as much as possible full time use of respirators.

At the ASARCO El Paso smelter, a substantial number of employees are exposed in the range of 50 $\mu g/m^3$ (Ex. 29G, App. 3). Applying Burton's estimate of 80 percent reduction in exposure, a significant number of those employees in this range will have their exposures reduced to 10 $\mu g/m^3$. Employees in this group whose exposures are not reduced below 10 $\mu g/m^3$ through engineering controls still may have their exposures reduced sufficiently low so that in conjunction with clean rooms respirator use will be limited. Engineering controls alone are not anticipated to reduce exposures to 10 $\mu g/m^3$ for those employees working in the high exposure areas such as the roasters and reverberatory furnaces where existing exposures are sometimes as high as several hundred micrograms per cubic meter. Therefore respirator use will be necessary to reduce exposures to 10 $\mu g/m^3$ level for the limited number of employees working in these areas. As discussed in the Tacoma section full time use of respirators can be avoided even for many of these employees. Much smelter work is of an intermittent or watching nature so employees can go into clean rooms or filtered air pulpits during part of the day and be protected without wearing respirators.

Arthur Young estimated that 70 employees would need to wear respirators at the 4 $\mu g/m^3$ level at El Paso. Utilizing Burton's 80 percent analysis, OSHA believes that the 70 number might be on the low side at 4 $\mu g/m^3$ proposed level but that it may be a reasonable estimate at the 10 $\mu g/m^3$ level set by this standard. It is possible that the number will be higher than this. See the economic considerations section for a discussion of ASARCO's estimate of respirator use at the 4 $\mu g/m^3$ level which is not broken down by facility.

It is accepted that it is a major engineering task to accomplish these goals at El Paso. But installation of the engineering controls discussed in the AY and IHEA studies will substantially reduce exposure levels.

At the Anaconda smelter many exposure emissions from the traditional copper smelting technology have ranged between 10 $\mu g/m^3$ and 50 $\mu g/m^3$ with a few somewhat higher (Ex. 28, p. 165). Applying the above principles to these exposures, 10 $\mu g/m^3$ would be a challenging engineering task which should be achieved a significant percentage of time with engineering controls and work practices alone. Some employees will need to wear respirators to achieve 10 $\mu g/m^3$. The same principles discussed for El Paso will limit respirators use to part-time for most employees who need to use them. The difficulty in achieving 10 $\mu g/m^3$ may be lessened due to the installation of the electric furnace, although that may not reduce the problems in the converter aisle where exposures average approximately 46 $\mu g/m^3$.

The Kennecott-Garfield smelter is being completely rebuilt utilizing the Noranda Process. Accordingly, a feasibility analysis of the new smelter is difficult. But, based on the fact that arsenic in the feed is between the levels existing at Anaconda and El Paso on the one hand and ASARCO-Hayden on the other, and the limited exposure data supplied by Kennecott in higher exposure process areas, the problems of compliance should be less than those at Anaconda and El Paso. The new Kennecott smelter's continuous and more enclosed process should improve conditions as well.

At the ASARCO-Hayden smelter many exposures are in the 10 $\mu g/m^3$ range such as at the converter aisle and acid plant (Ex. 29A, App. 4). However, exposures in the reverberatory furnace area are in the 100-200 $\mu g/m^3$ range and are approximately 75 $\mu g/m^3$ by the roasters. The 10 $\mu g/m^3$ will be achievable for the employees in the low exposures area with engineering controls and will require some respirator use for employees exposed in the higher range. AY estimated that 45 employees would need to wear respirators at a 4 $\mu g/m^3$ level. The ASARCO data is discussed in economic considerations.

Arthur Young used Hayden as the basis for its analysis for the four other smelters in Group 4. However, it is quite possible that AY has underestimated the success that engineering controls will have in achieving the permissible exposure limit at those four smelters and that even the limited use of respirators which AY estimated at those smelters is an over estimate. In addition to the increase in the permissible exposure level, those four smelters have much lower levels of arsenic in their feed than ASARCO-Hayden ranging from .015 percent to .002 percent in comparison to the .04 percent at Hayden. Therefore, though there is little exposure data supplied by those smelters, it seems likely that they will find it easier to comply than ASARCO-Hayden.

On the other hand, Arthur Young may have placed Phelps-Dodge's Douglas smelter in too low a group. The level of arsenic in its feed is higher than at other smelters in Groups 4 and 5. Exposure data in Exhibit 12 indicates that most exposures are near 10 $\mu g/m^3$. However, a few exposures readings are between 10 and 80 $\mu g/m^3$.

In all the remaining smelters most exposures are quite low and concentrate levels are less than 0.02 percent. Those smelters can clearly meet the the 10 $\mu g/m^3$ level in virtually all of the places most of the time. Arthur Young estimated that very few if any of the employees at those smelters (in Groups 5 and 6) would need to wear respirators on a regular basis in these smelters at a 4 $\mu g/m^3$ level.

In summary, the three expert witnesses, Caplan, Burton and Arthur Young agreed that a 4 $\mu g/m^3$ level was technically achievable with engineering and work practice controls and respirators use, though varying on the extent of their estimates of respirator use. However, the 10 $\mu g/m^3$ level comports more clearly with the concept of technical feasibility, especially in the smelter environment. It provides a very high degree of protection with less extensive respirator use. Certainly a higher number would give less protection and lead to less respirator use. A lower number possibly might provide more protection and certainly would substantially increase respirator usage.

The 10 $\mu g/m^3$ level is achievable at 11 of the smelters with engineering and work practices and only very limited use of respirators. Limited use of respirators will be needed at the ASARCO-Hayden smelter, moderate use at the El Paso smelter and Anaconda smelters, and the Kennecott Garfield smelter will probably fall in between the two groups in terms of respirator use. The Tacoma smelter will require extensive respirator use and an appropriate compliance strategy to mitigate the problems created is discussed below.

Exhibit 5G contains a discussion of new technologies which may become available in the future. These, because of their more enclosed and continuous

MAY 5 1978

V 4 3 / 8 8

nature or because of their use of newer technology will ultimately lead to still lower exposures. However, those technologies (some of which are unproven) commonly require building a new smelter which may cost in the $150 to $250 million range. Since these new technologies are generally not yet looming on the horizon, the feasibility analysis has not been based on them.

The Arthur Young study (Ex. 148A) also considered other affected industry groups. However, those industries which are covered by this final standard did not specifically submit any detailed studies themselves though they made a few comments.

AY estimates the 4 $\mu g/m^3$ was achievable with engineering and work practice controls alone in zinc smelters. Arthur Young and Arthur D. Little (Ex. 111-7, p. 37) clearly considered the 4 $\mu g/m^3$ level feasible at primary lead smelters though it is unclear to what extent limited respirator use might be needed.

Arthur Young estimated that the glass, and desiccant manufacturer industries could achieve 4 $\mu g/m^3$ with engineering controls alone. They estimated that the herbicide and pesticide manufacturers, wood preservative manufacturers and lead arsenical industry could achieve 50 $\mu g/m^3$ with engineering controls alone but would require some respirator use to achieve 4 $\mu g/m^3$. As the former two industries are chemical industries where enclosed processes can often be utilized, OSHA believes that the 10 $\mu g/m^3$ level can be achieved without respirator use. There may be limited use of respirators needed at the 10 $\mu g/m^3$ level in the lead arsenical segment.

In conclusion, the 10 $\mu g/m^3$ exposure level is the lowest feasible level for exposure to inorganic arsenic. It minimizes, to the maximum extent feasible, excess lung cancer deaths resulting from exposure to inorganic arsenic. It is achievable generally through engineering and work practice controls. Limited respirator use will be needed to achieve the limit in some locations in some facilities, and one facility will require extensive respirator usage. The absolute degree of control of work exposure will be certain only after inplementation of engineering and work practice controls. What is clear is this standard will provide significant protection of workers from arsenic-induced lung cancer.

VI. Economic Considerations

In setting standards for toxic substances, the Secretary is required by section 6(b)(5) of the Act to give due regard to the question of feasibility. Section 6(b)(5) mandates that final standards be set which most adequately assure employee safety and health "to the extent feasible, on the basis of the best available evidence" and further requires that, in the development of occupational safety and health standards, "considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws."

While the precise meaning of feasibility is not clear from the Act, it is OSHA's view that the term may include the economic ramifications of requirements imposed by standards. The determination that OSHA has the authority to consider economic feasibility factors in developing standards has been endorsed by the courts. *Industrial Union Dept., AFL-CIO* v. *Hodgson*, 499 F. 2d 467 (C.A.D.C., 1974); *AFL-CIO* v. *Brennan*, 530 F. 2d 109 (C.A. 3, 1975); *American Iron & Steel Inst.* v. *OSHA*, No. 76-2358 (3rd Cir., 3/28/78). As pointed out by the D.C. Court of Appeals, Congress did not intend the Secretary to promulgate standards which drive entire industries or large numbers of employers out of business. On the other hand, "standards may be economically feasible even though, from the standpoint of employers, they are financially burdensome and affect profit margins adversely". Further, the Court said, the concept of economic feasibility does not "necessarily guarantee the continued existence of individual employers." *Industrial Union Dept., AFL-CIO* v. *Hodgson, supra*, at page 478. In accordance with the Secretary's position, it has been OSHA's practice to analyze the economic impact of proposed standards where significant impact on employers covered by the proposals seem likely. OSHA then makes, such analyses available to affected parties for comment and subsequent hearing prior to issuance of final rules, and invites the submission of other information on the economic impact and feasibility of proposed standards. In developing a final standard OSHA evaluates the economic impact of the final standard on the basis of the entire rulemaking record, including the information developed by its own studies of the proposal and submissions by the public. On the basis of the best available evidence, therefore, OSHA has determined, as explained in detail below, that the permanent standard is economically feasible.

A number of studies were done of economic considerations resulting from an arsenic standard. The Arthur Young study (Ex. 135A) contracted for by OSHA considered economic factors for all affected industries. Other studies submitted concentrated on the copper smelting industry. These are listed in section V of this preamble. In addition the matter was specifically considered in testimony at the hearings.

The copper smelting industry is the most affected industry. Table 2 summarizes the Arthur Young and industry cost estimates for a 4 $\mu g/m^3$ level and Arthur Young's estimates for a 50 $\mu g/m^3$ level. However more than half of the industry's total cost estimate was comprised of hypothesized worker rotation costs for Anaconda and Kennecott. The industry hypothesized that the OSHA proposal required that industry use employee rotation, rather than respiratory protection, if engineering controls and work practices were sufficient by themselves to achieve the proposed 4 $\mu g/m^3$ exposure level. Although it is true that Arthur Young's cost estimates includes in a few instances a limited amount of worker rotation, the proposal does not contain any language specifying worker rotation. Like the proposal, the final standard contains no requirement that worker rotation be used rather than respiratory protection when engineering and work practice controls do not succeed in reaching the permissible exposure limit (sometimes referred to in this document as the PEL or TWA limit). Therefore OSHA does not consider it appropriate to include worker rotation costs and Table 2 also presents the industry estimate adjusted to exclude worker rotation costs.

TABLE 2.—*Cost of compliance for copper smelters*

[Millions of dollars]

Source of estimate	50 $\mu g/m^3$			4 $\mu g/m^3$		
	Capital	Annual	Annualized	Capital	Annual	Annualized
AY (Ex. 135A)	85.9	6.2	23.5	103.9	11.2	32.0
Industry (Exs. 156a, 111-7)				224.2	153.7	198.8
Industry adjusted				224.2	49.6	94.7

M Y 5 7 8 M

Annual costs include the additional costs resulting from the standard for fuel, medical examinations, monitoring, maintenance, etc., as well as potential loss of efficiency through respirator use. Annualized capital costs are 20 percent of initial capital costs. These are then added to annual costs to derive annualized costs.

The industry cost figures cited in Table 2 do not include costs for four of the 16 U.S. primary copper smelters which are not owned by the four major companies. The Arthur Young estimate includes costs for all 16 U.S. primary copper smelters. The ASARCO estimates, included in the overall industry cost figure includes costs of compliance for some of their non-copper operations as well as their copper smelters and thus to that extent the industry figure overstates costs which are attributable to copper smelting alone.

OSHA believes that at the 10 $\mu g/m^3$ level the adjusted industry cost estimates are too high. Respirator costs will be reduced substantially from the 4 $\mu g/m^3$ level because engineering controls will succeed in reaching the 10 $\mu g/m^3$ level more frequently. There will be a limited reduction in the cost of engineering controls at the 10 $\mu g/m^3$ level at Kennecott and Phelps-Dodge. The Phelps-Dodge capital costs estimate of $80 million, supported by no underlying data, seem, much too high relative to other industry estimates. They had originally estimated $22 million (Ex. 12). Kennecott, with higher exposures and a larger scale of operation, estimated capital costs at $28.5 million.

Kennecott's estimate of $9.9 million in annual energy costs to reheat stack gasses is unsubstantiated. Anaconda's estimate of $30 cfm estimate for ventilation controls is approximately double other estimates used for ventilation controls on the record (Ex. 29 m, Ex. 148A).

The ASARCO cost estimate includes annual costs of $10.57 million for loss of efficiency from respirator use and $231 million for respirator expenses at the 4 $\mu g/m^3$ level. These figures are based on approximately 900 employees at Tacoma and approximately 2000 employees at other ASARCO facilities wearing respirators full time. Loss of efficiency through respirator use is computed by ASARCO at 20 percent or $3600 per man year. Respirator costs are estimated at approximately $800 per man year.

OSHA believes these ASARCO figures are substantial over-estimates at the 10 $\mu g/m^3$ level. As analyzed in detail below, in the Tacoma section, ASARCO's estimate of employees on respirators at Tacoma is probably double the correct figure and the 20 percent estimate of loss of efficiency for respirator use is probably more than double the correct estimate. Therefore the loss of efficiency through respirator use at Tacoma is probably more than $2.43 million too high.

OSHA believes that substantially fewer than 2,000 employees will need to wear respirators full time at non-Tacoma ASARCO facilities at the 10 $\mu g/m^3$ level. ADL does not make clear how this figure is derived, but it appears to be based on all production employees at El Paso, Hayden, East Helena and possibly other ASARCO facilities wearing respirators at the 4 $\mu g/m^3$ level. However ASARCO Exhibit 29G indicates that many employees at those locations (except El Paso) have exposures already below 10 $\mu g/m^3$ and other are exposed at levels sufficiently close to 10 $\mu g/m^3$ so that engineering controls will in many instances succeed in reducing exposures below 10 $\mu g/m^3$. In any event full time use of respirators by many of these employees is not likely to be necessary.

Further David Burton and AY estimated that approximately 50 employees would need to wear respirators at Hayden at the 4 $\mu g/m^3$ level. (Ex. 18, p. 67, Ex. 173A). Arthur Young estimated that approximately 70 employees at El Paso will need to wear respirators full time at the 4 $\mu g/m^3$ level (Ex. 173A). These estimates would indicate much lower respirator use than the ADL estimate at 4 $\mu g/m^3$.

Based on the change to the 10 $\mu g/m^3$ level, existing exposure levels, the effectiveness of engineering controls and estimates of other experts, OSHA believes that fewer than 500 employees will be wearing respirators at ASARCO's non-Tacoma facilities. Further as discussed below in the Tacoma section, the 20 percent figure for loss efficiency through respirator use is too high and 10 percent may be a more reasonable high side estimate. Therefore the ASARCO estimate of $8.86 million in total respirator expenses at non-Tacoma facilities ($7.33 million loss of efficiency plus $1.54 million respirator costs) is probably overstated by a factor of seven-eighths. In any event, full time use of respirators by many of these employees is not likely to be necessary. However to be certain that respirator costs are not underestimated, it will be assumed for purposes of this analysis that these respirator costs are overestimated by three-quarter or $6.65 million. Therefore the total ASARCO estimate for respirator expenses is overestimated at least $9 million per year at the 10 $\mu g/m^3$ level ($2.43 million overestimate at Tacoma and $6.65 million non-Tacoma). The ASARCO capital cost figure will also be reduced in the short and middle term by the likelihood of less capital investment at Tacoma as discussed below. In the longer term that investment will be necessary.

The above overestimates come to $32.1 million per year in annualized costs. Subtracting the overestimates from the industry estimate of $94.7 million leaves a balance of $62.6 million in annualized costs. The computations to derive the $32.1 million figure are as follows: Capital costs at Phelps Dodge should be no more than the Kennecott estimate of $28 million, saving $52 million in capital costs from the Phelps Dodge $80 million estimate or $10.4 million in annualized costs. Even the $28 million figure is likely to be an overestimate for Phelps Dodge since Exhibit 12 indicates that existing exposures are low. Caplan, an ASARCO witness estimated $16 per CFM for difficult ventilation jobs. Applying that figure to the Anaconda estimate of 1 million CFM results in costs of $16 million rather than the $30 million Anaconda estimate. This saves $14 million in capital costs or $2.8 million in annualized costs. Arthur Young believed the $30 CFM figure was too high but nonetheless utilized it in their analysis. They believed the capacity required was overestimated as well. Also subtracted are $9 million in excess respirator costs at ASARCO and $9.9 million in excess fuel cost at Kennecott. (10.4+2.8+9.0+9.9=$32.1 million in overestimates).

Changes in the standard from the proposal will also result in substantial cost savings from the industry estimates. Monitoring costs will be reduced by approximately two-thirds due to the reduction in monitoring frequency. Medical, laundering and hygiene costs will also be reduced significantly by the change in the definition of covered employees and the reduction in laundering frequency. These savings have not been subtracted from the various estimates.

It also should be noted that both industry and Arthur Young figures are based on a 20 percent factor covering interest and depreciation to annualize capital costs. A figure commonly used in other OSHA proceedings has been

V 4 3 / 8 8

15 percent. To the extent that the 15 percent figure is more realistic, all of the estimates have exaggerated the annualized cost figures.

The Arthur Young cost estimates are reasonably detailed and based to a substantial extent on detailed underlying data. Caplan of IHEA testified that AY did not always give sufficient reasons when choosing the DBA report as the basis for estimates rather than selecting the IHEA estimates. (STR p. 629.) Nonetheless, the choice was made by qualified persons and general considerations and sometimes specific reasons were given in Exhibits 148A and 173A. The DBA costs, when chosen, were detailed and made by a qualified expert. DBA estimates were adjusted by AY to fully account for overhead costs.

Some of the AY costs based on DBA estimates may be too low. For example, in OSHA's experience the estimate of $5,350 for enclosing, filtering, and air conditioning an overhead crane (Ex. 148A, p. 8) may be too low. Also, the AY computation of costs for Phelps-Dodge smelters may be too low based on exposure levels at the Douglas smelter and interpolation of AY cost data. These underestimates are at least in part compensated for by the lessening of costs at the 10 $\mu g/m^3$ level from the 4 $\mu g/m^3$ level.

It therefore appears to OSHA that the AY 4 $\mu g/m^3$ estimate is a reasonable estimate at the 10 $\mu g/m^3$ level. It also appears that the industries adjusted figure for the 4 $\mu g/m^3$ level is high at a 10 $\mu g/m^3$ level, though an estimate in between those two figures of approximately $63 million would also be a reasonable high-side estimate. The adjusted industry figure with some of the probable overestimates substracted would come out to approximately $63 million in annualized costs.

The smelters not included in the industry compilation will probably have costs in the lower range in comparison with other smelters at the 10 $\mu g/m^3$ level since exposures are already in the lower range. In addition, it is not unreasonable to assume that as they did nbot actively participate in the hearing process, they did not believe it difficult to comply. It also should be noted that the profit figures used below do not include profits for the other smelters and therefore understate industry profits.

In considering economic impact, it is inappropriate to assume that the industry will have to absorb all these costs. Some of the increased costs will be offset by increases in smelting charges. Since the early 1970's smelting charges have risen from about 6 cents to 12 cents per pound of copper and combined smelting and refining charges have increased from about 10 cents to 20 cents per pound in response to higher energy, environmental and other costs. (Ex. 111-7, p. 24-25.) Also ASARCO has successfully increased smelting charges to independent mines to assist in offsetting costs of environmental controls. (STR. pp. 457-458.) Notes 1 and 6 of the 1975 ASARCO Annual Report indicate that ASARCO has been receiving approximately $12 million per year in environmental surcharges.

A. D. Little suggested that those costs of controls which affected most smelters can be passed on to consumers by smelting operations without disruption in time of "normal" copper prices. (Smelting charges are normally assumed by copper analysts to be paid by the mine which takes the gains and losses from rises and falls in copper prices.) ADL estimated that 2 cents per pound of copper could be passed along. (Ex. 111-7, pp. 35-37.) Arthur Young estimated that there would only be a "negligible" increase in copper prices based on the low impact of the proposal on some smelters, ADL's estimate that there is a surplus of smelting capacity abroad, and that their study was directed at long-term impacts. (Ex. 135, p. VI-10, Ex. 184.)

A 2 cent increase in smelting charges would result in increased revenue to smelters of $60 million per year and a 1 cent increase of $30 million per year based on a typical figure of 1.5 million tons of copper smelted per year in the U.S. In view of past increases in smelting charges to cover increased costs, OSHA believes some part of the increased costs of the regulations can be recovered by the smelters in increased smelting charges to mitigate the impact of the cost of arsenic controls. There are costs in shipping copper from overseas and some overseas smelters are also facing increased environmental costs. Therefore despite a possible surplus of overseas capacity, OSHA believes that a part of the cost increases can be recovered in increased smelting charges.

The average annual pretax profits over the 10 year period 1966-1975 for the four largest copper smelting companies total $525 million excluding extraordinary items (Standard and Poors). Industry profits need to be averaged over a period of time because of their historically large fluctuations. It is appropriate to compare costs against pretax profits since depreciation and interest are tax deductible. (Such a comparison may still overstate the impact of the costs because there is a tax credit for capital investment that would have the effect of reducing net capital outlays.)

Using the industry's adjusted estimate of costs of $94.7 million and a low estimate at increased smelting charges of 1 cent per pound ($30 million), the copper smelting industry would be left to absorb $64.7 million of costs, or 12.3 percent of average pretax profits. As discussed above, that percentage is probably too high at a 10 $\mu g/m^3$ level because the $94.7 million cost figure appears to be too high. Using the AY figure of $32 million in costs and the 1 cent per pound increase in revenues, the costs to be absorbed by the industry would be a negligible $2 million. This net figure is probably low. At the $32 million cost figure only a lower increase in smelting charges would probably be passed on because of the different cost impacts of the standard on different smelters.

An intermediate analysis would be to consider costs at the 10 $\mu g/m^3$ level as midway between the AY and industry adjusted estimate or $63 million. With increased smelting charges of 1 cent per pound this would result in the industry absorbing $33 million in increased costs, or 6.3 percent of historical pretax profits.

It would appear to OSHA that these percentages indicate that the cost of the arsenic standard is well within the economic capabilities of the copper smelting and refining industry as a whole. It is true that the copper smelting industry is also being required to spend substantial sums on environmental controls. However, no witnesses have testified that costs of this magnitude would be infeasible for the copper smelting industry as a whole.

This conclusion is consistent with the conclusions of A. D. Little, ASARCO's witness, that the cost to the copper and lead smelting industries can be passed on without any major dislocations except in times of abnormally low metal prices (Ex. 111-7, p. 37). They believed the exception to this was the additional compliance costs to ASARCO at their Tacoma and El Paso facilities over and above the level of costs at other smelters.

OSHA is aware that subsequent to the close of the record in this rulemaking, that copper prices have been very low and some copper companies have been in a loss position on their copper operations. It is also true that subsequent to the close of the record Kennecott received a very large sum in cash from the sale of Peabody Coal Co., Anaconda was purchased by Atlantic-Richfield and Bendix has invested in ASARCO. The Financial Press has speculated about high copper prices in the 1980's.

OSHA has not considered these factors in its analysis. However at the compliance level, feasible compliance plans are worked out for specific facilities. To the extent that a specific company can prove that serious economic feasibility difficulties exist, the compliance plan can be adjusted to include a more extended period for the installation of required engineering controls with more extensive use of respirators in the short term.

M Y 5 7 8 M

It is not appropriate to reopen the record each time the state of the economy or the price of a specific commodity changes. These fluctuations are frequent and it would become difficult ever to close a record and issue a final standard. In consequence needed health protection for employees would be further delayed. Such changes are better addressed at the compliance level where more detailed information is available. See *Atlantic and Gulf Stevedores* v. *OSHA*, 534 F. 2d 541 (3rd Cir. 1976). No party has petitioned to reopen this proceeding.

Lead and Zinc Smelters

The IIS estimated annualized costs to primary lead smelters of $9.3 million and of $940,000 to zinc smelters at a 4 $\mu g/m^3$ level. It found no economic impact of sufficiently great magnitude to create questions of economic feasibility or supply problems. In addition no detailed industry analyses were made indicating that any problems of economic feasibility existed.

Economic Impact—Other Industries

Interested parties in other industries did not bring to OSHA's attention major problems of economic feasibility. The IIS estimated substantial ($30 million annualized) costs of compliance at the 4 $\mu g/m^3$ level in the glass industry but did not indicate that difficult economic feasibility questions existed. The costs are distributed broadly across a reasonably large industry. In addition arsenic use in glass has been going down as substitutes have been developed. Manufacturers are continuing to reduce the already small percentage of arsenic in glass and to develop complete substitutes which will reduce the costs of compliance. The costs will be further reduced by the change to the 10 $\mu g/m^3$ level.

The IIS estimates $6.7 million in annualized costs for secondary lead smelters. It suggests that a few of the smaller firms may have some difficulty in raising capital to meet the costs of controls though no smelters have presented specific evidence on this point. This evidence indicates that the standard is feasible for the industry as a whole.

The IIS estimates that annualized costs of compliance were not over $1 million at the 4 $\mu g/m^3$ in any of the other industries studied. Although the IIS suggests that one or two individual plants may have difficulty in raising capital, no specific evidence has been presented to OSHA. In view of the relatively small amounts involved at a 4 $\mu g/m^3$ level, no significant questions of economic feasibility appear to be presented for these industries as a whole at a 10 $\mu g/m^3$ level.

Benefits

The legislative history and language of the Occupational Safety and Health Act, as distinguished from some other environmental and safety legislation, clearly indicate that Congress has already arrived at a judgment concerning the balancing of cost and benefit, with the result that worker safety and health are to be heavily favored over the economic burdens of compliance. Specifically, Section 6(b)(5) of the Act provides that:

> The Secretary, in promulgating standards dealing with toxic materials or harmful physical agents under this subsection, shall set the standard which most adequately assures, to the extent feasible, on the basis of the best available evidence, that no employee will suffer material impairment of health or functional capacity even if such employee has regular exposure to the hazard dealt with by such standard for the period of his working life. Development of standards under this subsection shall be based upon research, demonstrations, experiments and such other information as may be appropriate. In addition to the attainment of the highest degree of health and safety protection for the employee, other considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws.

Thus, while feasibility is an appropriate consideration, the Secretary is directed to set standards which attain the "highest degree of health and safety protection for the employee • • •."

This does not mean, however, that a systematic evaluation of costs and benefits is not to be encouraged within the limits of the estimation techniques. In considering the issue of feasibility in this rulemaking, as in others, OSHA has carefully evaluated the cost of compliance which may be incurred by the directly affected employers and their ability to comply. Additionally, OSHA believes that a standard for a substance which has been found to pose a cancer risk to workers, in this case inorganic arsenic, must assure maximum benefit (i.e. prevention of serious illness or death), constrained only by the limits of feasibility.

There is general agreement that inorganic arsenic exposure causes cancer. In spite of the certainty of this conclusion, and that there is a reasonable dose-response relationship for exposures in the hundreds of micrograms per cubic meter, there does not exist an adequate scientific basis for determining a quantitative dose-exposure relationship at the lower levels of exposures necessary to reduce the risk as much as is feasible. The uncertainty in both the actual magnitude of expected deaths and in the theory of extrapolation from existing data to the exposure level set by this standard places the estimation of benefits on "the frontiers of scientific knowledge."

While the actual estimation of the number of cancers to be prevented is highly uncertain, the evidence indicates that the number is likely to be appreciable. A dose-response relationship, that is a lower incidence of excess risk at lower levels of exposure is likely to exist at lower as well as higher levels of exposure to inorganic arsenic. Therefore reductions in exposure to lower levels is accompanied by a reduced risk, even though a precise quantitative relationship cannot be established.

The epidemiologic studies discussed in the health effects section give an indication of the magnitude of the excess risk which will be reduced by this standard. For example, the excellent Lee and Fraumeni study considered the employees at one copper smelter. This study indicated that over a 25 year period, there were 147 lung cancer deaths where only 45 deaths would be expected (Ex. 5D, Table 3, p. 1048). Exposures of groups of employees showing excess risk were both above and below the existing 500 $\mu g/m^3$ limit. It is clear that the new standard would contribute very substantially to reducing the 102 excess lung cancer deaths at that one copper smelter. In light of the uncertainties in this area of scientific knowledge, OSHA believes that it is required by the statutory mandate to adopt a highly protective posture in considering the evidence for health benefits.

We recognize that in view of the latency period usually associated with the induction of cancer, significant reductions in mortality may not be seen for many years. However, unless exposures are reduced now, OSHA believes that the mortality rate will not decline and employees exposed to inorganic arsenic will continue to suffer excess mortality.

Based upon the foregoing and the record as a whole, OSHA finds that compliance with the standard is well within the financial capability of the covered industries. Moreover, although the benefits of the standard cannot rationally be quantified in dollars, OSHA has given careful consideration to the question of whether these substantial costs are justified in light of the hazards of exposure to inorganic arsenic. OSHA concludes that these costs are necessary in order to effectuate the statutory purpose of the Act and to adequately protect employees from the hazards of exposure to inorganic arsenic.

In making judgments about specific hazards, OSHA is given discretion which is essentially legislative in nature. In setting an exposure limit for a substance like inorganic arsenic, OSHA has concluded that it is inappropriate to substitute cost benefit criteria for the legislatively determined directive of protecting all exposed employees against material impairment of health or bodily function. Where

V 4 3 / 8 8

the health effectiveness of alternative approaches are extremely uncertain and likely to vary from situation to situation, OSHA believes it is appropriate to adopt the compliance strategy which provides the greatest certainty of worker protection even if the approach carries with it greater economic burdens for the affected employers.

In the case of the inorganic arsenic standard, the evidence in the record indicates that the costs of compliance are not overly burdensome to industry. Having determined that the benefits of the proposed standard are likely to be appreciable, OSHA is not obligated to carry out further exercises toward more precise calculations of benefit which would not significantly clarify the ultimate decision. Previous attempts to quantify benefits as an aid to decisionmaking in setting health standards have not proved fruitful (41 FR 46742).

Impacts on Price Indexes

Both the IIS (Ex. 135, p. VI-5) and the Council on Wage and Price Stability (STR, pp. 845-6) estimate that the overall impact on general price indexes of the inorganic arsenic standard indexes will be "negligible." Arsenic products have a very small weight in these indexes and even substantial increases in individual arsenicals would have no significant impact. The likelihood of a 50 percent increase in the price of arsenic trioxide is discussed below. But such an increase would have very little impact on the prices of finished chemicals, cotton, or preserved wood because the cost of the arsenic trioxide is generally a small part of the cost of the finished product. See the discussion in the Final EIS of how even a 100 percent increase in the cost of arsenic trioxide would only have a negligible impact on the cost of cotton production, the largest user.

This preamble utilizes a 1 cent per lb increase in the price of copper as a low side estimate of the increase in price of copper for purposes of estimating impacts on copper smelters. ADL originally suggested a 2 cent increase in price. At the September 1976 hearing they suggested the possibility of a 5 cent increase if the Tacoma smelter shut down. As discussed below OSHA believes a compliance strategy exists which will assist in maintaining the continued viability of the Tacoma smelter.

OSHA does not believe that sufficient evidence has been introduced to permit it to evaluate the validity of ADL's second prediction. No doubt a 5 cent increase in the price of copper is not insignificant to copper users. However the market price frequently fluctuates by much greater amounts in the course of a year. Such an increase would still have a negligible impact on general price indexes, $150 million in a $1.5 trillion plus GNP. If it did occur, it would interestingly make the copper industry as a whole much more profitable and substantially improve its capabilities for paying for needed environmental and occupational safety controls.

The Arsenic Market

A. D. Little speculated that if Tacoma closes, the other producers of arsenic, Sweden, Mexico and Southwest Africa may form a cartel and force up the price of arsenic (Ex. 167A, p. II-16). Arthur Young points out that their speculation is not "obvious" though the IIS did not specifically consider this contention. (Ex. 184, p. 15)

The compliance strategy suggested for Tacoma will assist in maintaining its continued viability, so the basis for ADL's speculation may not occur. In any event OSHA believes the ADL suggestion is based on mere conjecture and is highly speculative. Further the flue dusts of many copper smelters are rich in arsenic and precious metals. These dusts, which in some cases now are stored, might very well become additional sources of arsenic if price relationships were suitable.

The Econometric Model

The 115 includes an econometric model. Arthur D. Little presented extensive criticisms of the model (Ex. 167, 167A, 186, 190(3)). Arthur Young responded to the criticisms in Ex. 173B and 184. OSHA has made its own independent interpretation of economic considerations in this preamble based on the data in the record. Therefore, it has not found it necessary to attempt to resolve the differing views on the econometric model.

VII. The Tacoma Smelter

The above analysis indicates that the final arsenic standard is feasible for the industries affected. However, the record also indicates that for copper smelters the magnitude of the task to achieve compliance will vary substantially among the different facilities in the industry. As discussed above, OSHA believes that it is inappropriate to make feasibility determinations based on those few facilities which have the most difficult compliance problems. To do so would deny necessary and achievable health protection to the majority of employees in facilities where a much lower level can be achieved.

When there are some facilities which cannot comply with the standard in the medium term using principally engineering controls, for technical reasons or because of serious economic difficulties, then a more elaborate compliance plan is required. Such a plan is to achieve compliance with the exposure limit in the near term through a carefully planned mix of feasible engineering controls, work practices and personal protective equipment. The plan should set priorities for the adaptation and installation of further engineering controls which will be put in place as soon as possible. It should also include strategies for reducing the difficulties in using personal protective equipment.

Normally, these situations will be dealt with at the compliance level. Considering the unusual circumstances at a few locations in a general rulemaking hearing would excessively lengthen the hearing with its many participants, and would reduce resources available to respond to major health questions with broad implications. Also solutions to the compliance problems are best incorporated in the compliance plan for a specific location so they can be tailored to specific difficulties.

However, a substantial amount of evidence has been placed on the record in regard to the Tacoma smelter of ASARCO, Inc. which has the most difficult compliance problems. OSHA has spent a substantial amount of time analyzing those data and members of its standards staff have visited the Tacoma smelter. Therefore, to assist the compliance process to more quickly and effectively reduce exposure levels, the evidence is analyzed here. This discussion will also provide useful information for other facilities. The outline of a feasible compliance plan is also described. Such a plan will permit compliance with the final standard including the 10 $\mu g/m^3$ level, substantially reduce the elevated lung cancer mortality reported among workers at the Tacoma smelter and alleviate the hardships of respirator use. It will assist in maintaining the continuing viability of the Tacoma smelter and the employment for its approximately 1,000 employees.

The details and changes based on new evidence will be worked out at the compliance level where the most recent evidence will be available to closely scrutinize compliance efforts and capabilities. Also, a joint EPA and OSHA study will be available which will integrate and set priorities for occupational and environmental health controls.

The evidence indicates that Tacoma is principally a copper smelter and similar to the other 15 in the United States. Like many of the others it is an older facility which smelts copper through a high temperature pyrometalurgical process involving the open transference of molten and fuming mineral complexes between and from furnaces. The employees at Tacoma carry out many tasks in a manner similar to other copper smelters. Compliance, as at other smelters, requires

M Y 5 7 8 M

principally enclosure, hooding, and ventilation to the extent feasible at the various steps in the process.

However, the record indicates that the degree of difficulty to achieve compliance is greater at Tacoma. Two reasons principally account for this. First, the level of arsenic in Tacoma's copper concentrate feed (4 to 5 percent overall) is five times that at the two smelters with the next highest levels of arsenic in their feed and at least 40 times greater than the other smelters. Second, Tacoma is the only domestic producer of arsenic-trioxide.

Both Knowlton Caplan, expert witness for ASARCO (Ex. 29m, pp. 66-67; ATR p. 1314) and David Burton, expert witness for OSHA (Exs. 18, 150; STR p. 279), suggested that in a number of areas at Tacoma, ventilation and enclosure controls by themselves would have a low probability of reducing exposures below 50 $\mu g/m^3$. Arthur Young did not specifically express a judgment on this point, but did suggest that to reach a 4 $\mu g/m^3$ level, engineering controls would have to be coupled with substantial use of clean rooms, respiratory protection and some worker rotation.

Arthur Young estimated that the capital cost of all technically feasible engineering controls at Tacoma would be $31 million and that the annualized cost would be $10 million at the 4 $\mu g/m^3$ level. A. D. Little estimated capital costs at $41 million and annualized cost at $16 million at that level. Costs of all technically feasible engineering controls would be similar at the 10 $\mu g/m^3$ and 4 $\mu g/m^3$ levels at Tacoma because of the high current exposure levels. ASARCO stated that pretax profits at Tacoma had averaged $1.9 million per year but supplied no underlying data (STR, p. 439). ASARCO's pretax profits have averaged $92 million in the 10 year period 1966-1975 (Standard and Poors). As discussed below, Tacoma is integrated into other ASARCO operations. This evidence indicates that part of the costs of controls should be borne by ASARCO as a whole.

The standard requires that employers install at the earliest possible time but no later than December 31, 1979, necessary engineering controls except to the extent the employer can show that those controls are not feasible. Unless the evidence supplied by ASARCO does not represent the current circumstances, ASARCO may be able to show that installing all of the technically feasible engineering controls discussed in the IHEA, DBA and Arthur Young studies are not feasible in that period at Tacoma. In addition, substantial respirator usage will be required.

If this is the case, the standard requires ASARCO to develop a compliance plan for installing the most effective feasible controls in the near term, mitigate the difficulties of substantial respirator use and provide a framework for complete compliance in the long term. ASARCO is obligated to install additional engineering controls as they become feasible.

The most effective types of engineering controls to be installed by December 31, 1979, would include the following three types of controls. Controls should be installed which would most effectively reduce background levels of arsenic contamination at the smelter. This includes enclosure, hooding, and ventilating sources of arsenic contamination which are currently uncontrolled or only partially controlled. Possible examples are controls at the roaster flue cleanout and enclosure of the fine ores bin. Other examples are hooding and ventilation of sources of arsenic emissions at the roaster, and during charging and tapping at the reverberatory furnaces and convertors to the extent that current systems are insufficient or incomplete. Also, some steps in the arsenic-trioxide production process are basically uncontrolled at present and reasonable controls should be installed to reduce background contamination. For example, hand tools are used in the open to "pull" (remove) arsenic-trioxide out of the "kitchens" (condensers) with little in the way of even basic forms of enclosure, ventilation or mechanization leaving a visible residue of arsenic-trioxide.

Lowering background arsenic levels makes controls at other specific locations easier to devise and reduces the need for full time use of respirators. It lessens respirator use in those areas of the plant where little arsenic is emitted and where most exposure is from background sources. Such controls by reducing fugitive arsenic emissions, reduce the spread of arsenic outside of the plant boundaries. They thereby reduce potential exposure in the surrounding community. These types of engineering controls must necessarily be coupled with good housekeeping practices such as promptly cleaning up spills, cleaning larry car tops and furnace doors for better seals, and cleaning of maintenance shops. A conscientiously carried out program of such practices can substantially reduce background levels of arsenic.

Secondly, those engineering controls which will reduce exposures below the 10 $\mu g/m^3$ limit for significant numbers of employees should be installed. This will eliminate the need for respirator usage in those locations.

Thirdly, filtered-air pulpits and clean rooms should be utilized where appropriate. Many production jobs in a smelter are of a tending or intermittant nature. A clean room or filtered air pulpit provides an environment below the 10 $\mu g/m^3$ level, where the employee can stay with his respirator off in between tasks, or while monitoring controls. As a result, the employee's exposure is substantially reduced without the full-time use of respirators.

Both D. B. Associates and Arthur Young emphasized the importance of these controls, which are effective at moderate cost and which in OSHA's experience are commonly used by industry. Caplan testified that at Tacoma, clean rooms might not succeed in reducing exposures to the 4 $\mu g/m^3$ because of high background levels. OSHA believes that well designed clean rooms will succeed in keeping exposures below the 10 $\mu g/m^3$ level. Good design includes adequate filtration and vacuums for the employee to dust himself off before entering.

The above discussion is not intended to be determinative, but to provide general guidance. The specific plan for setting installation priorities for engineering controls needs to be worked out at the compliance level where all necessary details can be taken into account. It is clear that such a plan can be devised. Caplan testified that he indeed could develop a compliance plan which would rationally set priorities for the installation of engineering controls, and that the study which he submitted to the record did not do that (STR, pp. 642-643). Similarly, the D.B. Associates study did not prioritize controls, but Burton himself did indicate the beginnings of a plan to do that in his testimony (STR, pp. 270-281).

In conjunction with the installation of the most effective feasible engineering controls, substantial respirator use will be necessary in the medium term to meet the 10 $\mu g/m^3$ exposure limit. Therefore, the standard requires the compliance plan to include provisions for a respiratory protection program designed to reduce the burden on the employees of widespread respirator use as well as assuring the effective use of respirators.

The plan for engineering controls discussed above is the first step in such a respiratory protection program. It will provide a basis for reducing the need for full time respiratory use. Many employees will be able to spend part of the day in clean rooms and pulpits where they may remove their respirators. Another part of the day, the employee will have to wear a respirator. However, properly fitted and selected respirators in many circumstances will reduce exposures substantially under 10 $\mu g/m^3$. That, in conjunction with a general lowering of background exposure levels, will permit employees to spend part of the day not wearing respirators outside of the clean room and still maintain 8 hour time weighted average under the 10 $\mu g/m^3$ limit set by the standard.

V 4 3 / 8 8

The standard also requires quantitative fit testing for facilities with widespread respirator use. Such testing will permit a more accurate assessment of the degree of protection the respirator is giving each employee. It will also permit determination of what part of the day the employee may go without wearing his respirator, and still be under the exposure limit.

The standard also gives the employees the option of wearing powered air purifying respirators and requires employers to furnish them when requested. Those respirators, as discussed below, are often more comfortable for the employee and can provide a higher degree of protection than negative pressure respirators. In addition, the process of developing new and more comfortable forms of powered air purifying respirators continues. OSHA is willing to consider granting experimental variances or other appropriate action to permit use of such respirators or other respirators which increase comfort and reduce safety problems before certification by NIOSH is granted, if quantitative fit tests indicate they are providing proper protection in the Tacoma environment.

A compliance plan for Tacoma following the above outlines will mitigate the hardships of respirator use at Tacoma. It will reduce the need to wear respirators for the entire work day and will encourage the use of more comfortable types of respirators. It also will be beneficial to ASARCO because the loss of efficiency through respiratory use is less when they need not be worn all day and more comfortable types can be worn. It is recognized that for some employees, such as crane chasers, electronic communication equipment needs to be incorporated into the respirator to permit adequate communication.

The feasible compliance plan for Tacoma would not be appropriate in most other circumstances. As explained above, the substitution of respirators for feasible engineering controls is not acceptable because of the difficulties in properly fitting and insuring that they are used. Moreover many types of respirators are uncomfortable to wear, and it is inappropriate to place the burden of compliance on the employee when it is the employer who has not removed toxic substances from the workplace.

Further a program of averaging exposures with the respirator on and off to prevent full time use is also not acceptable in most circumstances. It is difficult to administer such a program, enforce it and insure that employees are not over exposed.

However Tacoma presents difficult circumstances. There are serious health and feasibility problems. In these limited circumstances, the above program is appropriate despite its difficulties. If carefully administered by ASARCO, it will provide needed health protection for the employees and respond to the feasibility questions.

In the longer term installation of additional engineering controls, modernization of the Tacoma facility and technological development will reduce exposure levels. As this occurs less reliance on respiratory protection will be needed.

The case of *IUD* v. *Hodgson* (supra) suggests that consideration may be given to setting a different exposure level for different industries. Such a response does not seem proper in these circumstances. OSHA does not believe that the carcinogenic risk at higher worker exposure levels is acceptable, and an approach is available which can provide the Tacoma employees with the same level of protection as other employees, although in a less satisfactory manner. In addition Tacoma is primarily a copper smelter and does not constitute a separate industry.

The rulemaking record includes analyses of economic feasibility for Tacoma by Arthur D. Little, Inc., Arthur Young & Co., Dr. Arvil Adams, and ASARCO management officials. Based on this record OSHA believes ASARCO is in position to spend a substantial capital sum towards the installation of effective engineering controls and carry the provisions of the compliance plan described.

Final determination of the most effective economically feasible schedule for installation of engineering controls will be determined at the compliance level. Latest information and internal financial data will be available at that stage. This information is discussed here to assist in a more rapid determination at the compliance level and to give guidance to the parties.

Tacoma is integrated into other ASARCO operations as pointed out by Strauss, ASARCO's Executive Vice-President (STR, p. 443) and by A. D. Little, ASARCO's own witness (Ex. 111-7, pp. 29-30). Although ASARCO supplied little evidence upon which to estimate the value of the services it performs for other ASARCO facilities, they involve treating $30 million in metal values per year (Ex. 111-7, p. 30). ASARCO has stated it would involve new capital expenditures to perform those services at its El Paso smelter (STR. p. 443). On this basis and because of the serious health problems at Tacoma it is appropriate that the initial capital investment for engineering controls should be in major part charged to ASARCO as a whole, and not specifically come only from Tacoma resources.

ASARCO recently completed an $18 million program for reduction of environmental sulfur dioxide emissions at Tacoma. It has committed itself to spending $6 million for environmental arsenic controls there, knowing about the pendency of OSHA arsenic regulations. The expenditure of sums in this range will go a long way towards completing, or complete by 1980 the installation of those most effective engineering controls describes above. Obviously ASARCO management has considered it economically feasible to invest sums of this size in environmental controls in the recent past at Tacoma. However, in view of the severe health hazards, it is OSHA's view that a substantial sum must be invested in engineering controls, no matter what the circumstances, in order to significantly reduce that hazard and indicate that a major effort to reduce exposures is being made.

In considering economic feasibility at Tacoma it is also necessary to take into account additional revenues which will be generated at the smelter as a result of this standard. As discussed above in the feasibility analysis for the copper smelting industry, there will be conservatively an additional 1¢ per pound in copper smelting charges as a result to the standard. Based on approximately 75,000 tons of copper per year smelted at Tacoma, this will come to $1.5 million in increased revenues.

In addition, as a result of this standard Tacoma will receive increased revenues from the sale of arsenic-trioxide over its arsenic-trioxide revenues at the time this record was compiled. Both Arthur Young and A. D. Little analyzed the arsenic market at considerable length in Exhibits 135A and 111-7. Arthur Young suggested that, so long as Tacoma produced arsenic, prices would not increase significantly because of import competition. A. D. Little suggested that ASARCO might raise its arsenic-trioxide approximately 50 percent ($150 per ton) and still sell its entire annual production though not reduce its inventories existing at the time of the report. It is OSHA's understanding that Tacoma arsenic inventories have been substantially reduced and therefore pricing to reduce inventories would not now be necessary.

Foreign prices have in the last several years risen to levels higher than domestic prices. The largest foreign producer, Boliden in Sweden, may currently have less arsenic-trioxide to sell; it's inventories have shrunk with the exhaustion of some of its sources of high arsenic concentrates. Foreign arsenic-trioxide prices have increased about 300-400 percent over the last eight years. More recently domestic prices have risen 200-300 percent and domestic inventories have declined. Foreign prices are now greater than domestic prices. Domestic consumption has been maintained or increased.

M Y 5 7 8 8 M

The cost of arsenic-trioxide is only a small part of the cost of the finished products in which it is used and for some uses substitutes are less satisfactory. (This aspect is discussed at greater length in the final EIS.) Based on this, many of the purchasers of arsenic compounds should be able to absorb significantly increased prices without reducing consumption substantially.

A 50 percent increase in arsenic prices would increase Tacoma revenues by approximately $1.5 million per year based on 10,000 tons produced per year and a $300/ton price at the time of this record. It would appear to OSHA that a price and revenue increase of this magnitude would be quite possible in view of the recent price history and other reasons discussed above.

This standard will therefore result in additional smelting revenues of $1.5 million and additional arsenic revenues of $1.5 million, or total increased revenues of $3 million annually. ASARCO has stated that Tacoma pretax profits averaged $1.9 million and these two figures total $4.9 million.

The Arthur Young estimate for annual costs at the 4 $\mu g/m^3$ level is $3.85 million. This number is based on some assumptions based upon the provisions of the proposal and not the final standard. There will be a lower level of operating costs initially as a result of the immediate installation of fewer engineering controls. The increased exposure limit will reduce respirator use, but the installation of fewer engineering controls will increase it. Hence the changes will, at least in part, balance out.

The ASARCO estimate for annual costs at Tacoma is summarized by A. D. Little at page 15 of their Report. The basis of this data is testimony by ASARCO management and Caplan. A. D. Little did not independently review the figures. The figure estimated in $7.68 million. Other figures given are capital charges which are discussed above.

However the ASARCO estimate includes two figures which are substantial over-estimates. The operating expenses for engineering controls given are $2.77 million based on immediate installation of $41.1 million of engineering controls. If for example it is decided at the compliance level that it is only feasible to install one-third of those controls by 1980, then the operating costs of engineering controls would be reduced by approximately two-thirds or $1.84 million to $0.93 million.

ASARCO estimates a $3.24 million annual cost for loss of efficiency from respirator use. This is based on all 900 production employees wearing respirators full time giving protection to the 4 $\mu g/m^3$ level and an estimated average loss of efficiency of 20 percent. There are other estimates on the record of loss of efficiency of respirator use ranging down to 8 percent. In addition the change in the final standard from the proposal and new developments in respirator protection since that estimate was made, should substantially reduce the loss of efficiency associated with respirator use.

The change to the 10 $\mu g/m^3$ level and the use of exposure averaging (which would be based on mean exposure levels), will mean that a significant number of employees may not need to wear respirators at all and many employees will only need to wear respirators part time. Further employees need not wear respirators when in clean rooms. In a number of areas at Tacoma, existing mean exposures (based on personal samples as required by the standard if that data is available) are below 20 $\mu g/m^3$. Exhibit 29G, Appendix 3 supplied by ASARCO indicates that the Acid Plant, Slimes Building, Electric Shop, Fine Castings, Ore Dock, Main Office, Warehouse, Machine Shop, Anode Department, Mobile Equipment Repair and Bucking Room come in this category. The installation of the most effective engineering controls discussed above, good housekeeping and clean up may eliminate the need for respirators in those areas or greatly minimize it.

The ASARCO estimate is based on employees exposed over 4 $\mu g/m^3$ having to wear fullface piece respirator which ASARCO believes are less comfortable. It is also based on a substantial number of employees wearing airline respirators. These substantially reduce efficiency in jobs requiring mobility because the hoses interfere. It is not completely clear whether the estimated reduction in efficiency includes an element of the very high loss of efficiency in wearing heavy self-contained breathing apparatus. However it appears from the questioning that Mr. Lindquist's estimate of 20 percent loss of efficiency includes some allowance for that. It also should be noted that the study, which Mr. Lindquist stated he relied on for his 20 percent estimate, was not systematic and did not involve any actual time and motion analysis of lost efficiency.

The final standard will permit one-half facepiece respirators to 100 $\mu g/m^3$ which will reduce loss of efficiency from possible discomfort wearing full facepieces. There is now a certified dust and acid gas cartridge. Therefore when the SO2 limit is exceeded, the employee is permitted to wear a one-half facepiece respirator up to a concentration of 100 $\mu g/m^3$ of arsenic and 10 times the sulfur dioxide limit.

In addition there is now available a portable, battery operated certified powered air-purifying respirator (PAPR) which weights only 5 pounds, mostly carried at the belt. Because the face fit is loose, there is a cooling air stream, no breathing resistance and light weight, this type of respirator creates a loss of efficiency substantially below 20 percent and probably below the low end (8 percent) estimate on the record. These respirators may be used where exposures do not exceed 10,000 $\mu g/m^3$ thus offering the opportunity for replacing airline respirators, negative pressure respirators and self-contained breathing apparatus in the vast majority if not all locations. (See Table 1, paragraph g of standard)

In view of all these factors, OSHA believes that the loss of efficiency from respirator use will be, at most, no more than one-half of the ASARCO estimate. Further OSHA believes that with the increase in the permissible exposure level to 10 $\mu g/m^3$ and the compliance strategy described, approximately one-half of the number of full time equivalent employees will need to wear respirators as ASARCO estimated. Therefore the loss of efficiency through respirator use is likely to be reduced three-quarters or $2.43 million from ASARCO's $3.24 million estimate.

In view of these two factors, OSHA believes that the ASARCO estimate of annual compliance costs should be reduced by $4.27 million ($2.43 million respirator efficiency plus $1.84 operating costs engineering controls over-estimates) to $3.41 million. OSHA, however, would expect that ASARCO would spend several hundred thousand dollars more on improved housekeeping than the $0.14 million ASARCO estimated.

Based on the above analysis. OSHA believes that the operating cost of the compliance plan described will be within the resources of the Tacoma smelter including its $1.9 million historical annual profits and $3 million additional revenues as a result of this standard and that overall the compliance plan described is feasible. Obviously to the extent conditions change or better analyses become available, suitable adjustments can be made at the compliance level.

The question of future operations at Tacoma in uniquely the decision of ASARCO's management. Evidence on this record indicates that the continuing viability of the smelter depends on many factors beyond the control of OSHA or anyone, such as copper prices, availability of British Columbia concentrates, Japanese subsidy policies, and a number of other considerations. Nor as a matter of policy or of law does OSHA believe it appropriate to ignore health considerations because difficult feasibility questions may exist. ASARCO figures indicate a substantial excess of lung cancer

V 4 3 / 8 8

deaths at Tacoma. Certainly, major efforts are required to reduce this risk.

Consideration of additional capital investment for engineering controls in the early 1980's, is best analyzed in compliance proceedings at that time, in the light of the circumstance and available resources then existing. In addition as engineering controls succeed in reducing exposure levels, respirator use will be reduced. The resulting savings in respirator costs will make available additional sums for further engineering controls.

VIII. Summary and Explanation of the Standard

The following sections discuss the individual requirements of the standard. The sections include an analysis of the record evidence, the recommendations of NIOSH, and the policy considerations underpinning the decisions on the particular provisions of the standard. As discussed in the PEL section above, the final standard sets a permissible exposure limit to inorganic arsenic of 10 $\mu g/m^3$. Engineering controls and work practices are required where necessary and written compliance plans must be developed. Other portions of the standard including those on respirators, protective clothing, hygiene facilities, and exposure monitoring have been revised and clarified as described in detail below.

It should be noted that the language of many of the standard's provisions and the order of the paragraphs have been changed to be consistent with the drafting in recent OSHA health standards such as the acrylonitrile proposal (43 FR 2608), benzene final standard (43 FR 5913), and the final coke oven standard (41 FR 46784). OSHA believes, to as great extent possible, a similar style should be followed in order to lead to uniformity of interpretation of similar provisions. Section 6(b)(5) of the Act states that health standards shall also be based on "experience gained under this and other health and safety laws."

A. Scope and Application: Paragraphs (a) and (b)

This standard applies generally to all occupational exposures to inorganic arsenic. Some of the industries where substantial exposures to inorganic arsenic may occur are non-ferrous metal smelting, glass making, and manufacture of arsenical chemicals and pesticides. There may also be exposures covered by this standard in other areas and industries. Pesticide application, application of arsenical preservatives to wood, use of arsenically treated wood and agricultural uses are exempted. Pursuant to section 4(b)(1) of the OSHA Act, this standard does not apply where other Federal agencies exercise statutory authority to prescribe standards regulating occupational safety or health.

It should be noted that the standard does not cover every place where inorganic arsenic is present. As explained in the background section and FEIS, arsenic is a naturally occurring material and is present in small amounts in many substances. It is therefore inappropriate to cover situations where very low levels of arsenic may be present in substances or products in the workplace, but where they are handled in such a way that the possibility of airborne exposure is minimal. But where the substances containing arsenic are handled or processed in such a way as to create exposure, a possible hazard exists, and the operations come within the scope of this standard.

Several examples may be helpful. If arsenic trioxide is added to glass during manufacture, airborne arsenic is likely to be present and the operation comes within the scope of this standard. However, when that glass is cut or used, airborne exposure is unlikely because the arsenic is bound in the glass, and those operations are outside the scope of this standard. Similarly when gallium arsenide is produced there may be airborne exposures and the operation is covered by this standard. However, when light emitting diodes are assembled into calculators or watches, airborne exposure is unlikely and those operations are outside the scope of this standard.

If the operation comes within the scope of this standard, but exposures are shown to be below 5 $\mu g/m^3$ after initial monitoring, then there may be no other obligations under this standard except labelling in some circumstances and remonitoring if processes change.

Inorganic arsenic is defined as copper aceto-arsenite and all inorganic compounds containing arsenic except arsine. Copper aceto-arsenite has been specifically noted because of possible confusion on whether it is considered organic or inorganic. As Allied Chemical (Ex. 109) stated copper aceto-arsenite is inorganic. Furthermore, as previously noted it has been implicated as a potential lymphatic cancer agent, which compels its inclusion in this standard.

Arsine has been excluded for several reasons. The proposal did not include arsine and the rulemaking did not consider specifically the special provisions necessary for proper control of exposure and regulation of arsine. Most notably, no suitable sampling technique has been submitted for levels significantly lower than the present standard of 0.05 ppm.

NIOSH and the AFL-CIO suggested that the final standard include arsine. OSHA agrees that arsine has a very high acute toxicity. It has no practical value and exposures occur solely as a result of accidental evolution. It would unnecessarily delay the inorganic arsenic standard to wait for the development of a suitable sampling technique as well as other procedures and there is a current permissible exposure limit for arsine of 0.05 ppm included in Table Z-1 of 29 CFR 1910.1000 to give protection now.

Some parties requested that the scope of the final standard be narrowed and clarified. Spokespersons from several industries expressed their belief that industries handling materials containing less than 0.1 percent arsenic (Exhibits 79, 106, 108, 112) be exempted from the standard. It was their belief that this would provide a reasonable cut-off where exposures would be minimal and provisions such as monitoring need not apply.

OSHA does not feel it is appropriate to exclude those industries handling materials with less than 0.1 percent arsenic from the standard. OSHA feels this standard must be based on the degree of employee exposure to airborne concentrations of inorganic arsenic since the degree of exposure most represents the risk to the employee. It should be noted, for example, that employee exposure in some copper smelters with arsenic levels of less than 0.1 percent in their feed had a number of employees exposed above 10 $\mu g/m^3$. The inclusion of an action level limits the requirements of the standard (except for initial monitoring and labelling), to employees exposed above 5 $\mu g/m^3$.

Diamond Shamrock (Ex. 3E) has expressed the view that regulatory activity would be difficult where naturally occurring organic arsenicals may be mixed with inorganic arsenic. They further stated that since they believed there was no analytical method for distinguishing individual arsenic compounds, only total arsenic can be measured. Diamond Shamrock, therefore, recommended that only operations involved in smelting ores, conversion of arsenic trioxide and primary application of arsenical products be included. Dr. Braman (Ex. 145) has demonstrated that there is a sensitive method capable of distinguishing between organic and inorganic arsenic. Natural background levels of arsenic are in the range of approximately 0.01 to 0.04 $\mu g/m^3$. The higher levels reported in smelter communities cannot be considered natural, and are typically not high enough to interfere with sampling at a 5 $\mu g/m^3$ action level. In most facilities it can be determined whether workers are exposed to inorganic or organic arsenicals based upon the chemicals present and processes used. In those cases where both are present, a determination at the enforcement level can be made as to the percentage of exposure to organic arsenic, using Dr. Braman's or other methods.

The standard excludes pesticide application from its scope. The EPA regulates most pesticide applications and has a program to extend its regulations as necessary including suitable protection for employees.

The manufacture of pesticides is not considered pesticide application and is covered by this regulation. Most agricultural uses are pesticide application.

As discussed in the background section of this preamble one of the major uses of arsenic is to impregnate wood so as to preserve it from rot and insects. The manufacture of the preservative solution is covered by this regulation as is the manufacture and formulation of other pesticides. However, EPA regulates the impregnation of the wood by the preservative as a pesticide application. EPA is now reviewing the registration of arsenical preservatives and has indicated that it is considering new requirements for application and use including suitable protection for employees. OSHA believes it advisable to avoid duplicative regulation when employees will be suitably protected, and therefore the impregnation of wood with arsenical preservative is not covered by this regulation.

EPA currently does not regulate the use of preserved wood. Based on the evidence in this record the arsenic in the preserved wood is bound tightly to the wood sugars, exhibits substantial chemical differences from other pentavalent arsenicals after reaction, and appears not to leach out in substantial amounts (Exhibits 31 C-2, 5, 6, 7, 21, 36). Therefore OSHA does not believe it appropriate to regulate the use of preserved wood on the basis of the current record.

If further information indicates the need for regulation, and other agencies have not exercised jurisdiction, OSHA will institute proceedings to suitably regulate employee exposure to arsenically preserved wood.

Particulate Size

The proposed standard was based on the regulation of worker exposure to all particle sizes of inorganic arsenic. Some parties requested that this requirement be changed so that only arsenical particulates of "respirable size" (less than 10 micrometers mass median diameter) be regulated (Exhibits 3F, 3T, 23A, 106, 108, 109). This position has been summarized by Engelhard Minerals & Chemicals Corp. (Exhibit 3F) as follows:

> Since the Rule clearly refers only to arsenic exposure in terms of mg As/m^3 of air in the workplace, it is implicit that the Rule is intended to cover only airborne arsenical particulates or aerosols and should, therefore, indeed be restricted to those only in the *respirable* particulate size range, i.e., less than approximately 10 microns e.s.d., since particles larger than this are non-respirable and physiologically rejected.

There are two major routes of entry of airborne concentrations of inorganic arsenic. The primary route is inhalation. The secondary route, ingestion. Little is known about the absorption and translocation of arsenic in the various regions of the upper respiratory tract, lung and the gastrointestinal tract after inhalation and ingestion. Although the size of particle admitted by the inhalation route is limited by the aerodynamic principle of particle deposition, a similar limitation does not apply to arsenic that may possibly be ingested. Furthermore, too little is known about the absorption and translocation of *differently sized particles* in the lung, upper respiratory tract, lung and gastrointestinal tract to predict with confidence the final body dose. Accordingly, OSHA believes it appropriate to take the most protective stand and provide adequate protection from all particle sizes of airborne arsenic.

B. Ceiling Limit: Deletion

In contrast to the proposal, the final standard does not provide for a ceiling limit to supplement the permissible exposure limit. In the principally affected industry, copper smelting, there will be brief unpredictable exposure to higher levels of arsenic as a result of the smelting process. OSHA believes that engineering controls now available would not prevent occasional excursions above a ceiling limit though there are practices and controls available which will reduce their frequency and extent.

For the permissible exposure limit of 10 $\mu g/m^3$ to be met, employers will have to implement feasible engineering and work practice controls which will tend to reduce the number and extent of excursions over the permissible exposure limit. In this manner, the standard assures that protection will be provided to employees.

C. Action Level: Paragraph (b)

The proposal contained an action level of 2 $\mu g/m^3$ which triggered the monitoring, medical, regulated area, hygiene facilities and protective clothing requirements of the proposed standard. This requirement has been retained in the final standard, but the numerical value has been changed to 5 $\mu g/m^3$ in light of the change of the permissible exposure limit.

Many industry spokepersons believed that the action level was overly burdensome, stating their opinion that if the permissible exposure level were a level that adequately protects workers, no action level should be required (Exhibits 3A, 3W, and 112). Others believed that it was probably impossible to reduce employee exposures to 2 $\mu g/m^3$ in many locations, and therefore felt it should be deleted (Exhibits 3-L, 30, 3v). It was also pointed out that it would be difficult to measure a 2 $\mu g/m^3$ level.

In the absence of a demonstrated safe level for a carcinogen, OSHA has limited employee exposure to the maximum extent feasible by the use of engineering and workpractice controls. OSHA believes it is appropriate to begin some protective actions prior to exceeding the permissible exposure limit. The action level serves such a purpose. Another purpose of the action level is to help to relieve the burden on employers by providing a cut-off point for many of the required compliance activities under the standard. The standard necessarily encompasses some employers whose employees are exposed to levels below the permissible exposure limits. Such employers are required to perform initial monitoring to determine the extent of their employees' exposures to inorganic arsenic. If, on the basis of the results of the initial measurement, exposure is below the action level, the employer may discontinue monitoring and most other compliance activities for that employee. The action level concept thus provides an objective means for an employer to determine what further actions are required for compliance with the standard.

The statistical basis for determining the action level has been discussed in connection with several proposed OSHA health standards (See, for example, "Proposed Standard for Trichloroethylene" (Oct. 20, 1975, 40 FR 49032)). In brief, although all measurements on a given day may fall below the permissible exposure limit, some possibility exists that on unmeasured days the employee's actual exposure may exceed the permissible limit. Where exposure measurements are above one-half of the permissible exposure limit, i.e., the action level, the employer cannot reasonably be confident that his employees may not be overexposed. (Leidel, N. A., et al., "Exposure Measurement Action Level and Occupational Environmental Variability." DHEW, PHS, DCD, NIOSH, DLCK (August 1975)). Therefore, requiring periodic employee exposure measurements to begin at the action level provides the employer with a reasonable degree of confidence in the results of his measurement program.

However, OSHA has reduced the number or requirements and burden of requirements triggered by the action level, while maintaining its major benefits. The action level has been raised from 2 $\mu g/m^3$ to 5 $\mu g/m^3$, thereby reducing the number of workers and number of establishments required to do more than initial monitoring by this standard.

D. Regulated Areas and Notification of Use: Paragraphs (d) and (f)

The final standard requires that regulated areas (RA) be established and access limited to authorized persons.

M Y 5 7 8 (M

V 4 3 / 8 8

This section is to aid in limiting exposure to inorganic arsenic. By limiting access to the RA to authorized persons, the standard requires the employer to prevent those persons who are not authorized to enter the RA from doing so and thereby being exposed to inorganic arsenic. Other purposes of this section are to designate those areas in which precautionary signs are posted, and to designate those employees subject to quarterly exposure monitoring. Additionally, employees working in regulated areas are covered by the washing and showering provisions and certain activities such as smoking and eating are prohibited within regulated areas.

The proposed standard required that the regulated area be established at the action level. Commentors (Ex. 3B, 108, 112) suggested that the regulated area be established in areas in which exposure exceeds the permissible exposure limit (sometimes refered to as the PEL or TWA limit). This suggestion has been adopted for the Final Standard and is consistent with the approach taken in other OSHA standards for carcinogens.

The proposed standard required that a daily roster of all persons who enter the RA be made and maintained for at least forty years or the duration of employment plus 20 years whichever is longer (Ex. 2a, 40 FR 3397, 3400). The final standard does not requiare that a roster be kept.

Commentors have criticized this provision as excessively interfering with day to day operations (Ex. 3B). OSHA has concluded that rosters would be of little use in limiting worker exposure to inorganic arsenic. Other records such as medical records and results of exposure to monitoring required by the standard would provide more useful information and obviate the need for a roster.

The proposed standard prohibited eating, drinking and applying cosmetics in areas where employees were exposed above the action level. The specific prohibition was located in the Hygiene paragraph of the proposal.

The limitation on eating, smoking and applying cosmetics in regulated areas is necessary to prevent the ingestion of inorganic arsenic. As discussed elsewhere in the preamble, the ingestion of inorganic arsenic has been implicated as a cause of cancer. There is the possibility of the translocation of arsenic within the body after ingestion. Further it is OSHA's policy to limit all routes of exposure to carcinogens. Moreover, inorganic arsenic is a skin irritant. Applying cosmetics in its presence would retain arsenic against the skin.

Drinking water is permitted within regulated areas. The possibility of heat stress exists in smelters. Therefore it is necessary to have water readily available.

Paragraph (r) of the proposal required employers with regulated areas to notify OSHA area offices. This requirement has been retained in paragraph (d) of the final standard so that OSHA will be aware of facilities where substantial exposure to arsenic exists.

E. EXPOSURE MONITORING AND MEASUREMENT: PARAGRAPH (E)

The standard requires each employer who has a place of employment where there is exposure to inorganic arsenic as the result of the employers' activities to monitor their employees' exposure to inorganic arsenic over an eight hour period without regard to the use of respiratory protection. Section 6(b)(7) of the Act (29 U.S.C. 655) mandates that any standard promulgated under subsection 6(b) shall, where appropriate, provide for monitoring or measuring employee exposure at such locations and intervals, and in such manner as may be necessary for the protection of employees.

There are various reasons which make it appropriate for employers to measure employee exposure to inorganic arsenic. First, exposure monitoring informs the employer whether he is meeting his legal obligation to keep employee exposures below the permissible exposure limit. Second, exposure monitoring evaluates the effectiveness of the installation of engineering and work practice controls and informs the employer whether additional controls need be instituted. Third, exposure monitoring is necessary in order to determine whether respiratory protection is required at all, and if so, which respirator is to be selected.

Fourth, section 8(c)(3) of the Act (29 U.S.C. 657) requires employers to promptly notify any employee who has been or is being exposed to toxic materials or harmful physical agents at levels which exceed those prescribed by an applicable occupational safety and health standard and to inform such employee of the corrective action being taken. Exposure monitoring is necessary in order to determine whether employees are being exposed to inorganic arsenic at levels exceeding that prescribed by this standard and therefore should be notified as required by the Act. Finally, the results of exposure monitoring are part of the information which it is necessary to supply to the physician.

The need to conduct exposure monitoring was generally accepted by participants in the rulemaking process. A requirement that monitoring be done was included in the proposed standard. In view of this support and for the reasons stated above, the standard establishes a requirement for employers to monitor employee exposure to inorganic arsenic. The monitoring of airborne exposure is consistent with the proposal and other health standards.

Some industry spokespersons expressed their preference for biological monitoring (urinary arsenic measurements) (Ex. 29G, Ex. 118) stating that biological monitoring best defines the risk to the employee, that it is equally effective and much less expensive (Ex. 3T). Some feel that this form of biological monitoring can be used as an indication of the total effectiveness of control programs, including the effectiveness of respirator usage and the personal hygiene habits of the employee (Ex. 118). ASARCO (Ex. 29G, App. 7) presented a regression analysis of urinary arsenic levels versus airborne arsenic exposure levels. In this analysis, the average individual employee's urinary arsenic level taken on ten consecutive days were regressed on the corresponding average individual employee airborne arsenic exposure. The data on which this correlation is based is contained in Exhibit 125. Based on the 23 employees so measured, a weak to moderate linear correlation (regression coefficient of 0.528) was observed.

During the April 1975 hearing, NIOSH representatives were asked to evaluate the urinary arsenic determinations as an indicator of worker exposure (ATR 372-6). Dr. Blejer responded:

> From my background as a physician and knowledge of various plants, not smelters, which handle inorganic arsenicals, the urinary excretion of arsenic is an extremely variable and inconstant thing for any individual.
>
> Occupationally, I have learned and I was taught, as well, to treat results—all the results—to group them and take means or average but not on individual bases, because of dietary and many, many other factors.
>
> Therefore, the results of an individual would not be indicative of an exposure and if they were to be enormously high, which would be about the only way that you could tell that they were occupationally related, I would say, then you would be corroborating what would have to be a fairly gross exposure or overexposure. [ATR 373]

OSHA has concluded that it is not appropriate to use urinary arsenic measurements as the primary means for determining employee exposure. Airborne monitoring is effective and is capable of detecting levels over the permissible exposure limit before over exposures to employees occur. Urinary monitoring is variable and the correlation between airborne and urinary levels is only weak to moderate. OSHA has further concluded that it will not require urinary arsenic determinations as a supplement to airborne monitoring. However, employers may use it as an additional monitoring technique if they believe it useful in their particular circumstances.

The requirement for airborne monitoring is limited to employers who have a place of employment where inorganic arsenic is released as a result

M Y 5 7 8 M

of their operations. There are trace amounts of naturally occurring arsenic in the atmosphere (.01-.04 $\mu g/m^3$) and without this limitation, all employers would be required to monitor. (For a discussion of this limitation see the Scope and Application section.)

The standard requires that the measurements be made by monitoring which is representative of each employee's exposure to inorganic arsenic over an eight hour period without regard to the use of respiratory protection. Exposure measurements for each individual employee would, of course, be an indication of that employee's exposure. However, this may be unnecessarily burdensome in some instances, as some industry participants have suggested. Monitoring which is truly representative of an employee's exposure would provide the necessary information and in many instances would involve fewer samples.

The employee exposure measurements are to be made without regard to the use of respiratory protection. In order to use the results of exposure monitoring to evaluate the effectiveness of the required engineering and work practice controls, to determine whether additional controls must be instituted, and to ascertain which, if any, respirator must be used, it is necessary to know employee exposure levels without the use of respiratory protection.

Exposure conditions vary throughout the day (Exhibit 29G). At least one sample is to be taken during each shift in order to ensure that exposure measurements represent exposures of employees on all shifts. Employees working in the same area doing different jobs may have different exposures. Therefore the standard requires sampling for each job classification as well. The samples are to be full-shift samples to give a more accurate indication of an employee's average exposure during a work shift than would sampling for less than a full shift. Short-term samples would tend to be affected by the variability or inorganic arsenic emissions associated with operations such as copper smelting. Full-shift samples tend to average out these variations. As time is needed to issue and retrieve samplers, full shift sampling is defined as sampling for at least seven working hours. The proposed standard did not expressly set forth these requirements for accurate monitoring. The standard has been clarified by requiring these procedures for the reasons stated above. All of those requirements are intended to ensure that the monitoring is truly representative of an employee's exposures.

Paragraphs (d)(1) and (d)(2) of the proposed standard allowed the employer to visually inspect each work place and work operation to accurately determine if any worker was exposed above the action level (Exhibit 2A, p. 3400). OSHA has reconsidered this provision. It is not possible by visual inspection to accurately determine worker exposure. Accurate initial determinations are crucial, particularly when dealing with a carcinogen. Accordingly, this provision has not been included in the standard and the employer must monitor and measure the employee's actual exposures.

The final standard requires remeasurement every 3 months for employees exposed above the TWA limit and every 6 months for those exposed between 5 and 10 $\mu g/m^3$. In addition a remeasurement is required where the initial measurement is below 5 $\mu g/m^3$ if there is a significant change in process or materials which could result in additional exposures.

The proposal required monthly measurements for employees exposed above the permissible exposure (TWA) limit and bimonthly for employees exposed between the action level and the TWA limit. Employers criticized these frequencies as being too burdensome in relation to the possible health benefits (Ex. 3A, Ex. 3B, Ex. 118).

There are substantial fluctuations in exposure conditions, hour to hour and day to day at smelters, the largest industry affected by this standard (Ex. 29A, Ex. 29G). The higher the measurement frequency, the higher the accuracy of the employee exposure profile. On the other hand, monthly or bimonthly monitoring of significant numbers of employees at some smelters would require major resources including trained personnel. Monitoring could not be generally concluded during a few days, but would necessarily be carried out over a longer period of time.

Therefore OSHA has lowered the monitoring frequency.

Any choice of a lower measurement frequency is judgmental. OSHA now believes that requiring measurements at 3 and 6 month intervals in the circumstances of the particular industries affected by this standard will reflect employee exposure with sufficient accuracy to assure that suitable precautions will be taken as needed.

The standard requires that in those instances in which measured exposure ranges between 5 and 10 $\mu g/m^3$, these measurements shall be repeated at least every 6 months. OSHA recognizes that the accuracy of monitoring and measurement will decrease as exposure decreases below 10 $\mu g/m^3$. Therefore, the standard requires an accuracy of plus or minus 35 percent rather than 25 percent for exposures between 5 and 10 $\mu g/m^3$. However, periodic measurement is appropriate when exposures are in the 5-10 $\mu g/m^3$ range because of the possibility that minor changes in process, materials, or weather may raise exposure to above the TWA limit and to compensate for the possibility that such measurements are falsely low.

Periodic monitoring and measurement are not required when initial measurements are below 5 $\mu g/m^3$. It is unlikely when exposures are at this level that minor fluctuations in process, materials, or weather or measurement accuracy would result in false negative readings below the TWA limit. It would not be appropriate to require periodic measurements in those operations where exposures would be well below the permissible exposure limit. If there is a significant change in materials or process in an area where exposure was under 5 $\mu g/m^3$, remeasurement would be required.

The standard requires that whenever there has been production, process, or control change which may result in new or additional exposures to inorganic arsenic, or whenever the employer has any other reason to suspect an increase in employee exposure, the employer shall repeat the required monitoring and measurements for those employees affected by such change or increase. A redetermination which was also included in the proposed standard, is required in order to ensure that the most recent monitoring accurately represents the existing exposure conditions. This is necessary so that the employer may take the appropriate actions such as instituting additional engineering controls and providing the appropriate respiratory protection.

Section 8(c)(3) of the Act (29 U.S.C. 657) requires employers to promptly notify an employee who is exposed in excess of the permissible exposure limit. The proposal required that the employee be notified in writing within 10 days of the sampling. OSHA agrees with the statements by some industry participants that 10 days would not allow sufficient time for sample analysis (Ex. 3D). This would be particularly true in such cases where many samples need be analyzed or where samples would be sent to other locations for analysis. Accordingly, the standard requires an employer to notify each employee in writing of that employee's measurement within five working days after the receipt of the results of any required measurements.

ASARCO (Ex. 111, Attach. 10; Ex. 1608) twice sent inorganic arsenic samples for analysis by outside laboratories. In contrast to the second trial, samples were not replicated and were not distributed on a double blind basis in the first trial. Therefore, the results of the first trial are not as significant as those of the second trial.

In the second trial, five laboratories randomly chosen from the 7 laboratories used in the study, were sent one blank, filter three filters containing

V 4 3 / 8 8

2.5 μg arsenic and three filters containing 6.0 μg of arsenic. The two remaining laboratories were sent one blank filter as well as one filter each containing the other two concentrations. The results of the second trial are found in Table III of "Results of Trace Arsenic Analyses Performed by Various Laboratories" (Attached to Ex. 160B).

The results indicated that 5 of the laboratories did not achieve an accuracy of plus or minus 25 percent for the arsenic samples analyzed. However, 2 of the laboratories (including the ASARCO laboratory, Laboratory B in the table) did achieve accuracies of plus or minus 10 percent.

The final standard requires that the method and measurement have an accuracy of plus or minus 25 percent (with a confidence level of 95 percent) for concentrations of inorganic arsenic greater than or equal to 10 μg/m³. It requires a method of sampling with an accuracy of plus or minus 35 percent for concentrations of inorganic arsenic between 5 and 10 μg/m³.

As noted previously, the standard requires full shift personal monitoring (minimum 7 hours) for the determination of employee exposure. Using personal monitoring pumps at a flow rate of 2 liters per minute, with a 7 hour sampling time, 8.4 μg of inorganic arsenic will be collected if the airborne concentration is 10 μg/m³. The equivalent sample at airborne concentrations of 5 μg/m³ will be 4.2 μg of inorganic arsenic.

The ASARCO tests indicate that accuracies of plus or minus 10 percent can be achieved by experienced laboratories with samples of between 2.5 and 6 μg of inorganic arsenic. Therefore the minimum amounts of arsenic which would be collected under the final standards requirement fall within the range which can be accurately analyzed by experienced and qualified personnel such as those at ASARCO's own laboratories. It is also sufficiently large so that sample contamination will not excessively affect the results.

It should be noted that the laboratory methods used by the two laboratories with best results were atomic absorption and colorimetric methods. These methods are relatively simple methods commonly in use by industrial hygiene laboratories. More sensitive methods are available, such as X-ray fluorescence and d.c. discharge emission methods (Ex. 145). These more sensitive methods can be used to analyze with improved accuracy much lower arsenic concentrations. However, these methods are somewhat more difficult and expensive for many laboratories to use and in the typical industrial setting the problem of sample contamination would exist at such lower levels.

ASARCO noted that possible contamination might significantly elevate results at the small sample size range of the proposed action level of 2 μg/m³. The potential effects of contamination have been reduced in the final standard due to the increased TWA limit and action level. The sample size collected at the 10 μg/m³ TWA limit will be 5 times greater than at the proposed 2 μg/m³ action level. Thus a similar level of contamination will only have one-fifth the effect. Similarly, an equivalent level of contamination at the 5 μg/m³ action level will have only 40 percent of the effect which would occur at a 2 μg/m³ level. Therefore a level of contamination of 0.5 μg suggested by ASARCO as a possibility will not be a major factor relative to the sample sizes resulting from monitoring at the permissible exposure limit and action levels in the final standard.

One question raised was whether particulate sampling methods could efficently collect arsenic released in the smelting environment. It has been suggested that arsenic trioxide has a significant vapor pressure and that it would not be efficiently collected at the elevated temperatures of copper smelting. An ASARCO study (Ex. 160B) indicates the efficient collection is possible at the temperatures of copper smelting. Using millipore personal monitor cassettes (0.8 micron pore size), backed up by midget impinger containing potassium permanganate or sodium hydroxide, ASARCO observed that the millipore filter had better than 95 percent collection efficiency of arsenic in the smelter (Ex. 160 B, Refs. 8, 9). As can be calculated from Table 1, Ex. 160B; capture efficiencies ranged from 98.5 percent to 99.6 percent for total arsenic particulate ranging from 45.6 to 224.8 μg/m³. The vapor and/or submicron particulate evading capture ranged from 0.26 to 0.62 μg/m³. Thus, assuming that the highest value (0.62 μg/m³) was eluding collection with an airborne concentration of 10 μg/m³, 93.8 percent collection efficiency would result.

F. METHODS OF COMPLIANCE: PARAGRAPH (g)

The final standard requires that engineering controls and work practices be used to control employee exposure to inorganic arsenic, except to the extent that the employer can show they are not feasible. If all feasible engineering and work practice controls do not succeed in reducing exposure below the permissible exposure limit, they must be supplemented by respiratory protection. This is changed from the proposal which required that all feasible engineering controls be instituted before reliance could be placed on work practices. However, OSHA's experience has been that engineering controls must be coupled with suitable work practices to maximize their effectiveness. Consequently, the final standard allows joint use of engineering and work practice controls. Respiratory protection may be used only during the time period necessary to install engineering controls, where engineering controls may be inappropriate such as during some maintenance operations or in those cases when both engineering controls and work practices do not succeed in reducing exposures below the permissible exposure limit.

This compliance strategy has been consistently OSHA's policy and has been followed in prior standards and proposed standards. This policy is based upon the view that the most effective means of controlling employee exposure is to contain emissions of toxic substances at their source through the use of mechanical means combined with work practices. This is far more effective than reliance on the highly variable human behavior so critical to the successful use of respirators. As discussed below, respirators have many disadvantages which preclude primary reliance or co-reliance of respiratory protection on an equal basis with engineering and work practice controls. Furthermore, the burden of reducing employee exposure should more properly rest on the employer in whose establishment toxic substances are released rather than placing the burden of respirator use on the exposed employee.

ASARCO appeared to propose an alternative compliance strategy (Ex. 29 p. —; Ex. 111-7, p. 19; Ex. 118). Biological monitoring would be used, using an assumed safe urinary arsenic level of 250 μg/liter as a trigger. In those instances in which the urinary arsenic levels were above 250 μg/liter, workers would be removed, and/or engineering controls or respiratory protection would be instituted. ADL (Ex. 111-7) suggested this would be a much less costly approach. However, ADL did not include the costs of engineering controls to reduce exposures in areas in which the urinary levels were consistently above the specified limit. Therefore the ADL cost estimate is only a fraction of the actual costs unless it was proposed that employees be constantly rotated from areas of lower exposure to those of higher exposure and conversely, to reduce high exposures.

OSHA does not believe this is an appropriate compliance strategy. As discussed in the monitoring section, there is a weak correlation between urinary arsenic levels and environmental arsenic levels and there are other difficulties with biological monitoring. The ASARCO proposed urinary arsenic level cannot be shown to be a safe level. Thus, employees exposed for more than 25 years in the lowest urinary arsenic exposure category (exposures under 200 μg/liter) did have excess respiratory cancer mortality (though it is true earlier exposures may have been higher). Further, as discussed in the occupational health implications section, there is a significant body of scientific opinion that it is not possible given present methodology to demonstrate a safe level for a carcinogen. The limited amount of evidence ASARCO has submitted is not sufficiently convincing to adopt their approach.

OSHA also does not believe in many circumstances it is an appropriate compliance strategy to rotate employees into and out of high exposure areas to reduce worker exposures to carcinogens. This approach would present the possibility of increasing the number of workers exposed to higher levels of a carcinogen. If ASARCO proposes to use engineering controls to reduce exposures, then the ADL cost figures are misleading as they just indicate monitoring costs. The actual cost of the ASARCO strategy will be much nearer the cost of the standard compliance strategy since a substantial amount of engineering controls would have to be installed.

The Council on Wage and Price Stability (Ex. 169) and some industry representatives (see Ex. 12 for example) suggested a control strategy involving principal reliance on respiratory protection, to reduce the cost of compliance. However, as will be discussed in a subsequent section, there are many difficulties with respiratory protection as testified by respirator expert Bruce Held (ATR 227-229) as well as some industry representatives (Ex. 29H). Because of the difficulties in face fit, it is difficult to know whether the respirators actually provide adequate protection. Respirators, by interfering with vision, hearing, and mobility, can cause safety problems. Some employees cannot wear respirators because of breathing difficulties. Finally, it is not appropriate to place the burden of compliance principally on the employee, as would be the case if respiratory protection were the principal means of reducing employee exposure. Therefore, OSHA retains in the standard the policy of principal reliance on engineering controls and work practices, except in circumstances where there appears to be no feasible alternative to more substantial reliance on respiratory protection.

Even in situations in which engineering controls will not succeed in reducing exposure levels below the TWA limit, it is still appropriate to require all feasible engineering controls to be installed, even though they would have to be supplemented by the use of respiratory protection. The engineering controls, by minimizing the exposure, without regard to the use of respirators, will have minimized the potential for over exposure resulting from poorly fitting respirators and will usually reduce the number of employees who need to wear respirators.

The final standard clarifies the language in the proposal by clearly placing the burden on the employer, for proving or disproving feasibility. The employer is in the best position to gather evidence on feasibility in a particular workplace. He is most familiar with his own production processes and engineering modifications which can be made. Further it is the policy of the OSHA Act that employers be required to take steps to investigate the feasibility of controls and install them as necessary.

(G) RESPIRATORY PROTECTION: PARAGRAPH (h)

The standard requires that respirators be used only during the time period necessary to install or implement feasible engineering and work practice controls, in operations where engineering controls are not appropriate such as some maintenance operations, in work operations in which such controls are not feasible or are not yet sufficient to reduce exposure to the permissible limit, or in emergencies. These restrictions on the use of respirators are consistent with the requirements of 29 CFR 1910.1000(e) and with good industrial hygiene practice.

Many comments (Exhibit 11, 19, 29G, 29H, 117, 118, 119) cited problems associated with respirators. Respirators are to be considered secondary to the objective of limiting emissions at the source (ATR 229). Proper facial fit is essential, but due to variations in individual facial dimensions, as well as facial hair, scars or growths, is difficult to maintain. Fatigue and reduced efficiency may occur more rapidly among workers wearing respirators due to increased breathing resistance, heat stress and reduced vision (ATR 228). Safety problems presented by respirators must be considered. Respirators can limit vision (ATR 228). This can be significant, in smelters, for example where physical hazards exist and the employee's ability to see is important (ATR 246, Ex. 29G). Speech is also limited. Voice transmission through a respirator can be difficult, annoying and fatiguing. Communication may make the difference between a safe efficient operation and a hazardous operation, especially in dangerous jobs. (ATR 245, Ex. 29G, p. 13). Entanglement of hoses of air respirators as well as limited mobility due to hose lengths (ATR 242) are problems in heavy industrial environments. Self-contained breathing apparatus have the problem of carrying around a heavy weight (ATR 242.)

It is clear that respirators cannot generally be considered as the primary means of employee health protection. OSHA has carefully considered all these problems and has nonetheless concluded that if the permissible exposure limit is exceeded then employees must use the respirators provided. Where engineering controls and work practices do not succeed in reducing exposure below the permissible exposure limit, it becomes necessary to utilize respirators to give sufficient health protection to employees.

In situations where a significant number of employees will be wearing respirators for more than a short period of time, the employer is required to institute a more elaborate respiratory protection program to maximize the effectiveness and minimize the discomfort of extended respirator use. Items to be considered for inclusion in such a program are making available a greater variety of respirators for employee use, having a technician fully trained in respirator use and selection, and organizing the work so that part of the day can be spent in clean rooms or areas where the TWA limit is not exceeded. The employer should also plan to provide respirators with microphones or other communication equipment where needed.

Respiratory protection also has a role during maintenance operations as well as during emergency situations. However the goal of the standard is the control of emissions at the source to minimize the need for respirators.

Since it is apparent that respirators may be necessary, an evaluation of respirators for inorganic arsenic use is necessary. The standard contains two respirator selection tables (Tables I and II) so the employer will provide the respirators which afford the proper degree of protection based on the airborne concentration of inorganic arsenic. These tables are principally based on the NIOSH recommendation made during the September 1976 hearings (Ex. 146B) and OSHA's experience in this and other rulemakings. However, a significant change has been made from the NIOSH recommendations. This principally involves permitting the use of air purifying respirators with half mask and high efficiency filter for protection against nonvolatile arsenicals including arsenic trioxide.

During the September 1976 hearings, NIOSH (Ex. 146A, 146B, STR 67) recommended that only chemical cartridge and gas mask respirators be used where workers are exposed to inorganic arsenic compounds based on theoretical considerations that some arsenic compounds may have high vapor pressures. Questions have been raised whether arsenic trioxide has significant vapor pressure at ambient

M Y 5 7 8

temperatures (Ex. 129) and at elevated temperatures (Ex. 146, 157).

To see whether arsenic vapor might be eluding capture by high efficiency filters ASARCO conducted a respirator experiment (Ex. 160B No. 2). Respirator testing was performed by suspending the respirators from a metal bar supported by two ring stands. None of the test equipment was worn by a worker. To simulate a good fit against a worker's face, each respirator backing was covered with at least four thicknesses of plastic wrap. Two sampling trains were used. One employed a probe located inside the sealed respirator followed by a preweighed millipore filter. The millipore filter was backed up by impingers containing potassium permanganate or sodium hydroxide. A personal monitor (10 to 20 liters per minute flow rate) was used as the suction source. The second sampling train consisted of a probe, millipore filter, giant Greenburg-Smith impinger, dry gas meter and pump (10–20 liters per minute flow rate). Efficiencies of the high efficiency filters averaged better than 99 percent for protection against arsenic (Ex. 160B, No., 8, 9). Table 1 (Ex. 160B) contains the summary of ASARCO's results. It is noteworthy that the highest vapor and or sub/micron concentration was 0.66 $\mu g/m^3$ both inside and outside the respirator indicating that any vapor problem is minimal in comparison to the permissible exposure limit. Thus, air purifying respirators with high efficiency filters will be allowed in the final standard except for inorganic arsenic compounds with demonstrated significant vapor pressure.

Arsenic trioxide as well as some other arsenicals, are skin irritants and can cause skin irritation where the facepiece of the respirators comes in contact with the worker's face. Because they found no documented study indicating a threshold for eye irritation and because they judged there was an increased potential for skin irritation using half-masks, NIOSH recommended that full facepiece respirators be the minimal protection against particulate arsenic (STR 77–8). The record does not support these points. ASARCO has noted that complaints of eye irritation have been relatively few, mostly having arisen from gross accidental exposure to dust or to impaction of large particles on the eye (Ex. 164). Safety glasses which are now worn by smelter workers, have been noted to protect such smelter workers, except in rare occasions (Ex. 164). Finally, the use of a full facepiece would result in more skin contact with the rubber or plastic of the facepiece resulting in more discomfort and sweating. The increased contact and increased sweating has resulted in more skin irritation from arsenic trioxide dust. (Ex. 164). For the above reasons, OSHA will continue to allow the use of half-facepieces for protection against inorganic arsenic particulate.

In those situations where arsenic compounds do have high vapor pressures, the NIOSH recommendations for such a situation are followed. Table II of the standard specifies the respirators which must be worn to prevent excess exposure to arsenicals with high vapor pressures. Two chemicals which do have significant vapor pressure are arsenic trichloride and arsenic phosphide.

During the April 1975 hearing, Bruce Held (ATR 231–236) recommended changes to the proposed respirator selection table in paragraph (g)(2) of the proposal (Ex. 2A). Mr. Held stated that "constant flow" should be deleted from (g)(2)(i)(B), "pressure demand" changed to "demand" (g)(2)(iv)(A) and (g)(2)(v)(B) to "demand". We have adopted these recommendations using more recent terminology. The protection factors used in the table reflect the factors found in the August 2, 1976 joint OSHA/NIOSH Standard Completion Program Respirator Decision Logic (Ex. 146C).

There are numerous factors which affect the performance of air purifying respirators. These include the filter material and the fit of the facepiece on the wearer. Also important is wearer acceptance and training.

Proper fit of the respirator is critical. As a negative pressure is created within the facepiece when the wearer breathes, unfiltered air may enter the facepiece if gaps exist. Obtaining a proper fit on each employee may require the employer to provide two or three different mask styles.

The employee must be properly trained to wear the respirator, to know why the respirator is needed and to understand the limitations of the respirator. An understanding of the hazard involved is necessary to enable the employee to take steps for his or her own protection. The respiratory protection program implemented by the employer must conform to the program set forth in 29 CFR 1910.134. This contains basic requirements for proper selection, use, cleaning, and maintenance of respirators.

The employer must check to see that the employees' respirators fit properly and that leakage is at a minimum. A rapid simple fit test can be performed at the start of each shift by each employee wearing a negative pressure respirator. This test can be either a positive pressure test, in which the exhalation valve is closed and in which the wearer exhales into the facepiece to produce a positive pressure, or a negative pressure test, in which the inlet is closed and the wearer inhales so that the facepiece collapses slightly. Employees should be trained to perform this test.

The standard requires a qualitative fit test at the time of initial fitting and semiannually thereafter. If the particulate filters can be replaced with chemical cartridges, isoamyl acetate can be used to qualitatively test facepiece fit. If the employee can smell the isoamyl acetate while wearing the respirator it can be concluded that the particular respirator will not provide suitable protection.

The standard requires that employers with more than 20 employees wearing respirators provide a quantitative fit test at the time of initial fitting and semiannually thereafter. In a quantitative fit test the level of leakage and degree of protection is specifically measured by instrumentation. These tests are more accurate and provide greater assurance that the respirator is providing proper protection. One type of quantitative fit test involves using a simple hood, sodium chloride vapor, and automated instrumentation. At least one such device is commercially available at less than $10,000. These tests can be performed rapidly (10 to 20 minutes) and are relatively easy to perform. This requirement is limited to employers with more than 20 workers wearing respirators. At present, organizations are not available to provide these testing services. Therefore the requirement is limited to employers with greatest need for testing and for whom it is reasonable to acquire the equipment. However, OSHA recommends that all employers who have access to quantitative fit testing make use of such facilities for employees who regularly wear respirators. There was no specific requirement for quantitative fit tests in the proposal. But subsequent developments of equipment to make them relatively easy to carry out and the greater assurance of proper protection they provide, make it appropriate that they be required for employers with significant numbers of employees on respirators.

The standard makes the wearing of respirators voluntary, at the option of the employee until December 31, 1979 except when employees are exposed in excess of 50 $\mu g/m^3$. While exposures in excess of the permissible exposure limit do constitute a hazard, OSHA believes that it is necessary to mitigate some of the problems associated with respirator use and to permit time for educating and training employees in the need for and use of respirators. During the voluntary period, control measures, such as installation of engineering controls and improved work practices can be implemented. These controls will result in an improved work environment which will substantially reduce the number of employees required to wear respirators. The voluntary nature of respirator use prior to December 31, 1979 does not reduce the employer's obligation to train employees in the proper use of the respirators and to make the appropriate respirators available. Indeed, since the employee is being granted a greater responsibility for his or her own protection, special attention must be given to the training program so the employee can make an informed choice.

The proposal required immediate use of respirators whenever employees were exposed in excess of the TWA limit. This would have essentially required the wearing of respirators by a large number of workers in some facilities on the effective date of the standard. The transition period provided by the final standard will alleviate this burden and permit more time for training and implementation of a respirator program. The employer is required to provide respirators for employees exposed between 10 and 50 $\mu g/m^3$ as soon as possible but with an outside limit of December 1, 1978 to allow time which may be needed to purchase and receive a sufficient number of respirators. There are fewer employees exposed between 50 $\mu g/m^3$ and 500 $\mu g/m^3$ and those employees face more severe risks. Therefore respirators must be supplied as soon as possible and no later than October 1, 1978 for those employees. Respiratory use is now required for employees exposed over 500 $\mu g/m^3$ and therefore respirators continue to be required from the effective date of this standard.

The standard requires that employees wearing air-purifying respirators be permitted to replace the respirator's filter whenever they detect a significant increase in breathing resistance. When the filter becomes loaded, the movement of air through the filter becomes restricted forcing the employee to breathe harder to overcome this resistance. The wearing of the respirator becomes increasingly more uncomfortable and it may not be used as a result. To aid in the minimizing of the discomfort of wearing a respirator and to keep the respirator working efficiently the employee must be allowed to change filters when the need arises.

The wearing of a respirator in an arsenical atmosphere can result in skin irritation as the dust may accumulate around the facepiece seal. To prevent this irritation and to minimize the discomfort of respirator use, employees must be allowed to periodically wash their faces and respirator facepieces in order to remove the accumulation of inorganic arsenic.

It will be necessary for some production employees in some smelters to wear respirators for a substantial percentage of the day for a number of years. Subsequent to the arsenic proposal and hearings, NIOSH has certified a lightweight Powered Air Purifying Respirator (PAPR). In addition, other types are under development. It is OSHA's experience that in many circumstances, PAPR's are more comfortable to wear and provide better protection. They are light, under positive pressure and do not require a tight facial fit thereby minimizing irritation and breathing resistance. Except in cold weather, the air stream provided makes them more comfortable. They have a higher protection factor than negative pressure respirators since face fit is not a crucial factor. While they are more expensive, they interfere with work far less than negative pressure respirators. Therefore, OSHA believes it appropriate that employees have the option of wearing PAPR's. Consequently, the standard gives the employee the option of wearing PAPR's in appropriate circumstances after December 1, 1978. The employer must also supply a combination dust filter with a gas sorbent where there will be exposure to gases (such as sulfur dioxide) over the relevant limit for that gas some of the time. This will be the case some of the time in smelters. If over-exposures to gases are relatively continuous, PAPR's would not provide suitable protection.

H. PROTECTIVE CLOTHING AND EQUIPMENT PARAGRAPH (j)

The standard requires the employer to provide and assure that employees use protective clothing and equipment where the employee is exposed above the permissible exposure limits to prevent contamination of street clothing, to prevent skin and eye irritation and to prevent skin absorption of arsenic trichloride. The employer is responsible for cleaning and replacing the clothing as necessary. Specifically, the employer is to provide coveralls or other full body clothing, gloves, and shoes. The employer must also provide eye protection and other equipment, when necessary to prevent skin or eye irritation.

The final standard makes a number of changes from the proposal to respond to the comments, to clarify the language and to utilize the experience developed in the Coke Oven Emissions proceeding. The clothing is to be supplied to employees exposed above the 10 $\mu g/m^3$ level. It is necessary that protective clothing and shoes be required to prevent contamination of the employees' street clothing and shoes, so that exposure is not extended beyond the work day. At exposures lower than the PEL, it is less likely that clothing will become significantly contaminated with inorganic arsenic.

Impervious protective clothing is required for those workers working with arsenic trichloride, because it can be *rapidly* absorbed through the skin.

The proposal required the employer provide and clean daily protective clothing. The final standard reduces the frequency to weekly, except where there is a significant probability of skin irritation because of exposures above 100 $\mu g/m^3$ such as in some locations in the ASARCO, Tacoma arsenic plant. The original requirement was designed to reduce skin irritation. However, at levels approaching 10 $\mu g/m^3$, skin irritation is unlikely. Accordingly, the cleaning requirement is changed to weekly to reduce the burden on the employer. At levels where skin irritation is likely, or at lower levels where skin irritation is occurring, the daily cleaning requirement is retained.

The final standard clarifies that the obligation is on the employer to provide protective equipment at no cost to the employee. In this way the employer is in the best position to provide the correct type of equipment and keep it in repair. Also, as the employer has permitted exposures to exceed the permissible exposure limits the obligation properly rests on the employer. The cost of necessary equipment has been included in the various economic analyses performed.

The standard provides that the employer ensure that all protective clothing is removed at the end of each work shift only in change rooms, and that the clothing that is to be laundered, cleaned, or disposed of be placed in a closable container in the change room. The purpose in requiring such a container is to prevent the contaminants on the clothing from coming into contact with an individual handling the container or being released in the change room. Since the container is to be located in the change room, it is appropriate to limit the removal of contaminated clothing to that area.

Finally, the standard requires the employer to inform those who handle the contaminated articles of the potentially harmful effects of exposure to inorganic arsenic. This provision is designed to make clear the need to use proper care in handling of the contaminated articles.

I. HYGIENE FACILITIES AND PRACTICES: PARAGRAPH (m)

The standard requires that the employer provide clean and suitable change room facilities, lavatories, showers, and lunchrooms for those employees working in regulated areas. One purpose of these requirements is to prevent exposure beyond the work day to the employee. Another purpose is to reduce the likelihood of skin irritation resulting from skin contact with inorganic arsenic. Both of these reasons have been discussed in more detail in the previous section on Protective Clothing and Equipment. A third purpose is to prevent the ingestion of inorganic arsenic.

V 4 3 / 8 8

Certain trivalent arsenicals (arsenic trioxide, sodium arsenite, potassium arsenite, copper acetoarsenite) have been implicated as systemic carcinogens. Some case reports based on long-term administration of medicinals containing potassium and sodium arsenite (Exhibits 180 and 101) and occupational exposure to sodium arsenite and copper acetoarsenite (Paris Green) (see sec. IV C of this preamble) have implicated ingestion of these chemicals as carcinogens. A high incidence of skin cancer has been reported in several populations exposed to high concentrations of arsenic in drinking water (Exhibit 180 pp. 299-301, Exhibit 58). In addition, OSHA believes as a general matter that efforts must be taken to minimize exposure to carcinogens by all exposure routes including ingestion.

The proposal did not include a requirement for lunchrooms with filtered air though it did prohibit eating in regulated areas. Union representatives recommended that such lunchrooms be provided (Exhibits 22, 30, 121). The suggestion has been adopted because such facilities are needed to provide a suitable place, relatively free from contamination to inorganic arsenic, for workers working in regulated areas to eat. In addition, suitable lunchroom facilities will provide an inducement for employees not to eat in regulated areas. As the risk of ingestion is highest in lunchrooms, somewhat more elaborate regulations for their design are included. Since the risk of ingestion is less below 10 $\mu g/m^3$, the standard requires those facilities only for employees exposed above that level rather than at the 2 $\mu g/m^3$ level of the proposal. This change will also reduce the burden on the employer.

Eye wash requirements contained in the proposal have been deleted. There appear to be few locations or arsenicals for which such facilities might be needed to prevent serious eye injury.

The standard requires employers to prevent employee skin or eye contact with liquid or particulate inorganic arsenic which is likely to cause skin or eye irritation. As discussed in the health effects section, some arsenicals cause skin irritation, and keratosis was a condition observed among workers exposed to substantial amounts of arsenic. These keratoses also seem to be related to various forms of cancer which subsequently developed.

Reducing the airborne exposure below the permissible exposure limit should eliminate skin irritation from exposure to arsenic. In areas where exposures are somewhat over the permissible exposure limit, supplying and using appropriate clean protective clothing and gloves as required by the standard should prevent skin irritation. In areas of higher exposure, such as arsenic kitchens, in addition to respirator use, suitable precautions need to be taken to avoid significant skin contact.

Arsenic trichloride is rapidly absorbed through the skin and creates a serious acute toxicity hazard. In consequence all skin and eye contact is prohibited. Where feasible arsenic trichloride should only be utilized in closed systems with suitable backup controls in case of system breakdowns. Where such a system is not feasible, the employer is required to provide impervious protective clothing and suitable respirators.

J. MEDICAL SURVEILLANCE: PARAGRAPH (N)

The standard requires each employer to institute a medical surveillance program for all employees who are exposed above the action level for at least 30 days per year and for employees who have been exposed to levels above the action level for more than 10 years who are no longer exposed above the action level. The record, including recommendations from NIOSH in its updated Criteria Document (Exhibit 99), clearly indicates that a medical surveillance program is appropriate in dealing with the problem of employee exposure to inorganic arsenic. Section 6(b)(7) of the Act provides that:

> • • • where appropriate, any such standard promulgated under subsection 6(b) shall prescribe the type and frequency of medical examinations or other tests which shall be made available, by the employer or at his cost, to employees exposed to such employment related hazards in order to most effectively determine whether the health of such employees is adversely affected by such exposure.

The proposed standard (Exhibit 2a, p. 3400), provided that medical examinations should be given to all employees exposed above the action level. The final standard also requires medical surveillance for all employees exposed above the action level (5 $\mu g/m^3$). Although the level of exposure which triggers medical surveillance has changed, the rationale remains the same.

Some employees may be assigned to work areas where they may be exposed to inorganic arsenic above the action level on a temporary or short term basis, e.g. during vaction periods or certain types of repair work. Therefore a cut-off point for the required medical surveillance program is needed since it would not be appropriate to provide medical surveillance for every employee regardless of duration of exposure. It is important that the time period selected be sufficiently inclusive without being administratively impracticable. The arsenic record did not specifically address this point. Consistent with OSHA's experience gained in the coke oven emissions proceedings where the matter was considered at length, OSHA has determined that 30 days is an appropriate cut-off point for inclusion in medical examinations.

The final standard includes a requirement that all employees who may have been exposed above the action level for 10 or more years must be provided with medical examinations although they are no longer exposed above the action level. The language in the proposal was unclear on this point. Medical examinations are mandated for this group because they represent a potentially higher risk group. Arsenic exposures have been reduced since the 1950's in most smelters and chemical manufacturers.

Long-term employees who have exposures now or in the near future below the action level, but have had exposure above the action level now or in the recent past, are quite likely to have had substantially greater exposures in the more distant past. Dr. Brooks testified on this point (STR 45-52) and the epidemiological studies indicate that risk increases with both *degree* and *duration* of exposure.

The medical examination required is principally based on the known utility of x-ray and sputum cytology as screening tests for respiratory cancer.

Two portions of the proposed medical surveillance protocol have been deleted. These are palpation of superficial lymph nodes and, a complete blood count. As noted previously, lymphatic and hematopoietic cancer excesses have only been observed in worker populations in the Ott and Baetjer studies (in which workers were exposed to sodium arsenite, potassium arsenite, and copper acetoarsenite). As OSHA is not aware of groups of workers in this category at the present time, it is not appropriate to require these tests generally. These tests may be given at the discretion of the examining physician and would be advisable if an employee has been exposed to those chemicals.

Neither the proposal nor the final standard requires that urinary arsenic determinations be a mandatory part of the medical surveillance protocal. The correlation of urinary arsenic levels and airborne arsenic exposure is fairly weak (r=0.528). Urinary arsenic levels vary considerably from individual to individual and time to time. Accordingly, we feel that the use of urinary arsenic determination to supplement monitoring of airborne levels of arsenic should be left to the discretion of the individual company or physician.

All examinations and procedures are required to be performed by or under the supervision of a licensed physician and provided without cost to the employee. Clearly, a licensed physician is the appropriate person to be supervising and evaluating a medical examination. However, certain parts of the required exam do not necessarily require the physician's expertise and may be conducted by another person under the supervision of the physician.

The proposed standard included a requirement that all medical examinations be given during the employees' normal working hours. The final standard does not include the requirement because it may be impractical for shift workers or less convenient for employee or employer. However the employer is obligated to pay for the time spent taking the medical examination if it is taken outside normal working hours and the exam must be given at a reasonable time and place. It is necessary that exams be convenient and without loss to the employee to assure that they are taken.

The standard provides that a work history, medical history and medical examination be performed at the time of initial assignment to areas where exposure exceeds the action level or by December 1, 1978, for employees exposed above the action level at the effective date of the standard. The purposes of this requirement are to make an initial assessment of the health of each employee and to establish a baseline health condition against which changes in an employee's health may be compared. The proposed standard (Exhibit 2a, 40 FR 3401), and Criteria Document (Exhibit 99, p. I-2) all contained requirements for an initial or preplacement exam. The history has been expanded slightly from the proposal to include information on smoking because of its relevance to increased respiratory cancer risk.

The various tests that comprise the medical exam are designed to be used in an initial assessment of an employee's health and to detect changes in health which may occur. The value of each of the specified examinations is described below.

A 14 in. by 17 in. X-ray is a screening test of proven value in the detection of lung cancer. The International Labour Office UICC/Cincinnati (ILO U/C) rating is useful in obtaining uniform quality in the reading of X-rays.

Sputum cytology is required in certain circumstances by the final standard though it was only recommended in the proposal. (See Appendix C to the proposal). The proposal did not mandate sputum cytology on the basis that it should be optional depending on the opinion of the examining physician. Subsequent information received during the coke ovens proceeding indicated that sputum cytology would be of value. The issue was raised more fully in the FEDERAL REGISTER notice of July 16, 1976 (41 FR 29425) which specifically requested comments on this issue and included it as one issue to be considered in the September 1976 hearing.

Comments received from Dr. Dahlgren (Exhibit 137-12) and Health Research Group (Exhibit 137-8), and testimony by Dr. Brooks, a noted expert in the field (STR 45-52), as well as by NIOSH (Exhibit 146) were in favor of requiring sputum cytology. Comments from the Motor Vehicle Manufacturers' Association (Exhibit 137-9) and Dr. Clark Cooper (Exhibit 137-7) were opposed. Anaconda submitted preliminary results of a study of sputum cytology among its workers (Exhibit 165B Appendix E, STR 600-601) which cast doubt on its usefulness. ASARCO recommended that sputum cytology be included on a trial basis (Exhibit 111-3).

Based on the information received, OSHA believes it appropriate to include sputum cytology in the medical surveillance protocol. With the development of the fiberoptic bronchoscope, sputum cytology has become an effective tool for early detection of respiratory cancer among a higher risk population such as workers exposed to inorganic arsenic. (Exhibit 140, 141A). Used in conjunction with X-rays, OSHA is hopeful that such early detection will result in prolonged life for those discovered to have respiratory cancer. X-rays and sputum cytology appear to be complementary, one being more a powerful tool for detection in the peripheral airways while the other is for the central airways. (Exhibit 140, 141A, STR 45-52).

A nasal examination is required because employees with significant exposures to inorganic arsenic are subject to perforation of the nasal septum. A skin examination is also required. Such an examination will detect gross overexposures to arsenic. Such exposure is rare now. However, the examination can be quickly and simply performed and therefore has been included.

The standard provides for semiannual examinations for employees exposed over the action level who are 45 years of age or older, and for employees who have been exposed for 10 or more years above 5 $\mu g/m^3$. All other employees working in regulated areas are to be provided with medical examinations on an annual basis and their examination need not include sputum cytology except for the initial examination. ASARCO recommended a less frequent examination. The frequency in the final standard is consistent with the proposal, Dr. Brook's testimony (ATR 45-52) and OSHA's experience during the coke oven emissions proceeding. The more frequent and more extensive examinations are specified for the higher risk population as discussed above.

Employers are required to make a medical examination available to an employee who has not had one within six months of termination of employment. This was not included in the proposal. It is believed necessary to inform the employee to the extent possible if the condition of his health has been affected during the period of employment.

The employer is required to provide the physician with certain information. The employer is also required to obtain a written opinion from the examining physician containing: the physician's opinion as to whether the employee has any detected medical conditions which would place the employee at increased risk of material impairment of health from exposure to inorganic arsenic; the results of the medical examination; any recommended limitations upon the employee's exposure to inorganic arsenic and upon the use of protective clothing and equipment such as respirators; and a statement that the employee has been informed by the physician of any medical conditions which require further examination or treatment. This written opinion must not reveal specific findings or diagnoses unrelated to occupational exposure, and a copy of the opinion must be provided to the affected employee.

The purpose in requiring the examining physician to supply the employer with a written opinion containing the above mentioned analyses is to provide the employer with a medical basis to aid in the determination of initial placement and ability to use protective clothing and equipment of employees. Requiring that opinion be in written form will serve as an objective check that employers have actually had the benefit of this information in making these determinations. Likewise, the requirement that the employee be provided with a copy of the physician's written opinion will insure that the employee is informed of the results of the medical exam and may take any appropriate action. The purpose in requiring that specific findings or diagnoses unrelated to occupational exposure not be included in the written opinion is to encourage employees to submit to medical examination by removing the fear that employers may find out information about their physical condition that has no relation to occupational exposures.

The proposal included a provision that the physician state whether exposure to inorganic arsenic would directly or indirectly aggravate any medical condition. This provision has been deleted from the standard for two reasons: It is vague, in that it is unclear what "aggravate" means. Secondly, it adds nothing to the requirement to determine whether an employee has any detected medical conditions which place the employee at increased risk of material impairment of health from exposure to inorganic arsenic.

The proposed standard included a provision prohibiting the exposure of

MAY 5 1978

V 4 3 / 8 8

an employee to inorganic arsenic if the employee would be placed at increased risk of material impairment to his or her health from such exposure (Exhibit 2A, 40 FR 3402). The proposal did not include any provision requiring the transfer of that employee to another job, or requiring that the employee be guaranteed his earlier rate of pay.

In this proceeding, representatives of unions indicated their great concern regarding any requirement for the mandatory removal of employees because of increased risk, in the absence of a medical removal protection or rate retention, right for employees so removed (Exhibit 22, 103). The major argument presented was that in the absence of a medical removal protection provision, such a requirement would constitute a major disincentive to employees to submit to physical examinations because they would fear that an adverse medical opinion could result in loss of employment. As a result, the purpose of the medical surveillance requirements would be undetermined and early detection of illness would, too often, not occur. It was also suggested that the absence of a medical removal protection provision creates a dilemma antithetical to the purposes of the Act—namely, the employee's need to choose between continuing to work but risking his life by continuing to do so, and protecting his health, but losing his job.

The Agency agrees that the approach taken in the proposed standard confronts the employee with a difficult choice and we are sympathetic to the concerns reflected in the unions' position on this issue. However, we believe that the present record does not contain sufficient evidence on the propriety, scope and implications of mandatory transfer and rate retention requirement so as to constitute an adequate basis for the incorporation of such a provision in the standard.

While we are not providing for medical removal protection in the standard, we are convinced that further exploration of this issue is necessary in order to deal in considerably more depth with the numerous issues raised by such a provision. OSHA has held a hearing specifically in regard to medical removal protection for employees exposed to lead. OSHA is now considering the record developed in that hearing. Based on the experience gained in that proceeding OSHA will consider whether medical removal protection should be proposed for employees exposed to other substances.

In the meantime, OSHA has decided to delete the mandatory removal provision. In our view, the issue of mandatory removal is closely related to the issue of rate retention and neither should be addressed in the present standard. The Agency's further study of rate retention will also involve consideration of the mandatory removal question.

(K) EMPLOYEE INFORMATION AND TRAINING: PARAGRAPH (O)

The final standard requires the employer to provide a training program for employees exposed above the action level or for whom there is a possibility of skin or eye irritation from contact with inorganic arsenic.

The need to train employees was agreed upon by virtually all of the participants in the rulemaking proceeding, and a training requirement was included in the Criteria Document (Ex. 99, p. 7) and the proposed standard.

The proposal required training in all locations where any inorganic arsenic was released or handled. However, inorganic arsenic is naturally present at very low levels in some substances where there is little possibility of its release. The benefit in requiring training in these circumstances did not seem significant and the scope of the training provision has been narrowed accordingly.

The training program is required to be completed by October 1, 1978, for employees initially covered by the standard and at the time of initial assignment to areas where there is possibility of exposure over the action level or skin irritation otherwise. OSHA believes that it is important to train employees as soon as possible, consistent with developing suitable materials, in order to maximize the benefits of the training program, and has acted accordingly.

The standard requires that the training program be provided at least annually except that it must be provided quarterly for those employees who have optional use of respirators until December 31, 1979. OSHA believes that an annual training program is both necessary and sufficient to remind the employee of the hazard. Quarterly training is required for employees who have optional use of respirators so that those employees will be in a position to make informed choices regarding the use of respiratory protection.

The content of the training program is intended to apprise the employees of (1) the hazards to which they are exposed; (2) the necessary steps to protect themselves, including minimizing exposure, respiratory protection and medical surveillance; (3) their role in reducing emissions; and (4) their rights under this standard.

The employer is required to make a copy of the standard and its appendixes available to affected employees. This requirement, in combination with the review provided for as part of the training program, is intended to ensure that employees understand their rights and duties under this standard.

The employer is also required to provide, upon request, all materials relating to the training program to the Assistant Secretary and the Director. This is intended to provide an objective check of compliance with the content requirements of the standard. It should be noted that the recordkeeping requirement regarding the training program which had been included in the proposal has not been retained in the standard to reduce the recordkeeping burden. This places greater reliance on access to training materials as a check to ensure that employees are being properly trained.

L. SIGNS AND LABELS: PARAGRAPH (P)

The final standard requires that regulated areas be sign posted stating: "Danger, Inorganic Arsenic Present, Cancer Hazard, Authorized Personnel Only, No Smoking or Eating, Respirator Required". It also requires labeling of containers of inorganic arsenicals, except when the arsenic is bound in such a manner as to make unlikely the possibility of exposure to inorganic arsenic. The labels must state, "Caution, Contains Inorganic Arsenic, Cancer Hazard, Harmful if Inhaled or Swallowed, Use only with Adequate Ventilation or Respiratory Protection".

It is important, and section 6(b)(7) of the Act requires, that appropriate forms of warning, as necessary, be used to apprise employees of the hazards to which they are exposed in the course of their employment. OSHA believes, as a matter of policy, that employees should be given the opportunity to make informed decisions on whether to work at a job under particular working conditions. Furthermore, when the control of potential safety and health problems involves the cooperation of employees, the success of such a program is highly dependent upon the worker's understanding of the hazards attendant to that job.

In light of the serious nature of the hazard of exposure to inorganic arsenic, OSHA believes that sign posting is needed as well as periodic training to adequately inform employees of the cancer hazard. The appearance of the phrase "Cancer Hazard" on the warning sign will serve as an objective check on whether employees are actually being informed of this hazard. It is a reasonable precaution to discourage unnecessary entry of occasional visitors to regulated areas. Also, the warning signs will inform all employees entering regulated areas of the need to utilize respirators and other protective equipment which the employer is to provide.

A number of comments were made that such signs would cause unnecessary alarm (Exs. 3E, 3T, 27). Given the evidence of the carcinogenicity of inorganic arsenic, a strong warning is necessary and the word "Hazard" has in

M Y 5 7 8 M

consequence been substituted for the ambiguous term, "Suspect Agent." Additionally, the phrases "Authorized Personnel Only" and "No Smoking or Eating" and "Respirator Required" relate directly to requirements in the standard which limit access and activities within regulated areas. (See discussions of Regulated Area and of Hygiene Facilities and Practices.)

All shipping and storage containers of inorganic arsenic compounds and products containing it are required to be labeled with a warning of the cancer hazard and the precautions to be taken. This is so employees handling the materials will treat them with care and take suitable precautions to avoid inhalation. It is necessary to warn employees to take precautions in case of spills or broken containers.

The proposal did not include any exception to this provision. Comments were received stating that the inorganic arsenic present in certain products was bound in such a manner as to make unlikely the possibility of exposure to inorganic arsenic. An example of this is the light emitting diode (Exhibit 137-4). In such circumstances, a warning label is inappropriate because the hazard does not exist. Therefore, the final standard excludes from the labeling requirements, those containers or products in which arsenic is bound in such a manner to make unlikely airborne exposure.

Exposures are not unlikely if dropping, breaking or ordinarily negligent handling will likely result in overexposure.

M. RECORDKEEPING: PARAGRAPH (Q)

Section 8(c)(3) of the Act (29 U.S.C. 657) mandates the inclusion of provisions requiring employers to maintain accurate monitoring records of employee exposures to potentially toxic materials. It also provides that employees or their representatives have access to such records.

The final standard requires records of exposures measurements. The records required include name and job classification of employees measured, details of the sampling and analytic techniques, results, and type of respiratory protection worn. The standard also requires records of medical surveillance. These include names of employees, the physician's written opinion, and copy of the results of the examination. In addition, the initial x-ray and cytology slide, the most recent 5 years of x-rays and 10 years of sputum cytology slides, and all x-ray and cytology slides indicating atypia, or subsequent to atypia must be retained. These records must be kept for 40 years or for at least 20 years after termination of employment, whichever is longer.

The participants at the hearing generally agreed with the necessity for keeping such records, but objected to the length of the record retention period. It is necessary to keep these records for such extended periods of time because of the long latency periods commonly observed for carcinogens. Cancer is often not detected until 20 or more years after onset of exposure. The extended retention period is therefore needed for two purposes. Diagnosis of disease in employees is assisted by having exposure data as well as the results of the medical exams even many years in the past. The original x-ray and cytology slide and those in the recent past are required to provide a baseline as well as a guide to the progression of symptoms. It is necessary to retain monitoring and medical surveillance data for the same period because the data has to be considered together. The second purpose for retaining records for 40 years is so that it will be possible at some future date to review the adequacy of the standard.

The final standard makes a number of changes from the proposal. Some of these reduce the recordkeeping burden. The respirator recordkeeping has been simplified and the retention period made the same length as for exposure measurements so that exposure levels can be assessed. Provisions in the proposal requiring records of employee training and regulated area rosters have not been retained in the final standard. These two records were deleted because there appeared to be little benefit in their retention. Training materials can be inspected when necessary to determine compliance. The roster duplicated data required to be retained for the medical surveillance and exposure records. Records of ventilation testing have been reduced to a notation of the last test and is included as part of the housekeeping paragraph. The initial inspection provisions have been replaced by specific measurement requirements and the recordkeeping requirements have been changed accordingly. The recordkeeping requirements have been substantially reduced as a result of the changes discussed above. The reduction in the monitoring frequency and change in the definitions of persons subject to medical surveillance will also reduce the volume of the records which must be retained.

The final standard, in uniformity with the proposal and other OSHA standards, requires that such records be made available to the Director and Assistant Secretary, that exposure records be available to employees and their representatives, and medical records to an employee or physician designated by an employee or former employee. These provisions carry out statutory requirements. In addition it is necessary for the Assistant Secretary and Director to have access for enforcement and research purposes. The employees or their representatives need access to exposure records because they help the employees determine the effectiveness of the employers' exposure abatement program. The physician needs access to medical records for diagnostic purposes. The transfer provisions are unchanged except that NIOSH is to be notified at the expiration of the retention period so it can determine if the records are still needed for research purposes.

N. EMERGENCIES

The final standard, unlike the proposal, includes no specific paragraph covering emergency situations. OSHA generally includes specific provisions on emergencies for chemicals produced in high pressure processes, where there is the possibility of explosions or other massive release of the substance, or where there are acute toxicity dangers.

In non-ferrous metal smelters these dangers appear unlikely. Arsenic is not generally subject to explosion. Further the arsenic is usually present as only a small percentage in the material stream, making unlikely acute toxicity episodes as a result of equipment breakdown.

Therefore, OSHA has decided to include no specific regulatory paragraph on emergencies. However, it should be noted that the employer is required by the respirator section to have available and provide respirators when a breakdown of equipment or accident leads to high exposures. Further, as a matter of proper industrial practice, OSHA expects employers handling or producing arsenical chemicals where the possibility of acute toxicity exists, to have procedures for safely handling spills, breakage of drums, and equipment breakdowns.

O. OBSERVATION OF MONITORING: PARAGRAPH (r)

Section 8(c)(3) of the Act requires that employers provide employees or their representatives with the opportunity to observe monitoring of employee exposures to toxic materials or harmful physical agents. In accordance with this section and consistent with the proposal and other OSHA standards, the standard contains provisions for such observation. To ensure that this right is meaningful, observers are entitled to an explanation of the measurement procedure, to observe all steps related to the measurement procedure, and to record the results obtained. Since results will not normally be available at the time of monitoring, the standard has been clarified to indicate that the observers are entitled to receive the results of the monitoring when returned by the laboratory. The observer, whether an employee or designated representative,

V 4 3 / 8 8

must be provided with, and is required to use, any personal protective devices required to be worn by employees working in the area that is being monitored, and must comply with all other applicable safety and health procedures.

P. EFFECTIVE DATE: PARAGRAPH (S)

The effective date is August 1, 1978.

Q. STARTUP DATES: PARAGRAPH (U)

Startup dates included have been extended from the proposal. This is based on OSHA's experience as to the time required to set up employee training programs and medical surveillance, to order and receive protective equipment and respirators, and to plan, order, receive, and install engineering controls. The approximately 3-month period between the publication of this standard and its effective date provides time to arrange to make available protective clothing and to commence monitoring on the effective date of the standard (or earlier if the employer wishes). It gives additional time to arrange for the implementation of this standard and to order necessary equipment. All startup dates are listed at the beginning of the preamble. It should be noted that some starting dates are set forth in the paragraphs to which they directly pertain. If there is no specific startup date set forth in the standard, then the startup date is the effective date of the standard. The immediate installation of change houses, etc., is not required if installation of engineering controls would only make their use necessary for a few months. If the time period for meeting any of these startup dates cannot be met because of technical difficulties, any employer is entitled to petition for a temporary variance under section 6(b)(6)(A) of the Act.

R. APPENDIXES: PARAGRAPH (T)

The three appendixes included with the regulation are not intended to create any additional obligations not otherwise imposed or to detract from any existing obligation.

S. ORGANIC ARSENIC AND SPECIFIC ARSENIC COMPOUNDS

The existing entry in Table Z-1 of 1910.1000 reads "Arsenic and its compounds (as As), 0.5 mg/m³," and accordingly covers both inorganic and organic arsenic. The new section 1910.1018 covers just inorganic arsenic. Accordingly the Table Z-1 entry is amended to indicate that just organic arsenic is covered by the 0.5 mg/m³ limit.

Calcium arsenate and lead arsenate are inorganic arsenicals. Accordingly the existing entries in Table Z-1 of § 1910.1000 setting exposure limits for them are deleted. Calcium arsenate and lead arsenate will now be regulated under the new standard on inorganic arsenic in § 1910.1018.

IX. AUTHORITY

This document was prepared under the direction of Eula Bingham, Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Ave. NW., Washington, D.C. 20210.

Accordingly, pursuant to sections 6(b) and 8(c) of the Occupational Safety and Health Act of 1970 (84 Stat. 1593, 1599; 29 U.S.C. 655, 657), Secretary of Labor's Order No. 8-76 (41 FR 25059) and 29 CFR Part 1911, Part 1910 of Title 29, Code of Federal Regulations is hereby amended by adding a new permanent standard for occupational exposure to inorganic arsenic at § 1910.1018 and by making consequential amendments to Table Z-1 of 29 CFR 1910.1000.

In addition, pursuant to the above authority, section 4(b)(2) of the Act (84 Stat. 1592; 29 U.S.C. 653) and the specific statutes referred to in section 4(b)(2), OSHA has determined that this new standard is more effective than the corresponding standards now in Subpart B of Part 1910, and in Parts 1915, 1916, 1917, 1918, and 1928 of Title 29, Code of Federal Regulations. Therefore, these corresponding standards are superseded by § 1910.1018. This determination, and the application of the new standard to the maritime and construction industries are implemented by adding a new paragraph (e) to § 1910.19.

Signed at Washington, D.C., this 26th day of April, 1978. These amendments are effective on August 1, 1978.

EULA BINGHAM,
Assistant Secretary of Labor.

Part 1910 of Title 29 of the Code of Federal Regulations is hereby amended as follows:

1. A new paragraph (e) is added to § 1910.19 to read as follows:

§ 1910.19 Special provisions for air contaminants.

* * * * *

(e) Section 1910.1018 shall apply to the exposure of every employee to inorganic arsenic in every employment covered by §§ 1910.12, 1910.13, 1910.14, 1910.15, or 1910.16, in lieu of any different standard on exposure to inorganic arsenic which would otherwise be applicable by virtue of any of those sections.

§ 1910.1000 [Amended]

2. Table Z-1 of § 1910.1000 is amended by deleting the following entries:

"Calcium Arsenate	1"
"Lead Arsenate	0.15"

and by amending the entry which now reads:

"Arsenic and its compounds (as As)... 0.5 mg/m³."

to read:

"Organic Arsenic compounds (as As)... 0.5 mg/m³."

3. A new § 1910.1018 and appendices A, B and C are added to read as follows:

§ 1910.1018 Inorganic arsenic.

(a) *Scope and application.* This section applies to all occupational exposures to inorganic arsenic except that this section does not apply to employee exposures in agriculture or resulting from pesticide application, the treatment of wood with preservatives or the utilization of arsenically preserved wood.

(b) *Definitions.* "Action level" means a concentration of inorganic arsenic of 5 micrograms per cubic meter of air (5 μg/m³) averaged over any eight (8) hour period.

"Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"Authorized person" means any person specifically authorized by the employer whose duties require the person to enter a regulated area, or any person entering such an area as a designated representative of employees for the purpose of exercising the right to observe monitoring and measuring procedures under paragraph (e) of this section.

"Director" means the Director, National Institute for Occupational Safety and Health, U.S. Department of Health, Education and Welfare, or designee.

"Inorganic arsenic" means copper aceto- arsenite and all inorganic compounds containing arsenic except arsine, measured as arsenic (As).

(c) *Permissible exposure limit.* The employer shall assure that no employee is exposed to inorganic arsenic at concentrations greater than 10 micrograms per cubic meter of air (10 μg/m³), averaged over any 8-hour period.

(d) *Notification of use.* (1) By October 1, 1978 or within 60 days after the introduction of inorganic arsenic into the workplace, every employer who is required to establish a regulated area in his workplaces shall report in writing to the OSHA area office for each such workplace:

(i) The address of each such workplace;

(ii) The approximate number of employees who will be working in regulated areas; and

(iii) A brief summary of the operations creating the exposure and the actions which the employer intends to take to reduce exposures.

(2) Whenever there has been a significant change in the information required by paragraph (d)(1) of this section the employer shall report the changes in writing within 60 days to the OSHA area office.

(e) *Exposure monitoring.*—(1) *General.* (i) Determinations of airborne exposure levels shall be made from air samples that are representative of each employee's exposure to inorganic arsenic over an eight (8) hour period.

(ii) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.

(iii) The employer shall collect full shift (for at least 7 continuous hours) personal samples including at least one sample for each shift for each job classification in each work area.

(2) *Initial monitoring.* Each employer who has a workplace or work operation covered by this standard shall monitor each such workplace and work operation to accurately determine the airborne concentration of inorganic arsenic to which employees may be exposed.

(3) *Frequency.* (i) If the initial monitoring reveals employee exposure to be below the action level the measurements need not be repeated except as otherwise provided in paragraph (e)(4) of this section.

(ii) If the initial monitoring, required by this section, or subsequent monitoring reveals employer exposure to be above the permissible exposure limit, the employer shall repeat monitoring at least quarterly.

(iii) If the initial monitoring, required by this section, or subsequent monitoring reveals employee exposure to be above the action level and below the permissible exposure limit the employee shall repeat monitoring at least every six months.

(iv) The employer shall continue monitoring at the required frequency until at least two consecutive measurements, taken at least seven (7) days apart, are below the action level at which time the employer may discontinue monitoring for that employee until such time as any of the events in paragraph (e)(4) of this section occur.

(4) *Additional monitoring.* Whenever there has been a production, process, control or personal change which may result in new or additional exposure to inorganic arsenic, or whenever the employer has any other reason to suspect a change which may result in new or additional exposures to inorganic arsenic, additional monitoring which complies with paragraph (e) of this section shall be conducted.

(5) *Employee notification.* (i) Within five (5) working days after the receipt of monitoring results, the employer shall notify each employee in writing of the results which represent that employee's exposures.

(ii) Whenever the results indicate that the representative employee exposure exceeds the permissible exposure limit, the employer shall include in the written notice a statement that the permissible exposure limit was exceeded and a description of the corrective action taken to reduce exposure to or below the permissible exposure limit.

(6) *Accuracy of measurement.* (i) The employer shall use a method of monitoring and measurement which has an accuracy (with a confidence level of 95 percent) of not less than plus or minus 25 percent for concentrations of inorganic arsenic greater than or equal to 10 μg/m³.

(ii) The employer shall use a method of monitoring and measurement which has an accuracy (with confidence level of 95 percent) of not less than plus or minus 35 percent for concentrations of inorganic arsenic greater than 5 μg/m³ but less than 10 μg/m³.

(f) *Regulated area.*—(1) *Establishment.* The employer shall establish regulated areas where worker exposures to inorganic arsenic, without regard to the use of respirators, are in excess of the permissible limit.

(2) *Demarcation.* Regulated areas shall be demarcated and segregated from the rest of the workplace in any manner that minimizes the number of persons who will be exposed to inorganic arsenic.

(3) *Access.* Access to regulated areas shall be limited to authorized persons or to persons otherwise authorized by the Act or regulations issued pursuant thereto to enter such areas.

(4) *Provision of respirators.* All persons entering a regulated area shall be supplied with a respirator, selected in accordance with paragraph (h)(2) of this section.

(5) *Prohibited activities.* The employer shall assure that in regulated areas, food or beverages are not consumed, smoking products, chewing tobacco and gum are not used and cosmetics are not applied, except that these activities may be conducted in the lunchrooms, change rooms and showers required under paragraph (m) of this section. Drinking water may be consumed in the regulated area.

(g) *Methods of compliance.*—(1) *Controls.* (i) The employer shall institute at the earliest possible time but not later than December 31, 1979, engineering and work practice controls to reduce exposures to or below the permissible exposure limit, except to the extent that the employer can establish that such controls are not feasible.

(ii) Where engineering and work practice controls are not sufficient to reduce exposures to or below the permissible exposure limit, they shall nonetheless be used to reduce exposures to the lowest levels achievable by these controls and shall be supplemented by the use of respirators in accordance with paragraph (h) of this section and other necessary personal protective equipment. Employee rotation is not required as a control strategy before respiratory protection is instituted.

(2) *Compliance Program.* (i) The employer shall establish and implement a written program to reduce exposures to or below the permissible exposure limit by means of engineering and work practice controls.

(ii) Written plans for these compliance programs shall include at least the following:

(A) A description of each operation in which inorganic arsenic is emitted: e.g. machinery used, material processed, controls in place, crew size, operating procedures and maintenance practices;

(B) Engineering plans and studies used to determine methods selected for controlling exposure to inorganic arsenic;

(C) A report of the technology considered in meeting the permissible exposure limit;

(D) Monitoring data;

(E) A detailed schedule for implementation of the engineering controls and work practices that cannot be implemented immediately and for the adaption and implementation of any additional engineering and work practices necessary to meet the permissible exposure limit;

(F) Whenever the employer will not achieve the permissible exposure limit with engineering controls and work practices by December 31, 1979, the employer shall include in the compliance plan an analysis of the effectiveness of the various controls, shall install engineering controls and institute work practices on the quickest schedule feasible, and shall include in the compliance plan and implement a program to minimize the discomfort and maximize the effectiveness of respirator use; and

(G) Other relevant information.

(iii) Written plans for such a program shall be submitted upon request to the Assistant Secretary and the Director, and shall be available at the worksite for examination and copying by the Assistant Secretary, Director, any affected employee or authorized employee representatives.

(iv) The plans required by this paragraph shall be revised and updated at least every 6 months to reflect the current status of the program.

(h) *Respiratory protection*—(1) *General.* The employer shall assure that respirators are used where required under this section to reduce employee exposures to below the permissible exposure limit and in emergencies. Respirators shall be used in the following circumstances:

(i) During the time period necessary to install or implement feasible engineering or work practice controls;

MY 5 78 M

V 4 3 / 8 8

(ii) In work operations such as maintenance and repair activities in which the employer establishes that engineering and work practice controls are not feasible;

(iii) In work situations in which engineering controls and supplemental work practice controls are not yet sufficient to reduce exposures to or below the permissible exposure limit; or

(iv) In emergencies.

(2) *Respirator selection.* (i) Where respirators are required under this section the employer shall select, provide at no cost to the employee and assure the use of the appropriate respirator or combination of respirators from Table I below for inorganic arsenic compounds without significant vapor pressure, or Table II below for inorganic arsenic compounds which have significant vapor pressure.

(ii) Where employee exposures exceed the permissible exposure limit for inorganic arsenic and also exceed the relevant limit for particular gasses such as sulfur dioxide, any air purifying respirator supplied to the employee as permitted by this standard must have a combination high efficiency filter with an appropriate gas sorbent. (See footnote in Table 1)

TABLE I.—*Respiratory protection for inorganic arsenic particulate except for those with significant vapor pressure*

Concentration of inorganic arsenic (as As) or condition of use	Required respirator
(i) Unknown or greater or lesser than 20,000 μg/m³ (20 mg/m³) or firefighting.	(A) Any full facepiece self-contained breathing apparatus operated in positive pressure mode.
(ii) Not greater than 20,000 μg/m³ (20 mg/m³)	(A) Supplied air respirator with full facepiece, hood, or helmet or suit and operated in positive pressure mode.
(iii) Not greater than 10,000 μg/m³ (10 mg/m³)	(A) Powered air-purifying respirators in all inlet face coverings with high efficiency filters.[1] (B) Half-mask supplied air respirators operated in positive pressure mode.
(iv) Not greater than 500 μg/m³	(A) Full facepiece air-purifying respirator equipped with high-efficiency filter.[1] (B) Any full facepiece supplied air respirator. (C) Any full facepiece self-contained breathing apparatus.
(v) Not greater than 100 μg/m³	(A) Half-mask air-purifying respirator equipped with high-efficiency filter.[1] (B) Any half-mask supplied air respirator.

[1]High-efficiency filter—99.97 pct efficiency against 0.3 micrometer monodisperse diethyl-hexyl phthalate (DOP) particles.

TABLE II.—*Respiratory protection for inorganic arsenicals (such as arsenic trichloride[2] arsenic phosphide) with significant vapor pressure*

Concentration of inorganic arsenic (as As) or condition of use	Required respirator
(i) Unknown or greater or lesser than 20,000 μg/m³ (20mg/m³) or firefighting.	(A) Any full facepiece self-contained breathing apparatus operated in positive pressure mode.
(ii) Not greater than 20,000 μg/m³ (20 mg/m³)	(A) Supplied air respirator with full facepiece hood, or helmet or suit and operated in positive pressure mode.
(iii) Not greater than 10,000 μg/m³ (10mg/m³)	(A) Half-mask[2] supplied air respirator operated in positive pressure mode.
(iv) Not greater than 500 μg/m³	(A) Front or back mounted gas mask equipped with high-efficiency filter [1] and acid gas canister. (B) Any full facepiece supplied air respirator. (C) Any full facepiece self-contained breathing apparatus.
(v) Not greater than 100 μg/m³	(A) Half-mask [2] air-purifying respirator equipped with high- efficiency filter [1] and acid gas cartridge. (B) Any half-mask supplied air respirator.

[1]High efficiency filter—99.97 pct efficiency against 0.3 micrometer monodisperse diethyl-hexyl phthalate (DOP) particles.
[2]Half-mask respirators shall not be used for protection against arsenic trichloride, as it is rapidly absorbed through the skin.

(iii) The employer shall select respirators from among those approved for protection against dust, fume, and mist by the National Institute for Occupational Safety and Health (NIOSH) under the provisions of 30 CFR Part 11.

(3) *Respirator usage.* (i) The employer shall assure that the respirator issued to the employee exhibits minimum facepiece leakage and that the respirator is fitted properly.

(ii) The employer shall perform qualitative fit tests at the time of initial fitting and at least semi-annually thereafter for each employee wearing respirators, where quantitative fit tests are not required.

(iii) Employers with more than 20 employees wearing respirators shall perform quantitative face fit test at the time of initial fitting and least semi-annually thereafter for each employee wearing negative pressure respirators. The test shall be used to select facepieces that provide the required protection as prescribed in Table I or II.

(iv) If an employee has demonstrated difficulty in breathing during the fitting test or during use, he or she shall be examined by a physician trained in pulmonary medicine to determine whether the employee can wear a respirator while performing the required duty.

(4) *Respirator program.* (i) The employer shall institute a repiratory protection program in accordance with 29 CFR 1910.134 (b), (d), (e) and (f).

(ii) The employer shall permit each employee who uses a filter respirator to change the filter elements whenever an increase in breathing resistance is detected and shall maintain an adequate supply of filter elements for this purpose.

(iii) Employees who wear respirators shall be permitted to leave work areas to wash their face and respirator facepiece to prevent skin irritation associated with respirator use.

(5) *Commencement of respirator use.*

(i) The employer's obligation to provide respirators commences on August 1, 1978 for employees exposed over 500 μg/m³ of inorganic arsenic, as soon as possible but not later than October 1, 1978 for employees exposed to over 50 μg/m³ of inorganic arsenic, and as soon as possible but no later than December 1, 1978 for employees exposed between 10 and 50 μg/m³ of inorganic arsenic.

(ii) Employees with exposures below 50 μg/m³ of inorganic arsenic may choose not to wear respirators until December 31, 1979.

(iii) After December 1, 1978 any employee required to wear respirators may choose, and if so chosen the employer must provide, if it will give proper protection, a powered air purifying respirator and in addition if necessary a combination dust and acid gas respirator for times where exposures to gases are over the relevant exposure limits.

(j) *Protective work clothing and equipment*—(1) *Provision and use.* Where the possibility of skin or eye irritation form inorganic arsenic exists, and for all workers working in regulated areas, the employer shall provide at no cost to the employee and assure that employees use appropriate and clean protective work clothing and equipment such as, but not limited to:

(i) Coveralls or similar full-body work clothing;

(ii) Gloves, and shoes or coverlets;

(iii) Face shields or vented goggles when necessary to prevent eye irritation, which comply with the requirements of § 1910.133(a)(2)(a)(6); and

(iv) Impervious clothing for employees subject to exposure to arsenic trichloride.

(2) *Cleaning and replacement.* (i) The employer shall provide the protective clothing required in paragraph (j) (1) of this section in a freshly laundered and dry condition at least weekly, and daily if the employee works in areas where exposure are over 100 μg/m³ of inorganic arsenic or in areas where more frequent washing is needed to prevent skin irritation.

(ii) The employer shall clean, launder, or dispose of protective clothing required by paragraph (j) (1) of this section.

(iii) The employer shall repair or replace the protective clothing and equipment as needed to maintain their effectiveness.

(iv) The employer shall assure that all protective clothing is removed at the completion of a work shift only in change rooms prescribed in paragraph (m) (1) of this section.

(v) The employer shall assure that contaminated protective clothing which is to be cleaned, laundered, or disposed of, is placed in a closed container in the change-room which prevents dispersion of inorganic arsenic outside the container.

(vi) The employer shall inform in writing any person who cleans or launders clothing required by this section, of the potentially harmful affects including the carcinogenic effects of exposure to inorganic arsenic.

(vii) The employer shall assure that the containers of contaminated protective clothing and equipment in the workplace or which are to be removed from the workplace are labelled as follows:

CAUTION: Clothing contaminated with inorganic arsenic; do not remove dust by blowing or shaking: Dispose of inorganic arsenic contaminated wash water in accordance with applicable local, State, or Federal regulations.

(viii) The employer shall prohibit the removal of inorganic arsenic from protective clothing or equipment by blowing or shaking.

(k) *Housekeeping*—(1) *Surfaces.* All surfaces shall be maintained as free as practicable of accumulations of inorganic arsenic.

(2) *Cleaning floors.* Floors and other accessible surfaces contaminated with inorganic arsenic may not be cleaned by the use of compressed air, and shoveling and brushing may be used only where vacuuming or other relevant methods have been tried and found not to be effective.

(3) *Vacuuming.* Where vacuuming methods are selected, the vacuums shall be used and emptied in a manner to minimize the reentry of inorganic arsenic into the workplace.

(4) *Housekeeping plan.* A written housekeeping and maintenance plan shall be kept which shall list appropriate frequencies for carrying out housekeeping operations, and for cleaning and maintaining dust collection equipment. The plan shall be available for inspection by the Assistant Secretary.

(5) *Maintenance of equipment.* Periodic cleaning of dust collection and ventilation equipment and checks of their effectiveness shall be carried out to maintain the effectiveness of the system and a notation kept of the last check of effectiveness and cleaning or maintenance.

(l) [Reserved.]

(m) *Hygiene facilities and practices*—(1) *Change rooms.* The employer shall provide for employees working in regulated areas or subject to the possibility of skin or eye irritation from inorganic arsenic, clean change rooms equipped with storage facilities for street clothes and separate storage facilities for protective clothing and equipment in accordance with 29 CFR 1910.141(e).

(2) *Showers.* (i) The employer shall assure that employees working in regulated areas or subject to the possibility of skin or eye irritation from inorganic arsenic shower at the end of the work shift.

(ii) The employer shall provide shower facilities in accordance with § 1910.141(d)(3).

(3) *Lunchrooms.* (i) The employer shall provide for employees working in regulated areas, lunchroom facilities which have a temperature controlled, positive pressure, filtered air supply, and which are readily accessible to employees working in regulated areas.

(ii) The employer shall assure that employees working in the regulated area or subject to the possibility of skin or eye irritation from exposure to inorganic arsenic wash their hands and face prior to eating.

(4) *Lavatories.* The employer shall provide lavatory facilities which comply with § 1910.141(d) (1) and (2).

(5) *Vacuuming clothes.* The employer shall provide facilities for employees working in areas where exposure, without regard to the use of respirators, exceeds 100 μg/m³ to vacuum their protective clothing and clean or change shoes worn in such areas before entering change rooms, lunchrooms or shower rooms required by paragraph (j) of this section and shall assure that such employees use such facilities.

(6) *Avoidance of skin irritation.* The employer shall assure that no employee is exposed to skin or eye contact with arsenic trichloride, or to skin or eye contact with liquid or particulate inorganic arsenic which is likely to cause skin or eye irritation.

(n) *Medical surveillance*—(1) *General*—(i) *Employees covered.* The employer shall institute a medical surveillance program for the following employees:

(A) All employees who are or will be exposed above the action level, without regard to the use of respirators, at least 30 days per year; and

(B) All employees who have been exposed above the action level, without regard to respirator use, for 30 days or more per year for a total of 10 years or more of combined employment with the employer or predecessor employers prior to or after the effective date of this standard. The determination of exposures prior to the effective date of this standard shall be based upon prior exposure records, comparison with the first measurements taken after the effective date of this standard, or comparison with records of exposures in areas with similar processes, extent of engineering controls utilized and materials used by that employer.

(ii) *Examination by physician.* The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician, and shall be provided without cost to the employee, without loss of pay and at a reasonable time and place.

(2) *Initial examinations.* By December 1, 1978, for employees initially covered by the medical provisions of this section, or thereafter at the time of initial assignment to an area where the employee is likely to be exposed over the action level at least 30 days per year, the employer shall provide each affected employee an opportunity for a medical examination, including at least the following elements:

(i) A work history and a medical history which shall include a smoking history and the presence and degree of respiratory symptoms such as breathlessness, cough, sputum production and wheezing.

(ii) A medical examination which shall include at least the following:

(A) A 14" by 17" posterior-anterior chest X-ray and International Labor Office UICC/Cincinnati (ILO U/C) rating;

(B) A nasal and skin examination;

(C) A sputum cytology examination; and

(D) Other examinations which the physician believes appropriate because of the employees exposure to inorganic arsenic or because of required respirator use.

(3) *Periodic examinations.* (i) The employer shall provide the examinations specified in paragraphs (n)(2)(i) and (n)(2)(ii) (A), (B), and (D) at least annually for covered employees who are under 45 years of age with fewer than 10 years of exposure over the

M Y 5 7 8 8 M

V 4 3 1 8 8

action level without regard to respirator use.

(ii) The employer shall provide the examinations specified in paragraphs (n)(2)(i) and (n)(2)(ii) of this section at least semi-annually for other covered employees.

(iii) Whenever a covered employee has not taken the examinations specified in paragraphs (n)(2)(i) and (n)(2)(ii) of this section within six (6) months preceding the termination of employment, the employer shall provide such examinations to the employee upon termination of employment.

(4) *Additional examinations.* If the employee for any reason develops signs or symptoms commonly associated with exposure to inorganic arsenic the employer shall provide an appropriate examination and emergency medical treatment.

(5) *Information provided to the physician.* The employer shall provide the following information to the examining physician:

(i) A copy of this standard and its Appendices;

(ii) A description of the affected employee's duties as they relate to the employee's exposure;

(iii) The employee's representative exposure level or anticipated exposure level;

(iv) A description of any personal protective equipment used or to be used; and

(v) Information from previous medical examinations of the affected employee which is not readily available to the examining physician.

(6) *Physician's written opinion.* (i) The employer shall obtain a written opinion from the examining physician which shall include:

(A) The results of the medical examination and tests performed;

(B) The physician's opinion as to whether the employee has any detected medical conditions which would place the employee at increased risk of material impairment of the employee's health from exposure to inorganic arsenic;

(C) Any recommended limitations upon the employee's exposure to inorganic arsenic or upon the use of protective clothing or equipment such as respirators; and

(D) A statement that the employee has been informed by the physician of the results of the medical examination and any medical conditions which require further explanation or treatment.

(ii) The employer shall instruct the physician not to reveal in the written opinion specific findings or diagnoses unrelated to occupational exposure.

(iii) The employer shall provide a copy of the written opinion to the affected employee.

(o) *Employee information and training.*—(1) *Training program.* (i) The employer shall institute a training program for all employees who are subject to exposure to inorganic arsenic above the action level without regard to respirator use, or for whom there is the possibility of skin or eye irritation from inorganic arsenic. The employer shall assure that those employees participate in the training program.

(ii) The training program shall be provided by October 1, 1978, for employees covered by this provision, at the time of initial assignment for those subsequently covered by this provision, and shall be repeated at least quarterly for employees who have optional use of respirators and at least annually for other covered employees thereafter; and the employer shall assure that each employee is informed of the following:

(A) The information contained in appendix A;

(B) The quantity, location, manner of use, storage, sources of exposure, and the specific nature of operations which could result in exposure to inorganic arsenic as well as any necessary protective steps;

(C) The purpose, proper use, and limitation of respirators;

(D) The purpose and a description of the medical surveillance program as required by paragraph (n) of this section;

(E) The engineering controls and work practices associated with the employee's job assignment; and

(F) A review of this standard.

(2) *Access to training materials.* (i) The employer shall make readily available to all affected employees a copy of this standard and its appendixes.

(ii) The employer shall provide; upon request, all materials relating to the employee information and training program to the Assistant Secretary and the Director.

(p) *Signs and labels.*—(1) *General.* (i) The employer may use labels or signs required by other statutes, regulations, or ordinances in addition to, or in combination with, signs and labels required by this paragraph.

(ii) The employer shall assure that no statement appears on or near any sign or label required by this paragraph which contradicts or detracts from the meaning of the required sign or label.

(2) *Signs.* (i) The employer shall post signs demarcating regulated areas bearing the legend:

DANGER

INORGANIC ARSENIC

CANCER HAZARD

AUTHORIZED PERSONNEL ONLY

NO SMOKING OR EATING

RESPIRATOR REQUIRED

(ii) The employer shall assure that signs required by this paragraph are illuminated and cleaned as necessary so that the legend is readily visible.

(3) *Labels.* The employer shall apply precautionary labels to all shipping and storage containers of inorganic arsenic, and to all products containing inorganic arsenic except when the inorganic arsenic in the product is bound in such a manner so as to make unlikely the possibility of airborne esposure to inorganic arsenic. (Possible examples of products not requiring labels are semiconductors, light emitting diodes and glass). The label shall bear the following legend:

DANGER

CONTAINS INORGANIC ARSENIC

CANCER HAZARD

HARMFUL IF INHALED OR SWALLOWED

USE ONLY WITH ADEQUATE VENITLATION

OR RESPIRATORY PROTECTION

(q) *Recordkeeping.*—(1) *Exposure monitoring.* (i) The employer shall establish and maintain an accurate record of all monitoring require in paragraph (e) of this section.

(ii) This record shall include:

(A) The date(s), number, duration location, and results of each of the samples taken, including a description of the sampling procedure used to determine representative employee exposure where applicable;

(B) A description of the sampling and analytical methods used and evidence of their accuracy;

(C) The type of respiratory protective devices worn, if any;

(D) Name, social security number, and job classification of the employees monitored and of all other employees whose exposure the measurement is intended to represent; and

(E) The environmental variables that could affect the measurement of the employees exposure.

(ii) The employer shall maintain these monitoring records for at least 40 years or for the duration of employment plus 20 years, whichever, is longer.

(2) *Medical surveillance.* (i) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance as required by paragraph (n) of this section.

(ii) This record shall include:

(A) The name, social security number, and description of duties of the employee;

(B) A copy of the physician's written opinions;

(C) Results of any exposure monitoring done for that employee and the representative exposure levels supplied to the physician; and

(D) Any employee medical complaints related to exposure to inorganic arsenic.

(iii) The employer shall in addition keep, or assure that the examining physician keeps, the following medical records;

(A) A copy of the medical examination results including medical and work history required under paragraph (n) of this section;

(B) A description of the laboratory procedures and a copy of any standards or guidelines used to interpret the test results or references to that information;

(C) The initial X-ray;

(D) The X-rays for the most recent 5 years;

(E) Any X-rays with a demonstrated abnormality and all subsequent X-rays;

(F) The initial cytologic examination slide and written description;

(G) The cytologic examination slide and written description for the most recent 5 years; and

(H) Any cytologic examination slides with demonstrated atypia, if such atypia persists for 3 years, and all subsequent slides and written descriptions.

(iv) The employer shall maintain or assure that the physician maintains those medical records for at least 40 years, or for the duration of employment plus 20 years whichever is longer.

(3) *Availability.* (i) The employer shall make available upon request all records required to be maintained by paragraph (m) of this section to the Assistant Secretary and the Director for examination and copying.

(ii) The employer shall make available upon request records of employee exposure monitoring required by paragraph (q)(1) of this section for inspection and copying to affected employees, former employees and their designated representatives.

(iii) The employer shall make available upon request an employee's medical records and exposure records representative of that employee's exposure required to be maintained by paragraph (q) of this section to the affected employee or former employee or to a physician designated by the affected employee or former employee.

(4) *Transfer of records.* (i) Whenever the employer ceases to do business, the successor employer shall receive and retain all records required to be maintained by this section.

(ii) Whenever the employer ceases to do business and there is no successor employer to receive and retain the records required to be maintained by this section for the prescribed period, these records shall be transmitted to the Director.

(iii) At the expiration of the retention period for the records required to be maintained by this section, the employer shall notify the Director at least 3 months prior to the disposal of such records and shall transmit those records to the Director if he requests them within that period.

(r) *Observation of monitoring.*—(1) *Employee observation.* The employer shall provide affected employees or their designated representatives an opportunity to observe any monitoring of employee exposure to inorganic arsenic conducted pursuant to paragraph (e) of this section.

(2) *Observation procedures.* (i) Whenever observation of the monitoring of employee exposure to inorganic arsenic requires entry into an area where the use of respirators, protective clothing, or equipment is required, the employer shall provide the observer with and assure the use of such respirators, clothing, and such equipment, and shall require the observer to comply with all other applicable safety and health procedures.

(ii) Without interfering with the monitoring, observers shall be entitled to;

(A) Receive an explanation of the measurement procedures;

(B) Observe all steps related to the monitoring of inorganic arsenic performed at the place of exposure; and

(C) Record the results obtained or receive copies of the results when returned by the laboratory.

(s) *Effective date.* This standard shall become effective August 1, 1978.

(t) *Appendixes.* The information contained in the appendixes to this section is not intended by itself, to create any additional obligations not otherwise imposed by this standard nor detract from any existing obligation.

(u) *Startup dates.*—(1) *General.* The startup dates of requirements of this standard shall be the effective date of this standard unless another startup date is provided for either in other paragraphs of this section or in this paragraph.

(2) *Monitoring.* Initial monitoring shall be commenced on August 1, 1978, and shall be completed by September 15, 1978.

(3) *Regulated areas.* Regulated areas required to be established as a result of initial monitoring shall be set up as soon as possible after the results of that monitoring is known and no later than October 1, 1978.

(4) *Compliance program.* The written program required by paragraph (g)(4) as a result of initial monitoring shall be made available for inspection and copying as soon as possible and no later than December 1, 1978.

(5) *Hygiene and lunchroom facilities.* Construction plans for changerooms, showers, lavatories, and lunchroom facilities shall be completed no later than December 1, 1978, and these facilities shall be constructed and in use no later than July 1, 1979. However, if as part of the compliance plan it is predicted by an independent engineering firm that engineering controls and work practices will reduce exposures below the permissible exposure limit by December 31, 1979, for affected employees, then such facilities need not be completed until 1 year after the engineering controls are completed or December 31, 1980, whichever is earlier, if such controls have not in fact succeeded in reducing exposure to below the permissible exposure limit.

(6) *Summary of startup dates set forth elsewhere in this standard.*

STARTUP DATES

August 1, 1978—Respirator use over 500 μg/m³.

AS SOON AS POSSIBLE BUT NO LATER THAN

September 15, 1978—Completion of initial monitoring.

October 1, 1978—Complete establishment of regulated areas. Respirator use for employees exposed above 50 μg/m³. Completion of initial training. Notification of use.

December 1, 1978—Respirator use over 10 μg/m³. Completion of initial medical. Completion of compliance plan.

July 1, 1979—Completion of lunch rooms and hygiene facilities.

December 31, 1979—Completion of engineering controls.

All other requirements of the standard have as their startup date August 1, 1978.

APPENDIX A—INORGANIC ARSENIC SUBSTANCE INFORMATION SHEET

I. SUBSTANCE IDENTIFICATION

A. *Substance.* Inorganic Arsenic.

B. *Definition.* Copper acetoarsenite, arsenic and all inorganic compounds containing arsenic except arsine, measured as arsenic (As).

C. *Permissible Exposure Limit.* 10 micrograms per cubic meter of air as determined as an average over an 8-hour period. No employee may be exposed to any skin or eye contact with arsenic trichloride or to skin or eye contact likely to cause skin or eye irritation.

D. *Regulated Areas.* Only employees authorized by your employer should enter a regulated area.

II. HEALTH HAZARD DATA

A. *Comments.* The health hazard of inorganic arsenic is high.

B. *Ways in which the chemical affects your body.* Exposure to airborne concentrations of inorganic arsenic may cause lung cancer, and can be a skin irritant. Inorganic arsenic may also affect your body if swallowed. One compound in particular, arsenic trichloride, is especially dangerous because it can be absorbed readily through the skin. Because inorganic arsenic is a poison, you should wash your hands thoroughly prior to eating or smoking.

III. PROTECTIVE CLOTHING AND EQUIPMENT

A. *Respirators.* Respirators will be provided by your employer at no cost to you for routine use if your employer is in the process of implementing engineering and work practice controls or where engineering and work practice controls are not feasible or insufficient. You must wear respirators for non-routine activities or in emergency situa-

M Y 5 7 8 M

V 4 3 / 8 8

tions where you are likely to be exposed to levels of inorganic arsenic in excess of the permissible exposure limit. Since how well your respirator fits your face is very important, your employer is required to conduct fit tests to make sure the respirator seals properly when you wear it. These tests are simple and rapid and will be explained to you during training sessions.

B. *Protective clothing.* If you work in a regulated area, your employer is required to provide at no cost to you, and you must wear, appropriate, clean, protective clothing and equipment. The purpose of this equipment is to prevent you from bringing to your home arsenic-contaminated dust and to protect your body from repeated skin contact with inorganic arsenic likely to cause skin irritation. This clothing should include such items as coveralls or similar full-body clothing, gloves, shoes or coveriets, and aprons. Protective equipment should include face shields or vented goggles, where eye irritation may occur.

IV. HYGIENE FACILITIES AND PRACTICES

You must not eat, drink, smoke, chew gum or tobacco, or apply cosmetics in the regulated area, except that drinking water is permitted. If you work in a regulated area your employer is required to provide lunchrooms and other areas for these purposes.

If you work in a regulated area, your employer is required to provide showers, washing facilities, and change rooms. You must wash your face, and hands before eating and must shower at the end of the work shift. Do not take used protective clothing out of change rooms without your employer's permission. Your employer is required to provide for laundering or cleaning of your protective clothing.

V. SIGNS AND LABELS

Your employer is required to post warning signs and labels for your protection. Signs must be posted in regulated areas. The signs must warn that a cancer hazard is present, that only authorized employees may enter the area, and that no smoking or eating is allowed, and that respirators must be worn.

VI. MEDICAL EXAMINATIONS

If your exposure to arsenic is over the Action Level (5 $\mu g/m^3$)—(including all persons working in regulated areas) at least 30 days per year, or you have been exposed to arsenic for more than 10 years over the Action Level, your employer is required to provide you with a medical examination. The examination shall be every 6 months for employees over 45 years old or with more than 10 years exposure over the Action Level and annually for other covered employees. The medical examination must include a medical history; a chest x-ray; skin examination; nasal examination and sputum cytology exam for the early detection of lung cancer. The cytology exams are only included in the initial exam and examinations given after you are either 45 years or older or have 10 or more years employment over the Action Level. The examining physician will provide a written opinion to your employer containing the results of the medical exams. You should also receive a copy of this opinion. The physician must not tell your employer any conditions he detects unrelated to occupational exposure to arsenic but must tell you those conditions.

VII. OBSERVATION OF MONITORING

Your employer is required to monitor your exposure to arsenic and you or your representatives are entitled to observe the monitoring procedure. You are entitled to receive an explanation of the measurement procedure, and to record the results obtained. When the monitoring procedure is taking place in an area where respirators or personal protective clothing and equipment are required to be worn, you must also be provided with and must wear the protective clothing and equipment.

VIII. ACCESS TO RECORDS

You or your representative are entitled to records of your exposure to inorganic arsenic upon request to your employer. Your medical examination records can be furnished to your physician if you request your employer to provide them.

IX. TRAINING AND NOTIFICATION

Additional information on all of these items plus training as to hazards of exposure to inorganic arsenic and the engineering and work practice controls associated with your job will also be provided by your employer. If you are exposed over the permissible exposure limit, your employer must inform you of that fact and the actions he is taking to reduce your exposures.

APPENDIX B—SUBSTANCE TECHNICAL GUIDELINES

ARSENIC, ARSENIC TRIOXIDE, ARSENIC TRICHLORIDE (THREE EXAMPLES)

I. Physical and chemical properties

A. Arsenic (metal).
1. Formula: As.
2. Appearance: Gray metal.
3. Melting point: Sublimes without melting at 613C.
4. Specific Gravity: (H20=1):5.73.
5. Solubility in water: Insoluble.

B. Arsenic Trioxide.
1. Formula: As203, (As406).
2. Appearance: White powder.
3. Melting point: 315C.
4. Specific Gravity (H20=1):3.74.
5. Solubility in water: 3.7 grams in 100cc of water at 20c.

C. Arsenic Trichloride (liquid).
1. Formula: AsC13.
2. Appearance: Colorless or pale yellow liquid.
3. Melting point: −8.5C.
4. Boiling point: 130.2C.
5. Specific Gravity (H20=1):2.16 at 20C.
6. Vapor Pressure: 10mm Hg at 23.5C.
7. Solubility in Water: Decomposes in water.

II. Fire, explosion and reactivity data.

A. Fire: Arsenic, arsenic Trioxide and Arsenic Trichloride are nonflammable.

B. Reactivity:
1. Conditions Contributing to Instability: Heat.
2. Incompatibility: Hydrogen gas can react with inorganic arsenic to form the highly toxic gas arsine.

III. Monitoring and Measurement Procedures

Samples collected should be full shift (at least 7-hour) samples. Sampling should be done using a personal sampling pump at a flow rate of 2 liters per minute. Samples should be collected on 0.8 micrometer pore size membrane filter (37mm diameter). Volatile arsenicals such as arsenic trichloride can be most easily collected in a midget bubbler filled with 15 ml. of 0.1 N NaOH.

The method of sampling and analysis should have an accuracy of not less than ±25 percent (with a confidence limit of 95 percent) for 10 micrograms per cubic meter of air (10 $\mu g/m^3$) and ±35 percent (with a confidence limit of 95 percent) for concentrations of inorganic arsenic between 5 and 10 $\mu g/m^3$.

APPENDIX C—MEDICAL SURVEILLANCE GUIDELINES

I. GENERAL

Medical examinations are to be provided for all employees exposed to levels of inorganic arsenic above the action level (5 $\mu g/m^3$) for at least 30 days per year (which would include among others, all employees, who work in regulated areas). Examinations are also to be provided to all employees who have had 10 years or more exposure above the action level for more than 30 days per year while working for the present or predecessor employer though they may no longer be exposed above the level.

An initial medical examination is to be provided to all such employees by December 1, 1978. In addition, an initial medical examination is to be provided to all employees who are first assigned to areas in which worker exposure will probably exceed 5 $\mu g/m^3$ (after the effective date of this standard) at the time of initial assignment. In addition to its immediate diagnostic usefulness, the initial examination will provide a baseline for comparing future test results. The initial examination must include as a minimum the following elements:

(1) A work and medical history, including a smoking history, and presence and degree of respiratory symptoms such as breathlessness, cough, sputum production, and wheezing;

(2) A 14" by 17" posterior-anterior chest X-ray and an International Labor Office UICC/Cincinnati (ILO U/C) rating;

(3) A nasal and skin examination;

(4) A Sputum Cytology examination; and

(5) Other examinations which the physician believes appropriate because of the employee's exposure to inorganic arsenic or because of required respirator use.

Periodic examinations are also to be provided to the employees listed above. The periodic examinations shall be given annually for those covered employees 45 years of age or less with fewer than 10 years employment in areas where employee exposure exceeds the action level (5 $\mu g/m^3$). Periodic examinations need not include sputum cytology and only an updated medical history is required.

Periodic examinations for other covered employees, shall be provided every six (6) months. These examinations shall include all tests required in the initial examination, except that the medical history need only be updated.

The examination contents are minimum requirements. Additional tests such as lateral and oblique X-rays or pulmonary function tests may be useful. For workers exposed to three arsenicals which are associated with lymphatic cancer, copper acetoarsenite, potassium arsenite, or sodium arsenite the examination should also include palpation of superficial lymph nodes and complete blood count.

II. NONCARCINOGENIC EFFECTS

The OSHA standard is based on minimizing risk of exposed workers dying of lung cancer from exposure to inorganic arsenic. It will also minimize skin cancer from such exposures.

The following three sections quoted from "Occupational Diseases: A Guide to Their Recognition", Revised Edition, June 1977, National Institute for Occupational Safety and Health is included to provide information on the nonneoplastic effects of exposure to inorganic arsenic. Such effects should not occur if the OSHA standards are followed.

A. *Local*—Trivalent arsenic compounds are corrosive to the skin. Brief contact has no effect but prolonged contact results in a local hyperemia and later vesicular or pustular eruption. The moist mucous membranes are most sensitive to the irritant action. Conjunctiva, moist and macerated areas of skin, the eyelids, the angles of the ears, nose, mouth, and respiratory mucosa are also vulnerable to the irritant effects. The wrists are common sites of dermatitis, as are the genitalia if personal hygiene is poor. Perforations of the nasal septum may occur. Arsenic trioxide and pentoxide are capable of producing skin sensitization and contact dermatitis. Arsenic is also capable of producing keratoses, especially of the palms and soles.

B. *Systemic*—The acute toxic effects of arsenic are generally seen following ingestion of inorganic arsenical compounds. This rarely occurs in an industrial setting. Symptoms develop within ½ to 4 hours following ingestion and are usually characterized by construction of the throat followed by dysphagia, epigastric pain, vomiting, and watery diarrhea. Blood may appear in vomitus and stools. If the amount ingested is sufficiently high, shock may develop due to severe fluid loss, and death may ensue in 24 hours. If the acute effects are survived, exfoliative dermatitis and peripheral neuritis may develop.

Cases of acute arsenical poisoning due to inhalation are exceedingly rare in industry. When it does occur, respiratory tract symptoms—cough, chest pain, dyspnea—giddiness, headache, and extreme general weakness precede gastrointestinal symptoms. The acute toxic symptoms of trivalent arsenical poisoning are due to severe inflammation of the mucous membranes and greatly increased permeability of the blood capillaries.

Chronic arsenical poisoning due to ingestion is rare and generally confined to patients taking prescribed medications. However, it can be a concomitant of inhaled inorganic arsenic from swallowed sputum and improper eating habits. Symptoms are weight loss, nausea and diarrhea alternating with constipation, pigmentation and eruption of the skin, loss of hair, and peripheral neuritis. Chronic hepatitis and cirrhosis have been described. Polyneuritis may be the salient feature, but more frequently there are numbness and parasthenias of "glove and stocking" distribution. The skin lesions are usually melanotic and keratotic and may occasionally take the form of an intradermal cancer of the squamous cell type, but without infiltrative properties. Horizontal white lines (striations) on the fingernails and toenails are commonly seen in chronic arsenical poisoning and are considered to be a diagnostic accompaniment of arsenical polyneuritis.

Inhalation of inorganic arsenic compounds is the most common cause of chronic poisoning in the industrial situation. This condition is divided into three phases based on signs and symptoms.

First Phase: The worker complains of weakness, loss of appetite, some nausea, occasional vomiting, a sense of heaviness in the stomach, and some diarrhea.

Second Phase: The worker complains of conjunctivitis, a catarrhal state of the mucous membranes of the nose, larynx, and respiratory passage. Coryza, hoarseness, and mild tracheobronchitis may occur. Perforation of the nasal septum is common, and is probably the most typical lesion of the upper respiratory tract in occupational exposure to arsenical dust. Skin lesions, eczematoid and allergic in type, are common.

Third Phase: The worker complains of symptoms of peripheral neuritis, initially of hands and feet, which is essentially sensory. In more severe cases, motor paralyses occur; the first muscles affected are usually the toe extensors and the peronei. In only the most severe cases will paralysis of flexor muscles of the feet or of the extensor muscles of hands occur.

Liver damage from chronic arsenical poisoning is still debated, and as yet the question is unanswered. In cases of chronic and acute arsenical poisoning, toxic effects to the myocardium have been reported based on EKG changes. These findings, however, are now largely discounted and the EKG changes are ascribed to electrolyte disturbances concomitant with arsenicalism. Inhalation of arsenic trioxide and other inorganic arsenical dusts does not give rise to radiological evidence or pneumoconiosis. Arsenic does have a depressant effect upon the bone marrow, with disturbances of both erythropoiesis and myelopoiesis.

III. SPUTUM CYTOLOGY

Sputum can be collected by aerosol inhalation during the medical exam or by spontaneous early morning cough at home. Sputum is induced by transoral inhalation of an aerosolized solution of eight per cent (8 percent) sodium chloride in water. After inhaling as few as three to five breaths the subject usually yields an adequate sputum. All sputum should be collected directly into sixty percent (60 percent) alcohol.

Scientific evidence suggests that chest X-rays and sputum cytology should be used together as screening tests for lung tests for lung cancer in high risk populations such as workers exposed to inorganic arsenic. The tests are to be performed every six months on workers who are 45 years of age or older or have worked in the regulated area for 10 or more years. Since the tests seem to be complementary, it may be advantageous to alternate the test procedures. For instance, chest X-rays could be obtained in June and December and sputum cytologies could be obtained in March and September. Facilities for providing necessary diagnostic investigation should be readily available as well as chest physicians, surgeons, radiologists, pathologists and immunotherapists to provide any necessary treatment services.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

PRIVACY ACT OF 1974

Republication of Privacy Act Systems of Records

Action: Publication of Second Annual Compilation of Privacy Act Systems of Records maintained by the Equal Employment Opportunity Commission.

Summary: The Privacy Act of 1974, 5 U.S.C. Sec. 552a(e)(4) (Pub. L. 93-597), requires that each agency publish in the FEDERAL REGISTER at least annually a notice of the existence and character of systems of records it maintains.

A compilation of the Commission's Privacy Act systems of records was most recently published at 41 FR 42170 (September 24, 1976). Since that publication, the following amendments to those systems of records have been made:

1. The "routine use" provision of system EEOC-3, Charge of Discrimination Case Files, was amended to provide for a limited disclosure to Congressional offices (41 FR 46061, October 19, 1976);

2. Additional "routine uses" were adopted for systems EEOC-1, 2 and 4-13 (42 FR 69, January 3, 1977). The additional "uses" generally provide for disclosures from these systems of records to Federal, State and local law enforcement agencies and to the General Services Administration in connection with services provided to the Commission;

3. Notice of proposed amendments to Privacy Act systems EEOC-8 (re-titled "Employee Travel and Reimbursement Records") and EEOC-13 (re-titled "Employee Performance, Effectiveness and Evaluation System") was published at 42 FR 8359 February 9, 1977). These amendments are adopted in final form upon this publication;

4. Additional "routine uses" were adopted for system EEOC-7, Employee Pay and Leave Records (42 FR 69, January 3, 1977). The additional "uses" generally provided for disclosure in providing a copy of an employee's Department of the Treasury Form W-2, Wage and Tax Statement, to the State, city, or other local jurisdiction which is authorized to tax the employee's compensation;

5. System EEOC-1, Affirmative Action Plan Employee Data, was cancelled at 42 FR 21644 (April 28, 1977) because such records were no longer being maintained. The designation, EEOC-1, is reserved;

6. Notice of the establishment of a new Privacy Act system of records, EEOC-14, Day-Care Center Study Records, was published at 42 FR 56643 (October 27, 1977);

7. Systems of records for the Equal Employment Opportunity Commission are current as of April 1, 1978.

Dates: Notice of this compilation is effective May 5, 1978.

For further information contact: Constance L. Dupre, Associate General Counsel, Legal Counsel Division, EEOC, 2401 "E" Street NW., Washington, D.C. 20506, 202-634-6460.

Supplementary Information: None.

Signed at Washington, D.C., this 24th day of April, 1978.

ELEANOR HOLMES NORTON,
Chair.

TABLE OF CONTENTS

I. EEOC Privacy Act Systems of Records
(a) EEOC—1, Reserved
(b) EEOC—2, Attorney Referral List
(c) EEOC—3, Charge of Discrimination Case Files
(d) EEOC—4, Commissioners' Biographical File
(e) EEOC—5, Correspondence and Congressional Inquiries
(f) EEOC—6, Employee Alcoholism and Drug Abuse Records
(g) EEOC—7, Employee Pay and Leave Records
(h) EEOC—8, Employee Travel and Reimbursement Records
(i) EEOC—9, Labor-Management Negotiated Agreements
(j) EEOC—10, Voluntary Programs Skills Bank
(k) EEOC—11, Correspondence File
(l) EEOC—12, Official Biographical File
(m) EEOC—13, Employee Performance, Effectiveness and Evaluation System)
(n) EEOC—14, Day-Care Center Study Records
II. Appendix
(A) List of Field Offices and Headquarters Offices for the Equal Employment Opportunity Commission.
(B) Additional Routine Uses for Systems EEOC—2 and 4-13.

EEOC-1 [Reserved]

EEOC—2

System name: Attorney Referral List—EEOC

System location: All district offices (see appendix).

Categories of individuals covered by the system: Attorneys

Categories of records in the system: Contains attorneys' names, business addresses, telephone numbers, and years of experience. Some offices may maintain the following additional information: (1) the kinds of cases the attorneys are interested in; (2) whether the attorney will handle cases investigated by EEOC; and (3) description of cases handled for plaintiffs and defendants.

Authority for maintenance of the system: 42 U.S.C. 2000e-4(g); 44 U.S.C. 396(a).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by EEOC personnel as a source of attorneys to whom charging parties can be referred to handle the litigation of their Title VII complaints.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Stored on prepared forms and 3 inch by 5 inch cards.

Retrievability: Indexed alphabetically by names of the attorneys.

Safeguards: Access to this system of records is restricted to EEOC district office personnel who have a legitimate use for the information contained therein. This system is stored in a filing cabinet.

Retention and disposal: Maintained until the Commission is notified that an attorney no longer wishes to be included on the referral list. Upon such notification, records are destroyed by manual shredding.

System manager(s) and address: The District Counsel at each EEOC district office (see appendix).

Notification procedure: Inquiries concerning this system of records should be addressed to the system manager. It is necessary to furnish the following information in order to identify the individual whose records are requested: (1) full name of the individual; (2) mailing address to which reply should be sent.

Record access procedures: Same as the above.

Contesting record procedures: Same as the above.

Record source categories: Attorneys.

EEOC—3

System name: Charge of Discrimination Case Files—EEOC

System location: District office where the charge of discrimination was filed (see appendix).

Categories of individuals covered by the system: Any aggrieved individuals who charge that an unlawful employment practice within the meaning of Title VII of the Civil Rights Act of 1964, as amended, has been committed by an employer, employment agency, labor organization or joint labor-management apprenticeship committee.

Categories of records in the system: Grievance filed by charging party alleging discrimination, original communication, perfected charge, amended charge; copy of deferral letter to state; communication requesting assumption of jurisdiction; receipt for copy of charge; receipt for notification of charge; analysis of deferral agency action or nonaction; charging party's statements and affidavits; report of initial and exit interviews; follow-up letter from charging party; statements and affidavits of charging party's witnesses; statement of respondent and respondent's witnesses; respondent's statement of position; correspondence and documentation related thereto; documentary evidence gathered from respondent such as charging party's records of jobs and earnings, records of jobs and earnings of co-workers, seniority list, job titles and an analysis of such documents; affidavits or statements of any additional witnesses interviewed and copies of any documents submitted by them; observations made on a tour of respondent's facilities, organizational charts, diagrams, summaries of comments made by employees regarding work facilities, EEO data, EEO Report forms; community background data such as racial and ethnic composition, education level by minority group status and sex, average income by minority status and sex, and history of employment relationships; collective bargaining agreements when relevant to the issue and related supplements or modifications to the contracts, copies of any subpoenas issued, and any petitions to modify or revoke; copies of any temporary restraining orders issued to seek preliminary relief in the case; investigator's notices and analysis of data; Decisions and Letters of Determination; conciliation agreements; statements or affidavits of additional witnesses contacted in connection with the investigation made; and any additional evidence gathered during the course of the investigation.

Authority for maintenance of the system: 5 U.S.C. 301, 42 U.S.C. 2000e-5, -8, and -9; 44 U.S.C. 396(a).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The purpose of this system of records is to provide for the federal prohibition against employment discrimination in the private and public sector based on race, color, religion, sex or national origin. The records are the official file to be utilized by authorized EEOC personnel, including investigators, conciliators, attorneys, research assistants and analysts, Commissioners, Compliance personnel and Regional and District Directors, in making an official determination regarding the validity of the charge of discrimination and as supportive material for any cases which are subsequently conciliated, or litigated by the EEOC or the Department of Justice. Other uses include the following: (1) to conduct compliance reviews with local, state and federal agencies, such as the Office of Federal Contract Compliance, Department of Justice, Department of Labor, Office of Revenue Sharing of the Treasury Department, Law Enforcement Assistance Administration, and other federal agencies as may be appropriate or necessary to carrying out the Commission's functions under the Title (See 42 U.S.C. 2000e-4(g)(1), 8(b) and (d); (2) sharing information contained in these records with state and local agenices administering state or local fair employment practices laws (See 42 U.S.C. 2000e-4(g)(1), 8(b) and (d); (3) sharing information in case files with the following person(s) in contemplation of or in connection with Title VII litigation:

(a) Charging Parties and their attorneys;

(b) Aggrieved persons in case files involving Commissioner Charges and their attorneys provided that such persons have been notified of their status as aggrieved persons pursuant to section 1601.25(c) of the Commission's Procedural Regulations;

(c) Persons or organizations filing on behalf of an aggrieved person, provided that the aggrieved person has given written authorization to the person who filed on his or her behalf to act as the aggrieved person's agent for this purpose and their attorneys;

(d) Employees of Commission-funded groups such as the Mexican-American Legal Defense and Education Fund and Lawyer's Committee for Civil Rights Under Law for the purpose of reviewing information in case files to determine the appropriateness of referral to private attorneys as a service to charging parties, provided that the Commission-funded group is reviewing the information at the request of the charging party;

(e) Respondents and their attorneys, provided that the charging party or aggrieved person has filed suit under Title VII; and (4) cooperating with private Title VII litigants and prospective Title VII litigants by allowing, when requested, access to information in other case files involving the same respondent, provided that the information in the other case files is relevant or material to the private litigant's case.

Disclosure of the status of the processing of a charge of employment discrimination may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in file folders, tape and computer print-outs.

Retrievability: Cross-indexed by charging party name, respondent name, and charge number; may be retrieved by any of the above three indexes.

Safeguards: Records are handled by authorized personnel of the Equal Employment Opportunity Commission and others; see routine uses. Premises are locked when authorized personnel are not on duty. Periodic security checks and emergency planning.

Retention and disposal: Case files which are received in the Office of Compliance and the Office of General Counsel are returned to their respective field offices. Files are retired to Federal Records Center one year after the year of the last action, including action in the federal courts or the last compliance review (the final report submitted by the respondent after conciliation to indicate compliance); destroyed after three additional years, except landmark cases, which are retained.

System manager(s) and address: District Director of the field office where charge was filed

Systems exempted from certain provisions of the act: System is exempt under 5 U.S.C. 552a(k)(2).

EEOC—4

System name: Commissioners' Biographical File—EEOC

System location: Office of Congressional Affairs, Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506.

Categories of individuals covered by the system: Current and former Commissioners of EEOC.

Categories of records in the system: Includes name, date and place of birth, education and employment histories, Congressional confirmation hearing transcript, speeches, and publications.

Authority for maintenance of the system: 44 U.S.C. 396(a).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by the staff of the Office of Congressional Affairs to answer public and Congressional inquiries regarding EEOC Commissioners.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Stored on paper.

Retrievability: Indexed alphabetically by last name of the Commissioner.

Safeguards: Stored in standard file cabinets. Available to office employees and Commissioners.

Retention and disposal: Maintained indefinitely.

System manager(s) and address: Director, Office of Congressional Affairs, Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506.

Notification procedure: Inquiries concerning this system of records should be addressed to the system namager. All inquiries should furnish the full name of the individual, and the mailing address to which the reply should be mailed.

Record access procedures: Same as the above.

Contesting record procedures: Same as the Above.

Record source categories: The Commissioner to whom the record pertains, publications, and original data generated by the Commission.

EEOC—5

System name: Correspondence and Congressional Inquiries—EEOC

System location: Office of Congressional Affairs, Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506.

Categories of individuals covered by the system: Current and former EEOC employees, charging parties, members of the general public.

Categories of records in the system: Includes name of inquiring individuals and information submitted by them; date inquiry received, date response due; to whom inquiry assigned; date response sent out; issue raised in the inquiry.

Authority for maintenance of the system: 44 U.S.C. 396(a)

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used (a) as a control of incoming correspondence, a record file as to the nature and status of the correspondence, a reference of assignment for outgoing response, a reference to previous correspondence on the same subject; and (b) to avoid duplication of responses and to assure a reply to Congressional inquiries.

M Y 5 7 8 M

V 4 3 / 8 8

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Stored in loose-leaf notebooks and on control slips.

Retrievability: Indexed numerically by date of incoming letter and alphabetically by name of the inquiring member of Congress and inquiring party.

Safeguards: Stored in standard file cabinets. Access to the records of daily incoming and outgoing correspondence is limited to office employees. Records of these files are stored in locked desk drawers.

Retention and disposal: Retained for six months after completion of necessary action, then destroyed manually. Material relating to specific subjects becomes part of the subject's official file.

System manager(s) and address: Director, Office of Congressional Affairs, Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506.

Notification procedure: Individuals wishing to know whether information about them is maintained in this system of records should address inquiries to the system manager.

Record access procedures: Same as the above.

Contesting record procedures: Same as the above.

Record source categories: Correspondence from members of Congress and their staffs, charging parties, members of the general public, and data generated within the Commission.

EEOC—6

System name: Employee Alcoholism and Drug Abuse Records—EEOC

System location: Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506, regional and district offices and regional litigation centers (see appendix).

Categories of individuals covered by the system: Current and former employees of EEOC.

Categories of records in the system: Contains information relating to individuals who are referred to the Public Health Service, other agency operating health facilities, alcoholic and drug abuse treatment and/or rehabilitation centers, and private physicians.

Authority for maintenance of the system: 5 U.S.C. 301; 5 U.S.C. 7901; 42 U.S.C. 218; 44 U.S.C. 396(a), 29 CFR 1510; 45 CFR 57.1 et seq.; 38 Federal Register, Part 1401; CSC FPM Letters No. 792-6 and -7; Bureau of the Budget Circular A-68, August 28, 1964; Bureau of the Budget Circular A-72, June 18, 1965.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by authorized personnel of the EEOC Headquarters, regional and district offices, personnel division upon the individual's request, by governmental personnel for purposes of attaining benefits; for disclosure in connection with judicial or administrative proceedings; for disclosure to medical personnel to meet a medical emergency; for disclosure to qualified personnel for purposes of research, audits, or program evaluation; for disclosure of a minor patient to his/her parents under the guidelines set forth in 21 CFR, Part 140.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in file folders.

Retrievability: Indexed by the names of the persons on whom they are maintained.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure. HM Individual health record card: six years after last entry. Log of visit to facility: if summarized, three months after last entry; if not summarized, two years after last entry. Health record case files, related forms, correspondence and papers which document employee medical history except pre-employment health qualification placement records, disability retirement exams, and fitness for duty examinations which become a part of the OPF (Standard Form 66) upon separation, are maintained for a period of six years after date of last entry.

System manager(s) and address: Director of Personnel, Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506, District and Regional Directors, and Regional Attorneys, EEOC district and regional locations (see appendix).

Notification procedure: Individuals who have been referred to PHS, or other agency operating health facilities are aware of that fact and any inquiries concerning this system should be addressed to the Director of Personnel, headquarters, or the District or Regional Directors and Regional Attorneys at the district and regional locations where individual is currently employed. Individuals should provide their full name, date of birth and social security number.

Record access procedures: Same as the above.

Contesting record procedures: Same as the above.

Record source categories: The individual to whom the record pertains; private physicians, medical institutions; Veterans Administration benefits program; office of workers' compensation programs, pay and leave allowance cards; health benefits records system, CSC personnel management evaluation and audit record system.

EEOC—7

System name: Employee Pay and Leave Records—EEOC

System location: All locations listed in appendix.

Categories of individuals covered by the system: Current and former employees of EEOC.

Categories of records in the system: Time and attendance cards and forms; leave records (employee name, branch or office, pay period ending, leave and overtime used during the pay period), requests for leave (earned or advance) or leave of absence, requests for and authorization of overtime; annual attendance record (indicates name, social security number, service computation date, hours and dates worked and taken as leave, pay plan, salary and occupation code, grade, leave earned and used); bond issuance and bond balance.

Authority for maintenance of the system: 5 U.S.C. 301; 44 U.S.C. 396(a).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: May be used by authorized EEOC personnel to keep a daily record of leave and overtime acquired and used; as a basis for maintaining an employee's official time card; and as a counseling aid for employees and to assist in evaluating an employee's performance.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Routine uses of records maintained in this system include providing a copy of an employee's Department of the Treasury Form W-2, Wage and Tax Statement, to the State, city, or other local jurisdiction which is authorized to tax the employee's compensation. The record will be provided in accordance with a withholding agreement between the State, city, or other local jurisdiction and the Department of Treasury pursuant to 5 U.S.C. 5516, 5517, or 5520, or in the absence thereof, in response to a written request from an appropriate official of the taxing jurisdiction to the Chairman. The request must include a copy of the applicable statute or ordinance authorizing the taxation of compensation and should indicate whether the authority of the jurisdiction to tax the employee is based on place of residence, place of employment, or both.

Pursuant to a withholding agreement between a city and the Department of the Treasury (5 U.S.C. 5520), copies of executed city tax withholding certificates shall be furnished the city in response to a written request from an appropriate city official to the Chairman.

In the absence of a withholding agreement, the social security number will be furnished only to a taxing jurisdiction which has furnished this agency with evidence of its independent authority to compel disclosure of the social security number, in accordance with Section 7 of the Privacy Act, 5 U.S.C. 552a, Pub. L. 93-579.

Records maintained in this system may be disclosed, as necessary, to employees of the Educational Systems Corporation for research purposes only to study the effects of providing day-care services on the job productivity and worker satisfaction of Commission employees.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Stored on prepared forms and on punched and unpunched cards.

M Y 5 7 8

Retrievability: Indexed alphabetically by name, social security number, and/or chronologically by event and name.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure. Files are stored in standard cabinets, safes and secured rooms.

Retention and disposal: Maintained from three months to one year. They are then manually destroyed.

System manager(s) and address: Director of each Commission Office or Division at headquarters; Regional and District Directors (see appendix).

Notification procedure: Employees of the Commission wishing to know whether information about them is maintained in this system of records should address inquiries to the Director of the Office or Division where employed or to the District or Regional Director if employed at a field installation (see appendix). Former employees separated from the Commission and no longer in the federal service should address all inquiries to the National Personnel Records Center, General Services Administration, 111 Winnebago Street, St Louis, Missouri 63118. The individual should provide his or her full name, date of birth, social security number and mailing address.

Record access procedures: Same as the above.

Contesting record procedures: Same as the above.

Record source categories: Official personnel folders, data submitted by employees, and data submitted by the offices where the individuals are or were employed.

EEOC—8

System name: Employee Travel and Reimbursement Records

System location: EEOC Headquarters, 2401 E St., N.W., Washington, D.C. 20506

Categories of individuals covered by the system: Current and former EEOC employees

Categories of records in the system: Includes travel orders, records of travel advances, amounts owed the agency by employees for travel and other purposes, amounts payable to the employee for travel and other purposes, payments made to the employees for travel and other reimbursable transactions and a record of the difference between the cost of official travel as estimated in the travel order and the amount actually expended by the employee.

Authority for maintenance of the system: 31 U.S.C. 66a, 44 U.S.C. 3101

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by authorized personnel in the Financial Services Division at headquarters as a record of planned and completed travel expenses; as a justification of government travel disbursements; and to record accounts receivable from and payable to the government for accounts advanced to the employee or owed to the employee for official travel and other purposes.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Stored on magnetic tape.

Retrievability: Indexed by an assigned employee code.

Safeguards: Access to any information maintained therein is limited to employees whose official duties require such access.

Retention and disposal: The records are maintained for the current fiscal year and two preceding fiscal years. They are then retired to the Federal Records Center.

System manager(s) and address: Chief, Financial Services Division, EEOC, 2401 E Street, N.W., Washington, D.C. 20506.

Notification procedure: Inquiries concerning this system of records should be addressed to the System manager. It is necessary to furnish the following information (1) name (2) social security number (3) mailing address to which the response is to be sent.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Bills, receipts, and claims presented by employees and original data generated by the Commission.

EEOC—9

System name: Labor-Management Negotiated Agreements—EEOC

System location: Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506. Regional and district offices.

Categories of individuals covered by the system: Current and former employees of EEOC.

Categories of records in the system: Contains information or documents relating to the Commission's labor-management relations program, including information and decisions by the Department of Labor, - Impasses Panel, and Federal Labor Relations Council.

Authority for maintenance of the system: 5 U.S.C. 301; 5 U.S.C. 7001; 44 U.S.C. 396(a); Lloyd-LaFollette Act of 1912; Executive Order 11491, as amended, 5 CFR 711.101-711.102.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by authorized EEOC personnel to respond to inquiries or requests from parties to the negotiated agreement; inquiries from other federal agencies; a court subpoena or to refer to a District Court; requests by parties having standing under Executive Order 11491, as amended; and in a proceeding authorized by Executive Order 11491, as amended.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in file folders, binders, and on index cards.

Retrievability: Indexed by subject matter and the names of parties involved.

Safeguards: Limited to individuals whose official duties require access and the parties having a standing in a particular labor-management proceeding.

Retention and disposal: Maintained up to five years and sent to the National Archives.

System manager(s) and address: Director of Personnel, Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506. District and Regional Directors at regional and district offices (see appendix).

Notification procedure: Employees and former employees of EEOC wishing to know whether information about them is maintained in this system of records should address inquiries to the Director of Personnel, at the above address, if they are or were employed at headquarters, Washington, D. C. or to the District and Regional Directors at the installation where the individual is or was employed (see appendix). The individuals should provide their full name, date of birth and social security number.

Record access procedures: Same as the above.

Contesting record procedures: Same as the above.

Record source categories: The individual to whom the record pertains; members of the bargaining unit; EEOC officials whose official duties require access to the records; authorized officials from the Department of Labor, Civil Service Commission, Federal Mediation and Conciliation Service, Federal Labor Relations Council, Federal Service Impasses Panel, and other third parties to disputes resolution, including arbitrators; other federal agencies having a standing in the Commission's dispute or requesting information; research groups; courts and information; research groups; courts and litigation; the Congress upon request.

EEOC—10

System name: Voluntary Programs Skills Bank—EEOC

System location: Office of Voluntary Porgrams, Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506.

Categories of individuals covered by the system: Members of the general public and employees of the federal government who have

voluntarily submitted resumes or statements of personal qualifications for inclusion within the skills bank.

Categories of records in the system: Includes name, address, date of birth, education, employment history, military and criminal histories, special qualifications, voting residence, social security number, letters of recommendation, etc.

Authority for maintenance of the system: 42 U.S.C. 2000e-4(g); 44 U.S.C. 396(a).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by authorized EEOC personnel in the Office of Voluntary Programs for technical aid to employers requesting Commission assistance in an effort to engage in a remedial action program; assistance to individuals seeking employment; referrals for employment.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Submitted data stored on paper and punch cards.

Retrievability: Indexed by names of individuals, skills and qualifications.

Safeguards: Maintained by authorized personnel only and when not in use kept in locked file cabinet.

Retention and disposal: System kept indefinitely and updated annually. When data is disposed of it is manually shredded.

System manager(s) and address: Director, Office of Voluntary Programs, Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D. C. 20506.

Notification procedure: Individuals who have submitted resumes or statements of personal qualifications are aware of the record on themselves maintained by the Commission. They may, however, contact the system manager regarding the existence of such records pertaining to them. The request should include the full name, date and place of birth of the individual and social security number.

Record access procedures: Same as the above.

Contesting record procedures: Same as the above.

Record source categories: The individual to whom the record pertains.

EEOC—11

System name: Correspondence File—EEOC

System location: Seattle District Office and Chicago District Office (See Appendix).

Categories of individuals covered by the system: Charging parties, applicants for employment and members of the general public.

Categories of records in the system: Includes name of inquiring individuals and information submitted by them; date inquiry received; date response sent out, issue raised in the inquiry; to whom inquiry assigned.

Authority for maintenance of the system: 44 U.S C. 396(a).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used (a) as a control of incoming correspondence, a record file as to the nature and status of the correspondence, a reference of assignment for outgoing response, a reference to previous correspondence on the same subject; and (b) to avoid duplication of responses and to assure a reply to all those who have sent inquiries to this office.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are stored on paper in file folders.

Retrievability: This system is indexed numerically by date of inquiry and alphabetically by name of inquirer for each yearly quarter.

Safeguards: The files are stored in locked file cabinets. Access to the files is limited to office employees.

Retention and disposal: Retained for one (1) year after completion of necessary action, then destroyed manually.

System manager(s) and address: Director, Seattle District Office, Equal Employment Opportunity Commission, Times Square Building, 4th Floor, 414 Olive Way, Seattle, Washington 98101.

Notification procedure: Inquiries concerning this system of records should be addressed to the system manager. It is necessary to furnish the following information in order to identify the individual whose records are requested: (1) full name of the individual , (2) mailing address to which reply should be mailed, (3) date(s) of correspondence.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Correspondence from charging parties, applicants for employment and the general public.

EEOC—12

System name: Officials' Biographical File — EEOC

System location: Office of Public Affairs, Equal Employment Opportunity Commission, Columbia Plaza, 2401 E Street, N. W., Washington, D.C.

Categories of individuals covered by the system: Current and past EEOC officials.

Categories of records in the system: Includes name, date and place of birth, education and employment histories, job duties, past experiences.

Authority for maintenance of the system: 44 U.S.C. 396(a).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by the staff of the Office of Public Affairs to answer public inquiries regarding EEOC officials.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are stored on paper in file folders.

Retrievability: This system is indexed alphabetically by last name of official.

Safeguards: The files are stored in a standard file cabinet which is available to office employees.

Retention and disposal: Maintained indefinitely.

System manager(s) and address: Director, Office of Public Affairs, Equal Employment Opportunity Commission, 2401 E Street, N. W., Washington, D.C. 20506.

Notification procedure: Inquiries concerning this system of records should be addressed to the system manager. It is necessary to furnish the following information in order to identify the individual whose records are requested: (1) full name of the individual, (2) mailing address to which reply should be mailed.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: The official to whom the information pertains.

EEOC—13

System name: Employee Performance, Effectiveness and Evaluation System.

System location: Dallas Regional Office and District Offices within the Dallas Region [See office addresses at 40 F.R. 39222, August 27, 1975.]

Categories of individuals covered by the system: Equal Employment Specialists employed within the Dallas Region.

Categories of records in the system: Names of employees, dates of evaluations, file numbers of compliance files evaluated, and categorization and description of any errors or deficiencies in the investigation or conciliation, job title and/or grade, and tabulation of units of work completed, and quality control data.

Authority for maintenance of the system: 44 U.S.C. 3101

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by Dallas Regional Director, District Directors and Deputy Directors of District Offices within the region for assignment making, for employee evaluation of error patterns, for definition of training needs, and for identification of problems which may be corrected by changing procedures.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are stored on paper and prepared forms in file folders.

Retrievability: This system is indexed alphabetically by the last name of employee or numerically by employee code.

Safeguards: The files are locked in file cabinets or stored in desk drawers. Access is limited to Commission employees whose official duties require access.

Retention and disposal: Records are retained for two years after preparation or until completion of any grievance, complaint, award, or other action, adverse or otherwise, which may require their retention for longer than two years. They are then destroyed.

System manager(s) and address: Director, Dallas Regional Office and Directors of the District Offices within the Dallas Region [See addresses of offices published at 40 F.R. 39222, August 27, 1975.]

Notification procedures: Inquiries concerning this system of records should be addressed to the system manager. It is necessary to furnish the following information in order to identify the individual whose records are requested: (1) the full name of the individual (2) the district office where the individual is or was employed; (3) social security number; (4) the address to which the response should be sent.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Work units are submitted by employees. Analyses are made of employees' and supervisors' performance by supervisors and District Director, respectively.

EEOC—14

System name: Day Care Center Study Records

System location: Educational Systems Corporation, 1710 N Street, N.W., Washington, D.C. 20036

Categories of individuals covered by the system: In this system will be maintained information on those persons and their children who participate in the EEOC's day-care center study program. An opportunity to participate in this program will be offered to current EEOC employees stationed at the EEOC's Headquarters Office and the Washington District Office. In addition, employees of other federal agencies who are stationed within the EEOC's Headquarters Office building, 2401 E Street, N.W., Washington, D.C., will also be offered an opportunity to enroll their children in the day-care program.

Categories of records in the system: Records will be maintained on three categories of individuals as described below. (1) Only EEOC Headquarters employees are participating in the study aspect of the day-care program. As to them, the following information will be maintained. Employee name, age, sex, ethnic category, education, business and residential address and telephone number, grade level, years in grade, records of interviews with them regarding their impressions of job satisfaction and productivity, records on interviews with them regarding their impressions of the day-care program, and their time and attendance records. (2) EEOC employees at the Washington District Office and employees of other federal agencies stationed within the EEOC Headquarters Office building, 2401 E Street, N.W., Washington, D.C., will be allowed to enroll their children in the day-care program, however, they will not participate in the job productivity and satisfaction study aspect of the program. As to these persons, the following information will be maintained. Employee name, age, sex, ethnic category, and business and residential address and telephone number. (3) With regard to the children enrolled in the day-care center study program, the following information will be maintained. Name, age, sex, ethnic category, health certificate and records of the educational development of participating children.

Authority for maintenance of the system: 42 U.S.C. 2000e-4(g)(5) and 12(a); 44 U.S.C. 3101

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The information collected for and maintained in this system will be used for two purposes: (1) the identifying information on all children enrolled in the program, and their parents, will be used for general record keeping purposes; (2) the information obtained from EEOC Headquarters personnel who are participating in the study aspect of the program will be used for research purposes only to study the effects of providing day-care services on the job productivity and worker satisfaction of the participants. The information will be disclosed, as necessary, to employees of Educational Systems Corporation, which is conducting the study. Commission employees will have access to the information obtained only in aggregate form.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Stored on computer tape, computer print-outs and letter sized paper.

Retrievability: Indexed numerically by assigned employee code and alphabetically by employee name.

Safeguards: Stored in standard file cabinets and on computer tapes and print-outs. Access is limited per routine use described above.

Retention and disposal: Retained for one year and then manually destroyed. Individual identifiers will be obliterated by the Educational Systems Corporation prior to the transfer of the study records to the EEOC.

System manager(s) and address: Director, Office of Planning, Research and Systems, Equal Employment Opportunity Commission, 2401 E Street, N.W., Washington, D.C. 20506.

Notification procedure: Individuals wishing to know whether information about them is maintained in this system of records should address inquiries to the system manager. All inquiries should furnish the full name of the individual and mailing address to which the reply should be sent. (See EEOC Privacy Act Regulations, 29 CFR Part 1611.)

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Information maintained in this system will be obtained from the individual's time and attendance records and from the individuals themselves.

ADDITIONAL ROUTINE USES FOR SYSTEMS EEOC—2 AND 4-13

The following "routine uses" were adopted by the Equal Employment Opportunity Commission for systems EEOC—2, and 4-13 at 42 F.R. 69 (January 3, 1977):

1. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a "routine use," to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

2. A record from this system of records may be disclosed as a "routine use" to a Federal, State or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information such as current licenses, if necessary, to obtain information relevant to an agency decision concerning the hiring or retention of any employee, the issuance of a security clearance, the letting of a contract or the issuance of a license, grant or other benefit.

3. A record from this system of records may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision in the matter.

4. A record from this system of records may be disclosed to an authorized appeal grievance examiner, formal complaints examiner, equal employment opportunity investigator, arbitrator or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee. A record from this system of records may be disclosed to the United States Civil Service Commission in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

5. A record from this system of records may be disclosed to officers and employees of the General Services Administration in connection with administrative services provided to this agency under agreement with GSA.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Expenses, Rate of Assessment, and Carryover of Unexpended Funds

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This document authorizes expenses and a rate of assessment for the 1977-78 fiscal period, to be collected from handlers to support activities of the Valencia Orange Administrative Committee which locally administers the Federal marketing order covering Valencia oranges grown in Arizona and designated part of California.

DATES: November 1, 1977, through October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: On April 18, 1978, notice was published in the FEDERAL REGISTER (43 FR 16346) inviting written comments not later than May 1, 1978, on proposed expenses, rate of assessment, and carryover of unexpended funds under Marketing Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. None were received. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

After consideration of all relevant matter presented, including the proposals in the notice, it is found that:

§ 908.217 Expenses, rate of assessment, and carryover of unexpended funds.

(a) Expenses that are reasonable and likely to be incurred by the Valencia Orange Administrative Committee during the period November 1, 1977, through October 31, 1978, will amount to $356,040.

(b) The rate of assessment for said period payable by each handler in accordance with § 908.41 is fixed at $0.0145 per carton of oranges.

(c) Unexpended assessment funds in excess of expenses incurred during the fiscal period ended October 31, 1977, shall be carried over as a reserve in accordance with § 908.42.

It is further found that good cause exists for not postponing the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) as the order requires that the rate of assessment for a fiscal period shall apply to all assessable Valencia oranges handled from the beginning of the period.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674).

Dated: May 2, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[6210-01]

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Regs. D and Q; Docket No. R-0157]

PART 204—RESERVES OF MEMBER BANKS

PART 217—INTEREST ON DEPOSITS

Investment of U.S. Treasury Funds

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors of the Federal Reserve System has amended Regulation D and Regulation Q to exempt from deposit treatment a member bank's liability on its promissory note that evidences an investment of funds by the United States Treasury. Consequently, these liabilities of member banks will not be subject to the reserve requirements and interest rate limitations imposed on member bank deposits.

EFFECTIVE DATE: July 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Allen L. Raiken, Associate General Counsel, Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3625.

SUPPLEMENTARY INFORMATION: Regulations D and Q provide, in part, that a member bank's liability on its promissory note will not be considered a "deposit" of the member bank if the note is issued to a domestic banking office of another bank, an agency of the United States, or the Government Development Bank of Puerto Rico. Under the amendments adopted today, a note issued by a member bank to evidence an investment of funds by the United States Treasury will also be exempt from deposit treatment.

This action is taken in recognition of Pub. L. 95-147, which authorizes the Secretary of the Treasury to invest operating cash in obligations of depositaries maintaining Treasury tax and loan accounts. The Board of Governors believes that Congress intended that these member bank obligations be exempt from reserve requirements and interest rate limitations. Accordingly, the amendments approved today will promote Congress' purpose in enacting this legislation to provide Treasury with a direct means of obtaining interest on its cash balances. The Treasury has issued rules regarding implementation of this legislation and it is intended that the Board's rules and the Treasury's rules take effect simultaneously on July 6, 1978.

It should be noted that these amendments do not affect the status of Treasury tax and loan accounts as demand deposit accounts. Funds placed in these accounts at member banks will retain their status as demand deposits until such time as they are remitted to the Treasury or until they are invested by Treasury in obligations of the depositaries pursuant to the rules adopted by Treasury. Until such time, member banks will be required to maintain reserves against the Treasury tax and loan demand deposits.

Because these amendments implement legislation enacted by Congress

V 4 3 / 8 9

and augment rules published by Treasury, the Board believes that significant public benefits will immediately result from their adoption. The immediate adoption of the final rules will remove uncertainty concerning the deposit status of promissory notes issued to Treasury by member banks, and thus will permit banks to begin preparing immediately for participation in the Treasury program. Consequently, the Board has determined that notice and public participation with respect to these amendments is unnecessary and would be contrary to the public interest.

Pursuant to section 19(a) of the Federal Reserve Act (12 U.S.C. 461), effective July 6, 1978, § 204.1(f) of Regulation D (12 CFR 204) and § 217.1(f) of Regulation Q (12 CFR 217) are amended to read as follows:

§ 204.1 Definitions.

• • • • •

(f) *Deposits as including certain promissory notes and other obligations.* For the purposes of this Part, the term "deposits" also includes a member bank's liability on any promissory note, acknowledgment of advance, due bill, banker's acceptance, or similar obligation (written or oral) that is issued or undertaken by a member bank as a means of obtaining funds to be used in its banking business, except any such obligation that:

(1) Is issued to (or undertaken with respect to) and held for the account of (i) a domestic banking office[4] of another bank, or (ii) the United States or an agency thereof, or the Government Development Bank for Puerto Rico;

• • • • •

§ 217.1 Definitions.

• • • • •

(f) *Deposits as including certain promissory notes and other obligations.* For the purposes of this Part, the term "deposits" also includes any member bank's liability on any promissory note, acknowledgment of advance, due bill, or similar obligation (written or oral) that is issued or undertaken by a member bank principally as a means of obtaining funds to be used in its banking business, except any such obligation that:

(1) Is issued to (or undertaken with respect to) and held for the account of (i) a bank or an institution the time deposits of which are exempt from § 217.7 pursuant to § 217.3(g), or (ii) the United States or an agency thereof, or the Government Development Bank for Puerto Rico;

• • • • •

Board of Governors of the Federal Reserve System, April 28, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[6210-01]

[Regs. B and Z; Docket No. R-0154]

PART 226—TRUTH IN LENDING

Amendment to Procedures for Issuing Official Staff Interpretations; Correction

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Correction.

SUMMARY: This document corrects a previous FEDERAL REGISTER document.

FOR FURTHER INFORMATION CONTACT:

Anne Geary, Chief Staff Attorney; Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3761.

In FR Doc. 78-11758 appearing at page 18540 of the issue for Monday, May 1, 1978, § 226.1(d)(2)(i) should have read:

• • • • •

(d) • • •

"(2)(i) Official staff interpretations will be issued at the discretion of designated officials. No such interpretation will be issued approving creditors' forms or statements. Any request for an official staff interpretation of this Part must be in writing and addressed to the Director of the Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The request must contain a complete statement of all relevant facts concerning the credit transaction or arrangement and must include copies of all pertinent documents."

Board of Governors of the Federal Reserve System, May 1, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[4910-13]

Title 14—Aeronautics and Space

CHAPTER 1—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-NW-11-AD; Amdt. 39-3209]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 747

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Airworthiness Directive (AD) requires inspection of the cabin floor support structure of Boeing Model B-747 airplanes in the vicinity of the main landing wheel wells, and repair if necessary. Several instances of cracks in floor beams and one crack in the lower pressure deck have been reported. Cracked floor structure could result in loss of cabin pressurization.

DATE: Effective date: May 16, 1978.

ADDRESSES: Boeing service bulletins specified in this directive may be obtained upon request to Boeing Commercial Airplane Co., P.O. Box 3707, Seattle, Wash. 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108.

FOR FURTHER INFORMATION, CONTACT:

Iven Connally, Airframe Section ANW-212, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108, telepone 206-767-2516.

SUPPLEMENTARY INFORMATION: Operators have reported several instances of floor-beam cracks between fuselage stations 1265 and 1480 on Boeing Model B-747 airplanes. In one case, the floor beam had failed through the lower caps, resulting in a 5-inch-long crack in the lower pressure deck. Failure of the floor support structure could result in cabin depressurization and/or failure of passenger seat tracks. This AD is issued to prevent floor support failures which could result in those consequences.

DRAFTING INFORMATION

The principal authors of this document are Iven Connally, Engineering and Manufacturing Branch, and Richard Salwen, Acting Regional Counsel, Northwest Region.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

BOEING: Applies to Model 747 series airplanes certificated in all categories listed in Boeing Service Bulletin 747-53-2183 with more than 5,000 landings. Compliance required as indicated. To prevent floor-beam structural failures accomplish the following:

A. Within 100 landings after the effective date of this AD, unless already accomplished, within the last 100 landings, thoroughly clean the exposed portion of the main deck pressure web inside the main landing gear wheel wells from fuselage stations 1265 to 1480 and visually inspect the pressure web for cracks as described in Boeing Service Bulletin 747-53-2183 or later FAA approved revisions.

1. If no cracks are found, repeat the above visual inspection at intervals not to exceed 200 landings until the internal inspection of paragraph A.2 or paragraph B is accomplished.

2. If cracks are found in the pressure web, before further flight, visually inspect all floor beams for cracks in accordance with Boeing Service Bulletin 747-53-2183 or later FAA approved revisions from fuselage stations 1265 to 1480. Remove all corrosion and repair all cracks in the floor beams and pressure webs in accordance with the Structural Repair Manual, or Boeing Service Bulletin 747-53-2183 or later FAA approved revisions, or in a manner approved by the Chief, Engineering and Manufacturing Branch, ANW-210. Spray the floor beams and pressure webs with BMS-3-23 moisture inhibitor or equivalent. Following repair, reinspect per paragraph B below.

B. Within 2,000 landings or 24 months, whichever comes first, after the effective date of this AD, and thereafter at intervals not to exceed 2,000 landings, visually inspect the floor beams from fuselage stations 1265 to 1480 for cracks in accordance with Boeing Service Bulletin 747-53-2183 or later FAA approved revisions. Repair any cracks in accordance with paragraphs A.2 or C before further flight. After the internal inspection of the floor beams, the main deck pressure web inspection of paragraph A need not be conducted.

C. Modification of the floor beams in accordance with the terminating action procedures described in Boeing Service Bulletin 747-53-2183 or later FAA approved revision, or procedures approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region, constitutes terminating action under the provisions of this AD.

D. For purposes of complying with this AD subject to acceptance by the assigned FAA Maintenance Inspector, the number of landings may be determined by dividing each airplane's hours time-in-service by the operator's fleet average from takeoff to landing for the airplane type. Only pressurized flights need be considered when establishing number of landings on the airplane.

E. Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA Northwest Region, may adjust the inspection interval if the request contains substantiating data to justify the increase for that operator.

F. Aircraft may be ferried to a base for maintenance in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Co., P.O. Box 3707, Seattle, Wash. 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108.

This amendment becomes effective May 16, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A107.

Issued in Seattle, Wash., on April 27, 1978.

C. B. WALK, JR.,
Director, Northwest Region.

The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

[FR Doc. 78-12443 Filed 5-5-78; 8:45 am]

[4910-13]

[Airspace Docket No. 78-WE-8]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zones

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action alters the wording in designated part-time control zone descriptions from "Airman's Information Manual" to "Airport/Facility Directory." The designated part-time control zones' effective dates and times will be carried in the "Airport/Facility Directory" instead of the "Airman's Information Manual."

EFFECTIVE DATE: May 18, 1978.

FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, Calif. 90261, telephone 213-536-6182.

SUPPLEMENTARY INFORMATION:

HISTORY

Part-time control zone descriptions contained in subpart F, § 71.171 (43 FR 355) of FAR Part 71 include the information that the effective date and time will thereafter be continuously published in the "Airman's Information Manual." On May 18, 1978, this information will be transferred to the new "Airport/Facility directory" and will no longer appear in the "Airman's Information Manual." This will necessitate deletion of the "Airman's Information Manual" and the substitution therefor of "Airport/Facility Directory" in the descriptions.

THE RULE

This amendment to Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) alters the description of designated part-time control zones by deleting the words "Airman's Information Manual" from the text and substituting therefor the words "Airport/Facility Directory."

Since these amendments are editorial in nature and impose no additional burden on any person, notice and public procedure hereon are unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Thomas W. Binczak, Air Traffic Division and DeWitte T. Lawson, Jr., Esquire, Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT, May 18, 1978.

§ 71.171 [Amended]

In Subpart F, § 71.171 (43 FR 355) the following control zone descriptions are altered by deleting the words "Airman's Information Manual" from the text and substituting therefor the words "Airport/Facility Directory."

[Airspace Docket No. 77-PC-2]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates a 700 foot and a 1200 foot above the surface transition area within 10 NM and 25 NM respectively, of the Wake Island air navigation aid classified as a VORTAC. This action provides controlled airspace for the protection of aircraft executing instrument approaches to the Wake Island Air Force Base.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone, 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On November 21, 1977, the FAA published for comment a proposal to designate 700 foot and 1200 foot transition areas at Wake Island (42 FR 59758). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received. Section 71.181 of Part 71 was published in the FEDERAL REGISTER on January 3, 1978, (42 FR 440). Since this action involved in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations designates a 700 foot transition area within a 10 NM radius of the Wake Island VORTAC and a 1200 foot transition area within a 25 NM radius of the Wake Island VORTAC. This action provides controlled airspace for the protection of aircraft executing Standard Instrument Approach Procedures (SIAP) to the Wake Island Air Force Base.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) is amended, effective 0901 G.m.t., July 13, 1978, by adding the following:

WAKE ISLAND

That airspace extending upward from 700 feet above the surface within a 10 NM radius of the Wake Island VORTAC; and that airspace extending upward from 1200 feet above the surface within a 25 NM radius of the Wake Island VORTAC.

Secs. 307(a), 313(a), 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

NOTE: The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 1, 1978.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

M Y 8 7 8 M

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations designates a 700 foot transition area within a 10 NM radius of the Johnston Island (Apollo) NDB and a 1200 foot transition area within a 25 NM radius of the Johnston Island (Apollo) NDB. This action provides controlled airspace for the protection of aircraft executing Standard Instrument Approach Procedures (SIAP) to the Johnston Island Airport.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) is amended, effective 0901 G.m.t., July 13, 1978, by adding the following:

JOHNSTON ISLAND, JOHNSTON ATOLL

That airspace extending upward from 700 feet above the surface within a 10NM radius of the Johnston Island (Apollo) NDB (Lat. 16°44'00"N., Long. 169°32'00"W.); and that airspace extending upward from 1200 feet above the surface within a 25 NM radius of the NDB.

(Secs. 307(a), 313(a), 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), and 1510); Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.69.)

NOTE: The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 1, 1978.

Title 17—Commodity and Securities Exchanges

CHAPTER I—COMMODITY FUTURES TRADING COMMISSION

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

Revision of Instructions to Registration Forms

AGENCY: Commodity Futures Trading Commission.

ACTION: Adoption of revised instructions to registration forms.

SUMMARY: The Commodity Futures Trading Commission ("Commission") has revised the instructions to its registration forms for all categories of registrants to require that all such forms be filed at the Commission's Central Regional Office in Chicago, Ill. This centralization of processing is expected not only to reduce costs for the Commission but to simplify the registration procedures for many applicants.

The forms which will be affected by this regulation are:

Form 7-R which is the application for registration or renewal of registration as a futures commission merchant, commodity trading advisor or commodity pool operator;

Form 8-R which is the application for registration or renewal of registration as an associated person or floor broker and is also used to furnish supplemental information in connection with an application on Form 7-R; and

Form 3-R on which changes and corrections to registration information are reported.

EFFECTIVE DATE: May 5, 1978.

ADDRESSES: See "Availability of Forms" under SUPPLEMENTARY INFORMATION.

FOR FURTHER INFORMATION CONTACT:

Robert Shiner, Office of Qualifications and Registration, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581, 202-254-9703.

SUPPLEMENTARY INFORMATION: In May 1977, the Commission consolidated its various registration forms then in use into two basic forms—Form 7-R to be used by firms and individuals seeking registration or renewal of registration as futures commission merchants, commodity trading advisors or commodity pool operators; and Form 8-R to be used by individuals seeking registration or renewal of registration as associated persons or floor brokers, and by certain other individuals who are controlling persons of futures commission merchants, commodity trading advisors and pool operators.[1] These revisions were made, in part, to streamline the Commission's processing of the forms and, in part, to reduce the filing burden by making it possible for certain applicants for registration in more than one capacity (*e.g.*, as a futures commission merchant and a commodity pool operator) to use a single form. Neither of these objectives of the Commission in consolidating its forms has been fully achieved, because certain applicants for dual registration have still been required to make duplicative filings in different regional offices of the Commission.[2]

Until recently, applications for registration were processed by the regional office which received them; however, in an effort to utilize its own resources more efficiently, the Commission has, beginning in April 1978, forwarded all such applications to its Central Regional Office in Chicago for processing. The Commission is hereby changing the instructions on the registration forms to conform to this new procedure by requiring that all applications for registration be sent directly to its Central Regional Office.

This centralization of processing is expected not only to reduce costs for the Commission but to simplify the registration procedures for many applicants. All applicants for initial registration as futures commission merchants, commodity trading advisors or commodity pool operators, which are seeking registration in more than one capacity, will hereafter be able to file one form (Form 7-R) with one Commission office for their multiple registrations. Also, individuals who are applying for registration as an associated person on Form 8-R and who also are applying for registration on Form 7-R in another capacity (e.g., as a commodity trading advisor) will send both forms to the Central Regional Office, and any necessary contacts between the Commission and the applicant concerning registration matters will be made through that office.[3]

As stated in the "Special Notice" on the first page of Forms 7-R and 8-R, the application forms, and schedules and supplements thereto, are considered by the Commission to be public records. These records, which have formerly been publicly available at the various regional offices where they were filed, will now be maintained in the public reference facilities of the Central Regional Office of the Commission. Section 3 of the "Special Notice" has been amended to reflect this change.

[1] *See* 42 FR 23988 (May 11, 1977).

[2] At present, applications for registration as a futures commission merchant or a floor broker are filed with the Commission's regional office nearest to the applicant; applications for registration as a commodity trading advisor or commodity pool operator are filed at the Commission's Eastern Regional Office in New York; and applications for registration as an associated person are filed at the Commission's Central Regional Office in Chicago.

[3] The Commission is aware that this new procedure may be slightly less convenient for applicants or registrants located in New York or Kansas City who were able, formerly, to file these applications in person at the Eastern or Southwestern Regional Offices of the Commission. The Commission, however, believes that the general benefits described above outweigh this consideration. Detailed questions concerning applications will now be answered by telephone or letter from the Central Regional Office.

V 4 3 / 8 9

AVAILABILITY OF FORMS

Forms with the revised instructions will be available about July 15, 1978. However, beginning May 5, 1978, all Form 3-R's, Form 7-R's and Form 8-R's should be sent to the Commission's Central Regional Office.

Blank forms will continue to be available at the Commission's main office in Washington, D.C., and at all Commission regional offices. Addresses are listed below:

Washington, D.C. Office, 2033 K Street NW., Washington, D.C. 20581.
Eastern Regional Office, One World Trade Center, Suite 4747, New York, N.Y. 10048.
Central Regional Office, 233 South Wacker Drive, 46th Floor, Chicago, Ill. 60606.
Minneapolis Office, Central Region, 510 Grain Exchange Building, Minneapolis, Minn. 55415.
Southwestern Regional Office, 4901 Main Street, Room 208, Kansas City, Mo. 64112.
Western Regional Office, Two Embarcadero Center, Suite 975, San Francisco, Calif. 94111.

• • • • •

Pursuant to Commission regulation 13.5(b)(2) (17 CFR 13.5(b)(2)) and the Administrative Procedure Act, 5 U.S.C. 553(b) (1970), the Commission for good cause finds that notice and public procedure with respect to the foregoing revisions are unnecessary. The Commission's reasons for so finding are that the revisions relate solely to the Agency's internal procedures for processing application forms and impose no additional burdens upon applicants. Thus, pursuant to sections 4d, 4e, 4f, 4k, 4m, 4n, and 8a of the Commodity Exchange Act, as amended (7 U.S.C. 6d, 6e, 6f, 6k, 6m, 6n, and 12a (1976).), the Commission hereby revises section 3 of the Special Notice of Form 7-R and Form 8-R, and instructions to Form 3-R, Form 7-R and Form 8-R, as set forth below:

CFTC FORM 7-R—SPECIAL NOTICE (PAGE 1)

Section 3 is revised to read as follows:

This application is considered by the Commission as a public record and will be available for inspection by any interested person. Copies wil be maintained in the public reference facilities of the Commission's Central Regional Office at Sears Tower, 46th Floor, 233 South Wacker Drive, Chicago, Ill. 60606. If the applicant believes that the placing of the information on this form, including Schedules A, B, or C, in the Commission's public files would reveal sensitive business information, or would constitute a clearly unwarranted invasion of personal privacy, the applicant may petition the Commission to treat such information as nonpublic in response to requests under the Freedom of Information Act (5 U.S.C. 552).

CFTC FORM 7-R—INSTRUCTIONS (PAGE 4)

The paragraph beginning "Who Must File" is revised to read as follows:

All futures commission merchants, commodity trading advisors and commodity pool operators must file this form in order to be registered with the Commission. Registration in one category (e.g., futures commission merchant) subject to regulation under the Commodity Exchange Act does not include registration in any other category subject to regulation under the Act (e.g., commodity pool operator). However, the same Form 7-R may be used for simultaneous application for registration, or renewal of registration, in more than one category. Where an applicant files a separate application for registration in one category and the information asked for in an item on a form has previously been provided by the applicant in response to the same or similar items contained in an application or supplement thereto, for registration in another category, such item may be answered by reference to the previous application or supplement thereto.

The paragraph beginning "Where to File" is revised to read as follows:

Futures commission merchants, commodity trading advisors and commodity pool operators should send their applications for registration or reregistration to the Central Regional Office of the Commodity Futures Trading Commission at Sears Tower, 46th Floor, 233 S. Wacker Drive, Chicago, Ill. 60606. Send the original copy of the completed Form 7-R, together with the registration fee. Retain the completed duplicate copy for your files. Also enclose related Form 8-R's, if any.

CFTC FORM 8-R—SPECIAL NOTICE (PAGE 1)

Section 3 is revised to read as follows:

This form, with the exception of the supplementary attachments to items 3, 4 and 12 (if any), is considered by the Commission as a public record and will be available for inspection by any interested person. Copies will be maintained in the public reference facilities of the Commission's Central Regional Office at Sears Tower, 46th Floor, 233 S. Wacker Drive, Chicago, Ill. 60606. The Commission may disclose supplementary information in items 3, 4, and 12 to third parties (1) in connection with matters in litigation; (2) in connection with Commission investigations; (3) where the information is furnished to regulatory, self-regulatory and law enforcement agencies to assist them in meeting responsibilities assigned to them by law; (4) where disclosure is required under the Freedom of Information Act (5 U.S.C. 552); and (5) in other circumstances in which withholding of such information appears unwarranted. If the individual believes that the placing of any other information on this form in the Commission's public files would constitute an unwarranted invasion of his personal privacy or would reveal sensitive business information, he may petition the Commission to treat such information as non-public in response to requests under the Freedom of Information Act.

CFTC FORM 8-R—INSTRUCTIONS (PAGE 4)

The paragraph beginning "Where to File" is revised to read as follows:

Send the original copy of the completed form and the registration fee, if applicable, to the Central Regional Office of the Commodity Futures Trading Commission at Sears Tower, 46th Floor, 233 S. Wacker Drive, Chicago, Ill. 60606. If you are filing in connection with the registration of a futures commission merchant, commodity trading advisor, or commodity pool operator, attach the original copy of the completed Form 8-R to the related Form 7-R. Retain the completed duplicate copy of Form 8-R for your files.

CFTC FORM 3-R—INSTRUCTIONS (ON REVERSE SIDE OF FORM)

Section 7 on "Where to File" is revised to read as follows:

Send the completed form to the Central Regional Office of the Commodity Futures Trading Commission at Sears Tower, 46th Floor, 233 S. Wacker Drive, Chicago, Ill. 60606. A duplicate copy of this statement should be kept for your files.

Issued in Washington, D.C., on May 2, 1978, by the Commission.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

[4710-06]

Title 22—Foreign Relations

CHAPTER I—DEPARTMENT OF STATE

SUBCHAPTER E—VISAS

[Dept. Reg. 108.755]

PART 42—VISAS: DOCUMENTATION OF IMMIGRANTS UNDER THE IMMIGRATION AND NATIONALITY ACT, AS AMENDED

Miscellaneous Amendments

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: Various of the Department's regulations governing immigrant visas are revised because of recent changes in law and for the sake of clarity. All of the changes are largely technical in nature.

EFFECTIVE DATE: May 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Gerald M. Brown, 202-632-1983.

SUPPLEMENTARY INFORMATION: The intent of § 42.65 (a), (b), and (d) and of section 203(e) of the Act, upon which they are based, is to provide for termination of registration of all categories of immigrants. The actual language used implied that the regulation applied only to numerically limited classes of immigrants. Section 42.65 (a), (b), and (d) are amended to make it clear that all categories of immigrants are subject to its provisions.

The abolition of contract location physicians necessitates the amendment of §§ 42.91(a)(1-6)(i) and 42.113(b) to eliminate reference to them.

Section 42.91(a)(10)(iv) has been rewritten largely in the interests of clarity.

Section 42.91(a)(12)(iii) is amended to include all persons contemplated under section 212(a)(12) of the Act, not just prostitutes and former prostitutes. The law requires this interpretation; and the Department has always adhered to the meaning of the law. Omission of the other categories from the regulations was an oversight.

Section 42.91(a)(22) is amended to render ineligible for an immigrant visa an alien who departed from or remained outside of the United States in order to avoid or evade service in the Armed Forces while he was in nonimmigrant status. Section 212(a)(22) of the Act requires such an interpretation, and the Department has always followed the meaning of the law. The previous exemption of this class of aliens in the regulation was a mistake.

The enactment on October 12, 1976 of Pub. L. 94-484, the Health Professions Educational Assistance Act of 1976, specifically Title VI, requires that § 42.91(c) be amended.

Section 42.124(a)(3) is amended to reflect the change in the starting date for the fiscal year.

Accordingly, Part 42 of Title 22, Code of Federal Regulations, is revised as set forth below.

§ 42.65 [Amended]

1. Amend § 42.65(a) by changing "on an immigrant visa waiting list" to read "for an immigrant visa".

2. Amend § 42.65(b) by changing "on an immigrant visa waiting list" to read "for an immigrant visa".

3. Amend § 42.65(d) by changing "on an immigrant visa waiting list" to read "for an immigrant visa".

§ 42.91 [Amended]

4. Amend § 42.91(a)(1-6)(i) by deleting the comma following "Health Service", by deleting "of a contract location physician," and by deleting "contract location or".

5. Section 42.91(a)(10)(iv) is amended to read as follows:

§ 42.91 Aliens ineligible to receive visas.

(a) *Aliens ineligible under the provisions of section 212(a) of the Act.*

• • • • •

(10) *Conviction of two or more offenses.* • • •

(iv) An alien shall not be considered ineligible to receive a visa under section 212(a)(10) of the Act by reason in part of having been convicted of an offense for which a full and unconditional pardon has been granted by the President of the United States, by the Governor of a State of the United States, by the former High Commissioner for Germany, acting pursuant to Executive Order 10062, or by the United States Ambassador to the Federal Republic of Germany acting pursuant to Executive Order 10608. A legislative pardon or a pardon, amnesty, expungement of penal record or any other act of clemency granted by a foreign state shall not serve to remove a ground of ineligibility under section 212(a)(10) of the Act.

• • • • •

6. Section 42.91(a)(12)(iii) is amended to read as follows:

§ 42.91 Aliens ineligible to receive visas.

(a) *Aliens ineligible under the provisions of section 212(a) of the Act.*

• • • • •

(12) *Prostitution, procuring and related activities.* • • •

(iii) A person who comes under one or more of the categories of persons described in section 212(a)(12) of the Act shall be ineligible to receive a visa under that section notwithstanding the fact that the acts engaged in may not be prohibited under the laws of the foreign country where the acts occurred.

• • • • •

§ 42.91 [Amended]

7. Amend § 42.91(a)(22) by deleting the comma following "if" and by deleting "having other than non-immigrant status,".

8. Amend § 42.91(c) by deleting the comma after "(84 Stat. 116)" and by adding immediately thereafter "and by the Act of October 12, 1976 (90 Stat. 2301),".

§ 42.113 [Amended]

9. Amend § 42.113(b) by deleting "by a contract location physician or".

§ 42.124 [Amended]

10. Amend § 42.124(a)(3) by changing "July 1 of each year," to read "the first day of each fiscal year,".

AUTHORITY: These amendments are issued pursuant to the authority contained in section 104 of the Immigration and Nationality Act (8 U.S.C. 1104). Compliance with section 553 of Title 5 of the United States Code as to notice of proposed rulemaking and delayed effective date is unnecessary in this instance because the amendments contained in this order are interpretative and editorial in nature.

Dated: March 30, 1978.

BARBARA M. WATSON,
Assistant Secretary for Consular Affairs.

[FR Doc. 78-12389 Filed 5-5-78; 8:45 am]

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

SUBCHAPTER F—ENROLLMENT

PREPARATION OF ROLLS OF CERTAIN TRIBES AND BANDS OF INDIANS

APRIL 17, 1978.

AGENCY: Bureau of Indian Affairs.

ACTION: Final rule.

SUMMARY: The Bureau of Indian Affairs is making miscellaneous changes to its regulations by revoking certain parts in their entirety, and by revoking certain paragraphs of another part. These amendments are necessary because the rolls for which the regulations were issued have been completed, thus the regulations no longer have any effect on either the Bureau or the public.

FOR FURTHER INFORMATION CONTACT:

Ms. Janet L. Parks, Chief, Branch of Tribal Enrollment Services, Bureau of Indian Affairs, 1951 Constitution Avenue NW., Washington, D.C. 20245, 202-343-2985; principal author, Janet L. Parks.

EFFECTIVE DATE: This amendment shall become effective May 8, 1978.

SUPPLEMENTARY INFORMATION: It is generally the policy of the Department of the Interior to allow time for interested persons to take part in the rulemaking process. However, this amendment is entirely administrative in nature. The public rulemaking process is dispensed with under the exception provided in 5 U.S.C. 553(b)(B)(1970).

This amendment is made pursuant to the authority vested in the Secretary of Interior by 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9).

Subchapter F, Chapter I, Title 25 of the Code of Federal Regulations is hereby amended as follows:

PART 41—PREPARATION OF ROLLS OF INDIANS

§ 41.3 [Amended]

Part 41, § 41.3 is amended by revoking the following paragraphs:

(b) Tlingit and Haida Tribes in Alaska.
(c) Miami Indians of Oklahoma and Indiana.
(d) Nooksack Tribe of Indians.
(e) Duwamish Tribe of Indians.
(f) Omaha Tribe of Nebraska.
(g) Quileute Tribe of Indians.

M Y 8 7 8 M

V 4 3 / 8 9

(h) Hoh Tribe.
(i) Brotherton Indians of Wisconsin.
(j) Upper and Lower Chehalis Tribes of Indians.
(k) Delaware Nation of Indians.
(l) Southern Paiute Nation of Indians.
(m) Wea, Piankashaw, Peoria and Kaskaskia Indians.
(n) Chemehuevi Tribe of Indians.
(p) Miami Indians of Oklahoma and Indiana.
(q) Wea, Piankashaw, Peoria and Kaskaskia Indians.
(u) Fort Sill Apache Tribe.
(v) Cherokee Nation of Oklahoma.
(aa) Apache Tribe of Oklahoma.

The following Parts of Subchapter F are revoked in their entirety:

PART 43—ENROLLMENT OF INDIANS OF THE CABAZON, AUGUSTINE, AND TORRES-MARTINEZ BANDS OF MISSION INDIANS IN CALIFORNIA [REVOKED]

PART 43a—MEMBERSHIP ROLL OF PONCA TRIBE OF NATIVE AMERICANS OF NEBRASKA [REVOKED]

PART 43b—PREPARATION OF A ROLL TO SERVE AS THE BASIS FOR THE DISTRIBUTION OF THE JUDGMENT FUNDS AWARDED THE CHEROKEE BAND OF SHAWNEE INDIANS [REVOKED]

PART 43c—PREPARATION OF A ROLL TO SERVE AS THE BASIS FOR THE DISTRIBUTION OF THE JUDGMENT FUNDS AWARDED THE NEHALEM AND TILLAMOOK BANDS OF THE TILLAMOOK INDIANS [REVOKED]

PART 43d—PREPARATION OF A ROLL TO SERVE AS THE BASIS FOR THE DISTRIBUTION OF THE JUDGMENT FUNDS AWARDED THE SNAKE OR PAIUTE INDIANS OF THE FORMER MALHEUR RESERVATION [REVOKED]

PART 43e—PREPARATION OF A ROLL TO SERVE AS THE BASIS FOR DISTRIBUTION OF JUDGMENT FUNDS AWARDED TO CERTAIN PERSONS OF CALIFORNIA INDIAN DESCENT [REVOKED]

PART 43f—PREPARATION OF ROLLS TO SERVE AS THE BASIS FOR DISTRIBUTION OF JUDGMENT FUNDS AWARDED THE CREEK NATION OF INDIANS IN INDIAN CLAIMS COMMISSION DOCKETS NUMBERED 21 AND 276 [REVOKED]

PART 43i—PREPARATION OF A ROLL TO SERVE AS THE BASIS FOR THE DISTRIBUTION OF JUDGMENT FUNDS AWARDED TO THE NORTHWESTERN BAND OF SHOSHONE INDIANS [REVOKED]

PART 43j—PREPARATION OF A ROLL TO SERVE AS THE BASIS FOR THE DISTRIBUTION OF JUDGMENT FUNDS AWARDED TO THE DELAWARE TRIBE OF INDIANS AND THE ABSENTEE DELAWARE TRIBE OF WESTERN OKLAHOMA [REVOKED]

PART 43k—REVISION OF THE FINAL ROLL OF THE MENOMINEE TRIBE OF WISCONSIN [REVOKED]

PART 43m—BRINGING UP TO DATE OF THE MEMBERSHIP ROLL OF THE CABAZON BAND OF MISSION INDIANS TO BE USED AS THE BASIS TO DISTRIBUTE JUDGMENT FUNDS [REVOKED]

PART 44—PREPARATION OF ROLLS FOR THE DISTRIBUTION OF FUNDS AWARDED CERTAIN INDIAN TRIBES OR BAND OF OREGON [REVOKED]

PART 45—PREPARATION OF A ROLL FOR THE DISTRIBUTION OF THE JUDGMENT AWARDED THE OTOE AND MISSOURIA TRIBE [REVOKED]

PART 49—PREPARATION OF A ROLL FOR THE DISTRIBUTION OF THE JUDGMENT AWARDED THE QUAPAW TRIBE [REVOKED]

PART 50—PREPARATION OF A MEMBERSHIP ROLL TO SERVE AS THE BASIS FOR THE DISTRIBUTION OF THE JUDGMENT FUNDS AWARDED TO THE OMAHA TRIBE OF INDIANS [REVOKED]

No further changes are made in Subchapter F.

Since this amendment is of an administrative nature and the regulations being revoked will have no further impact on the public, the 30-day deferred effective date is dispensed with under the exception provided in subsection (d)(3) of 5 U.S.C. 553 (1970).

NOTE.—The Bureau of Indian Affairs has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

FORREST J. GERARD,
Assistant Secretary,
Indian Affairs.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7545]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Repeal of Section 963 of Subpart F

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the repeal of the minimum distribution rules for controlled foreign corporations. Changes to the applicable tax law were made by the Tax Reduction Act of 1975. These regulations provide necessary guidance to the public for compliance with the law, and affect certain United States corporate shareholders of controlled foreign corporations.

DATE: The regulations are effective generally for taxable years of United States corporate shareholders or controlled foreign corporations ending after December 31, 1975.

FOR FURTHER INFORMATION CONTACT:

Jason R. Felton of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-4473, not a toll-free number.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On March 3, 1977, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 963 of the Internal Revenue Code of 1954, 42 FR 12199. The amendments were proposed to conform the regulations to section 602 (a)(1) of the Tax Reduction Act of 1975 (89 Stat. 58). After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

SECTION 963

A new section in the regulations, § 1.963-0, provides for the repeal of section 963 in § 1.963-1 through § 1.963-7. This new section also contains transitional rules for 1976, the first year in which the repeal is effective. In addition, § 1.963-0 has a provision that requires deficiency distributions to be made for appropriate taxable years subsequent to the repeal of section 963. Finally, § 1.963-0 (d) provides that any special adjustments to be made under the special rules of section 963 and the regulations thereunder (such as the special adjustments required under § 1.963-4), for a taxable year subsequent to the taxable year in which an election to receive a minimum distribution under section 963 was made, shall be made notwithstanding the repeal of section 963. This provision has been redrafted for clarity. Thus, no substantive changes were made.

CROSS-REFERENCES

Sections 1.1248-3 and 1.1248-4 have cross-references to section 963 or the regulations thereunder. These cross-references are used in a substantive manner that is unrelated to the minimum distribution concept. Since these provisions will survive the repeal of section 963, they have been amended in order to restate the same rules but without any reference to section 963.

A second group of cross-references to section 963 or the regulations thereunder has prospective effect despite the repeal of section 963. In each of these cases, the cross-reference relates to an event that took place in a year in which section 963 was in effect. This kind of event will continue to have tax consequences for taxable years subsequent to the repeal of section 963. Therefore, in order to assure the retention of these references in the regulations, the parenthetical "(applied as if section 963 had not been repealed by the Tax Reduction Act of 1975)" was added to the following provisions:

Sec.
1.952-1 (c)(2)(ii).
1.959-3 (b)(3).
1.960-1 (c)(1)(v).
1.964-1 (b)(2) (flush material).
1.964-1 (c)(2).
1.964-1 (c)(6)(iv) and (flush material).
1.964-2 (c)(1) (flush material).

The language of the parenthetical in the proposed regulations, "(as in effect prior to the Tax Reduction Act of 1975)," has been changed to make clear the intent of the amendment.

A third group of cross-references has no application for years subsequent to the repeal of section 963. Due to the effective date method of repeal used in § 1.963-0, no amendment of the following sections was required:

Sec.
1.78-1 (a).
1.78-1 (f).
1.864-5 (d).
1.951-1 (a)(2)(i).
1.952-1 (c)(2)(iii).
1.960-2 (a).
1.964-1 (b)(3) (Example (2)).
1.964-1 (c)(5).
1.964-3 (b)(1).
1.964-3 (c)(2).
1.964-4 (c).

Three cross-references were handled previously by T.D. 7481 published in the FEDERAL REGISTER (42 FR 20123) on April 18, 1977 (relating to the foreign tax credit for United States corporate shareholders in foreign corporations):

Sec.
1.902-1 (b)(1)(viii).
1.902-1 (g)(1).
1.902-1 (g)(2).

SECTION 1.902-1(g)(1) ELECTION

Paragraph 1 of the proposed regulations amended § 1.902-1(g)(3) by including a special election rule for corporate United States shareholders that have made a section 963 election in their last taxable year beginning before January 1, 1976. A comment suggested that the 30-day election period provided in the proposed regulations is inconsistent with the election allowed controlled foreign corporations that never made the § 1.902-1(g)(1) election or did not make the election for its last taxable year beginning before January 1, 1976. After considering this comment, it was decided that it would be inappropriate to allow some, but not all, taxpayers to make the election. Therefore, this paragraph has been deleted.

OTHER CHANGES

Paragraph 3 of the proposed regulations published on March 3, 1977 (42 FR 12199) amended the notice of proposed rulemaking published on August 9, 1976 (41 FR 33290) (relating to foreign base company shipping income). Since these latter proposed regulations have not been adopted, it would be inappropriate to adopt amendments to those regulations at this time.

DRAFTING INFORMATION

The principal author of this regulation was Karl P. Fryzel of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, the proposed amendments to the regulations other than those contained in paragraph 3, which will remain outstanding, are adopted subject to the changes set forth below:

PARAGRAPH 1. The third sentence of paragraph (g)(3) of § 1.902-1, as set forth in paragraph 1 of the notice of proposed rulemaking, is deleted.

PAR. 2. The amendments contained in paragraphs 2, 4, 5, 7, and 8 of the notice of proposed rulemaking are revised by deleting "(as in effect prior to the Tax Reduction Act of 1975)" each time it appears and inserting in its place, "(applied as if section 963 had not been repealed by the Tax Reduction Act of 1975)".

PAR. 3. Paragraph (d) if § 1.963-0, as set forth in paragraph 6 of the notice of proposed rulemaking, is revised to read as follows:

§ 1.963-0 *Repeal of section 963; effective dates.*

. . . . . .

(d) *Elections and special adjustments pursuant to section 963 to be taken into account for taxable years subsequent to the repeal of section 963.* If a United States shareholder of a controlled foreign corporation elects to receive a minimum distribution under section 963 for a taxable year, section 963 and the regulations thereunder may require certain elections and adjustments to be made in subsequent taxable years. These elections and adjustments shall be taken into account for subsequent taxable years as if section 963 were still in effect and no election to receive a minimum distribution were made after the effective date of the repeal of section 963. Examples of these elections and special adjustments include, but are not limited to, the election which may be made pursuant to § 1.963-3(g)(2), relating to the special extended distribution period, and the special adjustments to be made pursuant to § 1.963-4, relating to the minimum overall tax burden test.

MY 8 78 DM

V 43/89

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

WILLIAM E. WILLIAMS,
Acting Commissioner of Internal Revenue.

Approved: March 31, 1978.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

§ 1.952-1 [Amended]

Par. 1. Section 1.952-1(c)(2)(ii) is amended by inserting "(applied as if section 963 had not been repealed by the Tax Reduction Act of 1975)" immediately after the words "or paragraph (d)(2)(ii) of § 1.963-2".

§ 1.959-3 [Amended]

Par. 2. Paragraph (b)(3) of § 1.959-3 is amended by adding "(applied as if section 963 had not been repealed by the Tax Reduction Act of 1975)" immediately after the words "paragraph (e) of § 1.963-3".

§ 1.960-1 [Amended]

Par. 3. Paragraph (c)(1)(v) of § 1.960-1 is amended by adding "(applied as if section 963 had not been repealed by the Tax Reduction Act of 1975)" immediately after the words "paragraph (e) of § 1.963-3".

Par. 4. The following new section is added immediately after § 1.963:

§ 1.963-0 Repeal of section 963; effective dates.

(a) *Repeal of section 963.* Except as provided in paragraphs (b) and (c) of this section, the provisions of section 963 and §§ 1.963-1 through 1.963-7 are repealed for taxable years of foreign corporations beginning after December 31, 1975, and for taxable years of United States shareholders (within the meaning of section 951(b)) within which or with which such taxable years of such foreign corporations end.

(b) *Transitional rules for chain or group election*—(1) *In general.* If a United States shareholder (within the meaning of section 951(b) makes either a chain election pursuant to § 1.963-1(e) or a group election pursuant to § 1.963-1(f) for a taxable year of such shareholder beginning after December 31, 1975, then a foreign corporation shall be includible in such election only if—

(i) It has a taxable year beginning before January 1, 1976, which ends within such taxable year of the United States shareholder, and

(ii) It is either—

(A) A controlled foreign corporation or

(B) A foreign corporation by reason of ownership of stock in which such shareholder indirectly owns (within the meaning of section 958(a)(2)) stock in a controlled foreign corporation to which this subparagraph applies.

(2) *Series rule.* If any foreign corporation in a series of foreign corporations is excluded by subparagraph (1) of this paragraph from a chain or group election of a United States shareholder for its taxable year, then any foreign corporation in which the United States shareholder owns stock indirectly by reason of ownership of stock in such excluded corporation shall also be excluded from such election to the extent of such indirect ownership regardless of when its taxable year begins.

(3) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. (a) M is a domestic corporation, A, B, D, and E are controlled foreign corporations, and C is a foreign corporation other than a controlled foreign corporation. All five foreign corporations, each have only one class of stock outstanding. M owns directly all of the stock of A, which in turn owns directly all of the stock of B, which in turn owns directly 60 percent of the stock of D, which in turn owns directly all of the stock of E. M also owns directly 40 percent of the stock of C, which in turns owns directly the remaining 40 percent of the stock of D. M is a United States shareholder with respect to no other foreign corporation. M and B each use the calendar year as the taxable year. A, C, D, and E each use a fiscal year ending on November 30 as the taxable year. For calendar year 1976, M may make either a first-tier election with respect to A, a chain election with respect to C and D (to the extent of M's indirect 16-percent stock interest in D by reason of its direct ownership of 40 percent of the stock of C) or a group election with respect to A, C, D (to the extent of such 16-percent stock interest) and E (to the extend of M's indirect 16-percent stock enterest in E).

(b) M's indirect 100 percent stock interest in B will be excluded from any chain or group election made by M for calendar year 1976 since B is a controlled foreign corporation which does not have a taxable year beginning before January 1, 1976, which ends within the taxable year of M beginning after December 31, 1975, for which M has made either a chain or group election.

(c) M's indirect 60 percent stock interest through A and B in D and E will be excluded from any chain or group election made by M for calendar year 1976 since such 60 percent interests are indirectly owned by M by reason of its indirect ownership of stock in B, which is a foreign corporation which does not have a taxable year beginning before January 1, 1976, which ends within the taxable year of M beginning after December 31, 1975, for which M has made either a chain or group election.

(d) If C used the calendar year as its taxable year and was therefore excluded from a chain election made with respect to it and D, then D would also be excluded from such an election, since D would then be a foreign corporation in which M owns stock indirectly by reason of ownership of stock in C, which is excluded from such election.

(c) *Deficiency distributions.* The rules relating to deficiency distributions under section 963(e)(2) and § 1.963-6 shall continue to apply to a taxable year beginning after the effective date of the repeal of section 963 in which it is determined that a deficiency distribution must be made for an earlier taxable year for which a United States shareholder made an election to secure the exclusion under section 963 but failed to receive a minimum distribution.

(d) *Special adjustments pursuant to section 963 to be taken into account for taxable years subsequent to the repeal of section 963.* If a United States shareholder of a controlled foreign corporation elects to receive a minimum distribution under section 963 for a taxable year, section 963 and the regulations thereunder may require certain elections and adjustments to be made in subsequent taxable years. These elections and adjustments shall be taken into account for subsequent taxable years as if section 963 were still in effect and no election to receive a minimum distribution were made after the effective date of the repeal of section 963. Examples of these elections and special adjustments include, but are not limited to, the election which may be made pursuant to § 1.963-3(g)(2), relating to the special extended distribution period, and the special adjustments to be made pursuant to § 1.963-4, relating to the minimum overall tax burden test.

§ 1.964-1 [Amended]

Par. 5. Section 1.964-1 is amended by adding "(applied as if section 963 had not been repealed by the Tax Reduction Act of 1975)" in the following places:

1. Immediately after the words "under section 963(c) (2)(B) or (3)(B)" in the second sentence following paragraph (b)(2)(ii).

2. Immediately after the words "under section 963(c) (2)(B) or (3)(B)" in paragraph (c)(2).

3. Immediately after the words "under section 963" in paragraph (c)(6)(iv) and immediately after the words "under section 963(c) (2)(B) or (3)(B)" in the second sentence following paragraph (c)(6)(iv).

§ 1.964-2 [Amended]

Par. 6. The third sentence following paragraph (c)(1)(ii) of § 1.964-2 is amended by inserting "(applied as if section 963 had not been repealed by the Tax Reduction Act of 1975))" immediately after the words "(within the meaning of § 1.963-6".

§ 1.1248-3 [Amended]

Par. 7. Section 1.1248-3 is revised as follows:

1. Example (1) of paragraph (c)(3) is amended by deleting "80 percent" from the last sentence thereof and inserting in lieu thereof "30 percent".

2. Paragraph (c)(4) is amended by deleting the words "(d)(2)(i) (*d*) and (*e*) of § 1.963-2" and inserting in lieu thereof the words "(e) (2) and (3) of § 1.951-1".

3. Paragraph (d)(6) is amended by deleting the words "(d)(2)(i) (*d*) and (*e*) of § 1.963-2" and inserting in lieu thereof the words "(e)(2) and (3) of § 1.951-1".

§ 1.1248-4 [Amended]

Par. 8. Paragraph (e)(3) of § 1.1248-4 is amended by deleting the words "(d)(2)(i) (*d*) and (*e*) of § 1.963-2" and inserting in lieu thereof the words "(e) (2) and (3) of § 1.951-1".

[T.D. 7547]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

General Tax Credit

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to the general tax credit. Changes in the applicable tax law were made by the Revenue Adjustment Act of 1975, the Tax Reform Act of 1976, and the Tax Reduction and Simplification Act of 1977. These regulations provide necessary guidance to the public for compliance with the law.

EFFECTIVE DATES: The regulations are effective for taxable years ending after December 31, 1975, and before January 1, 1979.

FOR FURTHER INFORMATION CONTACT:

William E. Mantle of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-3734.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On April 18, 1977, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 42 of the Internal Revenue Code of 1954 (42 FR 20150). The amendments were proposed to conform the regulations to section 3 of the Revenue Adjustment Act of 1975 (89 Stat. 972) and to section 401 (a) of the Tax Reform Act of 1976 (90 Stat. 1555). A public hearing was neither requested nor held. One written comment was received suggesting a change in the proposed amendments. That suggestion has been implemented in this Treasury decision. The proposed amendments are thus adopted as revised by this Treasury decision.

Additionally, certain revisions to the proposed amendments are made by this Treasury decision in order to conform the regulations to the amendments made to section 42 by sections 101(c), 103(a), and 106(a) of the Tax Reduction and Simplification Act of 1977 (91 Stat. 132, 139, 141). These revisions parallel the statutory amendments and are not changes upon which public comment would be useful. For this reason, and because there is a need for immediate guidance for taxpayers, section 553 (b), (c) and (d) of the Administrative Procedure Act (5 U.S.C. 553 (b), (c), (d)) requiring further notice of proposed rulemaking, opportunity for public participation and delay in effective date are found to be inapplicable.

COMPUTATION OF CREDIT USING EXTRA EXEMPTIONS FOR AGE 65 AND BLIND

Section 101(c) of the Tax Reduction and Simplification Act of 1977 (91 Stat. 132) amended section 42(a)(2) to allow individuals electing the credit in an amount equal to $35 multiplied by their personal exemptions to take into account the additional exemptions allowed by section 151 (c) and (d) for age of 65 or more and for blindness. This change makes it possible to use tax tables that incorporate the general tax credit. In order to facilitate incorporation of the credit in the tax tables, section 42(a) was also amended to provide that the credit is a credit against the section 1 tax (or the tax imposed in lieu of the section 1 tax) and a new subsection (e) was added to section 42 to provide for incorporation of the credit in the tax tables.

COMPUTATION FOR MARRIED INDIVIDUALS FILING SEPARATE RETURNS

In order to simplify further the tax form and tax computation, section 42(c) was also amended by section 101(c) of the Tax Reduction and Simplification Act of 1977 to require a married individual filing a separate tax return to compute the credit in an amount equal to $35 multiplied by the number of personal exemptions to which the individual is entitled under section 151.

EXTENSION OF CREDIT

Following publication of the proposed amendments, section 103(a) of the Tax Reduction and Simplification Act of 1977 (91 Stat. 139, 141) extended the availability of the credit for an additional year. Thus, the credit is available for taxable years ending after December 31, 1975, and as amended by the Tax Reduction and Simplification Act of 1977 is available for taxable years beginning after December 31, 1976, and ending before January 1, 1979.

DRAFTING INFORMATION

The principal author of this regulation was William E. Mantle of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, 26 CFR Part 1 is amended as follows:

§ 1.42 [Deleted]

PARAGRAPH 1. Section 1.42 and the historical note are deleted.

PAR. 2. Section 1.42-1 is amended by revising the heading to read as follows:

§ 1.42-1 Tax credit for personal exemptions for taxable years ending in 1975.

* * * * * *

PAR. 3. The following new section is added immediately after § 1.42-1.

§ 1.42A-1 General tax credit for taxable years ending after December 31, 1975, and before January 1, 1979.

(a)(1) *Allowance of credit for taxable years ending after December 31, 1975, and beginning before January 1, 1977.* Subject to the special rules of paragraphs (b)(1), (c) and (d) and the limitation of paragraph (e)(1) of this section, an individual is allowed as a credit against the tax imposed by chapter 1 for the taxable year in the case of taxable years ending after December 31, 1975, and beginning before Janurary 1, 1977, an amount equal to the greater of—

(i) 2 percent of so much of the individual's taxable income as does not exceed $9,000, or

(ii) $35 multiplied by the total number of deductions for personal exemptions to which the individual is entitled for the taxable year under section 151 (b) and (e) and the regulations thereunder (relating to allowance of deductions for personal exemptions with respect to the individual, the individual's spouse, and dependents).

For purposes of applying subdivision (ii) of this paragraph (a)(1), the total number of deductions for personal exemptions shall not include any additional exemptions to which the individual or his spouse may be entitled based upon age of 65 or more or blindness under section 151 (c) or (d) and the regulations thereunder.

(2) *Allowance of credit for taxable years beginning after December 31,*

V 4 3 / 8 9

1976, and ending before Januray 1, 1979. Subject to the special rules of paragraphs (b)(2), (c) and (d) and the limitation of paragraph (e)(2) of this section, an individual is allowed as a credit against the tax imposed by section 1, or against the tax imposed in lieu of the tax imposed by section 1, for the taxable year in the case of taxable years beginning after December 31, 1976, and ending before January 1, 1979, an amount equal to the greater of—

(i) 2 percent of so much of the individual's taxable income for the taxable year, reduced by the zero bracket amount determined under section 63 (d), as does not exceed $9,000, or

(ii) $35 multiplied by the total number of deductions for personal exemptions to which the individual is entitled for the taxable year under section 151 and the regulations thereunder (relating to allowance of deductions for personal exemptions).

(b) *Married individuals filing separate returns—(1) For taxable years ending after December 31, 1975, and beginning before January 1, 1977.* In the case of taxable years ending after December 31, 1975, and beginning before January 1, 1977, a married individual who files a separate return for the taxable year is allowed as a credit for the taxable year an amount equal to either—

(i) 2 percent of so much of the individual's taxable income as does not exceed $4,500, or

(ii) $35 multiplied by the total number of deductions for personal exemptions to which the individual is entitled for the taxable year under section 151 (b) and (e) and the regulations thereunder, but only if both the individual and the individual's spouse elect to have the credit determined in the manner described in this subdivision (ii) for their corresponding taxable years. The elections shall be made by both married individuals separately calculating and claiming the credit in the manner and amount described in this subdivision (ii) on their separate returns for their corresponding taxable years. The rules of section 142 (a) and the regulations thereunder (relating to individuals not eligible for the standard deduction) in effect for taxable years beginning before January 1, 1977, apply to determine whether the taxable years of the individual and the individual's spouse correspond to each other. For purposes of applying this subdivision (ii), the total number of deductions for personal exemptions shall not include any additional exemptions to which the individual may be entitled based upon age of 65 or more or blindness under section 151 (c) or (d) and the regulations thereunder.

(2) *For taxable years beginning after December 31, 1976, and ending before January 1, 1979.* In the case of taxable years beginning after December 31, 1976, and ending before January 1, 1979, a married individual who files a separate return for the taxable year shall determine the amount of the credit for the taxable year under section 42(a)(2) and § 1.42A-1(a)(2)(ii).

(3) *Determination of marital status.* For purposes of this paragraph, the determination of marital status shall be made as provided by section 143 and the regulations thereunder (relating to the determination of marital status).

(c) *Return for short period on change of annual accounting period.* In computing the credit provided by section 42 and this section for a period of less than 12 months (hereinafter referred to as a "short period"), where income is to be annualized under section 443(b)(1) in order to determine the tax—

(1) The credit allowed by paragraph (a) (1)(i) and (2)(i) of this section shall be computed based upon the amount of the taxable income annualized under the rules of section 443(b)(1) and § 1.443-1(b)(1), or

(2) (i) The credit allowed by paragraph (a)(1)(ii) of this section shall be computed based upon the total number of deductions for personal exemptions to which the individual is entitled for the short period under section 151 (b) and (e) and the regulations thereunder (relating to allowance of deductions for personal exemptions with respect to the individual, the individual's spouse, and dependents), and

(ii) The credit allowed by paragraph (a)(2)(ii) of this section shall be computed based upon the total number of deductions for personal exemptions to which the individual is entitled for the short period under section 151 and the regulations thereunder (relating to allowance of deductions for personal exemptions).

As so computed, the credit allowed by section 42 and this section shall be allowed against the tax computed on the basis of the annualized taxable income. See § 1.443-1(b)(1)(vi).

(d) *Certain persons not eligible—(1) Estates and trusts.* The credit provided by section 42 and this section shall not be allowed in the case of any estate or trust. Thus, the credit shall not be allowed to an estate of an individual in bankruptcy or to an estate of a deceased individual. However, in the case of a deceased individual, the credit shall be allowed on the decedent's final return filed by his executor or other representative. Also, the credit provided by section 42 and this section shall be allowed in the case of a return filed by an estate of an infant, incompetent, or an individual under a disability.

(2) *Nonresident alien individuals.* The credit provided by section 42 and this section shall not be allowed in the case of any nonresident alien individual. As used in this subparagraph, the term "nonresident alien individual" has the meaning provided by § 1.871-2. See, however, section 6013(g) for election to treat nonresident alien individual as resident of the United States. The credit shall be allowed to an alien individual who is a resident of the United States for part of the taxable year. See § 1.871-2(b) for rules relating to the determination of residence of an alien individual. For purposes of paragraph (a) (1)(i) and (2)(i) of this section, the credit allowed shall be computed by taking into account only that portion of the individual's taxable income which is attributable to the period of his residence in the United States. For purposes of paragraph (a)(1)(ii) of this section, the credit allowed shall be computed by taking into account only the total number of deductions for personal exemptions to which the individual is entitled under section 151 (b) and (e) for the period of his residence in the United States. For purposes of paragraph (a)(2)(ii) of this section, the credit allowed shall be computed by taking into account only the total number of deductions for personal exemptions to which the individual is entitled under section 151 for the period of his residence in the United States. See § 1.871-13 for rules relating to changes of residence status during a taxable year.

(e) *Limitation—(1) For taxable years ending after December 31, 1975, and beginning before January 1, 1977.* For taxable years ending after December 31, 1975, and beginning before January 1, 1977, the credit allowed by section 42 and this section shall not exceed the amount of tax imposed by chapter 1 for the taxable year. In the case of an alien individual who is a resident of the United States for a part of the taxable year, the credit allowed by section 42 and this section shall not exceed the amount of tax imposed by chapter 1 for that portion of the taxable year during which the alien individual was a resident of the United States. See § 1.871-13.

(2) *For taxable years beginning after December 31, 1976, and ending before January 1, 1979.* For taxable years beginning after December 31, 1976, and ending before January 1, 1979, the credit allowed by section 42 and this section shall not exceed the amount of tax imposed by section 1, or the amount of tax imposed in lieu of the tax imposed by section 1, for the taxable year. In the case of an alien individual who is a resident of the United States for a part of the taxable year, the credit allowed by section 42 and this section shall not exceed the amount of tax imposed by section 1, or the amount of tax imposed in lieu of the tax imposed by section 1, for that portion of the taxable year during which the alien individual was a resident of the United States. See § 1.871-13.

(f) *Application with other credits.* In determining the credits allowed under—

(1) Section 33 (relating to foreign tax credit),

(2) Section 37 (relating to credit for the elderly),

(3) Section 38 (relating to investment in certain depreciable property),

(4) Section 40 (relating to expenses of work incentive programs), and

(5) Section 41 (relating to contributions to candidates for public office),

the tax imposed for the taxable year shall first be reduced (before any other reduction) by the credit allowed by section 42 and this section for the taxable year.

(g) *Income tax tables to reflect credit.* The tables prescribed under section 3 shall reflect the credit allowed by section 42 and this section.

(h) *Effective dates.* The credit allowed by section 42 and this section applies only for taxable years ending after December 31, 1975, and before January 1, 1979.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: April 12, 1978.

[T.D. 7544]

PART 7—TEMPORARY INCOME TAX REGULATIONS UNDER THE TAX REFORM ACT OF 1976

Exclusion of Disability Income Payments

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document amends the temporary regulations relating to the exclusion of certain disability income payments received in taxable years beginning on or after January 1, 1977. Changes to the applicable tax law were made by the Tax Reform Act of 1976 and the Tax Reduction and Simplification Act of 1977. These regulations provide guidance to taxpayers and their physicians, and affect taxpayers who receive disability income payments.

EFFECTIVE DATE: The regulations are generally effective for taxable years beginning on or after January 1, 1977.

FOR FURTHER INFORMATION CONTACT:

John H. Parcell of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-3287, not a toll-free call.

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document amends the Temporary Regulations under the Tax Reform Act of 1976 (26 CFR Part 7) to reflect the amendment of section 105 (d) of the Internal Revenue Code of 1954 by section 505 of the Tax Reform Act of 1976 (90 Stat. 1566), as amended by section 301 of the Tax Reduction and Simplification Act of 1977 (91 Stat. 151). The temporary regulations provided by this document will remain in effect until superseded by final regulations on this subject.

In general, section 505 of the Tax Reform Act of 1976 repealed the prior sick pay exclusion and substituted a new disability income exclusion of $100 a week. This exclusion is available only to taxpayers under age 65 who have retired on disability and are permanently and totally disabled. In addition, the exclusion is reduced dollar-for-dollar by adjusted gross income (including disability income) in excess of $15,000. The Act also specified circumstances in which certain taxpayers could begin to recover their pension or annuity costs.

CHANGE IN EFFECTIVE DATE

The changes made by section 505 of the Tax Reform Act of 1976, as originally enacted, applied to taxable years beginning on or after January 1, 1976. Section 301 of the Tax Reduction and Simplification Act of 1977 delayed the effective date of most of these changes for one year. Thus, the new disability income exclusion applies only to taxable years beginning on or after January 1, 1977. However, certain taxpayers were still permitted to begin recovering their pension or annuity costs in taxable years beginning in 1976. These amendments modify §7.105-1 to reflect these changes in the effective date.

PHYSICIAN'S CERTIFICATE

Under § 7.105-1, a taxpayer claiming the disability income exclusion must attach to his or her return a certificate from a qualified physician attesting to his or her permanent and total disability. This section also requires that the certificate contain an acknowledgment that the physician understands that the certificate will be used by the taxpayer to claim the exclusion for permanent and total disability on his or her income tax return. These amendments delete the requirement that the physician's certificate include this acknowledgment.

SUBSTANTIAL GAINFUL ACTIVITY

Section 105(d)(5) provides that a taxpayer is permanently and totally disabled if he is unable to engage in any substantial gainful activity by reason of a physical or mental impairment that satisfies certain requirements. However, neither section 105(d) nor § 7.105-1 defines substantial gainful activity. These amendments provide a definition of substantial gainful activity and examples of the application of this definition in specific factual situations.

DRAFTING INFORMATION

The principal author of these regulations was John H. Parcell of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, the Temporary Income Tax Reform Act of 1976 (26 CFR Part 7) are amended as follows:

INCOME TAX REGULATIONS

(26 CFR PART 7)

§ 7.105-1 [Amended]

PARAGRAPH 1. Section 7.105-1 is changed as follows:

1. A-2 is revised to read as follows:

A-2: The disability income exclusion and related annuity provisions of the Tax Reform Act of 1976 are effective for taxable years beginning on or after January 1, 1977. In addition, the Tax Reduction and Simplification Act of 1977 allows certain taxpayers to begin excluding pension or annuity costs in taxable years beginning in 1976. In the case of a retiree who uses the cash receipts and disbursements method of accounting, the new law applies to payments received on or after the effective date even if the payment is for a period before the effective date. Thus, a payment for December 1976 that is received in January 1977 by a calendar-year, cash-basis taxpayer is controlled by the new law.

2. A-4 (3) is revised by substituting "1977" for "1976".

3. A-4 (4) is revised by deleting the phrase "before January 1, 1976, was permanently and totally disabled on January 1, 1976", and substituting in its place, "before January 1, 1977, was

V 4 3 / 8 9

permanently and totally disabled on January 1, 1976 or January 1, 1977".

4. A-9 is revised by substituting "1978" for "1977" and "1977" for "1976".

5. The following sentence is added at the end of A-11:

A-11: • • • See § 7.105-2 for additional information relating to substantial gainful activity.

6. A-13 is revised to read as follows:

A-13: If retired on disability before January 1, 1977: A certificate from a qualified physician attesting that—

(a) The taxpayer was permanently and totally disabled on January 1, 1976 or January 1, 1977; or

(b) The records of the Veterans Administration show that the taxpayer was permanently and totally disabled as defined in 38 CFR 3.340 or 3.342 on January 1, 1976 or January 1, 1977.

If retired on disability during 1977 or thereafter: A certificate from a qualified physician attesting that—

(a) The taxpayer was permanently and totally disabled on the date he or she retired; or

(b) The records of the Veterans Administration show that the taxpayer was permanently and totally disabled as defined in 38 CFR 3.340 or 3.342 on the date he or she retired.

In either case, the taxpayer must attach the certificate or a copy of the certificate to his or her income tax return. The certificate shall give the physician's name and address. No certificate from any employer is required with regard to the determination of permanent and total disability.

7. Q-20 and A-20 are revised to read as follows:

Q-20: Did the changes made by the Tax Reduction and Simplification Act provide any relief to taxpayers eligible for the sick pay exclusion in taxable years beginning in 1976?

A-20: Yes. As originally enacted, the more restrictive provisions of the disability income exclusion applied to taxable years beginning in 1976. The Tax Reduction and Simplification Act postponed the effective date of these provisions for 1 year. Thus, taxpayers may claim the sick pay exclusion in taxable years beginning in 1976.

PAR. 2. The following § 7.105-2 is inserted after § 7.105-1:

§ 7.105-2 Substantial gainful activity.

(a) *Purpose.* This section defines substantial gainful activity for purposes of section 105(d) and § 7.105-1, prescribes rules for determining whether a taxpayer has the ability to engage in substantial gainful activity, and provides examples of the application of the definition and rules in specific factual situations.

(b) *Definition.* Substantial gainful activity is the performance of significant duties over a reasonable period of time in work for remuneration or profit (or in work of a type generally performed for remuneration or profit).

(c) *General rules.* (1) Full-time work under competitive circumstances generally indicates ability to engage in substantial gainful activity.

(2) Work performed in self-care or the taxpayer's own household tasks, and nonremunerative work performed in connection with hobbies, institutional therapy or training, school attendance, clubs, social programs, and similar activities is not substantial gainful activity. However, the nature of the work performed may be evidence of ability to engage in substantial gainful activity.

(3) The fact that a taxpayer is unemployed for any length of time is not, of itself, conclusive evidence of inability to engage in substantial gainful activity.

(4) Regular performance of duties by a taxpayer in a full-time, competitive work situation at a rate of pay at or above the minimum wage will conclusively establish the taxpayer's ability to engage in substantial gainful activity. For purposes of paragraphs (c)(4) and (c)(5) of this section, the minimum wage is the minimum wage prescribed by section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended, 29 U.S.C. 206(a)(1).

(5) Regular performance of duties by a taxpayer in a part-time, competitive work situation at a rate of pay at or above the minimum wage will conclusively establish the taxpayer's ability to engage in substantial gainful activity, if the duties are performed at the employer's convenience.

(6) In situations other than those described in paragraphs (c)(4) and (c)(5) of this section, other factors, such as the nature of the duties performed, may establish a taxpayer's ability to engage in substantial gainful activity.

(d) *Examples.* The following examples illustrate the application of the definition in paragraph (b) of this section and the rules in paragraph (c) of this section in specific factual situations. In examples 1 through 5, the facts establish that the taxpayers are able to engage in substantial gainful activity and, therefore, are not entitled to claim the disability income exclusion of section 105(d). In examples 6 through 9, the facts do not, of themselves, establish the taxpayers' ability or inability to engage in substantial gainful activity. In these situations, all the facts and circumstances must be examined to determine whether the taxpayers are able to engage in substantial gainful activity.

Example (1). Before retirement on disability, taxpayer worked for a hotel as night desk clerk. After retirement, the taxpayer is hired by another hotel as night desk clerk at a rate of pay exceeding the minimum wage. Since the taxpayer regularly performs duties in a full-time competitive work situation at a rate of pay at or above the minimum wage, he or she is able to engage in substantial gainful activity.

Example (2). A taxpayer who retired on disability from employment as a sales clerk is employed as a full-time babysitter at a rate of pay equal to the minimum wage. Since the taxpayer regularly performs duties in a full-time, competitive work situation at a rate of pay at or above the minimum wage, he or she is able to engage in substantial gainful activity.

Example (3). A taxpayer retired on disability from employment as a teacher because of terminal cancer. The taxpayer's physician recommended continuing employment for therapeutic reasons and taxpayer accepted employment as a part-time teacher at a rate of pay in excess of the minimum wage. The part-time teaching work is done at the employer's convenience. Even though the taxpayer's illness is terminal, the employment was recommended for therapeutic reasons, and the work is part-time, the fact that the work is done at the employer's convenience demonstrates that the taxpayer is able to engage in substantial gainful activity.

Example (4). A taxpayer who retired on disability, is employed full-time in a competitive work situation that is less demanding than his or her former position. The rate of pay exceeds the minimum wage but is about half of the taxpayer's rate of pay in the former position. It is immaterial that the new work activity is less demanding or less gainful than the work in which the taxpayer was engaged before his or her retirement on disability. Since the taxpayer regularly performs duties in a full-time, competitive work situation at a rate of pay at or above the minimum wage, he or she is able to engage in substantial gainful activity.

Example (5). A taxpayer who retired on disability from employment as a bookkeeper drives trucks for a charitable organization at the taxpayer's convenience. The taxpayer receives no compensation, but duties of this nature generally are performed for remuneration or profit. Some weeks the taxpayer works 10 hours, some weeks 40 hours, and over the year the taxpayer works an average of 20 hours per week. Even though the taxpayer receives no compensation, works part-time, and at his or her convenience, the nature of the duties performed and the average number of hours worked per week conclusively establish the taxpayer's ability to engage in substantial gainful activity.

Example (6). A taxpayer who retired on disability was instructed by a doctor that uninterrupted bedrest was vital to the treatment of his or her disability. However, because of financial need, the taxpayer secured new employment in a sedentary job. After attempting the new employment for approximately two months, the taxpayer was physically unable to continue the employment. The fact that the taxpayer attempted to work and did, in fact, work for two months, does not, of itself, conclusively establish the taxpayer's ability to engage in substantial gainful activity.

Example (7). A taxpayer who retired on disability accepted employment with a former employer on a trial basis. The purpose of the employment was to determine whether the taxpayer was employable. The trial period continued for an extended period of time and the taxpayer was paid at a rate equal to the minimum wage. However, because of the taxpayer's disability only light duties of a nonproductive make-work nature were assigned. Unless the activity is both substantial and gainful, the taxpayer is not engaged in substantial gainful activity. The activity was gainful because the taxpayer was paid at a rate at or above the minimum wage. However, the activity was not substantial because the duties were of a nonproductive, make-work nature. Accordingly, these facts do not, of themselves, establish the taxpayer's ability to engage in substantial gainful activity.

Example (8). A taxpayer who retired on disability from employment as a bookkeeper lives with a relative who manages several motel units. The taxpayer assisted the relative for one or two hours a day by performing duties such as washing dishes, answering phones, registering guests, and bookkeeping. The taxpayer can select the times during the day when he or she feels most fit to perform the tasks undertaken. Work of this nature, performed off and on during the day at the taxpayer's convenience, is not activity of a "substantial and gainful" nature even if the individual is paid for the work. The performance of these duties does not, of itself, show that the taxpayer is able to engage in substantial gainful activity.

Example (9). A taxpayer who retired on disability because of a physical or mental impairment accepts sheltered employment in a protected environment under an institutional program. Sheltered employment is offered in sheltered workshops, hospitals and similar institutions, homebound programs, and Veterans Administration domiciliaries. Typically, earnings are lower in sheltered employment than in commercial employment. Consequently, impaired workers normally do not seek sheltered employment if other employment is available. The acceptance of sheltered employment by an impaired taxpayer does not necessarily establish his or her ability to engage in substantial gainful activity.

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under 5 U.S.C. 553(b), or subject to the effective date limitation of 5 U.S.C. 553(d).

This Treasury decision is issued under the authority contained in sections 105(d) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1566; 68A Stat. 917; 26 U.S.C. 105(d); 7805).

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: April 21, 1978.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

[T.D. 7546]

PART 420—TEMPORARY REGULATIONS ON PROCEDURE AND ADMINISTRATION UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

Temporary Regulations relating to disclosures of Returns and Return Information for Purposes of Administering Titles I and IV of the Employee Retirement Income Security Act of 1974

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides amendments to the temporary regulations on procedure and administration (26 CFR Part 420) under the Employee Income Security Retirement Act of 1974, Pub. L. 93-406 (hereinafter referred to as "ERISA"), relating to disclosures of tax returns and tax return information for purposes of administering titles I and IV of ERISA as authorized by section 6103(*l*)(2) of the Internal Revenue Code. The amendments to the regulations would provide personnel of the Internal Revenue Service, the Department of Labor, the Justice Department, and the Pension Benefit Guaranty Corporation with guidance needed to comply with section 6103(*l*)(2) of the Code and would affect disclosures of tax returns and tax return information made after January 1, 1977.

EFFECTIVE DATE: January 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Diane L. Renfroe of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-3459, not a toll-free call.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 1022(h) of ERISA added section 6103(g) to the Internal Revenue Code relating to disclosure of information with respect to deferred compensation plans, and temporary regulations under section 6103(g) were published in 1974 and 1975. Section 1202 of the Tax Reform Act of 1976 (Pub. L. 94-455) amended section 6103, effective January 1, 1977. As amended, section 6103(*l*)(2) now provides the disclosure authority formerly provided by section 6103(g)(1).

These amendments to the temporary regulations conform the regulations to the amendments to section 6103 made by section 1202 of the Tax Reform Act of 1976 and provide additional rules regarding disclosures of returns and return information to and by officers and employees of the Department of Labor, the Pension Benefit Guaranty Corporation, and the Department of Justice for purposes of administering titles I and IV of ERISA.

DRAFTING INFORMATION

The principal author of this regulation was Karl P. Fryzel of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE TEMPORARY REGULATIONS

Accordingly, 26 CFR Part 420 is amended as follows:

PARAGRAPH 1. Section 420.6103(g)-1 is redesignated § 420.6103(*l*)(2)-1 and amended as follows:

§ 420.6103(*l*)(2)-1 Disclosure of returns and return information to Pension Benefit Guaranty Corporation for purposes of research and studies.

(a) *General rule.* Pursuant to the provisions of section 6103(*l*)(2) of the Internal Revenue Code of 1954 and subject to the requirements of paragraph (b) of this section, officers and employees of the Internal Revenue Service may disclose returns and return information (as defined by section 6103(b)) to officers and employees of the Pension Benefit Guaranty Corporation for purposes of, but only to the extent necessary in, conducting research and studies authorized by title IV of the Employee Retirement Income Security Act of 1974.

(b) *Procedures and restrictions.* Disclosure of returns or return information by officers or employees of the Internal Revenue Service as provided by paragraph (a) of this section will be made only upon written request to the Commissioner of Internal Revenue by the Executive Director of the Pension Benefit Guaranty Corporation describing the returns or return information to be disclosed, the taxable period or date to which such returns or return information relates, and the purpose for which the returns or return information is needed in the administration of title IV of the Employee Retirement Income Security Act of 1974, and designating by title the officers and employees of such corporation to whom such disclosure is authorized. No such officer or employee to whom returns or return information is disclosed pursuant to the provisions of paragraph (a) shall disclose such returns or return information to any person, other than the taxpayer by

V 4 3 / 8 9

whom the return was made or to whom the return information relates or other officers or employees of such corporation whose duties or responsibilities require such disclosure for a purpose described in paragraph (a), except in a form which cannot be associated with, or otherwise identify, directly or indirectly, a particular taxpayer.

PAR. 2. Section 420.6103(g)-2 is redesignated § 420.6103(*l*)(2)-2 and amended to read as follows:

§ 420.6103(*l*)(2)-2 Disclosure of returns and return information to Department of Labor for purposes of research and studies.

(a) *General rule.* Pursuant to the provisions of section 6103(*l*)(2) of the Internal Revenue Code of 1954 and subject to the requirements of paragraph (b) of this section, officers or employees of the Internal Revenue Service may disclose returns and return information (as defined by section 6103(b)) to officers and employees of the Department of Labor for purposes of, but only to the extent necessary in, conducting research and studies authorized by section 513 of the Employee Retirement Income Security Act of 1974.

(b) *Procedures and restrictions.* Disclosure of returns or return information by officers or employees of the Internal Revenue Service as provided by paragraph (a) of this section will be made only upon written request to the Commissioner of Internal Revenue by the Administrator of the Pension and Welfare Benefit Programs of the Department of Labor describing the returns or return information to be disclosed, the taxable period or date to which such returns or return information relates, and the purpose for which the returns or return information is needed in the administration of title I of the Employee Retirement Income Security Act of 1974, and designating by title the officers and employees of such department to whom such disclosure is authorized. No such officer or employee to whom returns or return information is disclosed pursuant to the provisions of paragraph (a) shall disclose such returns or return information to any person, other than the taxpayer by whom the return was made or to whom the return information relates or other officers or employees of such department whose duties or responsibilities require such disclosure for a purpose described in paragraph (a), except in a form which cannot be associated with, or otherwide identify, directly or indirectly, a particular taxpayer.

PAR. 3. Section 420.6103(g)-3 is redesignated § 420.6103(*l*)(2)-3 and amended to read as follows:

§ 420.6103(*l*)(2)-3 Disclosure to Department of Labor and Pension Benefit Guaranty Corporation of certain returns and return information.

(a) *Disclosures following general requests.* Pursuant to the provisions of section 6103(*l*)(2) and subject to the requirements of this paragraph, officers or employees of the Internal Revenue Service may disclose the following returns and return information (as defined by section 6103(b)) to officers and employees of the Department of Labor or the Pension Benefit Guaranty Corporation for purposes of, but only to the extent necessary in, the administration of title I or IV of the Employee Retirement Income Security Act of 1974 (hereinafter referred to in this section as the Act)—

(1) Notification of receipt by the Service of an application by a particular taxpayer for a determination of whether a pension, profit-sharing, or stock bonus plan, a trust which is a part of such a plan, or an annuity or bond purchase plan meets the applicable requirements of part I of subchapter D of chapter 1 of the Code;

(2) Notification that a particular application described in subparagraph (1) of this paragraph alleges that certain employees may be excluded from participation by reason of section 410(b)(2) (A) and (B) for the purpose of obtaining the finding necessary for the application of such section;

(3) An application by a particular taxpayer for a determination of whether a pension, profit-sharing, or stock bonus plan, or an annuity or bond purchase plan meets the applicable requirements of part I of subchapter D of chapter 1 of the Code with respect to a termination or proposed termination of the plan or to a partial termination or proposed partial termination of the plan, and any statement filed as provided by section 6058(b);

(4) Notification that the Service has determined that a plan or trust described in subparagraph (1) or (3) of this paragraph meets or does not meet the applicable requirements of part I of subchapter D of chapter 1 of the Code and has issued a determination letter to such effect to a particular taxpayer or that an application for such a determination has been withdrawn by the taxpayer;

(5) If the Department of Labor or the Pension Benefit Guaranty Corporation has commented on an application upon which a determination letter described in subparagraph (4) of this paragraph has been issued, a copy of the letter or document issued to the applicant;

(6) Notification to a particular taxpayer that the Service intends to disqualify a pension, profit-sharing, or stock bonus plan, a trust which is a part of such plan, or an annuity or bond purchase plan because such plan or trust does not meet the requirements of section 410(a) or 411 as of the date that such notification is issued;

(7) Notification required by section 3002(a) of the act of the commencement of any proceeding to determine whether a particular pension, profit-sharing, or stock bonus plan, a trust which is a part of such plan, or an annuity or bond purchase plan meets the requirements of section 410(a) or 411;

(8) Prior to issuance of a notice of deficiency to a particular taxpayer under section 6212, notification that the Service has determined that a deficiency exists under section 6211 with respect to the tax imposed by section 4971 (a) or (b) on such taxpayer, except that if the Service determines that the collection of such tax is in jeopardy within the meaning of section 6861(a), such notification will be disclosed only after issuance of the notice of deficiency or jeopardy assessment;

(9) Notification that the Service has waived the tax imposed by section 4971(b) on a particular taxpayer;

(10) Prior to issuance of a notice of deficiency to a particular taxpayer under section 6212, notification that a deficiency exists under section 6211 with respect to the tax imposed by section 4975 (a) or (b) on such taxpayer, except that if the Service determines that the collection of such tax is in jeopardy within the meaning of section 6861(a), such notification will be disclosed only after issuance of the notice of deficiency or jeopardy assessment;

(11) Notification that the Service has waived the tax imposed by section 4975(b) on a particular taxpayer;

(12) Notification of applicability of section 4975 to a particular pension, profit sharing, or stock bonus plan, a trust which is a part of such plan, or an annuity or stock purchase plan engaged in prohibited transactions within the meaning of section 4975(c);

(13) Notification to a plan administrator that the Service has determined that a pension, profit sharing, stock bonus, annity, or stock purchase plan no longer meets the requirements of section 401(a) or 404(a)(2);

(14) Notification that the Service has determined that there has been a termination or partial termination of a particular pension, profit-sharing, stock bonus, annuity, or stock purchase plan within the meaning of section 411(d)(3);

(15) Notification of the occurrence of an event (other than an event described in subparagraph (13), (14), or (18) of this paragraph) which the Service has determined to indicate that a particular pension, profit-sharing, stock bonus, annuity, or stock purchase plan may not be sound under section 4043(c)(2) of the act;

M Y 8 7 8 LM

(16) Notification that the Service has received and responded to a request on behalf of a particular pension, profit-sharing, or stock bonus plan, a trust which is a part of such plan, or an annuity or stock purchase plan for an extension of time for filing an annual return by such plan or trust;

(17) Notification that the Service has received and responded to a request on behalf of a particular pension, profit-sharing, or stock bonus plan, a trust which is a part of such plan, or an annuity or stock purchase plan to change the annual accounting period of such plan or trust;

(18) Notification that the Service has determined that a particular plan does not meet the requirements of section 412 without regard to whether such plan is one described in section 4021(a)(2) of the Act;

(19) Notification of the results of an investigation by the Service requested by the Deartment of Labor or the Pension Benefit Guaranty Corporation, or both, with respect to whether the tax described in section 4971 should be imposed on any employer named in such request or whether the tax imposed by section 4975 should be paid by any person named in the request;

(20) Notification of receipt by the Service of an application by a particular taxpayer for exemption under section 4975(c)(2) or of initiation by the Service of an administrative proceeding for such exemption; and

(21) Notification of receipt by the Service of an application by or on behalf of a particular taxpayer for a waiver or variance of the minimum funding standard under section 303 of the Act or section 412(d).

Return information disclosed under this paragraph includes the taxpayer identity information (as defined in section 6103(b)(6)) of the plan or trust, the name and address of the sponsor and administrator of the plan or trustee of the trust, and the name and address of the person authorized to represent the plan or trust before the Internal Revenue Service. Disclosure of returns or return information as provided by this paragraph will be made only following receipt by the Commissioner of Internal Revenue of an annual written request for such disclosure by the Administrator of Pension and Benefit Welfare Programs of the Department of Labor or the Executive Director of the Pension Benefit Guaranty Corporation describing the categories of returns or return information to be disclosed by the Service and the particular purpose for which the returns of return information is needed in the administration of title I or IV of the Act, and designating by title the officers and employees of the Department of Labor or such corporation to whom such disclosure is authorized.

(b) *Additional returns and return information subject to disclosure*—(1) *Returns and return information relating to automatic notification.* Subject to the requirements of subparagraph (3) of this paragraph, officers or employees of the Internal Revenue Service may disclose to officers and employees of the Department of Labor or the Pension Benefit Guaranty Corporation for purposes of, but only to the extent necessary in, the administration of title I or IV of the Act additional returns and return information to any item described in paragraph (a) of this section.

(2) *Other returns and return information.* Subject to the requirements of subparagraph (3) of this paragraph, officers or employees of the Internal Revenue Service may disclose to officers and employees of the Department of Labor or the Pension Benefit Guaranty Corporation returns and return information (other than returns and return information disclosed as provided by paragraph (a) of this section or § 420.6103(*l*)(2)-1 or § 420.6103 (*l*)(2)-2) for purposes of, but only to the extent necessary in, administration of title I or IV of the Act.

(3) *Procedures.* Disclosure of returns or return information by officers or employees of the Internal Revenue Service as provided by this paragraph will be made only upon written request to the Commissioner of Internal Revenue by the Administrator of Pension and Welfare Benefit Programs of the Department of Labor or his delegate or the Executive Director of the Pension Benefit Guaranty Corporation or his delegate identifying the particular taxpayer by whom such return was made or to whom such return information relates, describing the particular returns or return information to be disclosed, stating the purpose for which the returns or return information is needed in the administration of title I or IV of the Act, and designating by name and title the officers and employees of such department or corporation to whom such disclosure is authorized.

(c) *Disclosure and use of returns and return information by officers and employees of Department of Labor, Pension Benefit Guaranty Corporation, and Department of Justice*—(1) *Use by officers and employees of Department of Labor and Pension Benefit Guaranty Corporation.* Returns and return information disclosed to officers and employees of the Department of Labor and the Pension Benefit Guaranty Corporation as provided by this section may be used by such officers and employees for purposes of, but only to the extent necessary in, administration of any provision of title I or IV of the Act, including preparation for any administrative or judicial proceeding (or investigation which may result in such a proceeding) authorized by, or described in, title I or IV of the Act.

(2) *Disclosure by officers and employees of Department of Labor and Pension Benefit Guaranty Corporation to, and use by, other persons, including officers and employees of the Department of Justice.* (i) Returns and return information disclosed to officers and employees of the Department of Labor or the Pension Benefit Guaranty Corporation as provided by this section may be disclosed by such officers and employees to attorneys of the Department of Justice (including United State attorneys) personally and directly engaged in, and for their necessary use in, preparation for any civil or criminal judicial proceeding (or for their necessary use in an investigation which may result in such a proceeding) authorized by, or described in, title I or IV or the Act.

(ii) Returns and return information disclosed to officers and employees of the Department of Labor and the Pension Benefit Guaranty Corporation and to attorneys of the Department of Justice as provided by this section may be disclosed by such officers, employees, and attorneys to other persons, including but not limited to, persons described in subparagraph (2)(iii) of this paragraph, but only to the extent necessary in connection with administration of the provisions of title I or IV of the Act, including proper preparation for a proceeding (or investigation) described in subparagraph (1) or (2)(i). Such disclosures may include, but are not limited to, disclosures where necessary—

(A) To properly obtain the services of persons having special knowledge or technical skills;

(B) To properly interview, consult, depose, or interrogate or otherwise obtain relevant information from, the taxpayer to whom such return or return information relates (or the legal representative of such taxpayer) or any witness who may be called to give evidence in the proceeding; or

(C) To properly conduct negotiations concerning, or obtain authorization for, settlement or disposition of the proceeding, in whole or in part, or stipulations of fact in connection with the proceeding.

Disclosure of a return or return information to a person other than the taxpayer to whom such return or return information relates (or the legal representative of such taxpayer) to properly prepare for a proceeding (or to properly conduct an investigation) described in this subparagraph should be made, however, only if such preparation (or investigation) cannot otherwise properly be accomplished without making such disclosure.

(iii) Among those persons to whom returns and return information may be disclosed by officers and employees

of the Department of Labor and the Pension Benefit Guaranty Corporation and by attorneys of the Department of Justice as provided by subparagraph (2)(ii) of this paragraph are:

(A) Other officers and employees (including attorneys) of the Department of Labor, the Pension Benefit Guaranty Corporation, and the Department of Justice;

(B) Officers and employees of another Federal agency (as defined in section 6103(b)(9)) working under the direction and control of such officers and employees of the Department of Labor, the Pension Benefit Guaranty Corporation, or the Department of Justice; and

(C) Court reporters.

Disclosure of returns or return information to other persons by officers and employees of the Department of Labor or the Pension Benefit Guaranty Corporation as provided by subparagraph (2)(ii) of this paragraph for purposes of conducting research, surveys, studies, and publications referred to in section 513(a), or authorized by title IV, of the Act shall be restricted, however, to disclosure to other officers and employees of such department or corporation to whom such disclosure is necessary in connection with such conduct or to the taxpayer by whom such return was made or to whom such return information relates if the return or return information can be associated with, or otherwise identify, directly or indirectly, a particular taxpayer.

(3) *Disclosure in judicial proceedings.* A return or return information disclosed to officers and employees (including attorneys) of the Department of Labor, the Pension Benefit Guaranty Corporation, or the Department of Justice as provided by this section may be disclosed by such officers or employees in a civil or criminal judicial proceeding authorized by, or described in, title I or IV of the Act. *Provided,* That, in the case of a judicial proceeding described in section 6103(i)(4), the requirements of section 6103(i)(4) have first been met.

(d) *Disclosure of returns and return information in connection with certain consultations between Departments of the Treasury and Labor.* Upon general written request to the Commissioner of Internal Revenue by the Secretary of Labor, officers and employees of the Internal Revenue Service may disclose to officers and employees of the Department of Labor such returns and return information as may be necessary to properly carry out any consultation required by sections 3002, 3003, or 3004 of the Act.

(e) *Return information open to public inspection under section 6104.* Nothing in these regulations shall be construed to deny officers and employees of the Department of Labor and the Pension Benefit Guaranty Corporation the right to inspect return information available to the public under section 6104.

Because of the need for immediate guidance with respect to the provisions contained in this Treasury decision, it is found impracticable to issue it with notice and public procedure thereon under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(This Treasury decision is issued under the authority contained in sections 6103(q) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1685, 68A Stat. 917; 26 U.S.C. 6103(q), 7805).)

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: April 12, 1978.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

Title 29—Labor

CHAPTER XXVII—FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

PART 2700—PROCEDURAL RULES

Interim Rule

AGENCY: Federal Mine Safety and Health Review Commission.

ACTION: Interim rule.

SUMMARY: On March 10, 1978, (43 FR 10320) the Federal Mine Safety and Health Review Commission published its interim procedural rules for proceedings arising under the Federal Mine Safety and Health Act of 1977. Section 2700.57 of those rules dealt with the disposition of appeals pending before the Interior Board of Mine Operations Appeals. The rule provided the parties in those pending cases the opportunity to seek review before the Commission by May 8, 1978. The rule further provided that the Commission could order review on its own motion by the same date. Since the members of the Commission have not yet taken office, this amendment preserves the right of the Commission to order review on its own motion. It also preserves the right to discretionary review for those parties who have filed petitions for review by May 8, 1978.

EFFECTIVE DATE: May 8, 1978.

ADDRESS: Federal Mine Safety and Health Review Commission, 4015 Wilson Boulevard, Arlington, Va. 22203.

FOR FURTHER INFORMATION CONTACT:

James A. Broderick, Acting Chief Administrative Law Judge, Federal Mine Safety and Health Review Commission, 4015 Wilson Boulevard, Arlington, Va. 22203, phone number 703-235-2660.

JAMES A. BRODERICK,
Acting Chief Administrative Law Judge, Federal Mine Safety and Health Review, Commission.

This rule is officially adopted as an interim rule pursuant to section 113(d)(2) of the Federal Mine Safety and Health Act of 1977, 83 Stat. 742, 30 U.S.C. 801-960, Pub. L. 95-164, November 9, 1977, and the determination order of March 9, 1978, of the Director of the Office of Management and Budget. Notice of proposed rulemaking is not required inasmuch as these rules of agency procedure and practice are exempted under 5 U.S.C. 553(b)(A).

Section 2700.57 is amended to read as follows:

§ 2700.57 Pending appeals before the Interior Board of Mine Operations Appeals.

With regard to any appeal pending before the Interior Department Board of Mine Operations Appeals as of March 8, 1978, and reviewable by the Commission after that date, the appellant shall have 60 days from March 9, 1978, to petition the Commission for discretionary review under § 2700.58 of these rules. Unless review is ordered by the Commission within 30 days after the date that a majority of the members of the Commission take office, the decision appealed to the Interior Department Board of Mine Operations Appeals shall become the final decision of the Commission.

Title 33—Navigation and Navigable Waters

CHAPTER II—CORPS OF ENGINEERS, DEPARTMENT OF THE ARMY

[ER 1130-2-306]

PART 209—ADMINISTRATIVE PROCEDURES

Navigation Lights, Aids To Navigation, Navigation Charts and Related Data

Policy, Practice and Procedures

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: This regulation prescribes the policy, practice and procedures to be used by all Corps of Engineers installations and activities in connection with aids to navigation, chart data, and publication of information on Civil Works activities. The prescribed policy and procedure addresses necessary coordination with the U.S. Coast Guard, Defense Mapping Agency, National Ocean Survey and the U.S. Naval Oceanographic Office.

EFFECTIVE DATE: May 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Lyle Hanson, Construction Operations Division, Civil Works Directorate, Office of the Chief of Engineers, Washington, D.C. 20314, 202-693-6995.

SUPPLEMENTARY INFORMATION: This regulation is an update of ER 1130-2-306 last issued 17 October 1966 to all Corps of Engineers installations having Civil Works activities. This revised regulation modifies previous reporting procedures, lists the new agencies that are involved in navigation charts, surveys in navigable waters, and pertinent information that has a bearing on navigation interests. This regulation is strictly administrative procedures to be used by Corps District Engineers and as such is being published as a final rule.

This amendment revises § 209.325. See last paragraph (i) of the new rule with regard to availability of maps and charts. Accordingly, 33 CFR 209.325 is revised as set forth below:

§ 209.325 Navigation lights, aids to navigation, navigation charts, and related data policy, practices and procedure.

(a) *Purpose.* This regulation prescribes the policy, practice and procedure to be used by all Corps of Engineers installations and activities in connection with aids to navigation, chart data, and publication of information on Civil Works activities.

(b) This regulation will be applied by all elements of the Corps of Engineers with Civil Works responsibilities.

(c) *Reference.* Pub. L. 85-480, Publication Authority (72 Stat. 279).

(d) *Cooperation with Coast Guard.* (1) District Engineers will consult with the Coast Guard District Commander during design of channel and harbor improvement projects to discuss the aids to navigation requirements and all other facets of the projects that involve Coast Guard responsibility. Project material furnished direct to Coast Guard Commanders will include: (1) Information as to the authorization by Congress of a project involving changes affecting aids, such as channel limits, breakwaters, including a copy of the project document; (2) The proposed operations on such projects during the next fiscal year, to be furnished annually on the release of the budget estimates; (3) Plans showing the final location of the channel limits or structures to be furnished at the time work is undertaken.

(2) Changes in channel limits affecting navigation aids, made under general or specific provisions of the law, should be made the subject of a conference with the Coast Guard District Commander. He will be promptly informed as to the approval of such changes and the probable date of completion of the work.

(3) District Engineers will furnish direct to the various Coast Guard District Commanders, for their immediate information, any facts which may come to their attention in connection with their duties which will be of benefit to the Coast Guard in maintaining its system of aids to navigation. This should include statements as to the displacement of or defects in any such aids to navigation.

(4) If work involving harbor or channel improvements directly affects any existing aids to navigation or any structures of the Coast Guard, Districts Engineers will, when practicable, give notice to the Coast Guard District Commander sufficiently in advance to permit taking such steps as may be deemed necessary by the Coast Guard. If the Coast Guard District Commander specifically requests that the affected structure be replaced, the District Engineer will inform him of the estimated cost and will proceed with the work if so authorized by the Chief of Engineers. On completion of the work, the District Engineer will promptly furnish the Coast Guard District Commander, for settlement, an account of the expense incurred.

(e) *Navigation Aids of the Corps of Engineers.* (1) Whenever channel dredging or other channel improvements are being performed, necessary temporary markers, such as ranges and light poles, should be installed and maintained by the District Engineer pending the installation of permanent aids by the Coast Guard. The Coast Guard desires that information regarding aids to navigation installed or maintained by District Engineers in connection with harbor or channel improvement be furnished promptly. Such information is needed for inclusion in Notice to Mariners as published by the Coast Guard, and where desirable on the charts of the waters concerned.

(2) District Engineers will notify the Coast Guard District Commander in every case where aids to navigation for marking works of harbor or channel improvements are established or discontinued. Notice should be given of such aids as may be of use or interest to general navigation. Notice need not be given as to such buoys, lights, or fog signals as are of temporary or unimportant character, or of importance only to the Corps of Engineers. Omit also lights or fog signals on ferry slips and on piers used only by certain vessels, and stakes, bushes, and barrel buoys marking shallow and little-used channels.

(3) In placing aids to navigation in connection with harbor or channel improvement works, District Engineers should see that they do not conflict in character or otherwise with other aids to navigation in the vicinity. District Engineers should confer with the Coast Guard District Commander on this subject.

(4) The necessary blank forms for reporting information regarding Corps of Engineers aids will be furnished upon request by the Coast Guard District Commander.

(5) It is essential that the Coast Guard by furnished with information for publication concerning markers installed by the Corps of Engineers as temporary aids to navigation, for new improvements, in advance of permanent aids, and also concerning other markers that may be established in connection with Corps of Engineers operations that may also serve as important aids to navigation. Care will be exercised to see that all markers established are not misleading to general navigation and do not interfere with aids to navigation estabished by the Coast Guard.

(f) *Colors of Dredging Buoys Established by Corps of Engineers.*

(1) In order to distinguish buoys placed and maintained by the Corps of Engineers for dredging purposes from aids to navigation placed by the Coast Guard, Corps buoys will be painted white with the top 2 feet painted light green.

(2) If buoys with special markings are needed to indicate the different sides of the navigable channel, prior arrangements will be made with the Coast Guard District Commander having jurisdiction.

(g) *Information to be Furnished by the Corps of Engineers.*

(1) District Engineers responsible for harbors and waterways shown on charts of the National Ocean Survey (NOAA), will report the channel conditions promptly, using standard tabular forms, to:

Director, Defense Mapping Agency, ATTN: Hydrographic Center, Washington, D.C. 20390.

National Oceanic and Atmospheric Administration, ATTN: National Ocean Survey C-32, Rockville, Md. 20852.

Commandant and District Commanders, U.S. Coast Guard.

(2) Channel survey drawings furnished to the Coast Guard are to include:

(i) Either NAD 27 or State Plane grids.

V 4 3 / 8 9

(ii) Plots of the positions of aids to navigation.

(iii) Written notations of the coordinates in NAD 27 or State Plane Coordinates of the fixed aids to navigation found during the survey.

(3) The standard tabular forms with illustrated data follow:

(i) For channels 400 feet wide and greater (ENG Form 4020-R).

_____HARBOR, _____(State)

Name of Channel	Date Survey	Project			Minimum depth in each 1/4 width of channel entering from seaward			
					Mid-channel			
		Feet width	Miles length	Feet depth	Left outside quarter feet	Left inside quarter feet	Right inside quarter feet	Right outside quarter feet
Tybee Range--------	3-78	500	1.64	30	30	31	28	23
Bloody Point-------	3-78	500	2.81	30	30	30	29	25

(ii) For channels 100 to 400 feet wide (ENG Form 4021-R).

_____HARBOR, _____(State)

Name of Channel	Date Survey	Project			Minimum depths in channel entering from seaward		
		Feet width	Miles length	Feet depth	Left outside quarter feet	Mid-channel for half project width feet	Right outside quarter feet
Kings Island Channel	3-78	300	1.14	26	24	23	26
Whitehall Channel---	3-78	200	1.81	26	27	26	25

ENG FORM 4021-R(Jul 59)

(iii) For channels less than 100 feet in width, report controlling depths only based on at least 80 percent of project width, 40 percent on either side of centerline. (The submission of tabular forms is not required for channels having a project depth less than 10 feet except coastal inlets and harbors of refuge.)

(4) The tabulations of depths should be amplified by footnotes or otherwise to show clearly and definitely the location of controlling shoals, tendency of shoals to recur, and all other critical information of special value and importance for safe navigation of the channel. Reaches of channel not presently named should be identified in the tabular form by reference to chartered aids or features, or assigned identifying names, numbers or letters. For localized irregular project areas where the application of the tabular form would not be practical, the controlling depth based on a safe navigable width will be described as well as unusual or critical conditions of shoaling.

(5) The prompt dissemination of the latest detailed information concerning channel conditions is of utmost importance, and necessary measures will be taken to insure that such information is reported without delay simultaneously to the U.S. Naval Oceanographic Office, the Coast Guard, the National Ocean Survey and Defense Mapping Agency. When a dangerous shoaling is found during the progress of a survey, information thereon will be furnished immediately to the above-mentioned agencies, so that such information may be made available to mariners promptly, and buoys shifted to mark the shoal. Descriptions of any dredging or other operations in important channels in tidal waters—either in progress and not already reported, or soon to be undertaken—together with a statement of the work and expected duration, will also be reported in order that Naval and other vessels may be warned to look out for dredges and other plant, temporary markers and lights.

(6) District Engineers having charge of improvements of harbors and waterways shown on charts of the Defense Mapping Agency or of the National Ocean Survey will send to both offices promptly, as ascertained for the correction of such charts, the following information: Descriptions of changes in channel location and depth, or of obstructions that may be discovered, with such prints and other information as may be necessary to permit the existing charts to be corrected to date. All maps should contain sufficient data to permit the fixed plane or reference, bench marks, base lines, etc., to be determined and located. The survey stations should be shown and, when no unreasonable expenditure of time or labor is involved, the map will show one or more triangulation station(s) of the National Ocean Survey in such a way as to facilitate connection of old or new work. The source of authority for the shoreline and topography should be stated on the map. The data supplied should indicate what charts are affected.

(7) When any survey of areas covered by charts of the Defense Mapping Agency or the National Ocean Survey is completed, a print of each tracing will be sent direct to both the Defense Mapping Agency and the National Ocean Survey. It is not necessary that tracings be fully complete as to form and title when such prints are made. An informal manuscript title marked "Advance Sheets", and containing a description sufficient to identify the locality and to identify the source of the map, will be sufficient.

(8) Information relative to the improvement of harbors and waterways such as dredging operations, and precautions rendered necessary due to the presence of dredging or other plant will, when considered necessary, be brought to the attention of vessel owners or operators regularly using the waterway. This will be done through issuing bulletins or notices by District Engineers.

(h) *Special Reports.* Changes affecting navigation will be made promptly whenever information of immediate concern to navigation becomes known. Items of information especially desired are channel conditions as revealed by surveys, changes in channel conditions, either by natural causes or by dredging or other work, changes in approved projects for improvement with statements of results expected from proposed operations, descriptions of proposed dredging or other Federal work of improvement such as breakwater, pier, and revetment construction or alterations, descriptions of proposed or completed municipal or private improvements in or affecting navigable waters. Additional items of information desired are descriptions of wrecks, uncharted shoals, and other obstructions to navigation and particulars as to proposed or completed removal of same, changes in buoys or lights, erection of new, or changes in existing bridges, new or revised Federal or local rules and regulations for harbors and channels, and establishment or existence of danger areas in navigable waters. Reproductions of drawings or sketches which will be helpful in interpreting the data shall accompany the reports. The reports will not be limited to a reference to an accompanying drawing or sketch, but will contain a complete description in form suitable for publication in notices to mariners and the monthly supplements to the U.S. Coast Pilot. In this respect, the reports will provide enough information that a single notification to navigational interests will suffice. In the case of dredging or construction work, the bare statement that work will commence or has commenced on a certain date is insufficient. All additional information possible, such as probable duration of operations and object of work, will be given—the latter in the case of dredging being such data as the area to be covered and the depth expected to be provided. The reports required by this paragraph will be identified by reference to the appropriate Engineer Manual or regulation and will be numbered consecutively by each District during the calendar year, starting with number 1 at the beginning of each year.

(i) *Information Pamphlets, Maps, Brochures and Other Material.*

(1) Pub. L. 85-480, approved 2 July 1958, authorizes the Chief of Engineers to publish information pamphlets, maps, brochures, and other material on river and harbor, flood control, and other Civil Works activities, including related public park and recreation facilities under his jurisdiction, as he may deem to be of value to the general public.

(2) This Public Law authorizes the Chief of Engineers to provide for the sale of any of the material prepared under authority of the act—and of publications, charts, or other material prepared under his direction pursuant to other legislative authorization or appropriation, and to charge therefor a sum of not less than the cost of reproduction.

(3) District Engineers are authorized to publish the material covered in paragraph 8a above, and to sell such material. Except for material specifically prepared for free distribution to the general public, the charges for such other published information will be not less than the cost of its reproduction.

(4) Condition survey maps or charts, sold or otherwise distributed to the public, showing depths will specifically state the date or dates that the surveys were made. They shall also have the following notation printed or stamped thereon:

"The information depicted on this map represents the results of surveys made on the dates indicated and can only be considered as indicating the general conditions existing at that time."

For the Chief of Engineers:

JAMES N. ELLIS,
Colonel, Corps of Engineers, Executive Director, Engineer Staff.

Title 46—Shipping

CHAPTER IV—FEDERAL MARITIME COMMISSION

SUBCHAPTER A—GENERAL PROVISIONS

[General Order No. 16, Amdt. 22; Docket No. 77-40]

PART 502—RULES OF PRACTICE AND PROCEDURE

Miscellaneous Amendments

AGENCY: Federal Maritime Commission.

ACTION: Final rules.

SUMMARY: Rules of Practice and Procedure are amended to require that service of subpenas and discovery requests or motions directed against Commission staff personnel be served on the Secretary of the Commission; to authorize the General Counsel to appoint an attorney to represent Commission staff personnel who are involved; to permit rulings of the presiding officer to be appealed and to be reviewed by the Commission absent appeal in such matters; and to permit parties to file replies to appeals generally. The amendments are necessary because the present rules governing subpena and discovery procedures are inconsistent and unclear and do not give the Commission an opportunity to rule upon matters affecting disclosure of its own records. Furthermore, the present rule governing appeals to the Commission does not provide for replies to such appeals.

EFFECTIVE DATE: May 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, Feder-

M Y 8 7 8 UMI

V 4 3 / 8 9

al Maritime Commission, 1100 L Street NW., Washington, D.C. 20573, 202-523-5725.

SUPPLEMENTARY INFORMATION: The Commission instituted this proceeding by Notice of Proposed Rulemaking published in the FEDERAL REGISTER on August 10, 1977 (42 FR 40452) to amend Rules 135, 209, and 153 of its rules of practice and procedure (46 CFR 502.135, 46 CFR 502.209, and 46 CFR 502.153). The purpose of these amendments was fully explained in the Notice cited above. The Maritime Administrative Bar Association (MABA) submitted initial and supplemental comments. A discussion of the rules and comments follows.

1. Rule 135, 46 CFR 502.135. This rule deals with subpenas of Commission staff personnel and subpenas for production of documentary materials in the possession of the Commission. The proposed changes would considerably enlarge the present rule to establish the procedures to be followed by parties seeking to subpena Commission staff personnel and to obtain production of documents both at a hearing and in connection with prehearing depositions. The amendments would provide for service of subpenas on the Commission's Secretary and conform the procedural schedule regarding prehearing depositions with that which applies to motions to quash subpenas served in connection with depositions. The rule would also be changed to authorize the General Counsel to designate an attorney to represent Commission staff personnel under subpena and to permit rulings of the presiding officer to be appealed or, absent appeal, to be reviewed by the Commission. Replies to appeals would be permitted and the filing of such appeals would automatically stay the presiding officer's rulings until the Commission acted on the matter.

MABA suggests that the subpena be served directly on the Commission staff member although not opposing service of a copy on the Secretary for his information and that of the Commission. MABA expresses dissatisfaction with the proposal that the General Counsel designate an attorney to represent the staff member, suggesting that the staff member be permitted to retain his own counsel. Moreover, MABA is concerned that the authority granted to the General Counsel would result in a "commingling of functions." MABA believes that the General Counsel would be supervising the attorney representing the staff member in the matter of reviewing the subpena or discovery request and would also be supervising another attorney in the event of appeal or on Commission review of the presiding officer's rulings. MABA also expresses concern that the Commission would be reviewing rulings of the presiding officer and fears that the Commission will overrule the presiding officer without having the benefit of the parties' views if no appeal has been filed. It also fears that the Commission will rule without stating its reasons and supporting evidence. MABA believes that matters arising under the rule should be reviewed by the courts rather than the Commission.

In its supplemental comments, MABA opposes the idea of permitting automatic appeals or review by the Commission in the case of subpenas and discovery directed against Commission staff personnel. MABA argues that such a procedure establishes disparate treatment among litigating parties. MABA contends that the proposed procedure is inconsistent with section 27 of the Shipping Act, 1916, and with the legislative history thereof. MABA contends that the Commission's staff member should follow the same procedure as do other parties, that is, move for leave to appeal to the Commission, and that in the event of refusal to comply with a ruling of the presiding officer, the matter be tested in the courts. After careful analysis of these comments, the Commission believes that they are not persuasive and that the rule should be amended as proposed.

MABA's concern that service on the Secretary rather than on the staff member may not serve to inform the staff member of his obligations and that designation of an attorney to represent the staff member by the General Counsel will lead to improper "commingling of functions" is unwarranted. As explained in the Notice of Proposed Rulemaking, cited above, the rule change would eliminate the present inconsistencies and confusion as to the person on whom a subpena or discovery request is to be served. It would also provide a staff member with legal representation, something the present rule does not do, although in practice an attorney who is a member of the Office of the General Counsel has usually been designated to provide such representation. In previous practice, a staff member has been informed of the service of the subpena whether it had been served on the General Counsel or the Secretary. The staff member will continue to be informed. Furthermore, it does not follow that service on the Secretary deprives the staff member of his own views on the propriety of complying with a subpena or discovery order. Likewise, the designation of an attorney by the General Counsel is not intended to have this effect.

MABA's concern that appointment of an attorney by the General Counsel would lead to improper "commingling of functions" is based upon a wrong premise. MABA presumes that the General Counsel will supervise the designated attorney. In fact, that attorney will be free to represent the staff member before the presiding officer and the Commission without supervision by the General Counsel or by anyone whose interests may conflict with those of the staff member. The General Counsel would become involved only in the matter of advising the Commission when appeals are filed or the Commission decides to review on its own motion. Furthermore, to allay any possible remaining concern, the Commission would expect the General Counsel whenever possible, to select an attorney from outside his office.

MABA's concern that the change in procedure would depart from the principle of equality embodied in section 27 of the Shipping Act, 1916, or its legislative history has superficial appeal but ignores the unique status and responsibilities of the Commission. As we stated in the Notice of Proposed Rulemaking, cited above, the Commission is a government agency involved in law enforcement activities, unlike private litigants, and certain privileges against disclosure have been recognized in the law because of these unique responsibilities. See the Freedom of Information Act, as amended, 5 U.S.C. 552(b). Unless the Commission itself has some control over the matter of prehearing discovery and disclosure directed aginst its own staff and documents in its possession, the Commission cannot adequately protect functions which may involve delicate and sensitive considerations of policy as to which presiding officers may be unaware. MABA seems to assume, furthermore, that the Commission would always be overruling presiding officers in an effort to prevent disclosure. The rule change would also apply, however, to situations in which the presiding officer has denied a discovery request so that the Commission could also overrule him and order disclosure. Of course, as in any final ruling of the Commission, an aggrieved party ultimately has the right to judicial review. Finally, at worst a litigant might be deprived of access to general information in the possession of the Commission or a staff member, which information may or may not really be necessary to the development of the litigant's case. This is in contrast to the situation in which a party under investigation or accused of violations of law seeks access to relevant information for purposes of cross-examination of Commission staff members who testify against such party. In the latter situations, as MABA itself has observed, the Commission has adopted a procedure in which the presiding officer may rule upon the matter of production or disclosure and appeal to the Commission may be taken only by his leave. See "Delaware River Port Authority, et al. v. United States Lines, Inc., et al.," 16 SRR 1546 (1976). It is obviously the latter type of situation in which a party might be prejudiced during the course of a proceeding if deprived of vital information rather than the former situation in which general preparatory probing is being conducted prior to hearing.[1] However, the Commission does not intend to deprive parties of vital information necessary for proper cross-examination nor conduct its investigations and present evidence in reliance upon secret, privileged information.

We are not persuaded by MABA's contentions that the Commission will be deprived of the views of the parties where no appeal is taken and that the Commission will not explain its reasons for its rulings. If an affected party wishes to present his views to the Commission in connection with a ruling of the presiding officer, he need only exercise his right to file an appeal within the prescribed period of time. In the event of review by the Commission, absent appeal, the parties' views as expressed to the presiding officer are on record and will be considered. MABA's contention that a statement of reasons explaining the Commission's rulings should be required erroneously presumes that the Commission will act contrary to law by issuing rulings without explanations.

2. Rule 209, 46 CFR 502.209. This rule deals with the use of prehearing discovery processes directed to Commission staff personnel. It follows the same procedures as set forth in the preceding rule with regard to the designation of an attorney by the General Counsel and the matter of appeals from and review of the presiding officer's rulings. MABA's comments regarding the proposed changes to this rule are identical with those directed to the previous rule and, as already discussed, are without merit.

3. Rule 153, 46 CFR 502.153. The Commission proposed to amend this rule by permitting parties to file replies to motions for leave to appeal rulings of the presiding officer. The present rule fails to make such provision. As explained in the Notice of Proposed Rulemaking, this amendment would establish a fairer procedure, enable the presiding officer to rule after having the benefit of all views, and conform to current practice. MABA made no comments on this proposed amendment.

Having considered the comments on Rules 135 and 209 and found them to be without merit, the Commission is therefore adopting the amendments to the above three rules as originally proposed with slight clarifications.[2] Therefore, pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 553), and sections 27 and 43 of the Shipping Act, 1916 (46 U.S.C. 826, 841a), Part 502 of Title 46, Code of Federal Regulations, is amended as set forth below.

1. Section 502.135 is revised to read as follows:

§ 502.135 Subpena of Commission staff personnel, documents or things.

(a) A subpena for the attendance of Commission staff personnel or for the production of documentary materials in the possession of the Commission shall be served upon the Secretary. If the subpena is returnable at hearing, a motion to quash may be filed within five (5) days of service and attendance shall not be required until the presiding officer rules on said motion. If the subpena is served in connection with prehearing depositions, the procedure to be followed with respect to motions to quash and replies thereto will correspond to the procedures established with respect to motions and replies in § 502.132(c).

(b) The General Counsel shall designate an attorney to represent any Commission staff personnel subpenaed under this section. The attorney so designated shall not thereafter participate in the Commission's decisionmaking process concerning any issue in the proceeding.

(c) Rulings of the presiding officer issued under § 502.135(a) shall become final rulings of the Commission unless an appeal is filed within ten (10) days after date of issuance of such rulings or unless the Commission on its own motion reverses, modifies, or stays such rulings within twenty (20) days of their issuance. Replies to appeals may be filed within ten (10) days. No ruling of the presiding officer shall be effective until twenty (20) days from date of issuance unless the Commission otherwise directs.

2. Section 502.209 is revised to read as follows:

§ 502.209 Use of discovery procedures directed to Commission staff personnel.

(a) Discovery procedures described in §§ 502.204, 502.205, 502.206, 502.207, and 502.208, directed to Commission staff personnel shall be permitted and shall be governed by the procedures set forth in those sections except as modified by paragraphs (b) and (c) of this section. All notices to take depositions, written interrogatories, requests for production of documents and other things, requests for admissions, and any motions in connection with the foregoing, shall be served on the Secretary of the Commission.

(b) The General Counsel shall designate an attorney to represent any Commission staff personnel to whom any discovery requests or motions are directed. The attorney so designated shall not thereafter participate in the Commission's decision-making process concerning any issue in the proceeding.

(c) Rulings of the presiding officer issued under § 502.209(a) shall become final rulings of the Commission unless an appeal is filed within ten (10) days after date of issuance of such rulings or unles the Commission on its own motion reverses, modifies, or stays such rulings within twenty (20) days of their issuance. Replies to appeals may be filed within ten (10) days. No ruling of the presiding officer shall be effective until twenty (20) days from date of issuance unless the Commission otherwise directs.

§ 502.153 [Amended]

3. Section 502.153 is amended by inserting the following sentence after the third sentence:

* * * Replies to the motion and the appeal may be filed within fifteen (15) days after date of service thereof unless the presiding officer for good cause shown enlarges or shortens the time.

Effective Date. Inasmuch as the expeditious adoption of these rules is desirable and inasmuch as they are procedural in nature, they shall be effective May 8, 1978, and shall be applicable to all pending and future proceedings.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

[FR Doc. 78-12381 Filed 5-5-78; 8:45 am]

[1] The distinction between general prehearing discovery and inspection and production of specific information for purposes of cross-examination has been recognized by the courts as well as by the Commission. The latter situation relates to the famous case of "Jencks v. United States," 353 U.S. 657 (1957), and to Federal Rule of Evidence 612, 28 U.S.C.A. See 7 A.L.R. 3d 181, § 17; "Zuzich Truck Line, Inc. v. United States," 224 F. Supp. 457, 461 (D. Kans. 1963); "United States v. Harrison," 461 F. 2d 1127 (5th Cir. 1972) cert. denied, 409 U.S. 884.

[2] The last sentences of proposed rules 135(c) and 209(c) have been revised to clarify the effective date of rulings.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[4910-13]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Docket No. 78-NW-7 AD]

BOEING 707-300/-400/-300B/-300C

Proposed Airworthiness Directive

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: It is proposed to require structural changes to the Boeing 707-300/-400/-300B/-300C horizontal stabilizer which would provide an alternate load path if spar chord cracking should occur. This modification would assure compliance with the airworthiness standards which make up the certification basis for the aircraft. Failure to make these modifications could lead to loss of a horizontal stabilizer and a resultant loss of aircraft control. Airworthiness Directives (ADs) 77-16-11 and 78-01-04 require repetitive inspections of the stabilizer at intervals of 375 landings. This proposal, if adopted, will provide terminating action for these ADs'.

DATES: Comments must be received on or before June 30, 1978.

ADDRESSES: Send comments on the proposal in duplicate to: Federal Aviation Administration, Northwest Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket, Docket No. 78-NW-7 AD, 9010 East Marginal Way South, Seattle, Wash. 98108.

FOR FURTHER INFORMATION CONTACT:

Harold N. Wantiez, Airframe Section, ANW-212, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108, telephone 206-767-2516.

SUPPLEMENTARY INFORMATION:

COMMENT INVITED

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communication should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

AVAILABILITY OF NPRMS

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket, Docket No. 78-NW-7 AD, 9010 East Marginal Way South, Seattle, Wash. 98108.

DISCUSSION OF THE PROPOSED RULE

Information from the accident investigation of a Boeing 707-321C, which crashed in Zambia, Africa, revealed that the right hand stabilizer separated from the airplane during final approach. Analysis of the fracture surface indicates that the upper rear spar chord of the right hand stabilizer experienced a fatigue failure sometime prior to the accident.

The closure rib chord also showed evidence of fatigue. On May 18, 1977, an AD was issued which required visual inspection of the stabilizer rear spar upper chord. This action was later found to be insufficient, since further investigation indicated that cracks may exist in the stabilizer rear spar upper chord which are not detectable by visual means but are detectable by nondestructive testing methods (NDT). A superseding AD telegraphic message was issued on May 27, 1977, requiring one-time NDT inspections of the chord. On July 11, 1977, another AD telegraphic message was issued which required an additional one-time NDT inspection. During July and August 1977, the manufacturer conducted static tests on a 707-400 horizontal stabilizer. First, strain surveys were conducted with the application of loads corresponding to certain flap configurations and failsafe design conditions. Then, the upper chord on the right hand side of the rear spar was cut to simulate the structural configuration of the accident airplane. Loads were then applied to the stabilizer simulating the 1 G flaps 50 flight condition. This caused a failure of the fasteners tying the skin to the rear spar upper chord inboard of the cut and also the web from the upper chord to the mid chord. On August 1, 1977, loads were placed on the stabilizer to simulate a 1 G flaps 50 abrupt elevator condition. There appeared to be some distress; however, the structure remained intact. On August 4, 1977, loads were placed on the stabilizer representing the failsafe negative gust condition (condition 1022). Upon reaching 80 percent of this load condition, the stabilizer failed. In order to have passed the test the stabilizer was required to carry 115 percent of condition 1022, without failure.

On August 15, 1977, AD 77-16-11 was issued which superseded all previous messages and ADs and required repetitive inspections at an interval of 375 landings. On December 27, 1977, AD 78-01-04 was issued to require visual inspection of the rear spar center section of the horizontal stabilizer upon a finding that this portion of the structure appeared not to meet Part 4b of the Civil Air Regulations, the airworthiness standards that make up the certification basis of the Boeing Model 707 airplane. AD 77-16-11 and AD 78-01-04 provide interim inspections until the terminating action being proposed by this notice is accomplished.

The stabilizer is capable of carrying all design loads so long as cracks do not extend beyond critical lengths into the body of the rear spar upper chord. With the chord completely severed, the stabilizer is not capable of carrying failsafe design loads. It will be necessary to modify the basic structure to improve the failsafe capability of the horizontal stabilizer.

A draft regulatory AD analysis for this notice is available for public review and comment. It is contained in the rules docket at the address specified above. That analysis discusses the major alternatives to this proposed action considered by the FAA. The alternative of requiring immediate modification is felt by the FAA to be unreasonable while that of requiring continued periodic inspections under the existing ADs is not believed to provide a long term adequate level of safety.

DRAFTING INFORMATION

The principal authors of this document are Harold N. Wantiez, Engineering and Manufacturing Branch, Northwest Region, and Jonathan Howe, Regional Counsel, Northwest Region.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

BOEING: Applies to all Boeing 707-300/-400/-300B/-300C airplanes certified in all categories previous to line number (to be determined). Compliance required no later than January 1, 1980.

Install structural improvement kits on the horizontal stabilizer and center section in accordance with (a) Boeing Service Bulletins 3313 Rev. 5 or later FAA approved Revisions and 3331 Rev. 1 or later FAA approved Revisions; or (b) a modification approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region. Compliance with this AD constitutes terminating action for ADs 77-16-11 and 78-01-04.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85)

NOTE.— The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Seattle, Wash., on April 28, 1978.

C. B. WALK, Jr.,
Director,
Northwest Region.

CIVIL AERONAUTICS BOARD

[EDR-354; Docket 32585; Dated: May 1, 1978]

[14 CFR Ch. II]

QUALITY OF AIR TRANSPORTATION SERVICES

Advance Notice of Proposed Rulemaking

AGENCY: Civil Aeronautics Board.

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: The Board is concerned that passengers and competing carriers may not have enough information available on the various dimensions of air travel service quality. While some information is readily available, information on some other important dimensions is difficult, if not impossible, to gather unless the passenger has substantial experience with the same trip. The Board has decided to solicit public views on whether it should collect and make available to the public data on performance quality in air travel and associated ground service of the United States certificated air carriers, and, if so, what information should be disseminated and in what form to best serve the public need at least cost to the carriers and the Board.

DATE: Comments by: July 7, 1978. Comments and other relevant information received after this date will be considered by the Board only to the extent practicable.

ADDRESSES: Twenty copies of comments should be sent to Docket 32585, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Brinley H. Williams, Jr., Office of the Consumer Advocate, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5482, or Steven Salop, Office of Economic Analysis, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5978.

SUPPLEMENTARY INFORMATION: To evaluate the various price-service options available from competing carriers, passengers must subjectively evaluate and compare a diverse set of price and service components. For some objective components, information is readily available from the official airline guide, carriers and travel agents. Some other objective components, such as on-time performance, denied boarding ("bumping") rates, and baggage loss and damage frequency, are more difficult to gather. It is also difficult to gather useful information regarding such subjective components as customer treatment and meal quality, except through personal experience and carriers' reputations.

While carrier's performance records are generally outstanding, one would expect differences among carriers in particular markets. Carriers allocate their resources among the various service components according to their relative costs of providing each service and their notion of the weight consumers place on each component. Simply stated, carriers compete on service components as well as price. The ability of carriers to compete on particular service components is constrained by a shortage of information. For example, a carrier cannot advertise its superior baggage handling record, if its competitors' relative performance is unknown. If one carrier considers a guarantee on baggage retrieval time or on-time performance, and offers to compensate passengers in the event of failure, it cannot easily evaluate the profitability of the performance-guarantee in the absence of knowledge of its competitiors' records; nor can consumers easily value the offer without some idea of that same information.

Thus, improved information would be valuable to both the travelling public in choosing among carriers and to carriers in adopting competitive service, advertising and guarantee policies. However, these improvements in information collection and dissemination can only come at an additional cost to the carriers and the Board. Therefore, in designing any new program, care must be taken to ensure that the value of any additional effort will be worth the cost.

The design of an information collection and dissemination program is not a trivial problem. Information is only valuable if it is processed and used, and it can only be used if the data is presented in a usable form. This is a more serious problem for a program focusing on dissemination to consumers. "Information overload" considerations suggest that if too much data is presented, none will be used. The alternative solution of limiting the data to only a few variables requires a careful selection of "key" variables, for in response to the new information, carriers will increase their service expenditures and base their comparative advertising on those components published. Information overload seems less of a problem if the program is geared towards improving carriers' information for use in comparatives advertising compaigns and guaranteed service offerings. However, in this case, the potential for deception must be considered.

In light of these issues and potential problems, the Board is requesting comments on the design, cost, and benefits of an expanded information collection and dissemination program. Comments should be directed to the issues raised above, the following questions below, and any other issues deemed important.

(1) What dimensions of service quality are important to passengers? Which are most important to the greatest number of passengers?

(2) For which of the following items could the Board effectively provide information, based on data collected from the carriers?[1] What would be the

[1] The Board currently obtains carrier data in some form on items (a), (b), (c), (d), and (i). What modification might be needed in the data now collected? With regard to additional data, * * * Should data be required from all certificated carriers including supplementals, trunks and local service carriers, or trunks only? Should commuters be permitted to file data? Should data cover the top 200 markets or some other set of markets? In what form should the Board make information available? By carrier, by

Footnotes continued on next page

V 4 3 / 8 9

cost to carriers of collecting the additional data itemized? Is this or similar data currently collected by the carriers?

(a) On-time performance,
(b) Flight cancellation rates,
(c) Bumping rates,
(d) Average load factors, by class of service,
(e) Proportion of flights fully booked and/or stop-saled,
(f) Lost, damaged, or delayed (resulting in the filing of a baggage irregularity report) baggage rates,
(g) Average retrieval time for baggage delivery,
(h) Number of consumer complaints categorized by (i) flight cancellation, delays, irregularities; (ii) reservations; (iii) fares and refunds; (iv) baggage; (v) customer treatment; (vi) discrimination; (vii) flight information; (viii) in-flight service; (ix) equipment and facilities; and (x) other,
(i) Seating pitch and width, by class of service,
(j) Aisle width,
(k) Average number of cabin attendants per passenger, by class of service,
(l) Average number of passengers (or seats) per restroom, by class of service,
(m) Cubic space per passenger available for carry-on items,
(n) Cabin noise level, and
(o) Other.

(3) Are passengers already adequately informed? If so, what variables comprise adequate information? How might the flow of currently available information be voluntarily improved by carriers?

(4) How should data currently collected and any additional data collected be disseminated for maximum usefulness? Additions to the official airline guide? Booklets? Is information overload a serious problem? If so, what key variables should be emphasized?

(5) Would consumer servey data be useful in the selection of key variables? Would carriers voluntarily make their consumer surveys available to the Board for this purpose? Should the Board consider collection and publication of consumer servey data on the quality of service of different carriers?

(6) What information would carriers find useful in formulating service policies and advertising service quality? What information would be necessary to utilize performace guarantees as a competitive tool? Is reliance on comparative advertising and performance guarantees a viable solution? What sort of guidelines regarding misleading use of data and deceptive practices are necessary?

(Sec. 204, 404, and 407 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 760, 766 (49 U.S.C. 1324, 1374, and 1377).)

Footnotes continued from last page

market, or in some other manner? How often should data be collected?

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR
Secretary.

FEDERAL TRADE COMMISSION

[16 CFR Part 441]

MOBILE HOME SALES AND SERVICE

Additional Hearing Regarding Telephone Survey by The Housing Advocates, Inc., on the Proposed Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Additional public hearing scheduled at Washington, D.C.

SUMMARY: On May 23, 1977 (42 FR 26398), the Presiding Officer published in the FEDERAL REGISTER a Final Notice of a proposed trade regulation rule proceeding concerning Mobile Home Sales and Service. On December 7, 1977 (42 FR 61871), the Presiding Officer published in the FEDERAL REGISTER a notice of additional hearings. A hearing in addition to those listed in those two notices has been scheduled.

DATES: A public hearing will be held on June 9, 1978, commencing at 9:30 a.m. Written rebuttal submissions limited to and relevant to only The Housing Advocates' survey (and testimony) and the MHI rebuttal witness testimony will be accepted for the record until no later than June 23, 1978.

ADDRESS: Hearing location: Room 532 of the Federal Trade Commission Building, Pennsylvania Avenue at Sixth Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Raymond L. Rhine, Presiding Officer, Room 667, Bicentennial Building, Sixth and E Streets NW., Washington, D.C. 20580, 202-724-1037.

SUPPLEMENTAL INFORMATION: On April 11, 1978, the Presiding Officer issued a Ruling reopening the Public Record for the receipt of a telephone survey of nonrespondents by The Housing Advocates, Inc., relating to the Proposed Trade Regulation Rule and other related material. The Presiding Officer has scheduled an additional hearing to be held on June 9, 1978 for the purpose of:

1. Receiving testimony by a witness for The Housing Advocates, Inc., regarding the survey;
2. Cross-examination of that witness by Group Representatives;
3. Rebuttal testimony limited to The Housing Advocates' survey and the related material by a rebuttal witness for the Manufactured Housing Institute;
4. Cross-examination of the MHI rebuttal witness by Group Representatives.

Interested parties are invited to attend the hearing and to file written rebuttal limited to and relevant to only The Housing Advocate's survey and to 1 to 4 above. Such submissions will be accepted for the public record if received by the Presiding Officer on or before June 23, 1978.

More detailed instructions to the two witnesses for the filing of statements and for Group Representatives to request cross-examination are included in the Presiding Officer's Ruling Reopening Public Record for Submission of Housing Advocates' survey, April 11, 1978, his Ruling Granting MHI Request to Provide Witness—Housing Advocates' Survey, April 18, 1978, and his Memorandum Setting New Hearing Date and Relating to Procedures, April 28, 1978. The requirements of those Rulings for participation at the hearing must be observed by witnesses and Group Representatives. The hearing date was originally scheduled for June 2, 1978 as stated in the April 11 and 18, 1978 Rulings. The hearing date has been changed to June 9, 1978. Copies of the Rulings will be sent upon request.

Issued: May 2, 1978.

RAYMOND L. RHINE,
Presiding Officer.

ACCOUNTING PRACTICES—OIL AND GAS PRODUCERS

Additional Hearing Date and Extension of Comment Period

AGENCY: Securities and Exchange Commission.

ACTION: Notice of addtional hearing date and extension of comment period for proposed rules.

SUMMARY: The Commission has announced that on May 10, 1978, it will hold a further day of hearing in connection with the Commission's rulemaking proposals relating to accounting practices for oil and gas producers which the Commission published for comment in Release Nos. 33-5877, August 31, 1977 (42 FR 44927), and 33-5861, October 26, 1977 (42 FR 57661). The Commission has also extended the comment period on these proceedings and on its related proposed replacement cost disclosure rules to May 31, 1978.

DATE: Comments should be submitted on or before May 31, 1978.

ADDRESS: Comments should refer to File S7-715. Comments on the rules proposed in Release Nos. 33-5878 and 33-5916 should also refer to File S7-724. Comments should be submitted in triplicate to George A Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. All comments will be available for public inspection.

FOR FURTHER INFORMATION CONTACT:

Richard C. Adkerson, Office of the Chief Accountant, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-1671.

SUPPLEMENTARY INFORMATION: The May 10, 1978 hearing will begin at 9 a.m. in Room 776, 500 North Capitol Street, Washington, D.C. The schedule of presentations will be published in the "SEC News Digest".

The Commission has thus far held a total of eleven days of hearing on these proposals in Washington, D.C. and Houston, Tex. Transcripts of the hearing are available for public inspection at the Commission's public reference room, 1100 L Street NW., Washington, D.C.

In its Notice of Public Hearing, Release No. 33-5905, February 10, 1978 (43 FR 6810), the Commission announced that comments on (1) matters discussed at the public hearing, (2) material place in Public File S7-715, the public file for these proceedings, or (3) matters otherwise pertinent to these procedings, were to be submitted no later than May 19, 1978. The Commission has extended that date to May 31, 1978. The Commission has also extended to May 31, 1978, the comment period on related rules requiring disclosure of information based on the present value of future net revenues from estimated production of proved oil and gas reserves which it originally proposed in Release No. 33-5878, November 3, 1977 (42 FR 57652) and revised in Release No. 33-5916, March 24, 1978 (43 FR 12334).

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

APRIL 28, 1978.

[17 CFR Part 270]

[Release No. IC-10222; File No. S7-738]

PREVENTION OF UNLAWFUL ACTIVITIES WITH RESPECT TO REGISTERED INVESTMENT COMPANIES

Extension of Comment Period

AGENCY: Securities and Exchange Commission.

ACTION: Extension of comment period.

SUMMARY: This notice extends the period for comments set in the notice published March 20, 1978, requesting public comment regarding proposed Rule 17j-1 under the Investment Company Act of 1940. Proposed rule 17j is proposed to prevent unlawful activities with respect to registered investment companies.

DATES: Comments must be received on or before May 30, 1978.

ADDRESSES: Comments should be sent in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 and should refer to File No. S7-738.

FOR FURTHER INFORMATION CONTACT:

Walter R. McEwen, Esq., Division of Investment Management, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-4866.

SUPPLEMENTARY INFORMATION: Notice was published on March 20, 1978, Released No. IC-10162 (43 FR 7976, March 27, 1978) requesting the submission of views with respect to the proposed rule which would prohibit certain activities on the part of persons affiliated with registered investment companies or their investment advisers or principal underwriter. The proposed rule would also require that such entities establish codes of ethics applicable to certain persons associated with them, and would require that these persons make specified reports regarding their securities transactions. The Commission has received requests from two interested members of the public that the comment period be extended. The Commission has determined that it is in the public interest to allow the organizations making the requests additional time to submit comments on the proposed rule. Accordingly, the Commission hereby extends the period for comments on proposed Rule 17j-1 to May 30, 1978.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

APRIL 28, 1978.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[18 CFR Part 1]

[Docket No. RM78-10]

PROCEDURES FOR REVIEW BY FEDERAL ENERGY REGULATORY COMMISSION OF REMEDIAL ORDERS ISSUED BY SECRETARY OF ENERGY

Proposed Rulemaking and Public Hearing

MAY 2, 1978.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Federal Energy Regulatory Commission (the Commission) gives notice of a proposal to establish regulations governing procedures for Commission review of remedial orders issued by the Secretary of Energy (the Secretary) pursuant to the Emergency Petroleum Allocation Act of 1973 (Pub. L. 93-159), as amended (the EPAA). Authority to review remedial orders of the Secretary was conferred upon the Commission by section 503 of the Department of Energy Organization Act, Pub. L. 95-91 (the Act).

DATES: Written comments by June 5, 1978; requests to speak by May 19, 1978; statements by May 24, 1978; public hearing to be held at 9:30 a.m., May 25, 1978, to be continued the following day if necessary.

ADDRESSES: Written comments, requests to speak and statements should reference Docket No. RM78-10 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, the public hearing will be held at the same location in hearing room A.

FOR FURTHER INFORMATION CONTACT:

Mary Wright, Assistant General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 8200, Washington, D.C. 20426, 202-275-4273.

Bonnie Cord, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 8200, Washington, D.C. 20426, 202-275-4210.

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

Section 503(a) of the Department of Energy Act (Pub. L. 95-91) (the Act), provides that if upon investigation, the Secretary of Energy (Secretary) or his authorized representative believes that a person, including any individual, association, company, corporation, partnership or other entity, has violated any regulation, rule or order issued

MAY 8 1978

V 4 3 / 8 9

pursuant to the Emergency Petroleum Allocation Act of 1973 (Pub. L. 93-159, as amended) (EPAA), he may issue a remedial order to that person. Section 503(b) of the Act provides that the remedial order will become effective 30 days after receipt unless the recipient notifies the Secretary that he intends to contest the order.

Under section 503(c), if the Secretary receives notice that the order will be contested the Secretary must notify the Commission immediately, and the Commission is required to stay the effect of the remedial order unless it finds that the public interest requires immediate compliance. Section 503(c) further states:

> The Commission shall, upon request, afford an opportunity for a hearing, including, at a minimum, the submission of briefs, oral or documentary evidence, and oral arguments. To the extent that the Commission in its discretion determines that such is required for a full and true disclosure of the facts, the Commission shall afford the right of cross-examination. The Commission shall thereafter issue an order, based on findings of fact, affirming, modifying, or vacating the Secretary's remedial order, or directing other appropraite relief, and such order shall, for the purpose of judicial review, constitute a final agency action, except that enforcement and other judicial review of such action shall be the responsibility of the Secretary.

The Statement of Managers accompanying the Conference Report on the Act states that responsibility to review remedial orders was placed in the Commission rather than elsewhere in the Department to assure that the Department's review of any initial action taken with respect to remedial orders will be by officials who were in no way involved in the Department's original action. The Conferees stated that this would guarantee a separation of the Department's prosecutorial and judicial functions relating to enforcement. The Conferees also emphasized that the procedures specified in the Act for review of remedial orders—

> • • • are intended to clearly reaffirm the intent of Congress that those involved in enforcement actions • • • be extended procedural due process. Congress always intended that the notions of fair play and due process be followed in the administrative process. (S. Rep. No. 95-367, 95th Cong. 1st Sess. 85-86 (1977)).

On January 6, 1978, the Economic Regulatory Administration (ERA) issued proposed regulations, effective immediately on an interim basis (43 FR 1930, January 13, 1978) relating to the procedures that it would follow in issuing remedial orders under the EPAA.

By notice issued March 15, 1978, (43 FR 13073, March 29, 1978), ERA extended the date for filing comments to May 10, 1978, and scheduled a public hearing on the proposals for May 3, 1978. The regulations proposed by ERA provide generally for issuance by the Special Counsel for Compliance or the Assistant Administrator for Enforcement of a proposed remedial order, followed by an opportunity for aggrieved or interested parties to present evidence before the ERA's Office of Administrative Review relative to the proposed remedial order prior to issuance of the remedial order in final form. Under ERA's proposal, evidentiary hearings could be convened where appropriate, and an opportunity for oral argument would be afforded as a matter of right. The proposed regulations would also apply to interim remedial orders for immediate compliance and orders of disallowance, prohibit ex parte communications and authorize the issuance of ancillary orders. Since the proposal was issued, the Department has announced that that Office's functions will be transferred to a new Office of Hearing and Appeals (OHA) independent of ERA. Thus, under the Department's new announced organization, final remedial orders will be issued by OHA rather than by an office within ERA.

Since the proposed and interim regulations of the Department will to some extent affect the nature of the proceedings to be conducted by the Commission, the Commission invites interested persons to consider these regulations in connection with the Commission's proposed review procedures.

B. Summary of the Commission's Proposed Regulations.

The procedures proposed by the Commission for its review of remedial orders are intended to provide a full and fair consideration of the contested issues in relation to the order without imposing in any case procedural requirements which are unnecessary or unduly burdensome. Thus, the Commission anticipates that where necessary to provide a full and fair disclosure of the facts, an evidentiary hearing will be held, including the right of cross-examination, but that in some cases, disputed issues will be resolved on the basis of written submissions. Whenever a party to a proceeding requests an oral hearing with submissions of briefs, oral or documentary evidence and oral arguments, the request will be granted, as provided in section 503(c) of the Act.

Request for Confidential Treatment. Proposed § 1.38(c) of 18 CFR Part 1, Rules of Practice and Procedure of the Federal Energy Regulatory Commission, provides that information filed by a person under this section may be withheld from public disclosure if the person: (1) Claims that the material is exempt from the mandatory public disclosure requirements of the Freedom of Information Act (5 U.S.C. 552), is information referred to in 18 U.S.C. 1905, or is otherwise exempt from public disclosure; (2) requests the Presiding Office not to disclose the information; (3) serves the requests on other participants in the proceding; (4) submits a copy of the document concerned with alleged confidential information deleted; (5) indicates an the original document that confidentially is claimed; and (6) includes a statement justifying the confidentiality claim, if the claim is made pursuant to the trade secret and commercial or financial information exemption of 5 U.S.C. 552(b)(4). If the second copy with deletions is not submitted, the Presiding Officer may assume that there is no objection to public disclosure. The Presiding Officer shall notify a person of the denial of a claim and provide an opportunity to respond at least 5 days prior to public disclosure of the information. Other participants may oppose the request by filing, within 10 days of receiving a copy of the request, a statement specifying the reasons that the material should not be considered confidential. The Presiding Officer shall notify all participants of his determination as to the claimed confidentiality. if he finds that the information is confidential, the Presiding Officer shall, upon request, determine whether the information may be released to participants, upon request, and shall notify all participants of this determination.

The Commission particularly invites comments on the provisions of the proposal relating to confidentiality including the method by which presiding officers make the determinations of confidentiality. The possibility that a decision may be based on information contained in documents which other parties cannot contest because the information has been determined to be confidential is disturbing. However, the possibility of requiring parties to risk disclosing trade secrets or sensitive financial data to competitors in order to defend themselves in actions before the Commission also present problems. The Commission intends to consider a broad range of approaches to this matter, including refusing to classify any documents as confidential if it supports a material fact in the case and is contested. Accordingly, commentors are encouraged to submit alternative provisions governing confidentiality, and should consider this proposal merely as a description of the subject ot this portion of the rule and the issues involved in it.

Commencement of Proceedings. Proposed § 1.38(d) provides that proceedings under this section are commenced by written notice to the Commission by the Secretary of Energy or his delegate that he has been notified by the recipient of an order (the petitioner) that the order will be contested. The proceedings are also commenced by the petitioner's filing a notice of

M Y 8 7 8 LM

appeal of the denial of an application for stay of an interim remedial order pursuant to 10 CFR 205.199(D)(i)(2). The contested order may be a remedial order under 10 CFR 205.199, an interim remedial order for immediate compliance under 10 CFR 205.199D on an order of disallowance under 10 CFR 205.199E. Upon notice from the Secretary or upon receipt of the notice of appeal from the petitioner under proposed § 1.38(d), the Presiding Officer would be designated by the Commission or its designee for the proceeding. In this regard, the Commission requests the views of interested parties as to whom it should appoint as Presiding Officer in these proceedings, and as to the type of qualifications or experience that would be realistic and desirable for Presiding Officers in view of the Commission's resources.

Stay of Contested Order. Proposed § 1.38(e) provides that upon filing of the notice by the Secretary under paragraph (d) the contested order is automatically stayed unless the Presiding Officer finds on its own motion or upon request of the Secretary or other participant that the public interest requires immediate compliance with the contested order. A request not granted within 10 days would be denied. The Presiding Officer could extend the time for a determination for up to 7 days. The Presiding Officer wil notify petitioner of any denial of a request, and such denial may be appealed to the Commission under § 1.28, except that if the Commission has not acted upon the appeal within 20 days of the filing of the appeal, the appeal shall be deemed to have been denied.

Pleadings. Within 20 days after service of notice by the Secretary under paragraph (d), the Secretary must file with the Presiding Officer and serve upon other participants a copy of the contested order and must certify to the Presiding Officer the complete record developed in the proceedings before the Secretary. In addition, the Secretary may elect to file a separate brief setting forth the elements of the alleged violation with a statement of the factual and legal basis of the contested order, which would also have to be filed with the Presiding Officer within 20 days and served on other participants.

The petitioner's reply, which is due within 20 days of service of the Secretary's pleadings and which the petitioner must serve on all participants in the proceeding, would be required to state fully the petitioner's objections, supported by arguments, to the legal and factual basis of the contested order. New facts or issues could be raised in accordance with the proposed § 1.38(f)(2)(ii). In this regard, the Commission would not review an order otherwise reviewable under this section which was issued without underlying evidentiary proceedings. If in the proceeding before OHA the recipient did not reply to a notice of probable violation or file a notice of objection to a proposed remedial order, a final remedial order could be issued on the basis of the recipient's "consent" without ERA's proving its affirmative case for the record. Thus, any facts or issues raised by the recipient before the Commission would be new facts or issues which would not satisfy the criteria of § 1.38(f)(2)(ii)(A).

Within 20 days from the service of the petitioner's reply, the Secretary may file a response to the petitioner's objections and supporting arguments, which response the Secretary must serve on all participants.

Any person denied the opportunity to participate in prior proceedings could petition to intervene, in accordance with § 1.8. In order that the petition be granted, the person must establish that the denial of opportunity to participate in prior proceedings was wrongful. If the petition were granted, the person could then file briefs as determined by the Presiding Officer.

The time for filing pleadings could be extended for good cause as provided in § 1.13(d).

Hearings. Proposed § 1.38(g)(1) states that any participant may, at a time or times specified by the Presiding Officer, request an opportunity for hearing, which shall be granted. The Presiding Officer may on his own motion convene a hearing. The Presiding Officer, on his motion or on the motion of a participant, could order that there be an opportunity for cross-examination if necessary for a full and true disclosure of the facts. Proposed § 1.38 also provides that the Presiding Officer shall give notice to all participants of the time and place of the hearing. That section also states that the Presiding Officer shall determine the issues to be resolved in the proceeding, may specify the time available for oral argument, and may convene a prehearing conference to determine the issues or the nature of the proceeding to be held.

The Presiding Officer would determine the order of procedure at the hearing, except that in every case, the Secretary has the burden of proof regarding all disputed elements of the affirmative case. Other matters relating to the conduct of the hearing are to be determined by the Presiding Officer. At the conclusion of the hearing an opportunity is provided for participants to submit proposed findings of fact and conclusions of law, and replies thereto, with the requirement that participants serve all such submissions on all other participants.

Order. Proposed § 1.38(i) provides that the Presiding Officer issue a proposed order affirming, modifying or vacating the contested order or directing other appropriate relief. The proposed order and a copy of the record would then be certified and filed with the Commission. A final order affirming, modifying or vacating the contested order or directing other appropriate relief issued by the Commission and served on all participants would constitute a final agency action for purposes of judicial review.

Ex parte communications. Proposed § 1.38(k) provides that the ex parte provisions of § 1.4(d) of this subpart apply to proceedings under this section as if such proceedings were contest on-the-record proceedings pending before the Commission.

Other Issues. The Commission requests comments not only on these proposed procedures, but also on suitable alternative thereto and on any other issues which interested persons believe it should consider in this rulemaking proceeding.

C. Written Comment Procedures

Interested persons are invited to submit written comments, data, views or arguments with respect to this proposal. An original and 14 copies should be filed with the Secretary of the Commission. All comments received prior to June 5, 1978, will be considered by the Commission prior to promulgation of final regulations. All written submissions will be placed in the Commission's public files and will be available for public inspection in the Commission's Office of Public Information, 825 North Capitol Street NE., Washington, D.C., during regular business hours. Comments should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, and should reference Docket No. RM78-10.

D. Public Hearing Procedures

A public hearing concerning this proposal will be held in Washington, D.C. on May 25, 1978, beginning at 9:30 a.m. and will continue if necessary on the following day. Any person interested in this proceeding or representing a group or class of persons interested in this proceeding may make a presentation at the hearing provided a written request to participate is received by the Secretary of the Commission prior to 4:30 p.m., on May 19, 1978.

Requests to participate the hearing should include a reference to Docket No. RM78-10, as well as a concise summary of the proposed oral presentation and a number where the person making the request may be reached by telephone. Prior to the hearing each person filling a request to particiapte will be contacted by the Presiding Officer or his designee for scheduling purposes. At least five copies of the statement shall be submitted to the

V 4 3 / 8 9

Secretary of the Commission prior to 4 p.m., on May 24, 1978. The Presiding Officer is authorized to limit oral presentation at the public hearing both as to length and as to substance. Persons participating in the public hearing should, if possible, bring 100 copies of their testimony to the hearing.

The hearing will not be a judicial or evidentiary-type hearing. There will be no cross-examination of persons presenting statements. However, the panel may question such persons and any interested person may submit questions to the Presiding Officer to be asked of persons making statements. The Presiding Officer will determine whether the question is relevant and whether the time limitations permit it to be presented. If time permits, at the conclusion of the initial oral statements, persons who have made oral statements will be given the opportunity to make a rebuttal statement. Any further procedural rules will be announced by the Presiding Officer at the hearing. A transcript of the hearing will be made available at the Commission's Office of Public Information.

(Department of Energy Organization Act Pub. L. 95-91; E.O. 12009, 42 FR 46267).

In consideration of the foregoing, it is proposed to amend Part I, Subchapter A, Chapter I of Title 18, Code of Federal Regulations, as set forth below.

By direction of the Commission.

LOIS D. CASHELL,
Acting Secretary.

1. Part 1, Subchapter A, Chapter I of Title 18, Code of Federal Regulations, is amended in the table of contents by adding in the appropriate numerical order a new section number and heading to read as follows:

PART 1—RULES OF PRACTICE AND PROCEDURE

* * * * *

Sec. 1.38 Commission Review of Remedial Orders.

* * * * *

2. Part 1, Subchapter A, Chapter I of Title 18, Code of Federal Regulations, is amended in the Statement of Authority by inserting between "825h," and "unless otherwise noted" a phrase to read as follows:

AUTHORITY: 42 U.S.C. 7193(c), E.O. 12009, 42 FR 46467. * * *

3. Part 1, Subchapter A, Chapter I of Title 18, Code of Federal Regulations, is amended by adding a new § 1.38, to read as follows:

§ 1.38 Commission review of remedial orders.

(a) *Scope.* (1) The provisions of this section shall apply to proceedings of the Commission held in accordance with section 503(c) of the Department of Energy Organization Act, Pub. L. 95-91, 42 U.S.C. 7913(c), to review orders issued by the Secretary of Energy pursuant to section 503(a) of the Department of Energy Organization Act, and initiated by notices of probable violation issued on or after October 1, 1977, which are contested by the recipient.

(2) Except as otherwise specifically provided in this section, the following provisions of the Part shall apply to proceedings under this section:

(i) § 1.1—The Commission;
(ii) § 1.2—The Secretary;
(iii) § 1.3—Notice of public sessions and proceedings;
(iv) § 1.4—Appearances and practice before the Commission;
(v) § 1.8—Intervention (except for paragraph (b));
(vi) § 1.11—Amendments and withdrawal of pleadings;
(vii) § 1.12—Motions;
(viii) § 1.13—Time, extensions of time, issuance of orders;
(ix) § 1.14—Filings, docket; hearing calendar;
(x) § 1.15—Formal requirements as to pleadings, documents and other papers filed in proceedings;
(xi) § 1.16—Subscription and verification;
(xii) § 1.17—Service;
(xiii) § 1.21—Copies of transcripts;
(xiv) § 1.22—Witnesses;
(xv) § 1.23—Subpoenas;
(xvi) § 1.24—Depositions;
(xvii) § 1.25—Stipulations;
(xviii) § 1.26—Evidence;
(xix) § 1.27—Presiding officers;
(xx) § 1.36—Public information and requests; and
(xxi) § 1.51—Certificate of service.

(b) *Definitions.* For purposes of this section—

"Commission" means the Federal Energy Regulatory Commission.

"Contested order" means the remedial order, interim remedial order for immediate compliance, or order of disallowance being contested in a proceeding pursuant to this section.

"Interim remedial order for immediate compliance" means an interim remedial order for immediate compliance issued pursuant to 10 CFR 205.199D.

"Order of disallowance" means an order of disallowance issued pursuant to 10 CFR 205.199E.

"Participant" means, as appropriate, the Secretary, the petitioner, other interested persons who participated in prior proceedings on the contested order, and intervenors.

"Person" means any individual, association, company, corporation, partnership, or other entity however organized.

"Petitioner" means a person who has received a remedial order, interim remedial order for immediate compliance, or order of disallowance who notifies the Secretary that he intends to contest the order.

"Remedial order" means a remedial order issued pursuant to 10 CFR 205.199B.

"Secretary" means the Secretary of Energy or his delegate.

(c) Request for confidential treatment. (1) If any person filing under this section claims that some or all of the information contained in a document is exempt from the mandatory public disclosure requirements of the Freedom of Information Act (5 U.S.C. 552), is information referred to in 18 U.S.C. 1905, or is otherwise exempt by law from public disclosure, and if the person requests the Presiding Officer not to disclose such information, which request the person shall serve upon all participants in the proceeding, the person shall file together with the document a second copy of the document from which has been deleted the information for which the person wishes to claim confidential treatment. The person shall indicate in the original document that it is confidential or contains confidential information and may file a statement specifying the justification for nondisclosure of the information for which confidential treatment is claimed. If the person states that the information comes within the exception in 5 U.S.C. 552(b)(4) for trade secrets and commerical or financial information, the person shall include a statement specifying why the information is privileged or confidential. If the person filing a document does not submit a second copy of the document with the confidential information deleted, the Presiding Officer may assume that there is no objection to public disclosure of the document in its entirety. The Presiding Officer retains the right to make his own determination with regard to any claim of confidentiality. Notice of the decision by the Presiding Officer to deny a claim, in whole or in part, and an opportunity to respond shall be given to a person claiming confidentiality of information no less than 5 days prior to its public disclosure.

(2) A participant in the proceeding who wishes to oppose a request for confidential treatment under subparagraph (1) of this paragraph shall, within ten days of the receipt of a copy of the request, file with the Presiding Officer and serve on other participants a statement specifying the reasons that the material is not confidential or priviledged. The Presiding Officer shall notify all participants of his determination as to confidentiality. If the Presiding Officer determines that the material is confidential, he shall, upon request by a participant, determine whether the information may be released, upon request, to participants and shall notify all participants of his determination.

(d) *Commencement of proceedings.* (1) Except as provided in subparagraph (2) of this paragraph, proceedings pursuant to this section shall be commenced by written notice to the Commission by the Secretary that he has been notified by a petitioner that the petitioner intends to contest an order reviewable under this section. At the same time, the Secretary shall certify to the Commission that he has served such written notice upon other participants in the prior proceedings and upon persons denied intervention in the prior proceedings.

(2) Proceedings pursuant to this section with respect to an interim remedial order for immediate compliance shall be commenced by a petitioner's filing, with the Commission, a notice of appeal from the denial of an application for a stay of an interim remedial order for immediate compliance pursuant to 10 CFR 205.199(D)(i)(1).

(3) Upon receipt of notice from the Secretary under subparagraph (1) of this paragraph, or upon receipt of a notice of appeal by the petitioner under subparagraph (2) of this paragraph, the Commission or its designee shall designate a Presiding Officer for the proceeding and shall notify participants in the prior proceeding and persons denied intervention in the prior proceedings of such designation.

(e) *Stay of contested order.* (1) Upon the filing with the Commission by the Secretary of the notice under paragraph (d) of this section, the contested order shall be automatically stayed pending review pursuant to this section unless the Presiding Officer finds that the public interest requires immediate compliance with the contested order.

(2) The Secretary or other participant may at any time prior to the hearing under paragraph (g) of this section or if there is no hearing, prior to the issuance of a proposed order under paragraph (i) of this section, file a petition requesting that the contested order not be stayed and setting forth the legal and factual basis for the request.

(3) The Presiding Officer may request a written statement of the views of any participant regarding whether the contested order should not be stayed, and may convene an expedited hearing or conference on a petition under subparagraph (2) of this paragraph.

(4) The Presiding Officer may grant the petition requesting immediate compliance where he finds that the public interest requires immediate compliance.

(5) If the Presiding Officer has not granted the petition under subparagraph (2) of this paragraph within 10 days after it is filed, the petition shall be deemed denied. Prior to the expiration of the 10 day period the Presiding Officer may extend the period for decision for up to 7 days. At the end of the extension the petition, if not granted, shall be deemed denied.

(6) If the petition under subparagraph (2) of this paragraph is denied, the Presiding Officer shall notify petitioner of such denial.

(7) A grant or denial of a petition under subparagraph (2) of this paragraph may be appealed to the Commission in accordance with § 1.28, except that unless the Commission acts upon the appeal within 20 days after the filing of the appeal, the appeal shall be deemed to have been denied. The contested order will be automatically stayed pending the Commission's disposition of the appeal.

(f) *Pleadings.*—(1) *By the Secretary.* (i) Within 20 days after service of notice by the Secretary under paragraph (d), the Secretary:

(A) Shall file with the Presiding Officer a certified copy of the complete record developed in prior proceedings on the contested order, which shall be deemed a part of the record upon which the order of the Commission is based, and which shall be available at the Commission for inspection by the participants;

(B) Shall file with the Presiding Officer and serve on the other participants in the proceeding a copy of the contested order; and

(C) May, in addition, elect to file a brief in support of the affirmative case, which brief must set forth: (*1*) The elements of the alleged violation, including references to all authorities upon which the Secretary relies, including but not limited to regulations, rulings, interpretations and decisions on appeals and exceptions issued by the Department or its predecessor agencies, and precedents established by the Commission; and (*2*) a complete statement of the factual and legal basis of the contested order. The Secretary shall serve the brief on all participants in the proceedings.

(ii) With 20 days after service of the petitioner's reply, the Secretary may file with the Presiding Officer and serve upon other participants in the proceeding a response to the petitioner's reply.

(2) *By the petitioner.* (i) Within 20 days after service by the Secretary under subparagraph (1) of this paragraph, the petitioner shall file with the Presiding Officer and serve upon the Secretary and other participants in the proceeding a reply stating fully the objections, supported by arguments, to the factual and legal basis of the contested order.

(ii) In the reply, the petitioner may also request permission to raise new facts or issues not raised in prior proceedings on the contested order that (A)(*1*), are new facts or issues that were not known and could not, with the exercise of due care, have been known to the petitioner at the time they could have been raised during prior proceedings; or (*2*) are facts or issues that the petitioner was not permitted to raise due to adverse procedural rulings alleged to be erroneous in prior proceedings on the contested order; and (B) are necessary for a full and true disclosure of the facts.

(3) *By other persons.* Any other person who participated in prior proceedings on the contested order may participate in proceedings under this section and may make filings and submittals as determined by the Presiding Officer.

(4) *By intervenors.* Any person who was denied the opportunity to participate in prior proceedings on the contested order may petition the Presiding Officer to intervene in proceedings under this section in accordance with § 1.8. In order that the petition be granted, petitioner must show that denial of participation in prior proceedings was wrongful. If the Presiding Officer grants the petition, the petitioner may make filings and submittals as determined by the Presiding Officer.

(g) *Hearings.* (1) Any participant may, at such time or times as specified by the Presiding Officer, file a request for an opportunity for hearing or a motion for the opportunity for cross-examination including the reasons why cross-examination is necessary for a full and true disclosure of the facts.

(2) If a participant has filed a request for opportunity for hearing, the Presiding Officer shall grant the request for opportunity for hearing, which will include, at a minimum, the submission of oral or documentary evidence and oral arguments.

(3) The Presiding Officer may at any time, on his own motion, convene a hearing before the Presiding Officer.

(4) If at any time prior to the issuance of a proposed order pursuant to paragraph (i) of this section, upon motion of any participant or on his own motion, the Presiding Officer in his discretion determines that it is necessary for a full and true disclosure of the facts, he may order that the participants be afforded the opportunity for cross-examination on any facts or issues raised in the proceedings, on disputed portions of the record from prior proceedings, or, if determined under paragraph (f)(2)(ii) of this section, on new facts or issues.

(5) As soon as practicable after receiving the pleadings under paragraph (f) of this section, the Presiding Officer shall give notice to all participants of the time and place of the hearing.

(6) The Presiding Officer shall determine the issues to be resolved in

M Y 8 7 8 UM

V 4 3 / 8 9

the proceeding, may specify the time available for oral argument, and shall give notice therof to the participants. The Presiding Officer may require additional information from the participants and may convene a prehearing conference for the purpose of determining the issues or the nature of the proceeding to be held.

(h) *Conduct of the hearing.* (1) The order of procedure at the hearing shall be determined by the Presiding Officer, except that the Secretary shall have the burden of proof with respect to all disputed elements of his affirmative case.

(2) The Presiding Officer shall be responsible for the conduct of the hearing.

(3) Within 10 days after the conclusion of the hearing, any participant may file with the Presiding Officer and serve upon the other participants proposed findings of fact and conclusions of law, a brief in support thereof and any objections with respect to the treatment of confidential information under paragraph (c) (2) of this section or a denial of a motion for an opportunity for cross-examination.

(4) Within 5 days after service of proposed findings of fact and conclusions of law under subparagraph (3) of this paragraph any participant may file, and shall serve on other participants, a reply thereto.

(i) *Proposed order.* (1) After the conclusion of the hearing and after the filing of briefs pursuant to paragraph (h) (3) and (4) of this section, the Presiding Officer shall issue a decision and proposed order based on findings of fact affirming, modifying, or vacating the contested order or directing other appropriate relief. The proposed order shall be based on the entire record before the Presiding Officer, including the record at prior proceedings certified by the Secretary, and shall be based on a preponderance of the evidence.

(2) The Presiding Officer shall certify and file with the Secretary of the Commission, for the Commission, a copy of the record on the hearing, including the proposed order.

(j) *Commission action.* The Commission shall upon consideration of the entire record and the proposed order issue a final order affirming, modifying, or vacating the contested order or directing other appropriate relief. The Commission shall serve the final order on all participants.

(k) *Ex parte communications.* The provisions of § 1.4(d) shall apply to proceedings pursuant to this section, commencing at the time the Secretary gives notice under paragraph (d)(1) of this section, as if such proceedings were contested on-the-record proceedings pending before the Commission.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[25 CFR Part 41]

PREPARATION OF ROLLS OF CERTAIN TRIBES AND BANDS OF INDIANS

Qualifications for Enrollment and Deadline for Filing

APRIL 24, 1978.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Proposed rule.

Summary: The Bureau proposes to amend its regulations on preparation of rolls of Indians to include requirements for enrollment as a lineal descendant to share in the distribution of a judgment awarded the Saginaw, Swan Creek and Black River Bands of Chippewa Indians.

DATE: Comments must be received on or before: June 7, 1978.

ADDRESS: Written comments should be directed to: Chief, Division of Tribal Government Services, Bureau of Indian Affairs, 1951 Constitution Avenue NW., Washington, D.C. 20245.

FOR FURTHER INFORMATION CONTACT:

Mitchell L. Bush, Jr., Enrollment Officer, Bureau of Indian Affairs, 1951 Constitution Avenue NW., Washington, D.C. 20245, telephone 202-343-6921; principal author, Mitchell L. Bush, Jr.

SUPPLEMENTARY INFORMATION: The Saginaw, Swan Creek and Black River Bands of Chippewa Indians were awarded a judgment by the Indian Claims Commission in Docket 57. Funds to satisfy the award were appropriated by the Act of January 3, 1974. A plan for the use and distribution of the funds was submitted to the Congress as required by the Act of October 19, 1973, and since neither House of Congress adopted a resolution to disapprove the plan, it became effective on November 12, 1977.

The plan provides that the funds will be divided between the Saginaw Chippewa Tribe of Michigan and the descendants of the Saginaw, Swan Creek and Black River Bands of Chippewa Indians, parties to the Treaty of September 24, 1819. The division will be based on the number of enrollees on rolls of each group prepared as of November 12, 1977.

The purpose of this amendment to 25 CFR 41.3 by adding a new paragraph designated (cc) is to include in the regulations in Part 41, Preparation of Rolls of Indians, the requirements for enrollment to share in the funds as a lineal descendant of the Saginaw, Swan Creek and Black River Bands as prescribed by the plan, and to establish a deadline for filing applications for enrollment. The regulations will not apply to the preparation of a roll of members of the Saginaw Chippewa Indian Tribe of Michigan.

The authority for issuing these regulations is contained in 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9) and 230 DM 1 and 2.

Part 41, Chapter 1 of Title 25 of the Code of Federal Regulations is amended by the addition of a new paragraph designated (cc) to read as follows:

§ 41.3 Qualifications for enrollment and the deadline for filing.

* * * * *

(cc) Saginaw, Swan Creek and Black River Bands of Chippewa Indians.

(1) All persons who meet the following requirements for eligibility shall be entitled to be enrolled to share in the distribution of the judgment funds awarded the Saginaw, Swan Creek and Black River Bands of Chippewa Indians in Indian Claims Commission Docket numbered 57:

(i) They were born on or prior to and living on November 12, 1977;

(ii) Their name or the name of a lineal ancestor appears on (a) the 1868 census of the Kansas Swan Creek and Black River Chippewas; (b) the 1900 enrollment schedules of the United Band of Chippewa and Munsee of Kansas, appearing thereon as a Chippewa; (c) allotment schedules of the Saginaw, Swan Creek and Black River Bands of Chippewa Indians dated February 6, 1871, June 3, 1871; April 1, 1872 (two schedules); November 10, 1883, November 13, 1885 (two schedules), and November 7, 1891; (d) the March 22, 1939, revised membership roll of the Saginaw Chippewa Indian Tribe of Michigan; (e) the records as a person of Chippewa Indian descent who received a tract of land pursuant to Article 3 of the Treaty of September 24, 1819 (7 Stat. 203), or (f) any other record or document which is acceptable to the Secretary.

(2) No person shall be eligible to be enrolled under this paragraph who is not a citizen of the United States or who is enrolled or entitled to be enrolled with the Saginaw Chippewa Indian Tribe of Michigan.

(3) Applications must be filed with the Superintendent, Michigan Agency, Bureau of Indian Affairs, P.O. Box 884, Sault Ste. Marie, Mich. 49783, on forms provided for that purpose. Applications for enrollment must be received by the Superintendent no later than the close of business, December 1, 1978.

M Y 8 7 8 M

No further changes are made in the text of Part 41.

FORREST J. GERARD,
Assistant Secretary,
Indian Affairs.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Part 1]

[LR-1671]

ARBITRAGE BONDS

Notice of Proposed Rulemaking

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed amendments to the arbitrage bond regulations. The amendments are designed to clarify and correct the regulations. They affect purchasers and governmental issuers of tax-exempt bonds.

DATES: Written comments and requests for a public hearing must be delivered or mailed by July 7, 1978. One proposed amendment generally applies to bonds sold after May 15, 1978. Other proposed amendments apply to bonds issued or sold as specified in the respective regulations sections amended. Where no effective date is specified, the changes apply retroactively because they merely correct technical errors or interpret the statute.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Katherine A. Newell of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-3740, not a toll-free call.

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains proposed amendments to the Income Tax Regulations (26 CFR part 1) under section 103(c) of the Internal Revenue Code of 1954. These amendments are to be issued under the authority contained in sections 103(c)(6) and 7805 of the Internal Revenue Code of 1954 (83 Stat. 656 and 68A Stat. 917; 26 U.S.C. 103, 7805).

PREVIOUS NOTICES OF PROPOSED RULEMAKING

On May 3, 1973, the FEDERAL REGISTER published proposed Income Tax Regulations 926 CFR part (1) under section 103 of the Internal Revenue Code of 1954 (38 FR 10944). The proposed regulations were revised by notices of proposed rulemaking published in the FEDERAL REGISTER for December 3, 1975 (40 FR 56488), October 9, 1976 (41 FR 47679), May 31, 1977 (42 FR 27610), and June 9, 1977 (42 FR 29517) and corrected by notices published in the FEDERAL REGISTER for May 11, 1973 (38 FR 12405), December 18, 1975 (40 FR 58656), November 24, 1976 (41 FR 51840), and June 21, 1977 (42 FR 31462). This notice of proposed rulemaking further revises the proposed regulations.

Section 103 generally exempts from tax interest on State and local government obligations. Section 103(c) provides that interest on State and local obligations will not be tax exempt where a major portion of the porceeds of the issue is reasonably expected to be used to purchase securities or obligations that may produce a yield materially higher than the yield on the State or local bond issue.

Paragraph (c) of proposed § 1.103-13 provides that the yield on an obligation is determined by reference to the purchase price. The amendments made to the proposed regulations by this document define "purchase price" as the price at which the bonds are sold to the public. The proposed regulations did not previously have a definition of purchase price. The definition of purchase price is the same as the one used in § 1.1232-3 in relation to original issue discount.

Paragraph (c)(1)(ii) of § 1.103-13 provides that in computing the yield on obligations issued to refund other obligations and on obligations placed in escrow, the present value of certain adminstrative costs may be taken into account in determining the present value of the obligations. This rule has allowed administrative cost to be disregarded in determining whether it is economical to refund a prior issue. The result has been inflated administrative costs. The amendment to the proposed regulations provides that administrative costs will not affect the purchase or sales price. Thus yield will be determined on a gross profit basis. In addition, the amendment provides that administrative costs borne by the obligor on acquired purpose obligations will not be taken into account in computing yield.

Paragraph (b)(5) of proposed regulations § 1.103-13 provides a definition for the term "materially higher" as it relates to the determination of whether the yield on obligations acquired with proceeds of a governmental obligation causes it to be an arbitrage bond. An amendment to paragraph (b)(5) provides a formula for determining whether yield is materially higher than the yield on a refunding issue before the prior issue is discharged. This amendment and the amendments relating to determination of yield under paragraph (c) apply to obligations issued after September 1, 1978.

Generally, the issuer of tax-exempt bonds must invest all but a minor portion of the bond proceeds at a restricted yield, that is, a yield not materially higher than the yield at which the bonds were sold. The term "proceeds" includes "original proceeds" and "investment proceeds." Some issuers have avoided the restrictions on investment yield by contributing taxes or other revenues to a sinking fund. The sinking fund is then invested at a rate which allows the issuer, where the entire issue is retired at the end of a fixed period, to make a profit on the investment of the fund. Because of this abuse, the regulations are being amended to provide that contributions made to a sinking fund are treated as proceeds of the issue to the extent the issuer reasonably expects to use the fund to pay principal or interest on the issue. These amounts will thus be subject to the limitation on yield rules. This amendment generally applies to obligations sold after May 15, 1978.

When obligations are issued, existing proposed § 1.103-13(a)(2) provides that the issuer may certify that its reasonable expectations are that the proceeds of the obligations will not be used for arbitrage. Under paragraph (a)(2)(iii) of § 1.103-13, the Internal Revenue Service may provide that future certifications of the issuer may not be relied upon. Where the face amount of obligations is in excess of $2.5 million counsel to the issuer must opine that the certification is not unreasonable.

Paragraph (a)(2) of the regulations is amended to provide that with respect to obligations issued after September 1, 1978, the issuer may certify its reasonable expectations as to future events such as use of funds. However, the issuer may not certify conclusions of law and opinion of counsel is no longer required. An additional amendment to paragraph (a)(2) provides that the Internal Revenue Service may announce that future certifications of an issuer cannot be relied on if the issuer has made a material misrepresentation in a certification.

COMMENTS—PUBLIC HEARING

Before adopting these proposed amendments, consideration will be given to any written comments that are submitted (preferable six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held in accord-

V 43 / 89

ance with the notice of hearing published in this issue of the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal author of these proposed regulations was Katherine Newell of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

PROPOSED AMENDMENTS TO THE REGULATIONS

The proposed amendments to 26 CFR part 1 are as follows:

Paragraph 1. Section 1.103-13 is amended as follows:

1. The reference to "section 103(c)" in paragraph (a)(1) is changed to "section 103(b)".

2. Wherever "section 103 (d)" appears as a reference or as part of a reference, such reference is changed to "section 103 (c)".

3. The second and third sentences in paragraph (a)(2)(i) are revised and a new sentence is added to paragraph (a)(2)(i) after the third sentence as revised.

4. The reference to "this section and § 1.103-14" in paragraph (a)(2)(ii)(B) is changed to "this section, § 1.103-14, and § 1.103-15".

5. Paragraph (a)(2) is amended by redesignating subdivisions (iii) and (iv) as subdivisions (iv) and (v), by inserting a new subdivision (iii), by revising subdivision (iv) as redesignated, and by adding new examples (3) and (4) in subdivision (v) as redesignated.

6. The first and third sentences in paragraph (b)(1)(ii) are revised, paragraph (b)(5)(iii)(A) is revised by adding a new sentence at the end there of, new paragraphs (b)(5)(v), (b)(5)(vi), and (b)(5)(vii) are added, paragraph (b)(10)(i)(C) is revised, and a new paragraph (b)(11) is added.

7. Paragraph (c)(1) is amended by adding new subdivisions (iii)(D) and (iv).

8. Paragraph (c) is revised by redesignating subparagraph (4) as subparagraph (6) and by adding new subparagraphs (4) and (5).

9. Paragraph (d) is redesignated as paragraph (h) and a new paragraph (d) is added.

10. Paragraphs (f)(4)(ii) and (f)(4)(iii) are revised by inserting "original" before "proceeds" and inserting "such proceeds" in place of "the refunding issue", by redesignating paragraph (f)(4)(iv) as paragraph (f)(4)(v), and by adding a new paragraph (f)(4)(iv).

11. A new paragraph (g) is added.

§ 1.103-13 Arbitrage bonds.

(a) *Scope.* • • •

(2) *Reasonable expectations.* (i) • • • Thus, an obligation is not an arbitrage bond, if, based on the reasonable expectations on the date of issue as to the use of the proceeds of the issue, the proceeds will not be used in a manner that would cause the obligation to be an "arbitrage bond" under section 103 (c)(2), this section and § 1.103-14 and § 1.103-15. Reasonable expectations regarding the amount and use of the proceeds on or before September 1, 1978; may be established by the certification described in subdivision (ii) of this subparagraph. Reasonable expectations as to future events regarding a governmental obligation issued after September 1, 1978, may be established to the extent permitted by the certification described in subdivision (iii) of this subparagraph. • • •

• • • • •

(iii) (A) A State or local governmental unit may certify, in the bond indenture or a related document, reasonable expectations of the issuer on the date of the issue as to the future events, such as use of funds. For example, matters which may be certified include: The use to which amounts received from sale of the bonds will be put; the date on which a project financed by a sale of bonds will be completed; the amount that will be spent for construction of a such a project; and that a reserve or replacement fund of a certain amount will be established. On the other hand, an issuer may not certify that a reserve or replacement fund is reasonably required because the reasonableness of a reserve fund is an opinion or judgment that can be made before the date of issuance. As such it is not a reasonable expectation as to a future event.

(B) A State or local governmental unit may not certify conclusions of law (including legal characterizations of future events). For example, an issuer may not certify the statement that an obligation is not an arbitrage bond, or the statement that a major portion of the proceeds of an issue is not reasonably expected to be used directly or indirectly to acquire securities or obligations which may be reasonably expected to produce a yield over the term of the issue which is materially higher than the yield on the obligations of such issue. Both these statements are conclusions of law. In addition, a unit may not certify the date on which a temporary period ends because that is a conclusion of law. Similarly, a unit may not certify the statement that an obligation will produce a certain yield. This is because the statement uses "yield" as a defined legal term. Thus, the statement assumes that yield has been determined in a proper manner, which is a conclusion of law. On the other hand, a unit may describe the manner in which it has computed yield and certify that the yield on an obligation (determined in the manner described) is equal to a certain amount. In this statement yield is not used as a defined legal term. Therefore, the statement does not assume any conclusions of law. Further, a unit may not certify that the original proceeds of an issue will not exceed by more than 5 percent the amount necessary for the purpose of the issue. This statement uses two defined legal terms: "original proceeds" and "issue". On the other hand, a unit may certify the amount that will be received from the sale of certain obligations and the amount necessary for a particular purpose.

(C) An officer responsible for issuing the bonds must act for the issuer.

(D) In addition to the matters certified, the certification must set forth the facts and estimates on which the issuer's expectations are based and state that, to the best of the knowledge and belief of the certifying officer, the issuer's expectations are reasonable.

(E) (*1*) If the temporary period for a construction issue is more than 3 years but not more than 5 years, the issuer must commission an independent architect or engineer to prepare a study of the planned construction.

(*2*) The study prepared by the architect or engineer must accompany the certification and must include an estimated completion date for each stage of the construction.

(F) Subsequent events do not affect a certification made in accordance with this subdivision.

(iv)(A) If a certification contains a material misrepresentation, the Commissioner may disqualify the issuer. The Commissioner will publish notice that the issuer is disqualified in the Internal Revenue Bulletin. The disqualification will not affect bonds issued before the notice is published.

(B) An issuer that is disqualified may not certify an issue under subdivision (ii) or (iii) of this subparagraph.

(C) The Commissioner will give an issuer reasonable opportunity to be heard before it is disqualified.

(D) If appropriate, the Commissioner may requalify an issuer. The Commissioner will publish notice that the issuer has been requalified in the Internal Revenue Bulletin.

• • • • •

(v) • • •

Example (*3*). (i) The facts are the same as in example (1)(i) except that the bonds are issued on July 5, 1980, and all other dates are appropriately adjusted. City A includes in the bond indenture a certification which contains a statement that 85 percent of the receipts from sale of the bonds will be used for construction costs by July 5, 1983.

(ii) Construction of the water treatment facility was determined by the Environmental Protection Agency to have certain adverse environmental effects. Consequently, work on the project was halted and the facility was redesigned to avoid the effects with the result that 85 percent of the receipts from sale of the bonds will not be expended for project costs by July 5, 1983. The certification is conclusive as to the issuer's reasonable expectations that 85 percent of receipts will be expended for construction costs by July 5, 1983.

(iii) Under the circumstances described in subdivision (ii), city A has not made a material misrepresentation in the certification which would permit the Commissioner to disqualify city A under subdivision (iv) of this subparagraph. If, however, city A did not actually expect that 85 percent of the receipts from sale of the bonds would be used for construction costs by July 5, 1983, the Certification would contain a material misrepresntation. Under those circumstances, the Commissioner may disqualify city A.

Example (*4*). On January 1, 1980, city A sells $5 million of 6 percent refunding bonds. City A certifies the bonds in the manner provided in subdivision (iii) of this subparagraph. In addition, attorney X gives an opinion that the bonds are not arbitrage bonds. In connection with the refunding issue, city A makes use of a certain artifice or device. This artifice or device is not identified as specifically prohibited by section 103(c) or the regulations thereunder. However, as a result of the artifice or device, city A is able to exploit the difference between tax-exempt and taxable interest rates to gain a financial advantage. This financial advantage serves as a material inducement for city A to sell the refunding bonds, or to issue more refunding bonds than would be otherwise be necessary, or to allow the refunding bonds to remain outstanding longer than would otherwise be necessary. Based on these facts, the artifice or device is an attempt to defeat purposes of section 103(c). Because section 103(c) and the regulations thereunder are intended to prevent the use of such an artifice or device, the legal conclusion as reached by attorney X is erroneous. Therefore, the refunding bonds are arbitrage bonds despite the certification.

(b) *Definition.* • • •

(1) *Arbitrage bonds.* • • •

(ii) A major portion of the proceeds of an issue is any amount which at any time exceeds 15 percent of the original face amount of the issue. • • • See § 1.103-14 (e) for special rules that apply to refunding issues. • • •

• • • • •

(5) *Materially higher.* • • •

(iii) (A) • • • Before the prior issue is discharged, materially higher than the yield on a refunding issue that is issued after September 1, 1978, means higher than—

$$Y+(\$25{,}000\times Y)/(P)$$

where—

(*1*) "Y" stands for the yield on the issue, and

(*2*) "P" stands for the amount of the original proceeds of the issue.

• • • • •

(v) The following example illustrates the application of paragraph (b)(5)(iv) of this section:

Example. On July 1, 1977, city A sells $10 million of 7-percent Series A revenue bonds and $5 million of 4-percent Series B special obligation bonds at par in the full cash defeasance of a prior issue. Assuming that under State law and the bond indenture agreement the amount necessary to defease the prior issue is only $10 million, paragraph (b)(5)(iv) of this section applies to both the Series A and the Series B issue. Thus, for example, if transferred proceeds of the Series A issue are invested at more than 7 percent, the Series A bonds are arbitrage bonds.

(vi) Despite anything in § 1.103-13 (b) or (e) to the contrary, § 1.103-13 (b)(5)(vii) applies to any acquired obligation that is allocated to amounts treated as proceeds under § 1.103-13(g) (relating to invested sinking funds).

(vii) Materially higher than the yield on a issue means higher than—

$$Y+(\$5{,}000\times Y)/(F)$$

where—

(a) "Y" Stands for the yield on the issue, and

(B) "F" stands for the maximum amount that will be accumulated in a sinking fund (or funds) for the issue.

• • • • •

(10) *Issue.* (i) • • •

(C) Will be paid out of substantially the same source of funds (or will have substantially the same claim to be paid out of substantially the same source of funds).

(11) *Discharged.* An issue is "discharged" when all obligations that were part of the issue are retired.

(c) *Computation of yield*—(1) *In general.* • • •

(iii) • • •

(D) The market price of a certificate of deposit issued by a commercial bank may be determined as the bona fide bid price quoted by a dealer who maintains an active secondary market in such certificates of deposit.

(iv) The rules in paragraph (c)(1)(iii) shall also apply to acquired obligations that are allocable to amounts treated as proceeds under paragraph (g) of this section.

• • • • •

(4) *Student loans.* Payments made by the Commissioner of Education pursuant to section 127(a) of the Education Amendments of 1976 are not taken into account in determining yield on student loan notes.

(5) *Certain administrative costs.* If—

(A) An issue is issued after September 1, 1978,

(B) The original proceeds of the issue are used to purchase acquired purpose obligations, and

(C) The obligor pays administrative costs of issuing, carrying, or repaying the issue,

then such payments shall not be taken into account in determining yield. The preceding sentence applies whether or not such payments are made from bond proceeds, and whether or not such payments merely reimburse the issuer.

• • • • •

(d) *Obligations issued after September 1, 1978*—

(1) *In general.* Despite anything in paragraph (c) to the contrary, the rules in this paragraph apply to obligations issued after September 1, 1978.

(2) *Administrative costs.* Administrative costs may not be taken into account in determing yield.

(3) *Purchase price.* (i) If an issue of governmental obligations is sold to the public, the term "purchase price" means the initial offering price to the public (excluding bond houses, brokers, and other intermediaries).

(ii) If an issue of governmental obligations is privately placed, the purchase price of each obligation is the price paid by the first buyer of the obligation. For this purpose, the term "first buyer" does not include any bond house, broker, or other intermediary.

(iii) If the purchase price of an obligation is unreasonably low, then the yield on the obligation shall be determined as if its purchase price were equal to its fair market value on the date of issue.

(4) *Illustrations.* The following examples illustrate the application of this paragraph:

Example (*1*). On January 1, 1979, city A sells a $10 million issue of 10-year, 6-percent revenue bonds. The purchase price of the issue is $9,800,000. The yield on the revenue bonds is 6.27 percent. Administrative costs are not taken into account in determining yield.

Example (*2*). On January 1, 1980, city B sells $20 million of 5-percent general obligation bonds to underwriter X for $19,800,000. Underwriter X offers and sells the entire issue to the public at par. The purchase price of the issue is $20 million. The yield on the issue is 5 percent. The underwriter's spread is not taken into account in determining yield.

Example (*3*). On January 1, 1981, city C sells $12 million of revenue bonds and uses part of the proceeds to buy a 6-percent Treasury note at par. The yield on the Treasury note is 6 percent. Administrative costs are not taken into account in determining yield.

• • • • •

(f) *Allocations of investments and expenditures.* • • •

(4) *Requirements.* • • •

(iv) Obligations purchased with amounts treated as proceeds under § 1.103-13(g) (relating to invested sinking funds) must be allocated to such amounts.

• • • • •

M Y 8 7 8 LM

V 43/89

(g) *Invested sinking funds*—

(1) *Effective date.* (i) Except as provided in § 1.103-13(g)(1)(ii), this paragraph applies to bonds sold after May 2, 1978.

(ii) This paragraph does not apply to bonds sold before May 16, 1978, if—

(A) The sale of the bonds was either authorized or approved by the governing body of the governmental unit issuing the bonds or by the voters of such governmental unit,

(B) Notice of sale of the bonds was given as required by law, or

(C) A bona fide written offering statement (or preliminary offering statement) was circulated to potential purchasers, before May 3, 1978; *Provided*, That the bonds are issued within a reasonable time after they are sold.

(2) *In general.* Amounts accumulated in a sinking fund for an issue are treated as proceeds of the issue.

(3) *Sinking fund.* The term "sinking fund" includes a debt service fund, or any similar fund, to the extent that the issuer reasonably expects to use the fund to pay principal or interest on the issue.

(4) *Withdrawals.* Amounts withdrawn from a sinking fund are not treated as proceeds under this paragraph after they are withdrawn.

(5) *Prior issue.* Proceeds of the prior issue are not treated as proceeds of a refunding issue under this paragraph. See, however, § 1.103-14(e)(2)(ii) for rules relating to transferred proceeds.

PAR. 2. Section 1.103-14 is amended as follows:

1. Wherever "section 103(d)" appears as a reference or as part of a reference, such reference is changed to "section 103(c)".

2. New paragraphs (b)(9), (b)(10), and (b)(11) are added to read as set forth below.

3. In paragraph (c)(2)(iii), "anticipated tax or other revenues" is replaced by "issue."

4. In paragraph (e)(1-A)(iv), "Example (v)" is corrected to read "Example (1)" and "special obligation bonds" is replaced by "guaranteed revenue bonds" in example (3).

5. Two new sentences are added in place of the fourth sentence in paragraph (e)(2)(ii) to read as set forth below.

6. Paragraphs (e)(4)(iii) and (e)(5)(iii) are revised by inserting "paragraph (e)(1-B) (iii) and (iv)" in place of "paragraph (e)(1)(ii)".

§ 1.103-14 Temporary investments, reserve fund, and refunding issues.

* * * * *

(b) *Temporary period.* * * *

(9) *Invested sinking funds.* Thirty days is the temporary period for amounts treated as proceeds of an issue solely because they are accumulated in a sinking fund for the issue (see § 1.103-13(g)). The temporary period begins on the date of accumulation.

(10) *Debt service fund.* Despite subparagraph (9) of this paragraph, 13 months is the temporary period for amounts contributed to a bona fide debt service fund; provided that each such amount is spent before the end of the temporary period.

(11) *Interest.* Despite subparagraph (9) of this paragraph, one year is the temporary period for amounts received from investment of a sinking fund.

* * * * *

(e) *Refunding issue.* * * *

(2) *Definitions.* * * *

(ii) * * * Generally, it is not necessary to apply the preceding two sentences for purposes of § 1.103-14(e) (4) and (5). (This is because of § 1.103-14(e)(6), which treats different parts of the prior issue as separate issues.)

* * * * *

PAR. 3. Section 1.103-15 is amended as follows:

1. The portion of paragraph (c)(1) that follows subdivision (iv) is revised to read as set forth below.

2. Paragraphs (g), (h), and (i) are redesignated as paragraphs (h), (i), and (j) respectively, paragraph (j) is redesignated as paragraph (l), and new paragraphs (g) and (k) are added to read as set forth below.

3. Example (4) of paragraph (l) as redesignated is revised by deleting "$35,000" from item (c)(8) and "1980" from item (d)(4) and inserting respectively, "$15,000" and "1990" in lieu thereof.

§ 1.103-15 Excess proceeds.

* * * * *

(c) *Excess proceeds.*—(1) *In general.* * * *

(v) Proceeds that will be used to pay the administrative costs of—

(A) Repaying the prior issue,

(B) Carrying and repaying the refunding issue, or

(C) Purchasing, carrying, and selling or redeeming obligations acquired with the proceeds of the refunding issue;

(vi) Transferred proceeds that will used for the purpose of the prior issue;

(vii) Investment proceeds derived from the investment of a reasonably required reserve or replacement fund;

(viii) Interest on acquired purpose obligations; and

(ix) Amounts treated as proceeds solely because they are accumulated in a sinking fund for the refunding issue (see § 1.103-13(g)).

* * * * *

(g) *Fourth exception; temporary period.* This section shall not apply to a refunding issue if the prior issue is discharged within 180 days after the refunding bonds are issued.

* * * * *

(k) *Invested sinking funds.* If a refunding issue is sold after the effective date of § 1.103-13(g), then amounts accumulated in a sinking fund for the prior issue are treated as proceeds of the refunding issue for purposes of this section.

JEROME KURTZ,
Commissioner of Internal Revenue.

Arbitrage Bonds; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed amendments to the arbitrage bonds regulations.

DATES: The public hearing will be held on July 25, 1978, beginning at 10 a.m. Outlines of oral comments must be delivered or mailed by July 7, 1978.

ADDRESS: The public hearing will be held in the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, D.C. The outline for oral comments on the proposed amendments to the regulations should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-1671), 1111 Constitution Ave. NW., Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

George Bradley or Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224; telephone, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed amendments to the arbitrage bonds regulations under section 103(c) of the Internal Revenue Code of 1954. These proposed amendments appear in this issue of the FEDERAL REGISTER.

On May 3, 1973, the FEDERAL REGISTER published proposed Income Tax Regulations (26 CFR Part 1) under section 103 of the Internal Revenue Code of 1954 (38 FR 10944). The proposed regulations were revised by notices of proposed rulemaking published in the FEDERAL REGISTER for December 3, 1975 (40 FR 56488), October 9, 1976 (41 FR 47679), May 31, 1977 (42 FR 27610), and June 9, 1977 (42 FR 29517) and corrected by notices published in the FEDERAL REGISTER for May 11, 1973 (38 FR 12405), December 18, 1975 (40 FR 58656), November 24, 1976 (41 FR 51840), and June 21, 1977 (42 FR 31462). The proposed regulations which are the subject of this hearing further revise the proposed regulations.

The rules of § 601.601(a)(3) of the Statement of Procedural Rules (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed amendments and who desire to present oral comments at the hearing on the proposed amendments must submit an outline of the comments to be presented at the hearing and the time they wish to devote to each subject. As stated above, this outline must be delivered or mailed by July 7, 1978. Outlines of oral comments will be acknowledged by telephone upon receipt. Those who submit outlines but receive no acknowledgment within a reasonable amount of time after mailing should contact Mr. Bradley or Mr. Hayden.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time taken by questions from the panel for the Government and answers to these questions.

Because of controlled access restrictions, those attending the hearing cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

Dated: May 3, 1978.

ROBERT A. BLEY,
Director, Legislation and Regulations Division.

INCOME TAX

Depreciation of Property Attributable To Rehabilitation Expenditures Incurred With Respect to Low-Income Rental Housing

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed rules relating to the depreciation of property attributable to expenditures incurred to rehabilitate low-income rental housing. The proposed regulations reflect amendments made to section 167(k) of the Code by the Tax Reform Act of 1976 and the Act of November 12, 1977.

DATES: Written comments and requests for a public hearing must be delivered or mailed by July 5, 1978. The amendments generally apply to property attributable to rehabilitation expenditures paid or incurred after December 31, 1975. In addition, the amendments propose to extend the time for making an election with respect to property attributable to expenditures paid or incurred after December 31, 1975, until 90 days after the amendments are adopted.

ADDRESS: Send comments and requests for a public hearing to Commissioner of Internal Revenue, Attention: CC:LR:T (LR-141-76), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Charles M. Whedbee of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 Attention: CC:LR:T (202-566-3487) (Not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 167(k) of the Code relates to the depreciation of property attributable to expenditures to rehabilitate low-income rental housing. The Tax Reform Act of 1976 (Pub. L. 94-455) and the Act of November 12, 1977 (Pub. L. 95-171) extended the general cut-off date for qualifying expenditures from January 1, 1976, to January 1, 1979. In addition, certain expenditures incurred pursuant to a binding contract entered into before January 1, 1979, or with respect to low-income rental housing the rehabilitation of which has begun before January 1, 1979, are deemed to be incurred before January 1, 1979. Because these amendments clearly indicate a congressional policy to stimulate rehabilitation of low-income housing, the proposed amendments to the regulations utilize a somewhat broader approach to the determination of a binding contract entered into before January 1, 1979, than may be found in regulations under other sections of the Code where different congressional objectives are apparent.

The 1976 Act also increased to $20,000 the per-dwelling-unit ceiling on qualifying expenditures, effective with respect to expenditures incurred after December 31, 1975. The 1976 Act also requires that the Secretary of the Treasury (or his delegate) define, by regulations, families and individuals of low or moderate income in a manner consistent with the leased housing program under section 8 of the United States Housing Act of 1937. The proposed amendments to the regulations reflect these amendments to section 167(k) of the Code.

The proposed amendments also make clear that a dwelling unit held for occupancy by individuals or families of low or moderate income may qualify as low-income rental housing, even though other dwelling units in the same building are held for occupancy by persons not of low or moderate income.

The proposed amendments are to be issued under the authority contained in section 167(k)(3)(B) of the Internal Revenue Code of 1954 (83 Stat. 651, 90 Stat. 1530; 26 U.S.C. 167(k)(3)(B)) and section 7805 of the Internal Revenue Code of 1954 (68 A Stat. 917; 26 U.S.C. 7805).

COMMENTS AND REQUESTS FOR A PUBLIC HEARING

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal author of these proposed regulations was Charles M. Whedbee of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

PROPOSED AMENDMENTS TO THE REGULATIONS

The proposed amendments to 26 CFR Part 1 are as follows:

PARAGRAPH 1. Section 1.167(k) is deleted.

PAR. 2. Section 1.167(k)-1 is amended as follows:

1. Paragraph (a)(1) is amended by striking out "January 1, 1975" in the first sentence and inserting in lieu thereof "January 1, 1979".

MAY 8 1978

V 4 3 / 8 9

2. The first sentence of paragraph (a)(2) is amended by striking out "December 31, 1974" and inserting in lieu thereof "December 31, 1978".

3. The second sentence of paragraph (a)(2) is amended by striking out "January 1, 1975" and inserting in lieu thereof "January 1, 1979".

4. A new paragraph (d) is added at the end to read as set forth below.

§ 1.167 (k)–1 Depreciation of property attributable to rehabilitation expenditures.

• • • • •

(d) *Expenditures deemed incurred before January 1, 1979.* For purposes of paragraph (a) of this section—

(1) Rehabilitation expenditures (including rehabilitation expenditures that are treated as paid or incurred by the taxpayer by reason of paragraph (b)(1) of this section) that are incurred pursuant to a binding contract entered into before January 1, 1979, are deemed to be incurred before January 1, 1979. The contract must require (i) the rehabilitation to be performed for the taxpayer (or the person or persons other than the taxpayer described in paragraph (b)(1) of this section) in accordance with his specifications, or (ii) the taxpayer (or the person or persons other than the taxpayer described in paragraph (b)(1) of this section) to perform the rehabilitation (or to have the work performed for him in accordance with his specifications). The contract, as of December 31, 1978, must also specifically identify the existing building (or buildings) in connection with which the rehabilitation expenditures are to be incurred, and the expenditures must be incurred in connection with that building (or buildings). A contract may be binding, for purposes of section 167(k)(3)(D) and this section, even if it is subject to the happening of certain contingencies (such as the obtaining of financing from a third party) which have not occurred by January 1, 1979: *Provided*, That the happening of the contingencies is not within the unrestricted control of the taxpayer (or the person or persons other than the taxpayer described in paragraph (b)(1) of this section) and the contingencies in fact occur. In any event, a contract that does not represent a bona fide agreement negotiated at arms-length shall not be considered a binding contract for purposes of section 167(k)(3)(D). For purposes of section 167(k)(3)(D), a binding contract includes an agreement, entered into pursuant to section 8 of the United States Housing Act of 1937, between the taxpayer (or the person or persons other than the taxpayer described in paragraph (b)(1) of this section) and the Department of Housing and Urban Development ("HUD") or a public housing agency ("PHA") providing that upon completion of rehabilitation in accordance with the taxpayer's final proposal, HUD or the PHA will enter into a housing assistance payments contract with the taxpayer (or such other person or persons). For purposes of the preceding sentence, "agreement", "final proposal", "public housing agency", and "housing assistance payments contract" have the same meaning as those terms have in 24 CFR Part 881 (relating to substantial rehabilitation under the section 8 housing assistance payments program).

(2) Rehabilitation expenditures (including rehabilitation expenditures that are treated as having been paid or incurred by the taxpayer by reason of paragraph (b)(1) of this section) incurred with respect to low-income rental housing the rehabilitation of which has begun before January 1, 1979, are deemed to be incurred before that date. For purposes of determining whether rehabilitation has begun before January 1, 1979, each dwelling unit (see § 1.167(k)–3(c)) shall be considered separately. Rehabilitation begins upon the commencement of physical work at the site of the dwelling unit, as distinguished from the beginning of, or engaging in, other preliminary activities, such as the preparation of architect's sketches. The determination of whether physical work has begun shall be based upon all the facts and circumstances of a particular case. In general, where the physical work which has commenced before January 1, 1979, represents rehabilitation expenditures which are allocable under § 1.167(k)–2(d) to more than one dwelling unit (such as the cost of replacing the roof of an existing structure), such work may be treated as having been done on units to which the expenditures are allocable.

PAR. 3. Section 1.167(k)–2 is amended as follows:

1. The third sentence of paragraph (a) is amended by striking out "1974" and inserting in lieu thereof "1978".

2. The first two sentences of paragraph (c)(1) are deleted and four new sentences are inserted in lieu thereof to read as set forth below.

3. The last sentence of paragraph (c)(1) is amended by striking out "limitation" and inserting in lieu thereof "limitations".

4. Paragraph (c)(2) is amended by striking out "following example:" and *"Example."* and inserting in lieu thereof "following examples:" and *"Example* (1).", respectively.

5. A new example (2) is inserted after example (1) in paragraph (c)(2), to read as set forth below.

6. Paragraph (e) is amended as follows:

(a) Subparagraph (1) is amended by striking out "For purposes of" in the first sentence and inserting in lieu thereof "Except as provided in paragraph (e)(2) of this section, for purposes of".

(b) Subparagraph (2) is redesignated as subparagraph (3).

(c) A new subparagraph (2) is added after subparagraph (1), to read as set forth below.

§ 1.167(k)–2 Limitations.

• • • • •

(c) *Maximum amount.* (1) In general, the maximum amount of rehabilitation expenditures paid or incurred by the taxpayer with respect to any dwelling unit which may be taken into account under section 167(k) is $20,000. However, in the case of rehabilitation expenditures incurred before January 1, 1976, the amount of such expenditures paid or incurred by the taxpayer with respect to any dwelling unit which may be taken into account under section 167(k) is limited to $15,000. The rules in § 1.167(k)–1(a)(2) shall apply in determining whether an expenditure is incurred before January 1, 1976. Property attributable to amounts in excess of $20,000 (or, if applicable, $15,000) may qualify for the reasonable allowance provided by section 167(a). • • •

(2) • • •

Example (2). X, a calendar year taxpayer on the cash receipts and disbursements method of accounting, spends a total of $22,000 for rehabilitation of one dwelling unit in an existing building held for low-income rental housing. X would be considered, under the accrual method of accounting, to have incurred $19,000 of the expenditures in 1975 and $3,000 in 1976. The expenditures qualify as rehabilitation expenditures under § 1.167(k)–3. Because of the $15,000 limitation with respect to rehabilitation expenditures incurred before January 1, 1976, property attributable incurred in 1975 qualifies for an election under section 167(k). The $4,000 of expenditures incurred in 1975 with respect to which X cannot make a valid election is not taken into account in applying the $20,000 limitation. Therefore, property attributable to the entire $3,000 of expenditures incurred in 1976 qualifies for an election under section 167(k).

• • • • •

(e) *Special rule.* • • •

(2) In determining, for purposes of the $15,000 limitation described in the second sentence of paragraph (c)(1) of this section, whether a rehabilitation expenditure is incurred before January 1, 1976, a rehabilitation expenditure treated as having been paid or incurred by the taxpayer by reason of § 1.167(k)–1(b)(1) shall be deemed to have been incurred on the date the expenditure would be considered incurred under the accrual method of accounting by the person or persons who actually incurred the expenditure, regardless of the method of accounting used by that person or persons.

• • • • •

PAR. 4. Section 1.167(k)–3 is amended as follows:

1. Paragraph (b)(1)(i) is amended by inserting two new sentences after the first sentence to read as set forth below.

2. Paragraphs (b)(2) and (b)(3) are revised as set forth below.

3. Paragraph (b)(4) is amended by striking out "close of the certification year" each place it appears and inserting in lieu thereof "beginning of the certification year", by amending the fourth sentence as set forth below, and by deleting the fifth and sixth sentences.

4. Paragraph (b)(5) is redesignated as paragraph (b)(6) and a new paragraph (b)(5) is added to read as set forth below.

5. Example (1) and Example (2) in paragraph (b)(6), as redesignated, are revised as set forth below.

§ 1.167(k)–3 Definitions.

• • • • •

(b) *Low-income rental housing*—(1) *In general.* (i) • • • A dwelling unit held for occupancy by families and individuals of low or moderate income may qualify as low-income rental housing even though other dwelling units in the same building are held for occupancy by persons who are not of low or moderate income. On the other hand, a dwelling unit held for occupancy by persons who are not of low or moderate income does not qualify as low-income rental housing, even though other dwelling units in the same building are held for occupancy by families and individuals of low or moderate income. • • •

• • • • •

(2) *Definition of low or moderate income.* The occupants of a dwelling unit are considered families and individuals of low or moderate income for purposes of section 167(k) only if their adjusted income (computed in the manner prescribed in paragraph (b)(3) of this section) does not exceed 80 percent of the median income for the area, as determined with adjustments for smaller and larger families by the Secretary of Housing and Urban Development for the purposes of applying section 8(f)(1) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437f(f)(1)), except that if, for purposes of applying such section, the Secretary of Housing and Urban Development establishes an income ceiling higher or lower than 80 percent of the median for the area, the higher or lower income ceiling shall apply. Notwithstanding the preceding sentence, the occupants of a dwelling unit shall not be considered as individuals and families of low or moderate income if all the occupants are students (as defined in section 151(e)(4)), no one of whom is entitled to file a joint return under section 6013. All determinations under this subparagraph shall be made as of the first day of the certification year (as defined in paragraph (b)(3) of this section).

(3) *Adjusted income.* (i) The adjusted income of a family or individual is the anticipated total amount income of the family or individual for the certification year, determined in accordance with the criteria prescribed by the Secretary of Housing and Urban Development under section 8(f)(3) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437f(f)(3)), for purposes of determining whether a family is a lower-income family within the meaning of section 8(f)(1) of the Act. The adjusted income of a family or individual shall be computed solely from the income certifications required by paragraph (b)(4) of this section and shall be computed with respect to the "certification year" of the person. Adjusted income is not affected by income earned or received during the certification year that is not included in the income certification. The "certification year" for any person is the 12-month period which begins on the later of (A) the date on which the property attibutable to the expenditures allocated to the dwelling unit occupied by the person is placed in service (see § 1.167(k)–1(b)(3)), or (B) the date on which the person first occupies the unit on a rental basis, or signs a lease with respect to the unit, whichever occurs first. Adjusted income must be determined with respect to the actual occupants of the dwelling unit. For purposes of the preceding sentence, if any income of a family member who is not living in the dwelling unit would be taken into account under the criteria prescribed by the Secretary of Housing and Urban Development referred to in the first sentence of this subparagraph, that person shall be considered to be an occupant of the dwelling unit. The term "family", for purposes of section 167(k), means two or more persons related by blood, marriage, or operation of law.

(ii) The principles of this subparagraph may be illustrated by the following example:

Example. Family X first signs a lease on a rehabilitated dwelling unit on January 1, 1977, which the family first occupies on January 25, 1977. All expenditures with respect to the rehabilitation of the dwelling unit were paid or incurred by the taxpayer after December 31, 1975.

The certification year for members of family X is the 12-month period beginning on January 1, 1977. All income earned by family X in 1976 is disregarded. Instead, the determination of adjusted income shall be made with respect to the total anticipated annual income of the family for the calendar year 1977, computed in accordance with the criteria prescribed by the Secretary of Housing and Urban Development referred to in the first sentence of this subparagraph.

(4) *Income certification.* • • • The income certification shall contain a statement of the anticipated total annual income for the certification year of each person who proposes to live in the dwelling unit during the certification year, the number of minors who propose to live in the dwelling unit during the certification year, the anticipated total annual income of such minors, and a description of any payments expected to be received during the certification year which are not considered to be income, all determined in accordance with the criteria prescribed by the Secretary of Housing and Urban Development referred to in paragraph (b)(3) of this section. • • •

(5) *Effective date.* Paragraph (b)(2), (3), and (4) of this section shall apply to property attributable to expenditutes which are paid or incurred after December 31, 1975. (For purposes of applying this subparagraph, rehabilitation expenditures treated as having been paid or incurred by the taxpayer by reason of § 1.167(k)–1(b) shall be deemed to have been paid or incurred on the date on which the expenditures were actually paid or incurred, determined in accordance with the method of accounting used by the person that actually paid or incurred the expenditures.) In the case of property attributable to expenditutes paid or incurred before January 1, 1976, the rules in 26 CFR 1.167(k)–3(b) (2), (3), and (4), revised as of April 1, 1977, shall continue to apply.

(6) *Examples.* • • •

Example 1. The median family income in a particular area for a family of four, as established for the purposes of applying section 8(f)(1) of the United States Housing Act of 1937, is $12 000. During 1976, the taxpayer spends in excess of $3,000 per unit in rehabilitating three two-bedroom dwelling units, X, Y, and Z. All the units are placed in service on January 1, 1977, and are advertised for rental at $200 per month. Unit X is rented at this price to tenant A and unit Y is rented to tenant B. A and B each is married and each has two children. At the time of the signing of the lease, tenant A certifies that the family's adjusted income for the certification year (the 12-month period beginning on the date the lease is signed), computed under paragraph (b)(3) of this section, is $9,000. Tenant B, at the time of signing the lease, certifies that the family's adjusted income is $10,000 for the certification year. Assuming that the Secretary of Housing and Urban Development has not established an income ceiling higher or lower than 80 percent of median for the area for purposes of applying section 8(f)(1) of the United States Housing Act of 1937, the low or moderate income level for the purpose of this paragraph is $9,600 (80 percent of the $12,000 median income for the area). Since tenant A's adjusted income of $9,000 does not exceed this amount, rehabilitation expenditures allocated to the dwelling unit rented to tenant A could qualify under section 167(k). However, the rehabilitation expenditures allocated to the dwelling unit rented to tenant B could not qualify, since tenant B's adjusted income ($10,000) is in excess of the low or moderate income level for the area.

Example 2. The facts are the same as in example (1). Eight months after signing the lease, tenant A receives a promotion that was not anticipated when the lease was signed. Because of the unanticipated promotion, tenant A's actual income for the certification year is $9,800, which is more than the income ceiling ($9,600). Even though A's adjusted income would not have qualified if the promotion had been anticipated when the lease was signed, the original election with respect to property contained in unit X will remain valid as long as tenant A occupies the unit. Unit Z, even though vacant throughout 1977, will be considered low-income rental housing because the rental at which the unit is offered ($2,400 per year) does not exceed $2,800, i.e., 30 percent of $9,600, the low or moderate income level for a family of four.

• • • • •

PAR. 5. Section 1.167(k)–4 is amended by adding a new paragraph (f) at the end thereof, to read as set forth below.

§ 1.167(k)–4 Time and manner of making election.

• • • • •

(f) *Extension of time for election.* In the case of property attributable to expenditures paid or incurred after December 31, 1975, a taxpayer will be permitted to make an election under section 167(k) (and file the statement required for subsequent taxable years by paragraph (b)(2) of this section) on or before [the 90th day after the date this notice of proposed rulemaking is adopted as a Treasury decision], notwithstanding the fact that the period prescribed by paragraph (c) of this section for filing an election for the taxable year (or for filing the statement required for a subsequent year) has expired.

JEROME KURTZ,
Commissioner of Internal Revenue.

§ 1.167(k)–1 Depreciation of property attributable to rehabilitation expenditures.

(a) *In general.* (1) In the case of property attributable to rehabilitation expenditures incurred with respect to low-income rental housing after July 24, 1969, and before January 1, 1979, a

M Y 8 7 8 UM

V 4 3 / M Y 8 7 8 9

taxpayer may elect under section 167(k) to compute the depreciation deduction provided by section 167(a) by using the straight line method, a useful life of 60 months, and no salvage value, in lieu of any other method of computing the reasonable allowance referred to in section 167(a). The expenditures must meet the conditions and limitations contained in §§ 1.167(k)–2 and 1.167(k)–3 and the election must be made as prescribed in § 1.167(k)–4. If a proper election with respect to any portion of the basis of property is in effect under section 167(k), no deduction for depreciation or amortization shall be allowed with respect to that portion of the basis of such property under any other provision of the Code. For example, the additional first-year depreciation allowance for small business allowed under section 179 shall not be allowed with respect to that portion of the basis of property for which a proper election under section 167(k) is in effect. The provisions of this subparagraph may be illustrated by the following example:

Example. In 1970, a calendar-year taxpayer buys an existing building and spends $60,000 to rehabilitate 10 dwelling units. The property attributable to the expenditures is placed in service on January 1, 1971. If the conditions of § 1.167(k)–2 (relating to minimum and maximum limitations) and § 1.167(k)–3 (relating to definitions) are met in 1971, the taxpayer may make an election under section 167(k) and claim a depreciation deduction of $12,000 (12/60×$60,000) for 1971.

(2) Any property attributable to expenditures which are incurred before July 25, 1969, or after December 31, 1978, will not qualify for an election under section 167(k). For purposes of determining whether rehabilitation expenditures are incurred after July 24, 1969, and before January 1, 1979, each dwelling unit (see § 1.167(k)–3(c)) shall be considered separately. An expenditure is incurred, for purposes of this section, on the date such expenditures would be considered incurred under the accrual method of accounting, regardless of the method of accounting used by the taxpayer with respect to other items of income and expense. Thus, even though a taxpayer is on the cash receipts and disbursements method of accounting, expenditures shall be considered incurred, for purposes of this section, on the date that all events have occurred which establish the fact of the taxpayer's liability for such expenditures, and the amount of such expenditures can be determined with reasonable accuracy. The method used by a taxpayer on the cash receipts and disbursements method of accounting, in determining when expenditures are incurred, will be acceptable if it accords with any generally recognized and accepted accrual basis income tax accounting principles. The method so adopted must be applied consistently by the taxpayer for purposes of this subparagraph. (See section 446(c) and § 1.446–1(c)(1)(ii).) The principles of this subparagraph may be illustrated by the following example:

Example. On June 30, 1969, A, a taxpayer on the cash receipts and disbursements method of accounting, signs a contract with a builder for the rehabilitation of an apartment house. If (under this subparagraph) any expenditures under the contract are considered incurred before July 25, 1969, property attributable to such expenditures does not qualify for the election under section 167(k).

(3) If an election under section 167(k) is made with respect to property, see sections 1245 and 1250 for treatment of gain on disposition of the property. See section 57(a)(2) for treatment of depreciation under section 167(k) as an item of tax preference, for purposes of the minimum tax contained in section 56.

(b) *Rehabilitation expenditures treated as paid or incurred by the taxpayer.* (1) Generally, the taxpayer is considered to have paid or incurred rehabilitation expenditures only if the rehabilitation is performed by him or for him in accordance with his specifications. However, where rehabilitation expenditures are paid or incurred by a person (or persons) and the taxpayer acquires the property attributable to such expenditures (or an interest therein) before such property is placed in service, the taxpayer will be treated as having paid or incurred the expenditures and the portion of the basis of property attributable to such expenditures may be included in an election by the taxpayer under section 167(k). The rehabilitation expenditures must meet the requirements of this section and § 1.167(k)–2 (relating to minimum and maximum limitations) and § 1.167(k)–3 (relating to definitions). This paragraph shall apply only if the rehabilitated property is not placed in service during the period beginning with the date the expenditures were paid or incurred and ending on the date the taxpayer acquired an interest in the property. For example, assume that A pays or incurs rehabilitation expenditures of $10,000 with respect to an existing building on January 1, 1971, and then sells the building to B on June 1, 1971. If the property attributable to the expenditures is not placed in service by A during the period from January 1, 1971, to June 1, 1971, B will be treated as having paid or incurred the expenditures.

(2) The amount of rehabilitation expenditures treated as paid or incurred by the taxpayer under this paragraph is the lesser of—

(i) The rehabilitation expenditures paid or incurred before the date on which the taxpayer acquired an interest in the property attributable to the expenditures, or

(ii) The taxpayer's cost or other basis for the property attributable to the rehabilitation expenditures paid or incurred before such date.

The portion of the basis of property which is not attributable to rehabilitation expenditures paid or incurred by the taxpayer may not be depreciated under section 167(k), but may be subject to depreciation under section 167(a). Thus, a portion of the basis of property may be subject to depreciation under the method provided by section 167(k) and another portion of the basis of that property may be subject to depreciation under a method provided by section 167(b). For purposes of section 167(k), property is acquired when reduced to physical possession, or control, that is, on the date the taxpayer first bears the burdens and enjoys the benefits of ownership.

(3) (i) Property is placed in service on the date that it is first placed in a condition or state of readiness and availability for a specifically assigned function, whether in the production of income, in a tax-exempt activity, or in a personal activity. For purposes of determining when property attributable to rehabilitation expenditures is placed in service, each dwelling unit shall be considered separately. Rehabilitated property which is attributable solely to a single dwelling unit is placed in service on the date that dwelling unit is placed in service. Rehabilitated property which relates to more than one dwelling unit, or which relates to common areas or related facilities and is allocated to more than one dwelling unit under § 1.167(k)–2(d), will be considered as placed in service on the earliest date a significant number of such units are placed in service. For example, if a taxpayer reconstructs or replaces the roof of a building with 20 dwelling units, the property relates to the entire building and, accordingly, the new or reconstructed roof is placed in service on the earliest date a significant number of such dwelling units are placed in service. As a further example, assume that the first floor of a three-story building is operated for commercial purposes, and that the taxpayer rehabilitates the remaining two floors for dwelling units. In connection with the rehabilitation, the taxpayer constructs a parking lot for the use of the occupants of the building. The expenditures for the parking lot may be considered as rehabilitation expenditures (see § 1.167(k)–3(b)) and the property (parking lot) attributable to the expenditures allocated to dwelling units is treated as placed in service on the date the parking lot is available for use by the tenants of a significant number of such dwelling units.

(ii) If dwelling units are occupied on a rental basis at the same time that rehabilitation expenditures allocated to those units are paid or incurred, the property attributable to these expenditures will be considered placed in service on the date that the rehabilitation of such units is substantially completed.

(4) The principles of this paragraph may be illustrated by the following examples:

Example (1). A, a taxpayer using the cash receipts and disbursements method of accounting, begins the rehabilitation of a three-story building on January 11, 1971. Prior to May 1, 1971, he pays rehabilitation expenditures of $12,000, $1,000 of which is allocated to each of 12 dwellings units in accordance with the allocation rules of § 1.167(k)–2(d). On May 3, 1971, taxpayer A sells the building, the land, and the property attributable to the rehabilitation expenditures to taxpayer B for $35,000. The purchase price is allocated as follows:

Land	$8,000
Existing building	11,000
Property attributable to rehabilitation expenditures	16,000
Total purchase price	35,000

The property attributable to the rehabilitation expenditures is placed in service by B on September 5, 1971. Taxpayer B may treat a portion of the $35,000 purchase price as rehabilitation expenditures paid or incurred by him. Since the rehabilitation expenditures paid by A ($12,000) are less than the portion of the purchase price allocable to property attributable to these expenditures ($16,000), B may treat only $12,000 as rehabilitation expenditures paid or incurred by him. The excess of the purchase price allocable to rehabilitation expenditures ($16,000) over the rehabilitation expenditures paid by A ($12,000), or $4,000, does not qualify for treatment under section 167(k), but may qualify for the allowance for depreciation provided by section 167(a).

Example (2). The facts are the same as in example (1) except that the purchase price allocable to the property attributable to rehabilitation expenditures is $10,000. Under these circumstances, taxpayer B may treat only $10,000 of A's $12,000 expenditures as rehabilitation expenditures paid or incurred by him. The excess of the rehabilitation expenditures paid by A ($12,000) over the purchase price allocable to rehabilitation expenditures ($10,000), or $2,000, does not qualify for treatment under section 167(k).

Example (3). C, a taxpayer using the cash receipts and disbursements method of accounting, begins the rehabilitation of an existing building on April 1, 1970. The building consists of five dwelling units. The tenants remain in the dwelling units during and after the rehabilitation. Assume that the units are rehabilitated individually and that unit 1 is rehabilitated first. The rehabilitation consists of painting, replacing plumbing facilities, installing light fixtures and appliances. The rehabilitation of this unit is substantially completed on May 1, 1970, and the property attributable to these expenditures is considered placed in service on that date. If the five units were rehabilitated at one time the property would be placed in service when the work was substantially completed with respect to all the units.

(c) *Election by partnership.* An election under section 167(k) with respect to property held by a partnership shall be made by the partnership. See section 703(b).

(d) *Expenditures deemed incurred before January 1, 1979.* For purposes of paragraph (a) of this section—

(1) Rehabilitation expenditures (including rehabilitation expenditures that are treated as paid or incurred by the taxpayer by reason of paragraph (b)(1) of this section) that are incurred pursuant to a binding contract entered into before January 1, 1979, are deemed to be incurred before January 1, 1979. The contract must require (i) the rehabilitation to be performed for the taxpayer (or the person or persons other than the taxpayer described in paragraph (b)(1) of this section) in accordance with his specifications, or (ii) the taxpayer (or the person or persons other than the taxpayer described in paragraph (b)(1) of this section) to perform the rehabilitation (or to have the work performed for him in accordance with his specifications). The contract, as of December 31, 1978, must also specifically identify the existing building (or buildings) in connection with which the rehabilitation expenditures are to be incurred, and the expenditures must be incurred in connection with that building (or buildings). A contract may be binding, for purposes of section 167(k)(3)(D) and this section, even if it is subject to the happening of certain contingencies (such as the obtaining of financing from a third party) which have not occurred by January 1, 1979: *Provided,* That the happening of the contingencies is not within the unrestricted control of the taxpayer (or the person or persons other than the taxpayer described in paragraph (b)(1) of this section) and the contingencies in fact occur. In any event, a contract that does not represent a bona fide agreement negotiated at arms-length shall not be considered a binding contract for purposes of section 167(k)(3)(D). For purposes of section 167(k)(3)(D), a binding contract includes an agreement, entered into pursuant to section 8 of the United States Housing Act of 1937, between the taxpayer (or the person or persons other than the taxpayer described in paragraph (b)(1) of this section) and the Department of Housing and Urban Development ("HUD") or a public housing agency ("PHA") providing that upon completion of rehabilitation in accordance with the taxpayer's final proposal, HUD or the PHA will enter into a housing assistance payments contract with the taxpayer (or such other person or persons). For purposes of the preceding sentence, "agreement", "final proposal", "public housing agency", and "housing assistance payments contract" have the same meaning as those terms have in 24 CFR Part 881 (relating to substantial rehabilitation under the section 8 housing assistance payments program).

(2) Rehabilitation expenditures (including rehabilitation expenditures that are treated as having been paid or incurred by the taxpayer by reason of paragraph (b)(1) of this section) incurred with respect to low-income rental housing the rehabilitation of which has begun before January 1, 1979, are deemed to be incurred before that date. For purposes of determining whether rehabilitation has begun before January 1, 1979, each dwelling unit (see § 1.167(k)–3(c)) shall be considered separately. Rehabilitation begins upon the commencement of physical work at the site of the dwelling unit, as distinguished from the beginning of, or engaging in, other preliminary activities, such as the preparation of architect's sketches. The determination of whether physical work has begun shall be based upon all the facts and circumstances of a particular case. In general, where the physical work which has commenced before January 1, 1979, represents rehabilitation expenditures which are allocable under § 1.167(k)–2(d) to more than one dwelling unit (such as the cost of replacing the roof of an existing structure), such work may be treated as having been done on units to which the expenditures are allocable.

§ 1.167(k)–2 Limitations.

(a) *In general.* The amount of rehabilitation expenditures that may be taken into account with respect to any dwelling unit shall be subject to the limitations described in paragraphs (b) and (c) of this section. Rehabilitation expenditures treated as paid or incurred by the taxpayer by reason of § 1.167(k)–1(b) shall be taken into account in applying the limitations of this section. Rehabilitation expenditures incurred before July 25, 1969, or after December 31, 1978, will be taken into account in applying the limitation of paragraph (b) of this section. In the case of a partnership, these limitations shall apply to the partnership, not to the individual partners. The taxpayer shall maintain detailed records which permit specific identification of the rehabilitation expenditures paid or incurred and which permit allocation of these expenditures to individual dwelling units in the manner prescribed in paragraph (d) of this section.

(b) *Minimum amount.* (1) Rehabilitation expenditures paid or incurred by the taxpayer in any taxable year with respect to any dwelling unit may be taken into account only if the sum of (i) such expenditures, and either (ii) the rehabilitation expenditures paid or incurred by the taxpayer with respect to such dwelling unit in the immediately preceding taxable year, or

(iii) the rehabilitation expenditures paid or incurred by the taxpayer with respect to such dwelling unit in the immediately succeeding taxable year, exceeds $3,000. Thus, with respect to any dwelling unit the taxpayer must pay or incur rehabilitation expenditures of more than $3,000 over a period of 2 consecutive taxable years. See paragraph (e) of this section for special rule where no taxable year of the taxpayer includes the date on which the expenditures were paid or incurred.

(2) The principles of this paragraph may be illustrated by the following examples:

Example (1). A, a calendar-year taxpayer, spends $7,000 in 1970 to rehabilitate two dwelling units, of which $5,000 is attributable to unit 1 and$2,000 to unit 2. The expenditures qualify as rehabilitation expenditures under § 1.167(k)–(3). The property attributable to ther $5,000 spent on unit 1 would qualify for the election under section 167)k). The property attributable to ther $2,000 spent on unit 2 may qualify only if an amount in excess of $1,000 is expended solely on unit 2 in either 1969 or 1971.

Example (2). The facts are the same as in example (1) except that in 1972 A spends $4,000 to further rehabilitate units 1 and 2. The $4,000 is allocated to the two units equally and qualifies as rehabilitation expenditures under § 1.167(k)–(3). In the absence of any expenditures in 1971 or 1973, none of the property attributable to the expenditures in 1972 would qualify for an election under section 167(k).

(c) *Maximum amount.* (1) In general, the maximum amount of rehabilitation expenditures paid or incurred by the taxpayer with respect to any dwelling unit which may be taken into account under section 167(k) is $20,000. However, in the case of rehabilitation expenditures incurred before January 1, 1976, the amount of such expenditures paid or incurred by the taxpayer with respect to any dwelling unit which may be taken into account under section 167(k) is limited to $15,000. The rules in § 1.167(k)–1(a)(2) shall apply in determining whether an expenditure is incurred before January 1, 1976. Property attributable to amounts in excess of $20,000 (or, if applicable, $15,000) may qualify for the reasonable allowance provided by section 167(a). All amounts with respect to which a proper election is filed will be taken into account in applying the limitations of this paragraph, including rehabilitation expenditures treated as paid or incurred by the taxpayer by reason of § 1.167(k)–1(b) and rehabilitation expenditures covered by an election revoked or considered revoked under § 1.167(k)–4(d).

(2) This paragraph may be illustrated by the following examples:

Example (1). B, a calendar-year taxpayer, spends the following amounts (per dwelling unit) in 4 consecutive taxable years beginning in 1970: $500, $2,000, $5,000, and $9,000. The expenditures qualify as rehabilitation expenditures under § 1.167(k)–3. All of the property attributable to the expenditures in 1971 and 1972 qualifies for an election under section 167(k). If the taxpayer makes an election for such years, property attributable to only $8,000 of the expenditures for 1973 qualifies for the election since the total qualified amount may not exceed $15,000. The $500 expenditure in 1970 is not taken into account.

Example (2). X, a calendar year taxpayer on the cash receipts and disbursements method of accounting, spends a total of $22,000 for rehabilitation of one dwelling unit in an existing building held for low-income rental housing. X would be considered, under the accrual method of accounting, to have incurred $19,000 of the expenditures in 1975 and $3,000 in 1976. The expenditures qualify as rehabilitation expenditures under § 1.167(k)–3. Because of the $15,000 limitation with respect to rehibilitation expenditures incurred before January 1, 1976, property attributable to only $15,000 of the $19,000 of expenditures incurred in 1975 qualifies for an election under section 167(k). The $4,000 of expenditures incurred in 1975 with respect to which X cannot make a valid election is not taken into account in applying the $20,000 limitation. Therefore, property attributable to the entire $3,000 of expenditures incurred in 1976 qualifies for an election under section 167(k).

(d) *Allocation rules.* (1) Expenditures which are attributable to more than one dwelling unit shall be allocated among those individual dwelling units in the same ratio as the area of each such dwelling unit bears to the total area of all dwelling units to which the expenditures are attributable. Expenditures for related facilities attributable solely to dwelling units, such as parking facilities for tenant use, shall be allocated among the dwelling units to which they relate in the same manner. Expenditures attributable to commercial units, or to related facilities attributable solely to commercial units, shall not be allocated to dwelling units. Expenditures for related facilities attributable in part to dwelling units and in part to nondwelling units shall be allocated among the particular dwelling and nondwelling units to which they relate. Expenditures attributable to common areas such as stairways, halls, and entranceways shall be allocated among the particular dwelling and nondwelling units to which they relate. In any case where the taxpayer can demonstrate the actual amount of expenditures paid or incurred with respect to a particular dwelling unit, the allocation rules of this subparagraph shall not apply to such expenditures.

(2) The principles of this paragraph may be illustrated by the following examples:

Example (1). A taxpayer spends $60,000 to replace the roof of an existing structure and to install a new heating system. There are 25 dwelling units of varying size in the structure. Unit 1 contains 1,000 square feet and unit 2 contains 2,000 square feet. The entire building contains 36,000 square feet. the dwelling units occupy 25,000 square feet, a retail store occupies 5,000 square feet, and common areas occupy the remainder. Of the 6,000 square feet of common areas, 1,000 square feet (5,000/30,000×6,000) are allocated to the commercial store and 5,000 (25,00/30,000×6,000) to the dwelling units. Since five-sixths of the total floor space (30,000/36,000) is attributable to dwelling units, the dwelling units are allocated $50,000 (⅚×$60,000) and the commercial units $10,000 (⅙×$60,000). Thus, unit 1 is allocated $2,000 (1,000/25,000×$50,000) and unit 2 is allocated $4,000 (2,000/25,000×$50,000).

Example (2). The facts are the same as in example (1) except that the entire building is devoted to dwelling units. In this case the allocation may be made without regard to the common areas. Thus, unit 1 is allocated $2,000 (1,000/30,000×$60,000), and unit 2 is allocated $4,000 (2,000/30,000×$60,000), of the rehabilitation expenditures.

Example (3). A taxpayer who owns a three-story apartment building spends $1,000 to install new paneling, carpeting, and lighting in the hallway on a floor containing five dwelling units of equal size. Each dwelling unit is allocated $200 of the total expenditure. Since the expenditure is attributable only to the floor containing the five dwelling units, none of the expenditure is allocable to other areas of the building.

Example (4). A taxpayer spends $5,000 to install new fixtures and new window glass in a commercial store on the first floor of a five-story building. The other floors are occupied by dwelling units. None of the expenditure is allocable to the dwelling units.

Example (5). A owns a three-story apartment building and enters into a contract under which B agrees to paint 10 dwelling units of equal size in the building. The contract price is $5,000. Unless the taxpayer establishes the amount spent with respect to each unit, the expenditure will be allocated equally to each unit.

(e) *Special rule.* (1) Except as provided in paragraph (e)(2) of this section, for purposes of applying the limitations of this section, rehabilitation expenditures treated as having been paid or incurred by the taxpayer by reason of § 1.167(k)–1(b) shall be deemed to have been paid or incurred on the date on which such expenditure were actually paid or incurred (determined in accordance with the method of accounting used by the person that actually paid or incurred the expenditures). If no taxable year of the taxpayer includes such date, then the limitations of this section shall be applied by taking into account the period ending 24 full months after such date.

(2) In determining, for purposes of the $15,000 limitation described in the second sentence of paragraph (c)(1) of this section, whether a rehabilitation expenditure is incurred before January 1, 1976 a rehabilitation expenditure treated as having been paid or incurred by the taxpayer by reason of § 1.167(k)–1(b)(1) shall be deemed to have been incurred on the date the expenditure would be considered incurred under the accrual method of accounting by the person or persons who actually incurred the expenditure, regardless of the method of accounting used by that person or persons.

The principles of this paragraph may be illustrated by the following example:

Example. B, a calender-year taxpayer, uses the cash receipts and disbursements method of accounting. B spends $20,000 in 1969 and 1970 to rehabilitate a building containing four dwelling units. The expenditures are allocated to each dwelling unit equally. The $20,000 qualifies as rehabilitation expenditures under § 1.167(k)–3 and is paid in the form of progress payments on the following dates:

Aug. 20, 1969	$4,000
Mar. 1, 1970	5,000
May 1, 1970	7,000
Oct. 20, 1970	4,000

Taxpayer C purchases the building on November 10, 1970, and the property attributable to the expenditures in placed in service on December 1, 1970. Taxpayer C reports on the basis of a taxable year ending September 30 and uses the accrual method of accounting. For purposes of applying the minimum amount limitation of paragraph (b) of this section, the rehabilitation expenditures paid by B on August 20, 1969, are considered incurred in taxpayer C's taxable year ending September 30, 1969. The rehabilitation expenditures paid by B on March 1 and May 1, 1970 are considered incurred in taxpayer C's taxable year ending September 30, 1970. The expenditures paid by B on October 10, 1970, are considered incurred in taxpayer C's taxable year ending September 30, 1971. Thus, the property attributable to the expenditures in August 1979 would qualify for an election under section 167(k) since $16,000 or $4,000 per dwelling unit, was incurred within taxpayer C's two taxable years ending on September 30, 1976, and September 30, 1970. The property attibutable to the expenditures deemed incurred in C's taxable year ending September 30, 1971, would also qualify.

§ 1.167(k)–3 Definitions.

(a) *Rehabilitation expenditures*—(1) *In general.* The term "rehabilitation expenditures" means amounts chargeable to capital account for depreciable property with a useful life of 5 years or more, in connection with the rehabilitation of an existing building for low-income rental housing. The existing building need not have been used for residential purposes prior to the rehabilitation. Expenditures attributable to a dwelling unit shall not qualify as rehabilitation expenditures unless following the completion of rehabilitation the dwelling unit is held for occupancy on a rental basis by tenants meeting the requirements of paragraph (b) of this section. Expenditures for the purchase of land, or incurred to purchase the existing building or any interest in the building (such as a leasehold interest), do not qualify as rehabilitation expenditures. Expenditures attributable to a commercial unit, such as a grocery store, do not qualify as rehabilitation expenditures. An amount need not be actually spent on a dwelling unit or a building in order to qualify provided the expenditure is in connection with the rehabilitation of an existing building and not attributable to a commercial unit. For example, expenditures to pave a parking lot for use by the tenants could qualify. Such expenditures must meet the limitations of section 167(k)(2) and will be allocated in accordance with § 1.167(k)–2(d).

(2) *New construction distinguished.* Expenditures attributable to a building which are for new construction do not qualify as rehabilitation expenditures. Whether expenditures are attributable to the rehabilitation of an existing structure, or attributable to new construction, will be determined upon the basis of all the facts and circumstances. Expenditures will generally be considered attributable to rehabilitation if the foundation and outer walls of the existing building are retained. Where the internal structural framework of a building is replaced and one or more outer walls are also replaced, the expenditures will generally constitute new construction, even though the construction may be considered rehabilitation under local law. Other factors that may be relevant in this determination include: The amount paid to acquire the existing building; and the amount of material remaining from the existing building.

(3) *Enlargement of existing building.* The total area occupied by the dwelling units in a rehabilitated building may not exceed the total area of the existing building prior to rehabilitation, and any enlargement of this area for dwelling units will be considered new construction which will not qualify as rehabilitation. Expenditures which are attributable to the construction of a related facility, such as a garage, sidewalk, or parking lot, will not be considered the enlargement of a building for dwelling units, even if such facility is physically attached to the building.

(4) *Examples.* The principles of this paragraph may be illustrated by the following examples:

Example (1). The taxpayer owns a two-story apartment building with an empty attic, which he plans to rehabilitate. In addition to rehabilitating the existing units, he constructs two new apartments in the space formerly occupied by the attic. The expenditures may qualify as rehabilitation expenditures. However, if the taxpayer adds a third story to the building, the expenditures for the third story do not qualify as rehabilitation expenditures.

Example (2). The taxpayer owns an apartment building. In addition to rehabilitating the existing structure, the taxpayer adds a new wing to the building occupied by dwelling units. The expenditures attributable to the new wing do not qualify as rehabilitation expenditures.

Example (3). The taxpayer owns an apartment building. As part of the rehabilitation of the existing structure, the taxpayer constructs a garage for the use of tenants. The expenditures attributable to the garage may qualify as rehabilitation expenditures. If the garage is used by tenants of dwelling units and other persons, an allocation of expenditures will be made.

(b) *Low-income rental housing*—(1) *In general.* (i) The term "low-income rental housing" means any dwelling unit in a building which is held for occupancy by families and individuals of low or moderate income (as defined in subparagraph (2) of this paragraph. A dwelling unit held for occupancy by families and individuals of low or moderate income may qualify as low-income rental housing even though other dwelling units in the same building are held for occupancy by persons who are not of low or moderate income. On the other hand, a dwelling unit held for occupancy by persons who are not of low or moderate income does not qualify as low-income rental housing, even though other dwelling units in the same building are held for occupancy by families and individuals of low or moderate income. If a dwelling unit fails to qualify as low-income rental housing at any time during the 60-month election period, any election with respect to any property attributable to rehabilitation expenditures allocated to such unit shall be considered revoked by the taxpayer. (See § 1.167(k)–4(d) for revocation of election.)

(ii) If a dwelling unit is rented for one or more periods during the taxable year, beginning after the date the property attributable to rehabilitation expenditures allocated to such unit is placed in service, it shall be considered low-income rental housing only if it is occupied by families and individuals of low or moderate income (as defined in subparagraph (2) of this paragraph) during each such period.

(iii) If a dwelling unit is not rented for some period during the taxable year, beginning after the date the property attributable to rehabilitation expenditures allocated to such unit is placed in service, it shall be considered low-income rental housing only if at all times during such period the rental at which the unit is offered indicates that such unit is held for occupancy by families and individuals of low or moderate income (as defined in subparagraph (2) of this paragraph). Generally, if the rental at which the unit is offered does not exceed 30 percent of the low or moderate income level (determined under subparagraph (2) of this paragraph), for the number of persons occupying comparable units, the unit will be considered low-income rental housing.

V 43 / 89

(2) *Definition of low or moderate income.* The occupants of a dwelling unit are considered families and individuals of low or moderate income for purposes of section 167(k) only if their adjusted income (computed in the manner prescribed in paragraph (b)(3) of this section) does not exceed 80 percent of the median income for the area, as determined with adjustments for smaller and larger families by the Secretary of Housing and Urban Development for the purposes of applying section 8(f)(1) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437f(f)(1)), except that if, for purposes of applying such section, the Secretary of Housing and Urban Development establishes an income ceiling higher or lower than 80 percent of the median for the area, the higher or lower income ceiling shall apply. Notwithstanding the preceding sentence, the occupants of a dwelling unit shall not be considered as individuals and families of low or moderate income if all the occupants are students (as defined in section 151(e)(4)), no one of whom is entitled to file a joint return under section 6013. All determinations under this subparagraph shall be made as of the first day of the certification year (as defined in paragraph (b)(3) of this section).

(3) *Adjusted income.* (i) The adjusted income of a family or individual is the anticipated total annual income of the family or individual for the certification year, determined in accordance with the criteria prescribed by the Secretary of Housing and Urban Development under section 8(f)(3) of the United States Housing Act of 1937, as amended (42 US.C. 1437f(f)(3)), for purposes of determining whether a family is a lower-income family within the meaning of section 8(f)(1) of the Act. The adjusted income of a family or individual shall be computed solely from the income certifications required by paragraph (b)(4) of this section and shall be computed with respect to the "certification year" of the person. Adjusted income is not affected by income earned or received during the certification year that is not included in the income certification. The "certification year" for any person is the 12-month period which begins on the later of (A) the date on which the property attributable to the expenditures allocated to the dwelling unit occupied by the person is placed in service (see § 1.167(k)-1(b)(3)), or (B) the date on which the person first occupies the unit on a rental basis, or signs a lease with respect to the unit, whichever occurs first. Adjusted income must be determined with respect to the actual occupants of the dwelling unit. For purposes of the preceding sentence, if any income of a family member who is not living in the dwelling unit would be taken into account under the criteria prescribed by the Secretary of Housing and Urban Development referred to in the first sentence of this subparagraph, that person shall be considered to be an occupant of the dwelling unit. The term "family", for purposes of section 167(k), means two or more persons related by blood, marriage, or operation of law.

(ii) The principles of this subparagraph may be illustrated by the following example:

Example. Family X first signs a lease on a rehabilitated dwelling unit on January 1, 1977, which the family first occupies on January 25, 1977. All expenditures with respect to the rehabilitation of the dwelling unit were paid or incurred by the taxpayer after December 31, 1975.

The certification year for members of family X is the 12-month period beginning on January 1, 1977. All income earned by family X in 1976 is disregarded. Instead, the determination of adjusted income shall be made with respect to the total anticipated annual income of the family for the calendar year 1977, computed in accordance with the criteria prescribed by the Secretary of Housing and Urban Development referred to in the first sentence of this subparagraph.

(4) *Income certifications.* A taxpayer electing to compute depreciation under section 167(k) with respect to any property contained in a dwelling unit, shall secure an income certification from the tenant covering each person who proposes to live in such unit after the beginning of the certification year. If a dwelling unit is subleased during the taxable year and the taxpayer elects to compute depreciation under section 167(k) with respect to any property contained in such unit, the taxpayer shall secure an income certification from the subtenant covering each person who proposes to live in the dwelling unit after the beginning of the certification year. If the dwelling unit is rented to a new tenant or subtenant during the 60-month election period, the taxpayer shall secure an income certification from the new tenant (or subtenant) covering each person who proposes to live in the unit after the beginning of the certification year. The income certification shall contain a statement of the anticipated total annual income for the certification year of each person who proposes to live in the dwelling unit during the certification year, the number of minors who propose to live in the dwelling unit during the certification year, the anticipated total annual income of such minors, and a description of any payments expected to be received during the certification year which are not considered to be income, all determined in accordance with the criteria prescribed by the Secretary of Housing and Urban Development referred to in paragraph (b)(3) of this section. The income certification must be sworn to before an official authorized to administer oaths (such as a notary public) and shall be maintained by the taxpayer as part of his books and records.

(5) *Effective date.* Paragraph (b) (2), (3), and (4) of this section shall apply to property attributable to expenditures which are paid or incurred after December 31, 1975. (For purposes of applying this subparagraph, rehabilitation expenditures treated as having been paid or incurred by the taxpayer by reason of § 1.167(k)-1(b) shall be deemed to have been paid or incurred on the date on which the expenditures were actually paid or incurred, determined in accordance with the method of accounting used by the person that actually paid or incurred the expenditures.) In the case of property attributable to expenditures paid or incurred before January 1, 1976, the rules in 26 CFR 1.167 (k)-3(b) (2), (3), and (4), revised as of April 1, 1977, shall continue to apply.

(6) *Examples.* The principles of this paragraph may be illustrated by the following examples:

Example (1). The median family income in a particular area for a family of four, as established for the purposes of applying section 8(f)(1) of the U.S. Housing Act of 1937, is $12,000. During 1976, the taxpayer spends in excess of $3,000 per unit in rehabilitating three two-bedroom dwelling units, X, Y, and Z. All the units are placed in service on January 1, 1977, and are advertised for rental at $200 per month. Unit X is rented at this price to tenant A and unit Y is rented to tenant B. A and B each is married and each has two children. At the time of the signing of the lease, tenant A certifies that the family's adjusted income for the certification year (the 12-month period beginning on the date the lease is signed), computed under paragraph (b)(3) of this section, is $9,000. Tenant B, at the time of signing the lease, certifies that the family's adjusted income is $10,000 for the certification year. Assuming that the Secretary of Housing and Urban Development has not established an income ceiling higher or lower than 80 percent of median for the area for purposes of applying section 8(f)(1) of the U.S. Housing Act of 1937, the low or moderate income level for the purpose of this paragraph is $9,600 (80 percent of the $12,000 median income for the area). Since tenant A's adjusted income of $9,000 does not exceed this amount, rehabilitation expenditures allocated to the dwelling unit rented to tenant A could qualify under section 167(k). However, the rehabilitation expenditures allocated to the dwelling unit rented to tenant B could not qualify, since tenant B's adjusted income ($10,000) is in excess of the low or moderate income level for the area.

Example 2. The facts are the same as in example (1). Eight months after signing the lease, tenant A receives a promotion that was not anticipated when the lease was signed. Because of the unanticipated promotion, tenant A's actual income for the certification year is $9,800, which is more than the income ceiling ($9,600). Even though A's adjusted income would not have qualified if the promotion had been anticipated when the lease was signed, the original election with respect to property contained in unit X will remain valid as long as tenant A occupies the unit. Unit Z, even though vacant throughout 1977, will be considered low-income rental housing because the rental at which the unit is offered ($2,400 per year) does not exceed $2,800, i.e., 30 percent of $9,600, the low- or moderate-income level for a family of four.

MY 8 7 8 UM

(c) *Dwelling unit.*—(1) *In general.* The term "dwelling unit" means a house or apartment used to provide living accommodations in a building or structure. It is not required that the dwelling unit be occupied subject to a lease.

(2) *Exception.* The term "dwelling unit" does not include any unit in a hotel, motel, inn, or other establishment more than one-half of the dwelling units in which are used on a transient basis. A dwelling unit is used on a transient basis if, for more than one-half of the days in which the unit is occupied on a rental basis during the taxpayer's taxable year, it is occupied by a tenant or series of tenants each of whom occupies the unit for less than 30 days. If a dwelling unit is occupied subject to a sublease for any portion of the taxable year, the determination of whether the unit is occupied on a transient basis shall be made with respect to the sublessee who occupies the unit, not with respect to the lessee.

§ 1.167(k)-4 Time and manner of making election.

(a) *Manner of election.*—(1) *In general.* An election under section 167(k) shall be made by attaching a statement to the income tax return filed for the first taxable year in which the taxpayer computes the depreciation deduction using a 60-month useful life. An information statement shall be attached to the income tax return filed for each subsequent taxable year in which the taxpayer computes depreciation under section 167(k). The 60-month election period shall begin with the date the property is placed in service, unless the taxpayer adopts an averaging convention in accordance with § 1.167(a)-10(b) which permits the use of some other date. Except as provided in subparagraph (2) of this paragraph, no election may be made until all the conditions and limitations of §§ 1.167(k)-2 and 1.167(k)-3 are satisfied.

(2) *Special rule.* The rules contained in this subparagraph shall apply only if the taxpayer does not satisfy the $3,000 minimum amount limitation of section 167(k)(2)(B) in the taxable year in which property is placed in service and in the immediately preceding taxable year. The taxpayer may make an election under section 167(k) for the taxable year in which property is placed in service, by filing the election within the time and in the manner prescribed in this section and by enclosing a separate written statement disclosing an intent to fulfill the $3,000 minimum amount limitation in the succeeding taxable year. If the taxpayer does not make an election under the preceding sentence for the taxable year the property is placed in service, an amended return to make the election may be filed for such year, provided that such amended return is filed within the time and in the manner prescribed in paragraph (c)(2) of this section. The principles of this subparagraph may be illustrated by the following example:

Example. A, a calendar-year taxpayer, spends $2,000 per dwelling unit in 2 consecutive taxable years, beginning in 1970, and the expenditures qualify as rehabilitation expenditures under § 1.167(k)-3. An election under this subparagraph may be made with respect to the property placed in service in 1970, even though the income tax return for 1970 is due before any expenditures have been paid or incurred in 1971: *Provided,* That A files a statement of intent to spend more than $1,000 per dwelling unit in 1971. Alternatively, A may file an amended return for 1970.

(b) *Information required.*—(1) *Election year.* The election to compute depreciation under section 167(k) with respect to any property must contain the following information:

(i) Taxpayer's name, address, and identification number.

(ii) Description of property with respect to which an election is made, and the date such property was placed in service (see § 1.167(k)-1(b) (3)).

(iii) Location and description of building being rehabilitated.

(iv) Number of dwelling units in the structure, and the number of such units occupied on a transient basis (see § 1.167(k)-3(c)(2)).

(v) Date rehabilitation expenditures were incurred (see § 1.167(k)-1(a)(2)).

(vi) Statement that all income certifications required by § 1.167(k)-3(b)(4) have been obtained.

(vii) For each dwelling unit which the taxpayer seeks to qualify as low-income housing for purposes of the election under section 167(k):

(*a*) Rehabilitation expenditures allocated to such unit (see § 1.167(k)-2(d)),

(*b*) For each period of occupancy during the taxable year, the number of occupants, the maximum income level permissible under § 1.167(k)-3(b)(2) for that number of occupants, the adjusted income of the occupants of such unit (determined solely from the income certifications required by § 1.167(k)-3(b)(4)), the method by which such income was determined, and the rent charged for such unit, and

(*c*) For each period in which such unit is vacant during the taxable year, a description of each such unit (as to number of rooms), the low- or moderate-income level in that area for the number of persons occupying comparable units, and the rental at which each vacant unit is offered.

(viii) If allocation is required under § 1.167(k)-2(d), the area occupied by dwelling units and nondwelling units.

(ix) If applicable, statement of intent to fulfill $3,000 minimum amount limitation (see § 1.167(k)-4(a)(2)).

(x) If the taxpayer is treated as having paid or incurred expenditures by reason of § 1.167(k)-1(b), the amount of such expenditures, the date the expenditures were incurred, the date the property attributable to the expenditures was placed in service, the method of accounting used by the person that made the expenditures, and the purchase price for the property attributable to the expenditures.

(2) *Subsequent years.* For each taxable year in which depreciation is computed under section 167(k) after the taxable year of the election, the statement required by this section must state the rental charges for each occupied unit and the rental charge at which each vacant unit is offered. In addition, if any such unit is rented to a new tenant during the taxable year, such statement must also contain the following information:

(i) A statement that such tenant has signed an income certification (§ 1.167(k)-3(b)(4)), and

(ii) The number of occupants in the unit, the maximum income level permissible under § 1.167(k)-3(b)(2) for that number of occupants, and the total adjusted income of such occupants, determined solely from the income certifications required by § 1.167(k)-3(b)(4).

(c) *Time for filing election.*—(1) *General rule.* In general, the election to compute depreciation under section 167(k) with respect to any property attributable to rehabilitation expenditures must be filed no later than the time prescribed by law (including extensions thereof) for filing the taxpayer's return for the taxable year in which the property is placed in service, provided that the rehabilitation expenditures meet the requirements of §§ 1.167(k)-2 and 1.167(k)-3 in that year, taking into account expenditures of the preceding taxable year for purposes of the $3,000 minimum amount limitation. The statement required for subsequent years must be filed no later than the time prescribed by law (including extensions thereof) for filing the return for such subsequent years. However, if the taxpayer does not file a timely return for the year in which the property is placed in service, the election shall be filed at the time the taxpayer files his first return for such year. For information required in the election and subsequent years, see paragraph (b) of this sec-

V 4 3 / 8 9

tion. If the taxpayer fails to make an election within the time prescribed by this paragraph, no election may be made with respect to such property by the filing of an amended return or in any other manner.

(2) *Special rule.* If an election is filed with an amended return permitted by paragraph (a)(2) of this section it must be filed no later than time prescribed by law (including extensions thereof) for filing a return for the first taxable year following the year in which the property is placed in service. The principles of this subparagraph may be illustrated by the following example:

Example. A, a calendar-year taxpayer, spends the following amounts (per dwelling unit) in 4 consecutive taxable years beginning in 1970: $2,000, $3,000, $4,000, and $5,000. The expenditures qualify as rehabilitation expenditures under §1.167(k)-3 and the property attributable to the expenditures in each of the 4 taxable years would qualify for an election under section 167(k). A does not file an election under section 167(k) for 1970 or 1971 and the property attributable to the rehabilitation expenditures for those years may qualify for depreciation allowable under section 167(a). A may make an election under section 167(k) for the property attributable to the expenditures made in 1972 and 1973.

(d) *Revocation of election.*—(1) *In general.* An election under section 167(k) may be revoked by the taxpayer at any time prior to the time prescribed by law (including extensions thereof) for filing a tax return for the last taxable year in which any portion of the 60-month election period falls. Such revocation shall be made by filing a statement in writing with the District Director or Director of the Internal Revenue Service center with which the election was filed. If an election is revoked under this paragraph, the revocation shall not affect taxable years for which a tax return was filed computing a depreciation deduction under section 167(k). The revocation shall be effective on the date specified by the taxpayer. Such revocation may apply to any property attributable to rehabilitation expenditures allocated to any dwelling unit in the building or structure or to all such property. An election revoked under this subparagraph may not be reinstated.

(2) *Failure to meet requirements of section 167(k).* An election under section 167(k) with respect to property attributable to a dwelling unit shall be considered revoked with respect to such property if at any time during the taxable year—

(i) Such unit is rented to (or held for occupancy by) a family or individual not meeting the definition of low or moderate income (see §1.167(k)-3(b)(2));

(ii) More than one-half of the dwelling units in the building are rented on a transient basis (see §1.167(k)-3(c)); or

(iii) Expenditures which are required in order to meet the $3,000 minimum amount limitation for the preceding taxable year are insufficient (see §1.167(k)-2(b)).

The revocation shall be deemed to occur on the first day in which the dwelling unit does not meet the requirements of section 167(k) during the taxable year. Any revocation of an election under this subparagraph shall not affect prior taxable years for which a tax return computing depreciation under section 167(k) was filed if all the conditions of section 167(k) were met for those years. An election considered revoked under this subparagraph may not be reinstated.

(3) *Effect of revocation.* The taxpayer may not compute the depreciation deduction using the 60-month useful life permitted under section 167(k) for any portion of any taxable year beginning after the date on which a revocation is effective under this paragraph. The depreciation deduction allowed under section 167(k) for the taxable year in which a revocation is effective shall be the amount such deduction would have been for such year if no revocation had occurred, multiplied by a fraction consisting of: (i) the number of days in the taxable year prior to the date of the revocation, over (ii) the number of days of the 60-month election period which falls within such year. The taxpayer shall continue to use the straight line method of depreciation, but shall use the estimated remaining useful life and salvage value of the property (determined without regard to section 167(k)) as of the date such recovation is deemed to occur. If the taxpayer wishes to adopt another method of depreciation following a revocation of an election, such new method is a change in a method of accounting which requires the consent of the Secretary or his delegate under section 446(e). Generally, the straight line method of depreciation using the property's remaining useful life determined without regard to section 167(k) will be the only method of depreciation which will be accepted following a revocation.

(4) *Example.* The principles of this paragraph may be illustrated by the following example:

Example. Beginning after July 24, 1969, a calendar-year taxpayer spends $5,000 per dwelling unit to rehabilitate the three dwelling units in an apartment house. The property attributable to these expenditures is placed in service on January 1, 1970. The dwelling units qualify as low-income rental housing and the taxpayer elects to compute depreciation under section 167(k). The dwelling units continue to qualify as low-income rental housing throughtout 1970, 1971, and 1972. On March 15, 1973, the three units cease to qualify as low-income rental housing and the election under section 167(k) is considered revoked on that date. The amount of the depreciation deduction computed under section 167(k) for 1973 with respect to these three units is the amount such depreciation would have been absent a revocation, $3,000 (⅓×$15,000), multiplied by the number of days of the taxable year before the revocation, 73, over the number of days of the 60-month election period within the taxable year, 365. Thus, the depreciation deduction for 1973 under section 167(k) is $600 (⅕×$3,000). For the remainder of 1973, the taxpayer must compute depreciation under the straight line method, using the estimated useful life and the salvage value of the property on March 15, 1973. The adjusted basis of the property on March 15, 1973, is $5,400, the property's unadjusted basis ($15,000), minus the depreciation allowed under section 167(k) ($9,600). Assume that the property's estimated remaining useful life is 20 years and that the salvage value is $1,000. The depreciation deduction for the remainder of 1973 under section 167(a) is the amount the depreciation would have been for 1973 under the straight line method, $220 (1/20×$4,400), multiplied by the number of days following the revocation, 292, over the number of days of the taxable year, 365. Thus, the taxpayer would be allowed a deduction of $176 under section 167(a) for the period of 1973 following the revocation (⅘×$220). The depreciation allowed for 1973 with respect to the property is the sum of the depreciation computed under section 167(k) before the revocation ($600) plus the depreciation allowed under section 167(a) after the revocation ($176), or $776.

(e) *Effective date.* The provisions of section 167(k) apply to taxable years ending after July 24, 1969. A taxpayer will be permitted to make an election or revoke an election under section 167(k) on or before June 9, 1972. The election will be permitted under this paragraph for any taxable year ending after July 24, 1969, notwithstanding the fact that the period prescribed by paragraph (c) of this section for filing an election for such taxable year has expired. The provisions of paragraph (a)(1) of this section shall apply for purposes of determining the beginning of the 60-month election period. If the taxpayer is permitted to revoke an election with respect to any property within the 90-day period specified in this paragraph, the taxpayer may adopt any method of depreciation permitted under section 167 for such property, beginning with the date the property was placed in service, using the estimated useful life of the property on such date, determined without regard to section 167(k).

(f) *Extension of time for election.* In the case of property attributable to expenditures paid or incurred after December 31, 1975, a taxpayer will be permitted to make an election under section 167(k) (and file the statement required for subsequent taxable years by paragraph (b)(2) of this section) on or before (the 90th day after the date this notice of proposed rulemaking is adopted as a Treasury decision), notwithstanding the fact that the period prescribed by paragraph (c) of this section for filing an election for the taxable year (or for filing the statement required for a subsequent year) has expired.

DEPARTMENT OF DEFENSE

Defense Investigative Service

[32 CFR Part 298a]

[Dis Reg 28-4]

PRIVACY ACT OF 1974

Proposed Amendment of Exemption Rule

AGENCY: Defense Investigative Service (DIS).

ACTION: Proposed amendment of exemption rule.

SUMMARY: The DIS is amending an existing exemption rule for a record system identified as DIS 5-01, entitled, "Investigative files", by deleting the exemption from the provisions of subsection (o) of the Privacy Act.

DATES: Any comments must be received on or before June 7, 1978.

ADDRESS: Send comments to the Office of the Assistant for Information (D0020), Defense Investigative Service, 1000 Independence Ave SW., Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT:

Lt. Col. Dale L. Hartig, Assistant for Information, telephone, 202-693-1740.

SUPPLEMENTARY INFORMATION: On September 28, 1977 at 42 FR 51477 the DIS republished the procedural and exemption rules as required by the Privacy Act of 1974, Pub. L. 93-579 (5 U.S.C. 552a). DIS is proposing to amend an existing exemption rule identified in the summary above and located at 42 FR 51481 of the rules by deleting the exemption from the provisions of Subsection (o) of the Act. The record system notice was published on September 28, 1977 at 42 FR 51432. Therefore, it is proposed that § 298a.14, entitled "Exemptions", be amended as set forth below.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

MAY 3, 1978.

§ 298a.14 Exemptions.

. . . . . .

(c) *Investigative files.—DIS 5-01.*

(1) Exemption. 5 U.S.C. 552a(c) (3) and (4); (d); (e)(1), (2), (3), (5) and (8); and (g);

(2) Authority. 5 U.S.C. 552a(j)(2);

(3) Reasons. Records maintained by, or at the direction of the DIS Special Cases Division include criminal investigations for which DIS has primary responsibility and certain reports and reciprocal investigations, as well as security or counterintelligence information, which may be used in criminal prosecution. The withholding of this information will be to the extent necessary to allow the DIS Special Cases Division, a criminal law enforcement component, to conduct effective investigations into alleged unlawful activity, or crime conducive situations, without jeopardizing such investigations. Knowledge of the investigations of the Special Cases Division would enable subjects or suspects to take actions to prevent detection of criminal activities, fabricate evidence, influence witnesses improperly, conceal or destroy evidence, or to escape prosecution. It sould also lead to intimidation of, or harm to, sources, informants, witnesses and their families. Information from this system will be withheld only to the extent that its release would interfere with such investigations.

. . . . . .

POSTAL SERVICE

[39 CFR Part 111]

SECOND-CLASS BULK MAILINGS

Lower Per Piece Rate for Regular Rate and Science of Agriculture Publications

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: On July 13, 1977, the Postal Service filed with the Postal Rate Commission proposals for changes in postage rates and fees. The specific rates and fees proposed are set forth at 42 FR 37,332 et seq. as amended at 42 FR 63,240-63,242 (1977), 42 FR 63,830 (1977). One of these proposals would provide two-tier per piece charges for second-class regular-rate and science of agriculture publications.

Under the proposal, publications mailed at regular or science of agriculture rates would be eligible for the lower per piece charges if they are properly prepared in 5-digit ZIP Code direct sacks.

Before this proposal can be placed into effect, it must be recommended by the Postal Rate Commission to the Governors of the Postal Service and be approved by the Governors. Under the provisions of 39 U.S.C. 3624, the Postal Rate Commission is to issue its recommended decision on the Postal Service's proposal on or before May 13, 1978.

The purpose of this rulemaking is to set forth and solicit comments on proposed rules and regulations that would apply if the two-tier per piece charges are recommended by the Postal Rate Commission and the recommendation is approved by the Governors of the Postal Service. the Postal Service will then be able to place new second-class rates, including the two-tier per piece charges, into effect in a timely way.

DATE: Comments must be received on or before May 20, 1978.

ADDRESS: Written comments should be directed to the Director, Office of Mail Classification, Rates and Classification Department, U.S. Postal Service, Room 1610, 475 L'Enfant Plaza SW., Washington, D.C. 20260.

Copies of all written comments received will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in the Office of Mail Classification, Rates and Classification Department, Room 1610, 475 L'Enfant Plaza SW., Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT:

Mr. Ashley Lyons, 202-245-4749.

SUPPLEMENTAL INFORMATION: In order to carry out the purposes described above, the Postal Service would add to the Postal Service Manual a new 125.329, set forth below.

Although exempt under 39 U.S.C. 410(a) from the requirements of the Administrative Procedure Act, 5 U.S.C. 553 (b), (c), regarding proposed rulemaking, the Postal Service invites public comment on the following proposed revision of the Potal Service Manual:

PART 125—SECOND-CLASS BULK MAILINGS

In Part 125 of the Postal Service Manual add new .329 reading as follows:

125.3 Mailing

. . . . . .

.32 Preparation by the Mailer of Copies in Packages and Sacks

. . . . . .

.329 Mailings at 5-Digit Direct Presort Rates

To qualify for the lower per piece rate for regular rate and science of agriculture publications presented in 5-digit ZIP Code direct sacks, the following requirements must be met:

a. The publications must be for delivery to an address outside of the county of original entry;

b. The publications must be presented in:

V 4 3 / 8 9

(1) 5-digit ZIP Code sacks or
(2) 5-digit ZIP Code bundles in lieu of sacks if authorized in accordance with 125.328.

Each 5-digit sack (or 5-digit bundle in lieu of a sack) must contain a minimum of 20 pounds of mail or sufficient pieces to fill one-third of a sack. For the purposes of this requirement, 1,000 cubic inches of mail is considered sufficient to fill one-third of a No. 2 postal sack.

c. One sack to a 5-digit ZIP Code which is less than one third full or contains less than 20 pounds may qualify for this lower piece rate provided it is part of a mailing which includes other substantially full sacks to the same destination. This is to allow for the "overflow" to that destination which cannot be practically put with previously sacked mail to that destination.

d. Mailers must be prepared to document or otherwise confirm the number of pieces mailed and paid at the lower per piece rate. This may be done in any of the following manners:

(1) By separating the 5-digit ZIP Code direct sacks from the rest of the mailing when it is presented for mailing, or

(2) By attaching to the mailing statement a listing of the number of copies (and pieces) in each 5-digit ZIP Code direct sack for which the lower per piece charge is being paid, or

(3) By maintaining records for each mailing which will confirm the number of pieces in 5-digit ZIP Code direct sacks. The records must document the number of copies (and pieces) to each 5-digit ZIP Code destination for each edition of an issue entered at each post office for which 5-digit ZIP Code sacks are made up. A printout must be presented prior to the first mailing made under this arrangement, but not prior to August 1, 1978. These records must be retained for at least two months from the date of mailing. The mailer must provide a copy of the record for a particular mailing, or portions of it, within thirty days of a request by the postmaster of the office of entry. Postmasters shall advise the Region's Revenue Protection Program Manager of all publications being mailed under this arrangement. Acceptance Units will maintain a listing of publications authorized to mail under this agreement.

An appropriate amendment to 39 C.F.R. 111.3 to reflect these changes will be published if the proposal is adopted.

(39 U.S.C. 401(2))

ROGER P. CRAIG,
Deputy General Counsel.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 1, 81 and 87]

[FCC 78-268; SS Docket No. 78-137]

NEW PUBLIC COAST STATIONS, AERONAUTICAL ADVISORY STATIONS AND RADIONAVIGATION LAND STATIONS IN THE AVIATION SERVICES

Requiring Notification Upon Commencement of Service

AGENCY: Federal Communications Commission.

ACTION: Proposed Rulemaking.

SUMMARY: This document proposes amendments to certain of the Commission's rules to require notification upon commencement of service of new public coast stations, aeronautical advisory stations and radionavigation land stations, in the Aviation Services. This has been a routine condition of grant for public coast stations. This rulemaking will incorporate this condition of grant into the Commission's rules and will extend it to aeronautical advisory stations and radionavigation land stations in the Aviation Services.

DATES: Comments must be received on or before June 5, 1978 and reply comments must be received on or before June 15, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

SUPPLEMENTARY INFORMATION:

Adopted: April 20, 1978.

Released: May 3, 1978.

In the matter of amendment of Parts 1, 81 and 87 of the Commission's rules to require notification upon commencement of service of new public coast stations, aeronautical advisory stations and radionavigation land stations in the Aviation Services.

1. Notice of Proposed Rulemaking in the above-entitled matter is hereby given.

2. The Commission is proposing to amend its rules to require the licensees of new public coast stations, aeronautical advisory stations and radionavigation land stations in the Aviation Services to notify the Commission of the Commencement of station operations. Each of these types of stations provide important services to the public, and their frequencies, locations and hours of service are listed in various Government and non-Government publications. Under Commission rules only one station is permitted to operate in the area defined for that type of station, and operations must commence within eight months of the initial grant of the station license. If a station does not commence operations within this time period, the station license becomes invalid and must be returned to the Commission for cancellation. A new applicant then may file for a station license to serve that area.

3. To properly administer these rules and to provide accurate information concerning station operations, it is necessary that the Commission be promptly informed by the licensee of the commencement of station operations. Such requirement for notification by the licensee is presently a condition of grant placed on all public coast stations licensees and has not appeared to result in any substantial burden to the licensees. This proposed rulemaking would place this requirement in the rules and would extend it to aeronautical advisory stations and radionavigation land stations in the Aviation Services because of their public service use. Under the proposal, if the licensee fails to notify the Commission within 8 months of commencement of station operation, it would be conclusively presumed that the station is not in operation and the license would become invalid unless the licensee could show "good cause" why notification was not made. A statement of "good cause" would not be sufficient if it merely rested on the actions of the licensee or those associated with him. To come within "good cause", the failure to file must rest with some third party not within control of the licensee.

4. In addition to requiring notification by the licensee, this proposal would clarify the rules by amending Part 87 to reflect the requirement presently set forth in Section 1.932 of the Commission's rules that an authorized station, other than an operational fixed station operating on frequencies above 952 MHz, must be placed in operation within eight months from the date of grant or the authorization becomes invalid and must be returned to the Commission for cancellation.

5. The proposed amendments to the rules as set forth in the Appendix are issued pursuant to the authority contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

6. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's rules, interested persons may file comments on or before June 5, 1978, and reply comments on or before June 15, 1978. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

7. In accordance with the provisions of Section 1.419 of the Commission's rules, an original and 5 copies of all statements, briefs or comments filed shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

APPENDIX

Parts 1, 81 and 87 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 1—PRACTICE AND PROCEDURES

Section 1.932 is amended to read as follows:

§ 1.932 Time in which station must be placed in operation.

(a) For operational-fixed stations authorized to operate on frequencies above 952 MHz, the authorized station must be placed, in operation within twelve months from the date of grant or the authorization shall be invalid and must be returned to the Commission for cancellation. For all other stations, the authorized station must be placed in operation within eight months from the date of grant or the authorization shall be invalid and must be returned to the Commission for cancellation.

(b) The licensee of a new public coast station, a new aeronautical advisory station or a new radionavigation land station in the Aviation Services shall notify the Commission in writing when the station is placed in operation. If the licensee fails to notify this Commission within eight months from the date of grant that the station has been placed in operation, it shall be conclusively presumed the station is not in operation and, thus, the license becomes invalid by operation of paragraph (a) of this section, unless the licensee shows good cause why notification was not made.

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA/PUBLIC FIXED STATIONS

Section 81.61 is amended to read as follows:

§ 81.61 Time in which station must be placed in operation.

(a) In those cases in which a license is issued initially in lieu of a construction permit, if the station authorized is not placed in operation within eight months from the date of the grant, the authorization shall be invalid and must be returned to the Commission for cancellation.

(b) The licensee of a new aeronautical advisory station or a new redionavigation land station shall notify the Commission in writing when the station is placed in operation. If the licensee fails to notify this Commission within eight months from the date of grant that the station has been placed in operation, it shall be conclusively presumed the station is not in operation and, thus, the license becomes invalid by operation of paragraph (a) of this section, unless the licensee shows good cause why notification was not made.

[FR Doc.78-12454 Filed 5-5-78; 8:45 am]

PART 87—AVIATION SERVICES

A new § 87.58 is added to read as follows:

§ 87.58 Time in which station must be placed in operation.

(a) In those cases in which a license is issued initially in lieu of a construction permit, if the station authorized is not placed in operation within eight months from the date of the grant, the authorization shall be invalid and must be returned to the Commission for cancellation.

(b) The licensee of a new aeronautical advisory station or a new redionavigation land station shall notify the Commission in writing when the station is placed in operation. If the licensee fails to notify this Commission within eight months from the date of grant that the station has been placed in operation, it shall be conclusively presumed the station is not in operation and, thus, the license becomes invalid by operation of paragraph (a) of this section, unless the licensee shows good cause why notification was not made.

[BC Docket No. 78-141; RM-3062]

FM BROADCAST STATIONS IN MARTIN AND NEON, KY.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Action taken herein proposes the deletion of a Class A FM channel from Neon, Ky., and its assignment to Martin, Ky. Petitioner, Guaranty Broadcasting Co., states that since no interest has been shown in operating an FM station in Neon, the channel should be assigned to Martin where the proposed station could provided a first local aural broadcast service to that community.

DATES: Comments must be filed on or before June 20, 1978. Reply comments must be filed on or before July 10, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: April 21, 1978.

Released: May 2, 1978.

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (Martin and Neon, Ky.) BC Docket No. 78-141, RM-3062.

1. The Commission has before it for consideration a petition for rulemaking[1] filed February 6, 1978, by Guaranty Broadcasting Co. ("petitioner"), which requests the deletion of FM Channel 261A from Neon, Ky., to permit its assignment to Martin, Ky. Petitioner states that Channel 261A was assigned to Neon over ten years ago and that no application has been filed for its use. Petitioner asserts that Channel 261A could be assigned to Martin in conformity with the minimum distance separation requirements without affecting any presently assigned channel other than the deletion of Channel 261A from Neon. There is no other channel which could be assigned without deleting an existing assignment. Martin has no local broadcast service.

2. Martin, in eastern Kentucky, is a community of 786 persons in Floyd County (pop. 35,880),[2] and is located approximately 64 kilometers (40 miles) west of the intersection of Virginia and West Virginia state lines and 13 kilometers (8 miles) south of Prestonburg, Ky. Petitioner asserts that Martin, whose population has increased to an estimated 1200 in 1977, is primarily a mining community. It states that, with the county relying more heavily on coal as an energy source, the Floyd County population can be expected to increase, and the opportunities for new businesses and existing concerns will continue to grow. Petitioner notes that over a dozen mining companies form the base of the Martin area economic structure. It offers a description of Martin's form of government, the local geography, school system, civic, religious and rec-

[1] Public Notice of the petition was given on March 7, 1978, Report No. 1106.

[2] Population figures are taken from the 1970 U.S. Census, unless otherwise indicated.

MAY 8 1978

V 43 / 89

reational activities in an effort to show the need for the assignment.

3. Petitioner asserts that, since no interest has been shown in operating an FM station at Neon, the channel should be assigned to Martin where a need exists and a demand for its use has been expressed. Petitioner states that, if the channel is assigned to Martin, it will promptly file an application for a construction permit.

4. Although the FM channel was initially assigned in 1963, the channel has lain fallow all these years. Since an interest has been shown for its use elsewhere, it would be in the public interest to examine this possibility.

5. In view of the foregoing, and pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, it is proposed to amend the FM Table of Assignments (§ 73.202(b)) to read as follows:

City	Channel No. Present	Proposed
Martin, Ky	—	261A
Neon, Ky	261A	—

6. Authority to institute rulemaking proceedings; showings required; cutoff procedures; and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before June 20, 1978, and reply comments on or before July 10, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the Notice of Proposed Rulemaking to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rulemaking to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rulemaking to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[BC Docket No. 78-143; RM-3020]

FM BROADCAST STATION IN EL DORADO, ARK.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Action taken herein proposes the assignment of a third Class A FM channel to El Dorado, Ark., in response to a petition filed by Inspiration Radio Service. Petitioner claims the proposed station would provide El Dorado with a much-needed additional broadcast service.

DATES: Comments must be received on or before June 23, 1978. Reply comments must be received on or before July 13, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792

SUPPLEMENTARY INFORMATION:

Adopted: April 24, 1978.

Released: May 3, 1978.

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (El Dorado, Ark., BC Docket No. 78-143, RM-3020.

1. *Petitioner, Proposal, Comments.* (a) Petition for rulemaking,[1] filed December 5, 1977, by Inspirational Radio Service ("petitoner"), proposing the assignment of Channel 240A as a third Class A FM channel to El Dorado, Ark. An opposition to the petition was filed by Noalmark Broadcasting Corp., licensee of AM Station KELD and Station KEZU-FM (Channel 276A). A response was filed by petitioner.

(b) The channel may be assigned without affecting any existing FM assignments.

(c) Petitioner states that if the channel is assigned, it will apply for a construction permit to build a station.

2. *Demographic data*—(a) *Location.* El Dorado, seat of Union County, is located in south central Arkansas, approximately 176 kilometers (110 miles) south of Little Rock, Ark., and 430 kilometers (270 miles) northwest of New Orleans.

(b) *Population.* El Dorado—25,283; Union County—45,428.[2]

(c) *Local aural service.* Daytime-only AM Station KDMS, full-time AM Station KELD, FM Stations KRIL (Channel 257A) and KEZU (Channel 276A).

3. *Economic considerations.* Petitioner argues that El Dorado and Union County are beginning to experience development and have a need for an additional broadcast service. It asserts that the proposed station could take an active part in the economic development of the area by providing a competitive outlet for advertising. Petitioner states that air time would be made available for farm programs, a daily program in cooperation with the state employment board listing job opportunities, and indicates that time would be donated to civic, church, fraternal, governmental, developmental, and other public service groups to assist in disseminating vital information on public issues. Petitioner, in support of its petition, has submitted information with respect to education, government, churches, medical and recreational facilities, and work force. It asserts that the proposed channel would provide El Dorado with a much needed additional FM station.

[1]Public Notice of the petition was given on December 19, 1977, Report No. 1094.

[2]Population figures are taken from the 1970 U.S. Census.

MAY 8 1978

4. In opposition, Noalmark Broadcasting Corporation ("Noalmark") contends that the two AM stations and two FM stations serving El Dorado assure diversity of programming and adequate coverage. It asserts that other radio signals from communities within the states of Arkansas and Louisiana reach the El Dorado community and provide additional radio diversity to the residents. Noalmark argues that the proposed assignment would be detrimental to the financial viability of the existing stations since El Dorado must be considered a small market radio community. It contends that the result could be a lowering of the quality of broadcasting in El Dorado. Noalmark states that Channel 240A is assigned to Lake Village, Ark., and believes it is in the public interest to have it retained in that community.

5. In response, petitioner asserts that Noalmark is in error when it contends that the proposal involves the reassignment of Channel 240A from Lake Village, Ark. Petitioner states that its proposal is a drop-in and would have no effect on any other assignment in the FM Table. It disagrees with Noalmark that all community needs are being served by the existing stations because other formats such as beautiful music and ethnic, are available locally on a full-time basis. Petitioner claims that even though their signals may be heard in the city, other stations, located outside the El Dorado area, have not proposed a service to the city. It contends that Noalmark's statement as to economic harm and reduced level of broadcast service, that could result if another station were to be authorized, is unsupported.

6. *Preclusion studies.* Preclusion would occur on Channels 240A and 241 as a result of the proposed assignment. Five communities[2] with populations over 1,000 are located in the precluded areas. Of the five communities Hope, Ark., has an AM and FM station, and Ashdown, La., has an FM station. Waldo and Smackover, Ark., and Bernice, La., have neither FM assignments nor AM stations. Petitioner should indicate whether there are any channels available for assignment to Waldo, Smackover, and Bernice.

7. *Additional considerations.* The request for a third FM assignment to a community of 25,283 persons exceeds the FM population guidelines which call for one or two assignments for a city of this size. However, the proposal is being advanced for the purpose of determining whether such an assignment is warranted and whether the public interest would be served by making the additional assignment. In this connection, we note that the issue of economic impact on existing stations is not one dealt with in a rulemaking context. Rather, it can better be dealt with in connection with any application that is filed. As part of its effort to document the need for a third assignment, petitioner should submit in its comments a *Roanoke Rapids*, 9 FCC 2d 672 (1967), study showing the area and number of people who would receive a first and second FM service. In addition, petitioner should show the extent of nighttime service provided by AM stations in the context of first and second aural service. *Anamosa-Iowa City, Iowa*, 46 FCC 2d 520 (1974). Petitioner is invited to offer any other information it believes would indicate the need for the assignment.

8. Comments are invited on the following proposal to amend the FM Table of Assignments with regard to the community of El Dorado, Ark., as follows:

City	Channel No. Present	Proposed
El Dorado, Ark	275A, 276A	240A, 257A, 276A

9. The Commission's authority to institute rulemaking proceedings; showings required; cut-off procedures used; and filing requirements are contained in the attached Appendix and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 before a channel will be assigned.

10. Interested parties may file comments on or before June 23, 1978, and reply comments on or before July 13, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the Notice of Proposed Rulemaking to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rulemaking to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rulemaking to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

TELEVISION BROADCAST STATION IN LEWISTON, IDAHO

Proposed Change in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Action herein proposes the assignment of television Channel 5 for noncommercial educational use in Lewiston, Idaho. Petitioner, The State Board of Education and Board of Regents of the University of Idaho, states it plans to construct a 100 watt television translator station on Channel 5 so it could rebroadcast programs from Channel 12 in Moscow, Idaho, to serve Lewiston, Idaho.

[2]Arkansas: Waldo (pop. 1,658); Smackover (2,058); Hope (8,810); Louisiana: Bernice (1,794); Ashdown (3,522).

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: April 21, 1978.

Released: May 3, 1978.

In the matter of Amendment of § 73.606(b), *Table of Assignments*, Television Broadcast Stations. (Lewiston, Idaho), BC Docket No. 78-142, RM-2977.

1. The Commission has before it a petition[1] filed by the State Board of Education and Board of Regents of the University of Idaho ("petitioner"), licensee of seven noncommercial educational broadcast stations in Idaho,[2] proposing the assignment of Channel 5 at Lewiston, Idaho, for noncommercial educational television use. The channel could be assigned in conformity with the minimum distance separation requirements. Oppositions were filed by Clearwater Cable T.V. Corp. ("Clearwater")[3] and Teleprompter Corp. ("Teleprompter").[4] Replies were filed by petitioner and KHQ, Inc., licensee of television Station KHQ-TV, Channel 6, Spokane, Wash.

2. Lewiston (pop. 26,068), seat of Nez Perce County (pop. 30,376), is located in far western Idaho, adjacent to the Washington border and approximately 40 kilometers (25 miles) north of the Oregon border. Lewiston is currently assigned television Channel 3 which is occupied by Station KLEW-TV.

3. Petitioner asserts that if Channel 5 is assigned, it plans to construct a 100 watt television translataer station, which would rebroadcast Station KUID-TV, operating on Channel 12 in Moscow, Idaho, to serve Lewiston. Petitioner contends that because of intervening terrain obstacles, only a few households in the elevated residential area of Lewiston can receive a signal off-the-air from Station KUID-TV. It claims that since low income residents tend to live in the part of Lewiston which does not receive KUID-TV's signal adequately, it is significantly handicapped in reaching a part of the population who can most benefit from its programs. Petitioner claims that a high-power VHF-TV translator station is capable of reaching outlying areas around Lewiston which cannot be served by a 100 watt UHF-TV translater because of variable terrain. It asserts that since the local translator association seeks out donations from residents who have installed a UHF receiving antenna, installation of another UHF translater station in the community would unduly complicate fund raising activities for the translator association and would not be in the public interest. Petitioner also notes that about one-quarter of Lewiston television household do not subscribe to the local cable TV service offered by Teleprompter Corp.

4. In opposing comments, Clearwater states that, while it has no objection to a 100-watt translator station on Channel 5 in Lewiston, it objects to the assignment of the proposed channel for television broadcast operation in Lewiston. It notes that translators operate throughout the north central Idaho area, and one of these is Station K05BS in Orofino, Idaho, which is located 97 kilometers (60 miles) east of Lewiston. Petitioner claims that a full powered television station would cause interference to translator Station K05BS. It contends further that, since television stations on Channels 3, 10, and 12 provide Grade B service to Orofino, it is not likely that Station K05BS would seek to change to one of these channels, and since other local transiators are operating on Channels 7, 9, and 12, Station K05BS would not seek to operate on these channels or a channel adjacent to them. It claims that the signals of television stations operating on Channels 2, 4, and 6 (all in Spokane, Washington) are received off the air by Clearwater and distributed to its subscribers. Therefore, translator operation on these channels in Orofino, it asserts, would run a serious risk of interfering with Clearwater's reception of the Spokane signals. Clearwater asserts that since petitioner has not unequivocally stated it will build a television station on Channel 5 if the channel is assigned, the proposal should be denied for lack of showing of need for assignment of a television channel. It further states that this does not preclude the Commission from considering an application by petition for a 100 watt translator on Channel 5 in Lewiston and an appropriate request for waiver to permit grant of such an application.

5. In opposition, Teleprompter contends that a 100 watt translator station operating in Lewiston on Channel 5 would cause severe cochannel interference, rendering the cable Channel 5 useless. Teleprompter claims it would be required to displace carriage of Station KLEW-TV (Lewiston) and disrupt the viewing pattern of its subscribers. It does not agree with petitioner's assumption that non-subscribers to Teleprompter's cable television system "are predominantly those who feel they cannot afford the cable subscription." Teleprompter believes that non-subscribers are those who feel they receive off-air reception of television signals including the signal of KUID-TV. Teleprompter asserts that petitioner's assumption that installation of a UHF translator in Lewiston would unduly complicate fund raising activities for the translator association is unwarranted. It contends that petitioner has made no showing, beyond its own speculation, of the need for assignment of Channel 5 to Lewiston.

6. KHQ, Inc., licensee of television Station KHQ-TV, Spokane, Wash., in support of the opposition by Teleprompter, contends that the proposed assignment would not be in the public interest because it would be an inefficient use of valuable spectrum and would be likely to create interference to the only NBC network service available directly off-the-air in Lewiston. KHQ asserts that petitioner fails to demonstrate why a UHF translator could not provide additional service to Lewiston in order to fill in those areas of the KUID-TV city grade coverage now theoretically provided to this community, and that a UHF translator would not raise the potential of adjacent channel interference to the cable television system serving Lewiston nor to the direct off-the-air reception of KHQ-TV or the pick-up of KHQ-TV by translator K76AH. It, too, argues that KUID-TV has not provided support for its contention that authorization of another UHF translator would unduly complicate fund raising activities for the translator association.

7. In reply to these oppositions, petitioner asserts that the potential interference to Teleprompter's carriage of Lewiston's Channel 3 station is minimal in that the ERP of a 100 watt translator using a five-element yagi antenna would be over 15 dB below the ERP of Station KLEW-TV, and that although Station KLEW-TV on Channel 3 would have the same frequency relationship with KXLY-TV on Channel 4, Teleprompter claims interference would be caused by a Channel 5 station to the pick-up of Station KHQ on Channel 6. Petitioner argues that Teleprompter has the option of dropping carriage of a Spokane educational television station and moving Station KLEW-TV to that channel if any Channel 5 interference were to occur. It also asserts that it is logical to assume that people who wish to avoid payment to the translator association could say that the antennas were installed to receive petitioner's translator station. As to Clearwater's contention that the Channel 5 station would interfere with the reception of

[1] Public Notice of the petition was given on October 17, 1977, Report No. 1083.

[2] KAID(TV) and KBSU-TV, Boise; KBGL-FM and KBGL-TV, Pocatello; and KUID-FM and KUID-TV and KUOI-FM, Moscow.

[3] Owner and operator of a cable television system in Orofino, Idaho.

[4] Operator of a cable system in Lewiston.

MAY 8 1978

Channels 4 and 6 stations in Spokane, petitioner contends that, if Teleprompter can receive the Lewiston Channel 3 station and Channel 4 station, Clearwater should be able to receive a usable signal from the Channel 6 station even with full-power Channel 5 station located some 63 kilometers (39 miles) away.

8. To provide educational television service to an area located at the foot of a hill in Lewiston, petitioner is seeking an assignment of a VHF channel on which it intends to operate a 100 watt translator station. The proposed assignment meets the spacing requirements. The oppositions have raised a number of arguments, which without additional information, do not appear to have much merit. It would appear that the location of headend units for the cable systems in relation to the translator or the broadcast station would govern the question of interference to such service, not the mere existence of a certain relationship of channel assignments and usage. The cable systems appear to have a flexibility in their channel usage and thus should not be detrimentally affected by the requested assignment. Nevertheless, there is a question about the necessity of using a 100 watt VHF translator while the existing UHF translator stations are operating with 10 to 20 watt output powers to serve Lewiston. Petitioner should address this point.

9. The Commission believes that a sufficient public interest showing has been made to warrant consideration of petitioner's proposal. Thus, a rule making proceeding is being instituted to inquire into the instant proposal. The revision of the Television Table of Assignments § 73.606(b) of the rules) will be considered with respect to the city listed below:

City	Channel No. Present	Proposed
Lewiston, Idaho	3-	3-, *5+

10. Since Lewiston is located within 420 kilometers (250 miles) of the United States-Canada border, the proposed assignment of Channel 5 to Lewiston, Idaho, requires coordination by the Canadian Government.

11. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached appendix and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the appendix before a channel will be assigned.

12. Interested parties may file comments on or before June 20, 1978, and reply comments or or before July 10, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's rules and regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW, Washington, D.C.

[47 CFR Part 74]

[Docket No. 19918; RM-2235]

FM RADIO BROADCAST TRANSLATOR STATIONS

Order Extending Time For Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Action taken herein extends the time for filing comments and reply comments in a proceeding concerning amendment of the rules pertaining to FM radio broadcast translator stations. Petitioner, National Radio Broadcasters Association, states that the additional time is needed to complete the extensive consultations which must be undertaken with its members before comments can be prepared.

DATES: Comments must be received on or before June 2, 1978, and reply comments on or before June 23, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: April 28, 1978.

Released: May 1, 1978.

In the matter of amendment of Part 74, Subpart L, of the Commission's rules Pertaining to FM Radio Broadcast Translator Stations, Docket No. 19918, RM-2235.

1. On March 22, 1978, the Commission adopted a *Memorandum Opinion and Order and Further Notice of Proposed Rule Making*, 43 F.R. 14695, concerning the above-entitled proceeding. The present dates for filing comments and reply comments are May 5, and May 25, 1978 respectively.

2. On April 20, 1978, counsel for the National Radio Broadcasters Association filed a timely request seeking an extension of time for filing comments to and including June 2, 1978. Counsel states that because of the diversity of views of the Association's members in this proceeding it has become necessary to review carefully the various interests of the members in order to determine the precise position to be presented to the Commission. It asserts that since this requires extensive consultations to be undertaken, additional time its needed to complete the task of preparing comments.

3. We are of the view that the public interest would be served by this exten-

V 43/89

sion so that the National Radio Broadcasters Association may file any information which might be helpful to the Commission in reaching a decision in this proceeeding. Also, as a result of this decision, it is necessary to extend the reply comment date an equivalent amount of time.

4. *Accordingly, it is ordered,* That the dates for filing comments and reply comments in Docket 19918 are extended to and including June 2, and June 23, 1978, respectively.

5. This action is taken pursuant to authority found in Sections 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[49 CFR Chapter II]

[Docket No. RSSI-78-5; Notice No. 1]

GENERAL SAFETY INQUIRY

Initiation and Announcement of Hearings

AGENCY: Federal Railroad Administration, Department of Transportation.

ACTION: Notice of general railroad safety inquiry.

SUMMARY: The Federal Railroad Administration (FRA) is initiating a general railroad safety inquiry to obtain information from the public to assist in evaluating and improving the effectiveness of its safety regulatory program. A series of public hearings, each focused on a single regulatory topic, will be held throughout the remainder of 1978.

DATES: (1) The first 2-day public hearing will begin at 10 a.m. on June 14, 1978 (other hearings have been tentatively scheduled for July 12 and 13, August 2 and 3, October 11 and 12, and November 2 and 3). (2) Prepared statements should be submitted to the principal program person by June 7, 1978. (3) Persons desiring to participate in the hearing should notify the principal program person by June 7, 1978.

ADDRESS: Hearing location—Trans Point Building, Room 3201, 2100 Second Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Principal program person: Rolf Mowat-Larssen, Office of Safety (RRS-20), FRA, Washington, D.C. 20590, phone 202-426-0924.

Principal attorney: Edward F. Conway, Jr., Office of Chief Counsel (RCC-30), FRA, Washington, D.C. 20590, phone 202-426-8836.

SUPPLEMENTARY INFORMATION: Pursuant to § 211.61 of its rules of practice (41 FR 54181; 49 CFR 211.61), the Federal Railroad Administration (FRA) is initiating a general safety inquiry to examine in depth selected topics covered by its safety regulations. FRA will use the information it receives in this inquiry in assessing the effectiveness of its safety regulatory program. On the basis of this and other information, existing regulations may be expanded in scope, revised, or revoked to reflect changed conditions.

The scope of this inquiry will encompass three general areas: (1) Rolling equipment; (2) track and related structures, appliances, and devices; and (3) signal and communication systems.

The first area of consideration—rolling equipment—will consist of four topics: Locomotives, freight cars, safety appliances, and power brakes. Each of these topics will be considered in separate 2-day hearings during the next several months. The subject of the first hearing will be locomotives. This hearing will take place on June 14 and 15, 1978, in Washington, D.C.

Additional hearings have been tentatively scheduled to take place in Washington, D.C., on the following dates:

July 12 and 13—Freight cars and safety appliances.

August 2 and 3—Power brakes.

October 11 and 12—Track and related structures, appliances and devices.

November 2 and 3—Signal and communication systems.

Separate notices for each of these hearings will be published at a later date setting the time and place of the hearing.

The purpose of the first 2-day hearing scheduled for June 14 and 15, 1978, is to elicit information to assist FRA in critically reviewing its present safety regulatory program with respect to locomotives. Existing safety regulations for locomotives are contained in 49 CFR Part 230. Many of the requirements in Part 230 have been in effect with little or no change for more than 30 years and consequently, may be no longer necessary or may require revision to reflect changed conditions. Representatives of the railroad industry frequently have alleged that many of the requirements prescribed in safety regulations are based on "maintenance standards" or "recommended practices" rather than safety considerations. For example, the Association of American Railroads (AAR) recently petitioned the FRA to amend its locomotive inspection rules to make the present 30-day inspection requirement prescribed in 49 CFR 230.331, a quarterly inspection requirement (FRA rulemaking petition 78-1. On the other hand, some factors that play a vital safety role may not be covered by present regulations.

FRA is considering a major restructuring of its locomotive safety regulations. The restructuring would not be limited to eliminating or updating existing requirements that are obsolete or no longer necessary; it would also include the development of new requirements to meet the needs of the present railroad operating environment. Among the items to be addressed in this inquiry are the following:

1. How should safety requirements for the design, construction, inspection, maintenance, and operation of locomotives differ according to the type of service and operating environment? What factors should be considered in structuring these safety requirements (i.e., speed, mileage per year, train tonnage, length of train, train braking needs, dynamic response characteristics of locomotives, tractive effort, curvature and grades, and other operational factors)?

2. How should the inspection, maintenance, and replacement requirements for locomotive parts and components essential to safe operation take into account the quality and life expectancy of those parts and components?

3. What inspection procedures and intervals should be prescribed for the various types of service and operating environments? What should be the qualifications of persons performing the various types of locomotive safety inspections?

4. What do you recommend as a practical and enforceable Federal regulatory approach to assure locomotive safety? Explain.

5. In what areas do you believe further research and development is needed to improve the safety performance of locomotives?

FRA has requested that the Association of American Railroads, individual railroads, the National Transportation Safety Board, locomotive manufacturers, railroad employee organizations, and other interested parties participate actively in this hearing by providing knowledgeable witnesses and pertinent technical, manufacturing, service, and cost data. FRA has further requested that these witnesses be prepared to present detailed information to justify their positions.

Prepared statements should be submitted by June 7, 1978, in triplicate to the Docket Clerk, Office of Chief Counsel (RCC-1), Federal Railroad Administration, 400 Seventh Street SW., Washington, D.C. 20590.

MAY 8 1978

Persons desiring to participate in this hearing should notify the principal program person by June 7, 1978, and indicate the amount of time they will need to present their views.

The first 2-day hearing will begin at 10 a.m. on Wednesday, June 14, 1978, in Room 3201, Trans Point Building, 2100 Second Street SW., Washington, D.C. 20590.

AUTHORITY: Sec. 208, Federal Railroad Safety Act of 1970 (45 U.S.C. 437), § 1.49(a) of the regulations of the Office of the Secretary, 49 CFR 1.49(n).

Issued in Washington, D.C., on May 2, 1978.

JOHN M. SULLIVAN,
Administrator.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

UNIFORM GRAIN STORAGE AGREEMENT AND UNIFORM RICE STORAGE AGREEMENT

Modified Offer Rate System for Storage and Handling

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice.

SUMMARY: The purpose of this notice is to proclaim under the uniform grain storage agreement (UGSA) and the uniform rice storage agreement (URSA) that the offer rate system will be continued for the 1978-79 contract year starting July 1, 1978, certain modifications.

EFFECTIVE DATE: July 1, 1978.

ADDRESS: Inventory Management Division, ASCS-USDA, Room 5969-South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Tyrus Matsuoka (ASCS), 202-447-4068.

SUPPLEMENTARY INFORMATION: Uniform storage and handling rates for the UGSA and the URSA were in effect from 1940 and 1947, respectively through 1974. Under that system, CCC set the rates which were in effect for each contracting period. Uniform storage and handling rates were applied to all warehouses with grain storage contracts with CCC. Likewise, rice warehousemen had uniform rates that applied to the rice storage contracts. Under this system, CCC could withhold storage charges on grain or rice placed under loan and pay the warehouseman.

Beginning in 1975, an offer rate system was initiated whereby CCC accepted the storage and handling rates as offered by warehousemen. At the same time, CCC changed the loan procedure to provide that producers must prepay or arrange to pay the storage themselves and CCC would not make storage deductions on the loan and note agreement.

A notice that CCC was considering returning to a national uniform rate system for handling and storage of grain under the UGSA and rice under the URSA for the 1978-79 contract year beginning July 1, 1978, was published in the FEDERAL REGISTER on October 12, 1977 (42 FR 54955), in accordance with 5 U.S.C. 553.

A total of 143 comments were received, of which 42 favored a return to uniform rates, 92 opposed such a return; and 9 commented on other issues and were nonresponsive to the rate system issue. Several of the above pointed out: (1) That rates must adequately reflect increased elevator expense in order to insure proper performance by and services from the participating warehouses, and (2) the prepaid storage concept has caused concern among the producers.

In making the determination in this notice, full consideration was given to the principal concerns expressed by producers and producer groups as well as by the warehousing industry as they apply to the administration of the CCC storage programs.

Notice is hereby given that the offer rate system under the UGSA and URSA will be continued for the 1978/79 contract year starting July 1, 1978, with the following modifications:

(1) Storage and handling charges to accrue through the maturity date shall be deducted from grain loans, unless prepaid by the producer. Rice loans will continue to be made using procedures already in effect. If a grain producer is able to obtain a rate lower than the rate offered Commodity Credit Corporation (CCC), he can exercise his option to prepay the lower charges and can collect the full county loan rate (applicable to grains) from the county offices;

(2) Rates offered for CCC-owned and CCC-loan commodities will be the same, with an allowance for insurance on CCC-loan grain;

(3) Rates shall be subject to review and CCC reserves the right to reject and negotiate rates offered if they are deemed excessive. If rates are excessive and cannot be negotiated, CCC will notify the warehouseman that CCC will not store CCC-owned grain or rice in his facility and shall load out any CCC-owned grain or rice in store as soon as practicable. Warehouse shall be removed from the list of approved warehouses;

(4) All grain rates accepted will be open for public review in applicable ASCS State and county offices;

(5) CCC will accept downward adjustments in the grain and rice storage and handling rates once a year on a case-by-case basis;

(6) Warehousemen filing rates under the UGSA will submit the same storage and handling rates for wheat, barley, rye, and sorghum; but soybeans, corn, and oats will have separate rates, respectively. If an identity preserved storage rate is needed, it can be negotiated on an individual basis; and

(7) Under the URSA, storage and handling rates will continue to be submitted for identity preserved, modified commingled, and commingled storage and handling rates.

In addition, the following administrative changes will be applicable: (1) 30-day grace period at old load out rate from July 1-31, if a rate has not been agreed upon by July 1, and (2) if uninsured rate is the same or more than the insured rate, the warehouseman must carry full market value insurance on CCC-owned grain.

It is essential that a decision on 1978-79 storage policy be made as soon as possible to provide sufficient time for the warehouseman to determine their offer rates for the 1978-79 contract year. Accordingly, this notice is being issued at this time.

NOTE.—The Agricultural Stabilization and Conservation Service, to meet the requirements of the National Environmental Policy Act (Pub. L. 91-190, 42 U.S.C. 4321 et seq.), has developed an environmental assessment on the program and has determined that the proposed action would not constitute a major Federal action significantly affecting the quality of the human environment.

Signed at Washington, D.C., on May 2, 1978.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

SEA GRANT REVIEW PANEL

Partially Closed Meeting

The Sea Grant Review Panel will meet on May 30 and 31, 1978, from 9 a.m. to 5 p.m. each day, in the Penthouse of the Page Building, 2001 Wisconsin Avenue NW., Washington, D.C.

The Panel was established in December 1976 under section 209 of the National Sea Grant Program Improvement Act (Pub. L. 94-461), and advises the Secretary of Commerce with respect to:

a. Applications or proposals for, and performance under, grants and contracts awarded under Sections 205 and 206 of the Act;

b. The Sea Grant Fellowship Program, established under section 208 of the Act;

c. The designation and operation of Sea Grant Colleges and Sea Grant Regional Consortia (which are provided for in section 207 of the Act) and the operation of Sea Grant programs;

d. The formulation and application of the planning guidelines and priorities established by the Secretary under Section 204(2) of the Act and applied by the Director in accordance with Section 204(c)(1); and

e. Such other matters as the Secretary refers to the Panel for review and advice.

The Panel's meeting agenda is as follows:

May 30, 1978 (9 a.m. to 5 p.m.)

9 a.m.—Preliminary remarks, introduction and swearing in of new members.

9:30 a.m.—A. The nature and current posture of, and problems facing, the National Sea Grant Program, and the tasks before the Panel. A discussion by the Director and the Panel Chairman.

10:30 a.m.—B. Discussion of Institutional and Coherent Area Programs reviewed since last meeting:

University of Rhode Island; University of Miami; University of Michigan; South Carolina Program; Louisiana State University; Texas A&M University; Woods Hole Oceanographic Institution; University of Wisconsin; University of California; University of Southern California; and New Jersey Consortium.

3 p.m.—C. Discussion of changes in renewal dates (Hawaii) and progress toward two-year review cycle. Report on second year negotiations with:

Massachusetts Institute of Technology; University of Delaware; and Oregon State University.

3.30 p.m.—D. Sea Grant College Candidates Discussion. The following are eligible on the basis of time to be considered for designation as Sea Grant Colleges:

University of Southern California; Louisiana State University; and University of Georgia.

4 p.m.—E. Closed Session Discussion regarding Agenda Items B and D.

5 p.m.—Recess.

May 31, 1978 (9 a.m. to 5 p.m.)—Joint Meeting with Council of Sea Grant Directors

9 a.m.—F. Panel business, setting next meeting, election of vice-chairman.

9:30 a.m.—G. Organization of Office of Sea Grant.

10 a.m.—H. Discussion with Assistant Administrator for R. & D.

11 a.m.—I. Presentation by Sea Grant Directors, J. National Projects, K. International Sea Grant, L. Fellowship Program, M. Legislative Interaction.

5 p.m.—Adjourn.

All agenda items will be open to public attendance, except for Agenda Item E, a one-hour portion at the end of the discussion of all institutions under Agenda Items B and D, in accordance with 5 U.S.C. 552b(c)(6), as determined by the Assistant Secretary for Administration, pursuant to subsection 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended. Approximately 10 seats will be available to the public on a first-come, first-served basis. If time permits before the scheduled adjournment, the Chairman will solicit oral comments by the attendees. Written statements may be submitted at any time before or after the meeting.

Minutes of the meeting will be available 30 days thereafter on written request addressed to the National Sea Grant Program, 3300 Whitehaven Street NW., Washington, D.C. 20235.

For further information, contact Dr. Hugh J. McLellan, Acting Associate Director for Programs, at above address, telephone 202-634-4019.

Dated: May 3, 1978.

R. L. CARNAHAN,
Deputy Assistant Administrator for Administration, National Oceanic and Atmospheric Administration.

MYSTIC MARINELIFE AQUARIUM

Notice of Receipt of Application for Permit

Notice is hereby given that an applicant has applied in due form for a permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the regulations governing the taking and importing of marine mammals (50 CFR Part 216).

1. Applicant: (a) Name: Mystic Marinelife Aquarium (P13I, Mr. Stephen Spotte, Vice President. (b) Address: Mystic, Conn. 06355.

2. Type of permit: Public display.

3. Name and number of animals: Bottlenose dolphins (*Tursiops truncatus*), 4.

4. Type of take: To capture and maintain in a permanent facility.

5. Location of activity: Off Fort Myers, Fla.

6. Period of activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above-described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before June 7, 1978. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.:

Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Koger Boulevard, St. Petersburg, Fla. 33702; and

Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.

Dated: May 3, 1978.

ROLAND FINCH,
Acting Deputy Assistant Director for Fisheries Management, National Marine Fisheries Service.

SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL

Public Meeting With Partially Closed Session

Notice is hereby given of a meeting of the South Atlantic Fishery Management Council established by section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The meeting will be held Tuesday, Wednesday, and Thursday, May 23, 24, and 25, 1978, in the Ramada Inn, Interstate 26 and Highway 378, Columbia, S.C. 29202. The meeting will convene at 1:30 p.m. on May 23, and adjourn at about noon on May 25, 1978. The daily sessions will start at 8:30 a.m. and adjourn at 5 p.m. except as otherwise noted. The meeting may be extended or shortened depending on progress on the agenda.

Proposed Agenda: May 23: (1) Management plans; (2) Personnel and administration categories; (3) Review of foreign fishing applications, if any; *May 24:* (1) Closed session to discuss proposals by potential contractors in negotiated procurement of the preparation of a draft fishery management plan; (2) Other fishery management business; *May 25:* (1) Other fishery management business.

With the exception of the first agenda item on May 24 the meeting is open to the public. For information on seating arrangements, changes to the agenda, and/or written comments, contact: Mr. Ernest D. Premetz, Executive Director, South Atlantic Fishery Management Council, 1 Southpark Circle, Suite 306, Charleston, S.C. 29407, telephone: 803-571-4366.

The closed session is planned for 8:30 a.m. until 10 p.m., but may continue beyond this time to discuss proposals by potential contractors in a negotiated procurement for the preparation of a draft fishery management plan.

The Assistant Secretary for Administration of the Department of Commerce, with the concurrence of the General Counsel, formally determined on May 4, 1978 pursuant to section 10(d) of the Federal Advisory Committee Act, that the agenda item covered in the closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein because these items will be concerned with matters that are within the purview of 5 U.S.C., section 552b(c) (4), (6), and (9)(B). (A copy of the determination is available for public inspection and copying in the Public Reading Room, Central Reference and Record Inspection Facility, Room 5317, Department of Commerce.)

Dated: May 5, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

CONSUMER PRODUCT SAFETY COMMISSION

ADVISORY COMMITTEE APPLICATIONS

Extended Deadline

AGENCY: Consumer Product Safety Commission.

ACTION: Extension of deadline for submission of advisory committee applications to May 31, 1978.

SUMMARY: In March 7, 1978 FEDERAL REGISTER (43 FR 9330), the Commission announced that it was seeking applications to fill vacancies on its three advisory committees: the Product Safety Advisory Council, the Technical Advisory Committee on Poison Prevention Packaging, and the National Advisory Committee for the Flammable Fabrics Act. This notice announces an extension of the deadline for submittal of applications from May 19 to May 31, 1978. Applications for membership on the committees are available from and should be returned to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

FOR ADDITIONAL INFORMATION CONTACT:

Dee Wilson, Committee Management Officer, Office of the Secretary, 202-634-7700.

Dated: May 2, 1978.

SADYE E. DUNN,
Acting Secretary, Consumer Product Safety Commission.

Defense Investigative Service

PRIVACY ACT OF 1974

Amendment of Record System

AGENCY: Defense Investigative Service (DIS).

ACTION: Notice of record system amendment.

SUMMARY: The DIS is amending an existing record system notice.

DATES: This amended record system shall be effective as proposed without further notice June 7, 1978, unless comments are received on or before June 7, 1978, which would result in a contrary determination and require republication for further comments.

ADDRESS: Send comments to the System Manager identified in the record system.

FOR FURTHER INFORMATION CONTACT:

Lt. Col. Dale L. Hartig, Assistant for Information, telephone, 202-693-1740.

SUPPLEMENTARY INFORMATION: The DIS system of records notices prescribed by the Privacy Act of 1974, Pub. L. 93-579 (5 U.S.C. 552a) have been published in the FEDERAL REGISTER as follows:

FR Doc. 7-28255 (42 FR 51425) September 28, 1977.

FR Doc. 77-33100 (42 FR 59318) November 16, 1977.

DIS is proposing to amend an existing record system notice published September 28, 1977, at 42 FR 51432. This proposed amendment does not fall within the purview of an altered system requiring a report to the Office of Management and Budget (OMB) under the provisions of OMB Circular A-108, Transmittal Memorandum No. 1, dated September 30, 1975, and Transmittal Memorandum No. 3,

V 4 3 / 8 9

dated May 17, 1976, set forth in the FEDERAL REGISTER (40 FR 45877) on October 3, 1975. Following the specific change to the system notice being amended, the system notice is republished in its entirety, as amended.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Service, Department of Defense.

MAY 3, 1978.

V5-01

System name: V5-01 Investigative Files System (42 FR 51432) September 28, 1977.

Changes:

Systems exempted from certain provisions of the Act: On line 5 of this element describing the provisions of the Act from which this system has been exempted which now reads ". . . (5) and (8); (g) and (o)." is amended to read ". . . (5) and (8); and (g)."

V5-01

System name:

V5-01 Investigative File System

System location:

Defensive Investigative Service (DIS), Investigative Files Division, (D0840) P.O. Box 1211, Baltimore, MD 21203 has primary control over the system and is responsible for the maintenance of completed investigative records. The Special Investigations Center, 1000 Independence Avenue SW., Washington, D.C. 20314 maintains limited categories of these records. DIS operational centers; District Offices; Field Offices; Resident Agencies and various DIS headquarters staff elements originate and have temporary control over portions of records.

Categories of individuals covered by the system:

Military personnel who are on active duty, applicants for enlistment or appointment and reservists and National Guardsmen; DoD civilian personnel who are paid from appropriated funds; industrial or contractor personnel who are working in private industry in firms which have contracts involving access to classified DoD information or installations; Red Cross personnel and personnel paid from nonappropriated funds who have DoD affiliation; ROTC cadets; former military personnel; individuals residing on, having authorized official access to, or conducting or operating any business or other functions at any DoD installation facility.

Individuals not affiliated with the Department of Defense when, during the previous year, their activities have directly threatened the functions, property or personnel of the DoD or they have engaged in, or conspired to engage in, criminal acts on DoD installations or directed at the DoD.

Categories of records in the system:

Official Reports of Investigations (ROI's) prepared by DIS or other DoD, Federal, state or local official investigative activities.

DIS Information Summary Reports (ISR's) which record unsolicited information received by DIS concerning a person or incident which is of direct interest to other DoD components or Federal agencies. (When such information is received by DIS it is reported as it was received, without investigation or confirmation, by ISR and transmitted to the interested activity.)

Attachments to ROI's or ISR's including exhibits, subject or interviewed statements, police records, medical records, fingerprint cards, credit bureau reports, employment records, education records, release statements, summaries of or extracts from other similar records or reports.

Case control and management documents which are not reports of investigation, but that serve as the basis for investigation, or serve to guide and facilitate investigative activity, including documents providing the data to open and conduct the case, such as the Personnel Security Investigation Request; documents, initiated by the subject such as personnel history documents, and fingerprint records; and documents used in case management and control, such as release statements, case transfer forms, and documents directing the inquiry.

DIS file administration and management documents accounting for the disclosure, control and access to a file, such as warning sheets, separators, forwarding correspondence and accounting records required by 5 U.S.C. 552 and 552a.

Cross references to chronological correspondence files disclosing unfavorable and administrative action taken based on DIS investigations.

Authority for maintenance of the system:

Section 301 of 5 U.S.C. Departmental Regulations.

Section 310 of 44 U.S.C. Records Management.

Sections 2, 3, 4, 5, 6, 8 and 9, Executive Order 10450, Security Requirements for Government Employment.

Section 6(A), Executive Order 11652, Classification and Declassification of National Security Information and Material.

Sections III and V, DoD Directive 5105.42, Charter for the Defense Investigative Service.

Section IIIA, DoD Directive 5200.2b, Defense Investigative Program.

Section IV A and B, DoD Directive 5200.27 Acquisition of Information Concerning Persons and Organizations not Affiliated with the Department of Defense.

Section IX, DoD Directive 5210.7, Department of Defense Civilian Applicant and Employee Security Program.

Section I, DoD Directive 5210.8, Policy on Investigation and Clearance of DoD Personnel for Access to Classified Defense Information.

Section VII, DoD Directive 5210.9, Military Personnel Security Program.

Section V A 2., DoD Instruction 5210.25, Security Acceptability of American National Red Cross Employees at Department of Defense Installations and Activities.

Section I, DoD Instruction 5210.26, Investigation of American National Red Cross Employees on Duty at Department of Defense Installations and Activities in the Zone of Interior.

Encl 3, paragraphs b 2 and 3, DoD Directive 5210.41, Security Criteria and Standards for Protecting Nuclear Weapons.

Section III, DoD Directive 5210.45, Personnel Security in the National Security Agency.

Section VII, DoD Directive 5210.55, Selection of Department of Defense Military and Civilian Personnel for Assignment to Presidential Support Activities.

Section IV, C, DoD Directive 5220.6, Industrial Personnel Security Clearance Program.

Section V B, DoD Instruction 5220.28, Application of Special Eligibility and Clearance Requirements in the SIOP-ESI Program for Contractor Employees.

Section 1 (a) and 2, Executive Order 10865, Safeguarding Classified Information Within Industry.

Section III, DoD Instruction 5030.34, Agreement between the Department of Defense concerning Protection of the President and Other Officials.

Paragraph 10, Director of Central Intelligence Directive No. 1/14, Uniform Personnel Security Standards and Practices Governing Access to Sensitive Compartmented Information C.

Section II, DSA Regulation 5705.2, Criminal Investigative Support to the Defense Supply Agency.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Purpose for which collected.

Personnel security investigative information is collected to insure that the acceptance or retention of persons to sensitive DoD positions, or granting individuals access to classified information, including those employed in defense industry, is clearly consistent with national security.

Criminal investigative information is collected on request to identify offenders, provide facts and evidence upon which to base prosecution and effect the recovery of property which has been wrongfully appropriated.

Information contained in ISR's (see description in RECORD-CATEGORY) regarding criminal, personnel security, counterintelligence, or intelligence matters, when received, is disseminated to appropriate Federal agencies or other DoD components.

Criminal and personnel security information is collected during reciprocal investigations conducted for other DoD and federal investigative elements (or in limited instances, criminal information for local, or state law enforcement agencies) for maintenance and use by the requesting acitivity.

Information regarding alleged security violations is collected on request to establish whether or not a compromise occurred and to identify the personnel involved.

Criminal information received by DIS personnel in the course of their duties which is of direct interest to a local law enforcement agency and therefore furnished to that agency orally or by letter.

Users of DIS investigative information are:

(1) DIS personnel in the course of their official duties.

(2) Other accredited DOD investigative components, DOD agencies, elements of the Military Departments designated by the departments and representatives of the Secretary of Defense and the Joint Chiefs of Staff.

(3) Accredited Federal criminal and civil law enforcement and intelligence agencies.

(4) State and local official criminal law enforcement agencies.

(5) Other accredited federal agencies conducting investigations to evaluate suitability for employment or access to classified information.

(6) Congressional committees and the Government Accounting Office.

Specific uses of DIS investigative records are:

To determine the loyalty, suitability, eligibility, and general trustworthiness of individuals for access to Defense information and facilities by the first two categories of users, above.

To determine the eligibility and suitability of individuals for entry into and retention in the Armed Forces by the second category of users, above.

To provide information pertinent to the protection of persons under the provisions of 18 U.S.C. 3056, by the first three categories of users, above.

For use in criminal law enforcement investigations including statutory violations, counterintelligence, as well as counterespionage and other security matters by the first through fourth and the sixth categories of users, above.

In the event that records maintained in this system indicate a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

To provide information in judicial or adjudicative proceedings including litigation, or in accordance with a court order by the first three categories of users, above.

To make statistical evaluations of DIS investigative activities by the first, second and sixth categories of users, above.

To respond to Freedom of Information and Privacy Act access requests, by the first category of users, above.

To provide information in response to Inspector General, and EEO or other complaint investigations and Congressional inquiries by the first, second and sixth categories of users, above.

To determine the eligibility and suitability of an individual for personnel actions in the Armed Forces of the United States, as deemed appropriate by the second category of users, above.

A record such as identification data, from this system of records may be disclosed as a routine use to a federal, state local or foreign agency maintaining relevant information or to business enterprises to obtain employment records if necessary to obtain information relevant to an assigned investigation.

A record from this system of records may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter by any agency of the first, second, third, or fifth categories of users, above.

Transfers of information from this record system to other DoD components is a routine intra-agency use under the provisions of 5 U.S.C. 552a3(b)(1).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders, microfilm, magnetic tape or supplementary index cards.

Retrievability:

Investigations are centrally retrievable through the DIS Case Control System (DCCS) or the Defense Central Index of Investigations (DCII) systems described separately in this notice. Reciprocal investigations jurisdictions, may be retrieved only through a limited manual disclosure accounting system.

Safeguards:

Completed investigative records are maintained and stored in power files, open shelves and filing cabinets which are housed in secured areas accessible only to authorized personnel who are properly screened and have a need to know. Information contained on magnetic tape is secured in the same manner as the DCII, described separately. Recipients of investigative information are responsible for safeguarding information within the guidelines provided by DIS.

Retention and disposal:

Retention of closed DIS investigative files is authorized for 30 years maximum, except as follows: (1) Files which have resulted in adverse action against an individual will be retained permanently, (2) Files developed on persons who are being considered for affiliation with the Department of Defense will be destroyed within one year if the affiliation is not completed. In cases involving a pre-appointment investigation, if the appointment is not made due to information developed by investigation, the file will be retained permanently. If the appointment is not made for some other reasons not related to the investigation, the file will be destroyed within one year; (3) Information within the purview of the Department of Defense Directive 5200.27, "Acquisition of Information Concerning Persons and Organizations Not Affiliated with the Department of Defense", is destroyed within 90 days after acquisition by DIS unless its retention is required by law or unless its retention has been specifically authorized by the Secretary of Defense or through the Chairman, DIRC.

Generally, ISR's and reciprocal investigations are retained for only 60 days.

Partial duplicate records of personnel security investigations are retained for 60 days by DIS field elements. Partial duplicate records in criminal and special investigations are retained for one year.

System manager(s) and address:

Director, Defense Investigative Service, 1000 Independence Ave. SW., Washington, D.C. 20314

Notification procedure:

Requests should be addressed to the Assistant for Information, Defense Investigative Service, 1000 Independence Ave. SW., Washington, D.C. 20314.

M Y 8 7 8 M

V 4 3 / 8 9

The full name, date and place of birth, and social security account number are necessary for retrieval of information. More information or a notarized statement verifying the identity of requesters may be required. The Information Office, at Room 2H043 1000 Independence Avenue, Washington, D.C. 20314 may be visited by personnel making inquiries regarding this system. A Check of personal identification will be required of all visitors making such inquiries.

Record access procedures:

Access may be obtained through the Information Office at the address listed above.

Contesting record procedures:

DIS rules for contesting and appealing initial determinations may be obtained from the Assistant for Information at the address listed above.

Record source categories:

Categories of sources of records.

Subjects of investigations.

Records of other DoD activities and components.

Federal, state, county and municipal records.

Employment Records of private business and industrial firms.

Educational and disciplinary records of schools, colleges, universities, technical and trade schools.

Hospital, clinic and other medical records.

Records of commercial enterprises such as real estate agencies, credit bureaus, loan companies, credit unions, banks and other financial institutions which maintain credit information on individuals, transportation companies, (airlines, railroad, etc.)

The interview of individuals who are thought to have knowledge of the subject's background and activities.

The interview of witnesses, victims and confidential sources.

The interview of any individuals deemed necessary to complete the DIS investigation.

Miscellaneous directories, rosters and correspondence.

Any other type of record deemed necessary to complete the DIS investigation.

Systems exempted from certain provisions of the act:

In accordance with subsection 3j(2) of the Act, information maintained by the Special Cases Division of DIS may be exempted from the provisions of subsections (c)(3) and (4); (d); (e) (1), (2) and (3); (e) (5) and (8); and (g). Information maintained by, or at the direction of, this unit includes criminal investigations for which the DIS has primary responsibility and certain ISR's and reciprocal investigations, and security or counterintelligence information which may be used in criminal prosecution. The withholding of this information will be to allow the DIS Special Cases Division, a criminal law enforcement component, to conduct effective investigations into alleged unlawful activity or crime conductive situations without jeopardizing such investigations. Knowledge of the investigations of the Special Cases Division could enable subjects to take actions to prevent detection of criminal activities, conceal evidence, or to escape prosecution. It could also lead to intimidation of or harm to sources, informants, witnesses and their families. Information from this system will be withheld only to the extent that its release would interfere with such investigations.

Under subsection 3k(1) of the Act, properly classified material contained in DIS investigatory files is exempt from the provisions of subsection (d). This exemption will protect information, the disclosure of which would have an adverse effect on the national defense or foreign policy.

Under subsection 3k(2) of the Act, other investigatory material including certain reciprocal investigations and counterintelligence information is exempt from subsection (c)(3), (d), (e)(4) (G, H and I) and (f) until such time as action is taken regarding allegations, and after that time only to the extent that the information would identify a confidential source who furnished information under an express promise that the identity of the source would be held in confidence (or prior to the effective date of the Act under an implied promise). This exemption will permit the DIS to conduct certain law enforcement investigations effectively and to protect the identities of sources who would not otherwise provide information.

Protective Service: Under subsection 3k(3) of the Act, DIS investigatory material maintained in connection with assisting the US Secret Service (USSS) to provide protective services to the President of the United States or other individuals pursuant to section 3056 of Title 18 is exempt from subsections (c)(3), (d), (e)(1), (e)(4), (g, h and i), and (f). This exemption provision will enable DIS to continue its support of the US Secret Service without compromising the effectiveness of either activity.

Under subsection 3k(5) of the Act, personnel security investigatory material from subsections (c)(3), (d) and (f), is exempt to the extent that the disclosure of such material would reveal the identity of a confidential source as described above. This exemption provision will allow DIS to collect information from certain sources who would otherwise be unwilling to provide information necessary to personnel security investigations.

[3810-70]

Office of the Secretary

DEPARTMENT OF DEFENSE WAGE COMMITTEE

Notice of Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, the Federal Advisory Committee Act, effective January 5, 1973, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, July 11, 1978; Tuesday, July 18, 1978; and Tuesday, July 25, 1978, at 9:45 a.m. in Room 1E801, the Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) concerning all matters involved in the development and authorization of wage schedules for Federal prevailing rate employees pursuant to Pub. L. 92-392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92-463, the Federal Advisory Committee Act, meetings may be closed to the public when they are "concerned with matters listed in section 552b. of Title 5, United States Code." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency" (5 U.S.C. 552b.(c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b.(c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the the Department of Defense (5 U.S.C. 552b.(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b.(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the Chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by contacting the Chairman, Department of Defense Wage Committee, Room 3D281, the Pentagon, Washington, D.C.I06Maurice W. Roche,

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Service, Department of Defense.

DEPARTMENT OF ENERGY

CRUDE OIL

Inquiry on the Transportation System Serving the Northern Tier and Inland States; Correction

In FR Doc. 78-11021 appearing at page 17392 in the issue for Monday, April 24, 1978, the following corrections should be made:

1. Page 17392, middle column. The date in the preamble for the caption: "COMMENTS BY" should read "May 30" vice "May 31".

2. Page 17392, middle column, in the preamble under the caption: "ADDRESS TO", 12th line. The request to speak date should read "May 5" vice "May 15".

3. Page 17393, middle column, section B.1, second paragraph, 8th line. Delete the following: "Public Hearing Management, 2000 M Street NW., Box SS, Washington, D.C. 20461, and must be received before 4:30 p.m. on May 12, 1978, for the Chicago hearing and May 17 for the Seattle hearing." Add: "the Chicago and Seattle addresses, as appropriate. Chicago—Charles Swank, Region 5, DOE, 175 West Jackson Boulevard, Chicago, IL 60604; and Seattle—Lee Johnson, Federal Building, 915 2nd Avenue, Room 1992, Seattle, WA 98174. Such requests must be received before 4:30 p.m. on May 5, 1978 for both the Chicago and Seattle hearings."

4. Page 17393, middle column, section B.1, 4th paragraph. Delete the last three lines beginning with "Public Hearing * * * 20461" and add: "the Chicago and Seattle addresses listed above."

Issued in Washington, D.C., on May 3, 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration.

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF ADMINISTRATVE REVIEW

Week of January 30 through February 3, 1978

Notice is hereby given during the week of January 30 through February 3, 1978, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Administrative Review of the Economic Regulatory Administration of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Administrative Review and the basis for the dismissal.

Appeals

Peters Fuel Corp., Oakland, Md., FXA-1374, Refined Products

The Peters Fuel Corp., filed an Appeal from that portion of a March 30, 1977 Decision and Order in which the FEA had denied the firm's request for retroactive exception relief from the provisions of 10 CFR 212.93. *Peters Fuel Corp.*, 5 FEA Par. 80,588 (March 30, 1977). If the Appeal were granted, Peters would have been relieved of its obligation under a Remedial Order to refund previous overcharges to its customers. In its Appeal, Peters claimed that the March 30 Decision erred in rejecting its contention that in the absence of retroactive exception relief the firm would experience a negative cash flow during its fiscal year ended January 31, 1977. The DOE analyzed the financial data which Peters had submitted on Appeal, and found that the firm has made certain discretionary prepayments for obligations which did not accrue during the fiscal period concerned. As a result, the DOE determined that Peters had understated the amount of cash which was available to the firm. After recalculating the firm's cash flow position to eliminate the effect of the prepayment items, the DOE concluded that Peters had realized a positive rather than a negative cash flow during its 1977 fiscal year. The Peters Appeal was accordingly denied.

Rickelson Oil and Gas Co., Tulsa, Okla., FRA-1399, Crude Oil

Rickelson Oil and Gas Co. (Rickelson) appealed from a Remedial Order which Federal Energy Administration Region VI issued to the Firm on July 5, 1977. In its Appeal Rickelson challenged the Remedial Order's determination that the firm had incorrectly classified seven of its crude oil producing properties as stripper well leases. After considering Rickelson's Appeal, the Department of Energy rejected the firm's contention that in determining the number of wells on a producing property the firm should be permitted to include injection wells and should also be permitted to count as two wells single wells which produce crude oil from two separate formations. The DOE determined that the Remedial Order's findings in this respect were supported by DOE rulings and precedents established in prior cases. The DOE further considered evidence which Rickelson presented in order to demonstrate that its Nitchey, Ellen and Rhoda Cumsey "A" leases had more crude oil producing wells in operation during relevant qualifying periods than the number specified in the Remedial Order. After considering the evidence submitted, the DOE concluded that the Remedial Order did not contain sufficient findings of fact with respect to the number of wells on the Ellen and Rhoda Cumsey "A" leases. Consequently, the DOE remanded portions of the Remedial Order for further findings of fact regarding the stripper well status of these two leases. In all other respects the Remedial Order was affirmed..

Texfel Petroleum Corp., Dallas, Tex., DFA-0102, Freedom of Information

Texfel Petroleum Corp. (Texfel) appealed from a partial denial by the DOE Information Access Officer of a request for information which the firm had submitted under the Freedom of Information Act (the Act). In its request, Texfel sought access to certain material relating to an audit of the firm which had been conducted by the FEA in April 1975. The Information Access Officer released portions of one document in response to the firm's request but concluded that the remainder of that document was exempt from disclosure as an intra-agency memorandum under Exemption 5 of the Act. In considering Texfel's Appeal, the DOE found that the portion of the document which was withheld from disclosure was primarily factual in nature and under applicable law should have been released to Texfel. However, the DOE also determined that the last clause of the disputed material was properly withheld under Exemption 5 since it contained a predecisional opinion regarding Texfel's eligibility for stripper well status. Accordingly, Texfel's Appeal was granted in part and denied in part.

Tosco Corp., Washington, D.C. FXA-1280, Motor Gasoline

Tosco Corp., filed an Appeal from a Decision and Order which was issued to it by the FEA on March 31, 1977. *Tosco Corp.*, 5 FEA Par. 83,124 (March 31, 1977). Tosco's Appeal, if granted, would result in the reversal of the March 31 Decision and the issuance of an order relieving Tosco of any obligation to refund overcharges resulting from the firm's incorrect calculation of its May 15, 1973 selling prices. In addition, the firm would be permitted to continue to utilize the May 15, 1973 selling prices which it had actually been using in determining its maximum allowable selling prices. In considering Tosco's Appeal, the DOE initially reviewed the application of Ruling 1977-5 to the factual circumstances in this case and affirmed the finding of the March 31 Decision that two variable price contracts which Tosco had used to determine its May 15, 1973 prices should not have been considered as relevant transactions in calculating those prices. The DOE determined that, contrary to Tosco's assertion, Ruling 1977-5 is not erroneous as a matter of law, is consistent with the language of the Price Regulations, and is supported by contemporaneous interpretations of the transaction concept. The DOE also found tht Ruling 1977-5 had been issued to clarify the existing regulatory definition of "transaction," rather than to retroactively change the regulations. Nevertheless, the DOE found that there were factors present in this case which made it inequitable to apply the provisions of Ruling 1977-5 to Tosco. The DOE found that Tosco had received a written opinion from an FEA Regional Counsel which was contrary to the Ruling and that Tosco had acted in direct reliance upon that opinion when it purchased the Avon refinery from Phillips Petroleum Co. in April 1976. In this regard, the DOE determined that even though the opinion did not constitute a formal interpretation, Tosco had acted reasonably in assuming that it was a definitive determination of the FEA. IN addition, the DOE found that Tosco would have been financially unable to proceed with the refinery acquisition if it had been required to calculate its May 15, 1973 prices in accordance with the Ruling. Tosco's financial data demonstrated that, in the absence of exception relief the firm would experience a severe and irreparable injury as a result of its commitment of substantial assets to acquire the Avon refinery. The DOE therefore concluded that Tosco should be granted retroactive exception relief. The DOE also determined that prospective exception relief was warranted since Tosco continues to own and operate the Avon refinery and the profits which it will realize from the refinery will be significantly less than the profits which it originally anticipated.

V 43/89

United States Department of the Interior, Washington, D.C. FXA-1445, Residual Fuel Oil

The United States Department of the Interior (DOI) filed an Appeal on behalf of the Government of the Northern Mariana Islands (GNMI) from a Decision and Order that was issued to it by the FEA on June 28, 1977. *United States Department of the Interior for the Northern Mariana Islands*, 6 FEA Par. 83,026 (June 28, 1977). In the previous determination, the FEA granted an exception from 10 CFR 211.67(d)(2) which permitted Guam Oil & Refining Co. (Gorco) to earn entitlements for the residual fuel oil which it sold to GNMI. The exception relief, which permitted Gorco to treat its sales to GNMI as occurring within the United States rather than as export sales, had the effect of reducing the cost which GNMI incurred in purchasing residual fuel oil. The exception relief granted was effective as of March 31, 1977. The DOI Appeal, if granted, would make the relief retroactive to April 1, 1976. In considering the Appeal, the DOE found that new information had been presented which supported the DOI claim that additional exception relief should be approved for the period November 1, 1976 through March 31, 1977, since GNMI had actually incurred higher costs for the residual fuel oil which it purchased during that period from Gorco through an intermediate supplier, Mobil Oil Micronesia, Inc. (Mobil). In this regard, the DOE concluded that there was no basis to distinguish between this period and the period following March 31, 1977, since exception relief in the form of additional entitlement benefits which Gorco was required to pass through to GNMI would have the desired effect of reducing GNMI's costs. However, with respect to the period April 1, 1976 through November 1, 1976, the DOE affirmed the previous finding that the DOI request for exception relief was premature since Gorco had not been ordered to make restitution for the entitlements benefits which it had improperly received during that period.

Requests for Exception

Edgington Oil Co., Inc., Los Angeles, Calif., DXE-0081, Crude Oil

Edgington Oil Co., Inc. (Edgington) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of December 1977. In support of its exception request, Edgington provided projected financial statements for its current fiscal year ending December 31, 1977 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering Edgington's exception request, the DOE determined that as a result of Edgington's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of December 1977. As a result of the projected entitlements cost which Edgington would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. The DOE therefore found that exception relief was warranted under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976). Accordingly, the DOE issued a Proposed Decision and Order granting Edgington's Application for Exception and relieving the firm of sufficient entitlement purchase obligations during the period December 1977 through May 1978 to account for its crude oil runs to stills and old oil receipts during the period October 1977 through March 1978. However, the DOE noted that the relief granted to Edgington would be reevaluated if the firm requested an extension of exception relief beyond May 1978 and in any event would be reevaluated at the conclusion of the firm's current fiscal year. The DOE noted that an adjustment will be made and Edgington will be required to purchase entitlements if the DOE finds that the firm has received excessive benefits because of a discrepancy between the financial projections it submitted and the actual financial results which it achieves. Since no Notice of Objection was filed to the Proposed Decision and Order, a Final Decision and Order was issued by the DOE on January 30, 1978.

M. J. Mitchell, Dallas, Tex., DXE-0360, Crude Oil

M. J. Mitchell filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would have resulted in the extension of the exception relief previously granted and would have permitted Mitchell to continue to sell a portion of the crude oil produced from the Mitchell State Minnelusa Sand Unit at upper tier ceiling prices. In considering Mitchell's Application, the DOE found that although the firm's cost of producing crude oil from the Unit had increased since 1973, the lower tier ceiling price for the crude oil which he produced exceeded his current product costs on a per barrel basis. Consequently, the DOE determined that Mitchell had an economic incentive to maintain crude oil production at the Unit in the absence of exception relief. Accordingly, Mitchell's request for an extension of exception relief was denied.

San Joaquin Refining Co., Newport Beach, Calif., DXE-0095 crude oil

San Joaquin Refining Co. filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of December 1977. In support of its exception request, San Joaquin provided projected financial statements for its current fiscal year ending April 30, 1978 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering San Joaquin's exception request, the DOE determined that as a result of San Joaquin's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of December 1977. The DOE further found that as a result of the projected entitlements cost which San Joaquin would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976), exception relief was therefore warranted. Accordingly, the DOE issued a Proposed Decision and Order granting San Joaquin's Application for Exception and relieving the firm of sufficient entitlement purchase obligations during the six month period December 1977 through May 1978 to account for its crude oil runs to stills and old oil receipts during However, the DOE noted in the Proposed Decision that the relief granted to San Joaquin would be reevaluated if the firm requested an extension of exception relief beyond May 1978 and in any event would be reevaluated at the conclusion of the firm's current fiscal year. The decision noted that an adjustment will be made and San Joaquin will be required to purchase entitlements if the DOE finds that the firm has received excessive benefits because of a discrepancy between the financial projections it submitted and the actual financial results which it achieves. Since no Notice of Objection was filed to the Proposed Decision and Order, a Final Decision and Order was issued by the DOE on January 30, 1978.

Requests for Modification or Rescission

Leonard E. Belcher, Inc., Springfield, Mass., DRR-0008 No. 2 fuel oil

Leonard E. Belcher, Inc. (Belcher) filed an Application for Modification of a Decision and Order which the FEA issued to the firm on August 17, 1977. *Leonard E. Belcher, Inc.*, 6 FEA Par. 85,023 (August 17, 1977). In that determination, the FEA granted an Application for Stay of a Remedial Order which had been issued to Belcher by FEA Region I on July 19, 1977. However, as an express condition of the stay which was approved, Belcher was required to establish an irrevocable letter of credit. Belcher requested that the August 17 order be modified to eliminate the letter of credit requirement. Belcher contended that the approval of this request would be consistent with the new Remedial Order stay policies adopted in *Rickelson Oil and Gas Co.*, 6 FEA Par. 85,029 (August 24, 1977). In considering the Belcher request, the DOE noted that unlike the situation in the *Rickelson* case, the DOE has already fully considered all of the contentions raised by Belcher in its Appeal of the Remedial Order and has issued a Decision on the merits of that Appeal. *Leonard E. Belcher, Inc.*, 1 DOE Par. 80,183 (January 18, 1978). Since the January 18 Decision and Order rejected all of the contentions raised by Belcher concerning the factual and legal findings of the Remedial Order, the DOE concluded that it would be inappropriate to cancel the letter of credit at the present time. The Belcher Application for Modification was accordingly denied.

Red Carpet Car Wash, Oklahoma City, Okla., FMR—0116 Motor Gasoline

Red Carpet Car Wash filed on Application for Modification of a Decision and Order that was issued to Texaco, Inc. by the DOE Region VI Office on January 26, 1977. In the January 26 determination, Region VI vacated an Assignment Order that had directed a Texaco branded jobber to supply Red Carpet with a base period use of motor gasoline for a car wash-service station which Red Car operated in Oklahoma City, Okla. The Oklahoma City site had previously been occupied by another gasoline retailer before Red Carpet acquired the site and converted it to a combination car wash-service station. The request for modification, if granted, would reinstate the provisions of the original Assignment Order under which Texaco had been required to supply Red Carpet. The DOE determined that the Region VI Decision should be reconsidered in view of the issuance on March 22, 1977 of Modifications to the Guidelines for Evaluation of Assignment of Supplier and Base Period Use to New Gasoline Retail Sales Outlets. However, the DOE concluded that contrary to Red Carpet's claim, the March 22, 1977 Modifications did not alter the standard that had previously been set forth in Ruling 1975-6 for determining whether a firm which acquires a retail sales outlet qualifies as a "new" wholesale purchaser-reseller. Under the criteria discussed in the Ruling, a firm which succeeded another firm as the operator at a retail site was not eligible to receive an assignment of supplier and base period use as a new wholesale purchaser-reseller if it intended to continue to engage in retail sales at the site, regardless of any changes which it might make in the mode of operations at the site. The DOE found that since Red Carpet had always intended to continue selling motor gasoline at the Oklahoma City site, it failed to qualify as a new retail outlet, despite the conversion of the site to a combined car wash operation. The Red Carpet Application was accordingly denied.

Requests for Stay

Illinois Petroleum Marketers Association; FS Services, Inc. and Affiliated Companies, Springfield, Ill., and Bloomington, Ill., DES-0035 and DES-0037 Gasohol

The Illinois Petroleum Marketers Association (the Association) and FS Services, Inc. and Affiliated Companies (FS) filed Applications for Stay of the Mandatory Petroleum Price Regulations on behalf of retailers in the States of Illinois, Iowa and Wisconsin who wished to sell "Gasohol," a blend of ethyl alcohol and unleaded gasoline. In their Applications, the Association and FS asserted that firms had no economic incentive to distribute Gasohol because the price regulations do not permit them to reflect the cost of the alcohol component in Gasohol in computing their maximum allowable selling prices. In considering the Applications, the DOE noted that on the basis of the current record, sales of Gasohol appeared to be in the public interest. Accordingly, the Applications for Stay were granted. Sellers of Gasohol in Illinois and those sellers of Gasohol in Iowa and Wisconsin that were members of FS were permitted to increase the product costs which they could otherwise to reflect in their selling prices by the difference between the weighted average unit cost of ethyl alcohol in inventory in the current month and the weighted average unit cost of motor gasoline in inventory on May 15, 1973, multiplied by the percentage of ethyl alcohol in the Gasohol blend.

Southwestern Refining Co., Inc., Labarge, Wyo., DES-0483 Crude Oil

On January 25, 1978, the Southwestern Refining Co., Inc. (Southwestern) filed an Application requesting that its obligation to purchase entitlements under the Old Oil Entitlements Program (10 CFR 211.67) during January 1978 be stayed pending a determination on an Application for Exception which the firm also filed. In considering the stay request, the DOE found that Southwestern's financial material supported its contention that it did not have access to the resources necessary to enable the firm to purchase its January 1978 entitlements. Under these circumstances the DOE concluded that Southwestern could incur an immediate serious hardship unless a stay were granted. The Southwestern Application for Stay was therefore granted.

Requests for Exception Received From Natural Gas Processors

The Office of Administrative Review of the Department of Energy has issued a Decision and Order granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processor listed below. The exception relief permits the firm involved to increase the prices of the production of the gas plants listed below to reflect certain non-product cost increases:

Company	Case No.	Plant	Location	Amount of price increase (per gallon)
Gary Operating Co	DXE-0063	Altonah	Duchesne County, Utah	$0.0229
	DXE-0064	Bluebell	Duchesne County, Utah	.0515

SUMMARY DECISIONS

The following firms filed Applications for Stay of Remedial Orders which had been issued to them by the DOE. In considering the stay requests, the DOE referred to a recent Decision in *Rickelson Oil and Gas Co.*, 6 FEA Par. 85,029 (August 24, 1977), in which it held that a Remedial Order will generally be stayed pending the determination of an Appeal unless it appeared that the public interest required immediate compliance with the Remedial Order. Since the record in these cases did not indicate that the public interest required immediate compliance with the Remedial Orders, the DOE granted the requests for stay pending consideration of the Appeals.

Jay Oil Co., Inc., Tulsa, Okla., DRS-0123.

Jedco, Inc., Mobile, Ala., DRS-0117.

United Petroleum, Inc., Tampa, Fla., DRS-0116.

The Office of Administrative Review has issued a summary Decision and Order rescinding the Stay of the refund provisions of a Remedial Order. The Stay was rescinded since the Office of Administrative Review had previously determined that the firm's Appeal of the Remedial Order should be denied:

Maguire Oil Co., Dallas, Tex., DRX-0030.

Dismissals

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Hawthorne Oil & Gas Corp., Lafayette, La., DEE-0406.

Horomet Aluminum Corp., Lancaster, Pa., DEE-0453.

Robert C. Wampler, Allerton, Iowa, DEE-0348.

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street, NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

CASES FILED WITH THE OFFICE OF HEARINGS AND APPEALS

Week of April 7 Through April 14, 1978

Notice is hereby given that during the week of April 7 through April 14, 1978, the appeals and applications for exception or other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in this case may file with the DOE written comments on the application within 10 days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

MAY 2, 1978.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

MAY 8 1978

V 4 3 / 8 9

APPENDIX.—*List of cases received by the Office of Hearings and Appeals*

[Week of Apr. 7 through Apr. 14, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Apr. 7, 1978	Beacon Oil Co., Washington, D.C. If granted: DOE would review the entitlements exception relief granted to Beacon Oil Co. during its 1977 fiscal year in order to determine whether the level of relief approved was appropriate.	DEX-0059	Supplemental order.
Do	Brad's Mobil, North Pembroke, Mass. If granted: Brad's Mobil would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-1005	Exception to the reporting requirements.
Do	Ely Crude Oil Co., Ely, Nev. If granted: Ely Crude Oil Co. would receive a stay of the provisions of 10 CFR 211.67 pending a final determination on its application for exception.	DES-0053	Stay request.
Do	Fondren Park Texaco, Houston, Tex. If granted: Fondren Park Texaco would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-1006	Exception to the reporting requirements.
Do	Home-Stake Production Co., Tulsa, Okla. If granted: Home-Stake Production Co. would be permitted to sell the crude oil produced from the 1963 Searight project located in Seminole County, Okla., at prices in excess of the lower tier ceiling price.	DEE-1003	Price exception (sec. 212.73).
Do	Jorge's Shell, Miami, Fla. If granted: Jorge's Shell would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-1007	Exception to the reporting requirements.
Do	Ken's Sinclair Service, Coalville, Utah. If granted: Ken's Sinclair Service would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-1008	Do.
Do	Texaco, Inc., Los Angeles, Calif. If granted: Texaco, Inc., would be permitted to sell the crude oil produced from the Shiells intermediate zone unit located in Ventura County, Calif., at prices in excess of the lower tier ceiling prices.	DEE-1004	Price exception (sec. 212.73).
Do	Weber Oil Co., Bangor, Maine. If granted: The Feb. 14, 1978, ancillary order issued by DOE region I regarding the Nov. 7, 1977, remedial order issued to C. H. Sprague & Co. would be rescinded.	DEA-0188	Appeal of an ancillary order.
Apr. 10, 1978	Edgington Oil Co., Inc., Washington, D.C. If granted: DOE would review the entitlements exception relief granted to Edgington Oil Co., Inc., during its 1977 fiscal year in order to determine whether the level of relief approved was appropriate.	DEX-0060	Supplemental order.
Do	Husky Oil Co., Denver, Colo. If granted: DOE would review the entitlements exception relief granted to Husky Oil Co. during its 1977 fiscal year in order to determine whether the level of relief approved was appropriate.	DEX-0061	Do.
Do	Richmond Service Center, Providence, R.I. If granted: Richmond Service Center would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-1009	Exception to the reporting requirements.
Apr. 11, 1978	Burk Royalty Co., Wichita Falls, Tex. If granted: Burk Royalty Co.'s lease No. 2938 and lease No. 3942 located in Plaquemines Parish, La., would be classified as stripper well properties.	DEE-1010	Price exception (sec. 212.73).
Do	Fred's Chevron Service Station, Bayport, N.Y. If granted: Fred's Chevron Service Station would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-1014	Exception to the reporting requirements.
Do	Laguna Petroleum Co., Denver, Colo. If granted: Laguna Petroleum Co. would be permitted to sell the crude oil produced from the No. 1 Lambe lease located in the Border County, Tex., at upper tier ceiling prices.	DEE-1011	Price exception (sec. 212.73).
Do	Phillips Petroleum Co., Bartlesville, Okla. If granted: Phillips Petroleum Co. would be permitted to sell the crude oil produced from the Holder B lease and the Yount B lease located in Oklahoma County, Okla., at upper tier ceiling prices.	DEE-1012 and DEE-1013	Do.
Do	Swanton Interstate Sunoco, Swanton, Vt. If granted: Swanton Interstate Sunoco would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-1015	Exception to the reporting requirements.
Apr. 12, 1978	Charter Oil Co., Jacksonville, Fla. If granted: DOE would review the entitlements exception relief granted to Charter Oil Co. during its 1977 fiscal year in order to determine whether the level of relief approved was appropriate.	DEX-0063	Supplemental order.
Do	Hodge's Texaco Service Center, Swansboro, N.C. If granted: Hodge's Texaco Service Center would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-1016	Exception to the reporting requirements.
Do	Indian Wells Oil Co., Kearney, Mo. If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products.	DXE-1018	Extension of the relief granted in *Indian Wells Oil Company*, case No. DXE-0070 (decided Feb. 13, 1978) (unreported decision).

APPENDIX.—*List of cases received by the Office of Hearings and Appeals*—Continued

[Week of Apr. 7 through Apr. 14, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Maingas Service, Waterville, Maine. If granted: Maingas Service would be permitted to increase its prices for propane above the maximum levels allowed under the mandatory petroleum price regulations.	DEE-1019	Price exception (sec. 212.93).
Do	Marvel Corp., Boston, Mass. If granted: Marvel Corp. would not be required to file form EIA-9 (No. 2 heating oil supply/price monitoring report).	DEE-1017	Exception to the reporting requirements.
Do	Mohawk Petroleum Corp., Los Angeles, Calif. If granted: DOE would review the entitlements exception relief granted to Mohawk Petroleum Corp., Inc., during its 1977 fiscal year in order to determine whether the level of relief approved was appropriate.	DEX-0064	Supplemental order.
Do	Northland Oil & Refining Co., Tulsa, Okla. If granted: Northland Oil & Refining Co. would receive a stay of its April entitlement purchase obligations pending a final determination on its application for exception.	DES-0054	Stay request.
Do	W. W. Lindsey and W. E. Elliott, Pikeville, Ky. If granted: W. W. Lindsey and W. E. Elliott would receive an evidentiary hearing with respect to its pending objection to the Mar. 6, 1978, proposed remedial order.	DEH-0014	Evidentiary hearing.
Do	Wesreco, Inc., Woods Crossing, Utah. If granted: Wesreco, Inc., would receive a stay of the requirements of the by/sell list as published in the FEDERAL REGISTER on Mar. 3, 1978, pending a final determination on its appeal.	DES-0166	Stay request.
Apr. 13, 1978	Butler, Binion, Rice, Cook & Knapp, Houston, Tex. If granted: The DOE's Mar. 14, 1978, information request denial would be rescinded and Butler, Binion, Rice, Cook & Knapp would receive access to additional DOE data regarding the definition of posted price contained in 10 CFR 212.31.	DFA-0171	Appeal of an information request denial.
Do	Chester F. Dolley, Los Angeles, Calif. If granted: Chester F. Dolley's O.K. & B, Nance, Porter, and Vineyard leases would be classified as stripper well properties on a retroactive basis.	DEE-1020	Price exception (sec. 212.73).
Do	O. B. Mobley, Jr., Shreveport, La. If granted: Mobley would be permitted to compute a unit base production control level for the Lewisville-Smackover lime unit using the provisions of 10 CFR 212.75.	DEE-1021	Price exception (sec. 212.75).
Do	O. B. Mobley, Jr., Shreveport, La. If granted: The DOE's Mar. 16, 1978, interpretation 1978-6 regarding certifying production under 10 CFR 212.75 would be rescinded.	DIA-0170 and DES-0170	Appeal of an interpretation stay request.

[FR Doc. 78-12456 Filed 5-5-78; 8:45 am]

[3128-01]

ISSUANCE OF PROPOSED DECISIONS AND ORDERS BY THE OFFICE OF HEARINGS AND APPEALS

April 10 through April 14, 1978

Notice is hereby given that during the period April 10 through April 14, 1978, the Proposed Decisions and Orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to Applications for Exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of a Proposed Decision and Order in final form may file a written Notice of Objection within 10 days of service. For purposes of the new procedures, the date of service of notice of issuance of a Proposed Decision and Order shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in

M Y 8 7 8 M

V 43/89

the Proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.s.t., except Federal holidays.

MAY 2, 1978.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

Paul S. Ache, Jr., Houston, Tex., DEE-0059, Crude Oil

Paul S. Ache, Jr., filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Ache to sell the crude oil which is produced from the Katie Brown lease for his benefit at upper-tier ceiling prices. On April 14, 1978, the DOE issued a proposed decision and order which determined that Ache should be permitted to sell 41.38 percent of the crude oil produced for his benefit at upper-tier ceiling prices.

Guam Oil & Refining Co., Inc., Dallas, Tex., FEE-4105, Crude Oil

The Guam Oil & Refining Co., Inc., filed an application for exception from the provisions of 10 CFR 211.67(a). The exception request, if granted, would permit Gorco to earn entitlements with respect to the unfinished oils component of its refinery feedstocks. Gorco requested that this exception relief be implemented on both a prospective and a retroactive basis. On April 14, 1978, the DOE issued a proposed decision and order in which it determined that the Gorco request for exception relief should be denied.

Meason Operating Co., Natchez, Miss., DXE-0946, Crude Oil

Meason Operating Co. (Meason) filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Meason to continue to sell quantities of crude oil produced from the Arnold Perry well located in Wilkinson County, Miss., at upper-tier ceiling prices. On April 14, 1978, the DOE issued a proposed decision and order which determined that the exception request should be granted.

S & W Engine Supply Co., Oklahoma City, Okla., FEE-4357, Crude Oil

S & W Engine Supply Co. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit S & W to continue to sell at upper-tier ceiling prices certain volumes of crude oil produced from the Baker Townsend lease which is located in Oklahoma County, Okla. On April 11, 1978, the Department of Energy issued a proposed decision and order which determined that S & W should be permitted to sell at upper-tier ceiling prices 57.67 percent of the crude oil produced from the Baker Townsend lease for the benefit of the working interest owners.

Tenneco Oil Co., Houston, Tex., DXE-0970, Crude Oil

Tenneco Oil Co. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the firm to continue selling a portion of the crude oil produced from the Veeder-Hunt lease located in St. Mary Parish, La., at upper-tier ceiling prices. On April 11, 1978, the DOE issued a proposed decision and order which determined that Tenneco should be permitted to sell at upper-tier ceiling prices 49.47 percent of the crude oil produced from the lease for the benefit of the working interest owner.

Texaco, Inc., New Orleans, La., DEE-0200, Crude Oil

Texaco, Inc., filed an application for exception from the provisions of 10 CFR 212.73. The exception request, if granted, would permit Texaco to sell at upper-tier prices all or a portion of the crude oil produced from the BF Reno RA Sand unit, located in the Bayou Fordoche Field, Pointe Coupee Parish, La. On April 14, 1978, the DOE issued a proposed decision and order which determined that the exception request be granted.

CASES FILED WITH THE OFFICE OF HEARINGS AND APPEALS

Week of April 14 Through April 21, 1978

Notice is hereby given that during the week of April 14 through April 21, 1978, the appeals and applications for exception or other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in this case may file with the DOE written comments on the application within 10 days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

MAY 2, 1978.

APPENDIX.—*List of cases received by the Office of Hearings and Appeals*

[Week of Apr. 14 through Apr. 21, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Apr. 17, 1978	Commonwealth Oil Refining Co., Inc., San Antonio, Tex. If granted: Commonwealth Oil Refining Co., Inc., would receive a stay of pt. 213 pending a final determination on its application for exception (DEE-0611).	DES-0055	Stay request.
Do	Commonwealth Oil Refining Co., Inc., San Antonio, Tex. If Granted: Commonwealth Oil Refining Co., Inc., would received an exception from 10 CFR 211.67 with respect to its entitlement purchase obligations.	DEE-1022	Exception to the entitlements program.
Apr. 18, 1978	Burdett Oxygen Co., Norristown, Pa. If granted: Burdett Oxygen Co. would be assigned a new, lower priced supplier of propane to replace its base period supplier, Ugite Gas, Inc.	DEE-1023	Exception to change suppliers.
Do	Charles F. Haas, Corpus Christi, Tex. If granted: Charles Haas would be permitted to sell the crude oil produced from the A. C. Koch lease located in Wharton County, Tex., at upper tier ceiling prices on a retroactive basis.	DEE-1026	Price exception (sec. 212.73).
Do	Charles F. Haas, Corpus Christi, Tex. If granted: Charles F. Haas would be permitted to classify the Allen-Hamons unit located in Jackson County, Tex., as a stripper well property on a retroactive basis.	DEE-1027	Do.

APPENDIX.—*List of cases received by the Office of Hearings and Appeals*—Continued

[Week of Apr. 14 through Apr. 21, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Apr. 18, 1978	Farmland Industries, Inc., Kansas City, Mo. If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Gillette, Lamont, Mertzon, and Quitman plants.	DXE-1039 through DXE-1042	Extension of the relief granted in *Farmland Industries, Inc.*, case Nos. DXE-0090 through DXE-0093 (decided Feb. 13, 1978) (unreported decision).
Do	Gary Operating Co., Englewood, Colo. If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Altonah and Bluebell plants.	DXE-1043 and DXE-1044	Extension of the relief granted in *Gary Operating Company*, case Nos. DXE-0063 and DXE-0064 (decided Feb. 2, 1978) (unreported decision).
Do	J & W Refining, Inc., Dallas, Tex. If granted: J & W Refining, Inc., would receive a stay of the provisions of 10 CFR 211.67 (entitlements program) pending a final determination on its application for exception.	DES-0056	Stay request.
Do	J & W Refining, Inc., Dallas, Tex. If granted: J & W Refining, Inc., would receive an exception from 10 CFR 211.67 with respect to its entitlement purchase obligations beginning with April 1978.	DEE-1029 and DES-1029	Exception from the entitlements program. Stay request.
Do	John Galt, Inc., Hyattsville, Md. If granted: John Galt, Inc., would not be required to file form EIA-9 (No. 2 Heating Oil Supply/Price Monitoring Report).	DEE-1035	Exception from the reporting requirements.
Do	Mohawk Petroleum Corp., Inc., Los Angeles, Calif. If granted: Mohawk Petroleum Corp., Inc., would receive an exception from the provisions of 10 CFR 211.67 with respect to its entitlement purchase obligation for the months of June through November 1978.	DXE-1030	Extension of the relief granted to *Mohawk Petroleum Corp.*, 1 DOE par. 81,059 (Jan. 20, 1978).
Do	Moran Pipe & Supply Co., Inc., Seminole, Okla. If granted: Moran Pipe & Supply Co., Inc., would be permitted to sell the crude oil produced from the Cozar lease located in Seminole County, Okla., at upper tier ceiling prices.	DXE-1028	Extension of the relief granted in *Moran Pipe & Supply Co., Inc.*, 1 DOE par. 81,047 (Jan. 6, 1978).
Do	Ridge General Store, Northwood, N.H. If granted: Ridge General Store would not be required to file form EIA-8 (Retail Motor Fuels Service Station Survey).	DEE-1036	Exception to the reporting requirements.
Do	Union Oil Co. of California, Los Angeles, Calif. If granted: Union Oil Co. of California would be permitted to sell the crude oil produced from the West Richfield Chapman zone unit located in Orange County, Calif. at upper tier ceiling prices.	DEE-1024	Price exception (sec. 212.73).
Do	Wilson-Owens Production Co., Longview, Tex. If granted: Wilson-Owens Production Co. would be permitted to sell the crude oil produced from the W.T. Blackwell lease located in Wood County, Tex., at upper tier ceiling prices.	DEE-1025	Do.
Do	Winsauer's Texaco, Mathis, Tex. If granted: Winsauer's Texaco would be permitted to increase its prices for motor gasoline above the maximum levels allowed under the mandatory petroleum price regulations.	DEE-1034	Price exception (sec. 212.93).
Apr. 19, 1978	Atlantic Oil Co., Los Angeles, Calif. If granted: Atlantic Oil Co.'s Douglas lease would be classified as a stripper well property on a retroactive basis.	DEE-1032	Price exception (sec. 212.73).
Do	Beacon Oil Co., Hanford, Calif. If granted: Beacon Oil Co. would receive an exception from the provisions of 10 CFR 211.67 with respect to its entitlement purchase obligations for the months of June through November 1978.	DEE-1031	Extension of the relief granted to *Beacon Oil Co.*, 1 DOE par. 81,055 (Jan. 20, 1978).
Do	Morton & Dolley, Los Angeles, Calif. If granted: Morton & Dolley would be permitted to sell the crude oil produced from the Hathaway-Bloemer lease at upper tier ceiling prices on a retroactive basis.	DEE-1033	Price exception (sec. 212.73).
Do	PPG Industries, Inc. and Puerto Rico Olefins Co., Washington, D.C. If granted: PPG Industries, Inc. and Puerto Rico Olefins Co., would receive a stay of the provisions of pt. 213 pending a final determination on their application for exception.	DES-0057	Stay request.
Do	Wyoming Refining Co., Denver, Colo. If granted: Wyoming Refining Co. would be granted a motion for discovery in relation to the statement of objections the firm filed pursuant to the Mar. 20, 1978, proposed decision and order issued to Little America Refining Co.	DED-0001	Motion for discovery.
Apr. 20, 1978	Arizona Fuels Corp., Salt Lake City, Utah. If granted: Arizona Fuels Corp. would received an exception from the provisions of 10 CFR 211.67 with respect to its entitlement purchase obligations for the months May through October 1978.	DXE-1046	Exception from the entitlements program.
Do	Edgington Oil Co., Inc., Long Beach, Calif. If granted: Edgington Oil Co., Inc., would receive an exception from the provisions of 10 CFR 211.67 with respect to its entitlement purchase obligations for the months of June through November 1978.	DXE-1047	Extension of the relief granted in *Edgington Oil Co.*, 1 DOE par. —— (Jan. 30, 1978).

MAY 8 1978

V 43/89

APPENDIX.—*List of cases received by the Office of Hearings and Appeals*—Continued

[Week of Apr. 14 through Apr. 21, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Apr. 20, 1978	Keith's Exxon, Perry, N.Y. If granted: Keith's Exxon would not be required to file form EIA-8 (Retail Motor Fuels Service Station Survey).	DEE-1037	Exception to the reporting requirements.
Do	Mullins & Prichard, New Orleans, La. If granted: Mullins & Prichard would receive a stay of the provisions of the Mar. 31, 1978, decision and order with respect to the May 9, 1977, remedial order pending judicial review.	DRS-0058	Stay request.
Do	Navajo Refining Co., Washington, D.C. If granted: Navajo Refining Co. would receive an exception from the provisions of 10 CFR 211.67 with respect to its entitlement purchase obligations for the months June through November 1978.	DXE-1048	Extension of the relief granted in *Navajo Refining Co.*, 1 DOE par. 81,061 (Jan. 19, 1978).

CASES FILED WITH THE OFFICE OF HEARINGS AND APPEALS

Week of April 21 Through April 28, 1978

Notice is hereby given that during the week of April 21 through April 28, 1978, the appeals and applications for exception or other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within 10 days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

MAY 2, 1978.

APPENDIX.—*List of cases received by the Office of Administrative Review*

[Week of Apr. 21 through Apr. 28, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Apr. 24, 1978	Courtney F. Foos Coal Co., Inc., Virginia Beach, Va. If granted: Courtney F. Foos Coal Co., Inc., would not be required to file form EIA-6.	DEE-1052	Exception from reporting requirements.
Do	Gulf Oil Corp., Houston, Tex. If granted: Gulf Oil Corp., on behalf of its subsidiary, Caribbean Gulf Refining Co. (CARECO), would receive an exemption from the provisions of 10 CFR 211.67(l)(4) with respect to its entitlement obligations.	DEE-1053	Exception from the entitlements program.
Do	J&W Refining, Inc., Dallas, Tex. If granted: J&W Refining, Inc., would be granted a conference with respect to the establishment of guidelines for consideration of its requests for exception relief from its obligations under the entitlements program.	DSG-0016	Request for special redress.
Do	Mobile Lux Station, Luxora, Ark. If granted: Mobile Lux Station would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-1054	Exception to the reporting requirements.
Do	Smith's Bottled Gas, Bruceton Mills, W. Va. If granted: Smith's Bottled Gas would be granted an evidentiary hearing with respect to its objection in case No. FEE-4846.	DEH-0004	Motion for evidentiary hearing.
Apr. 26, 1978	Kern County Refinery, Inc., Bakersfield, Calif. If granted: Kern County Refinery, Inc., would receive a stay of a portion of its entitlements obligations computed pursuant to 10 CFR 211.67 pending a final determination on its application for exception.	DEX-0066	Supplemental order.
Do	Lunday-Thagard Oil Co., South Gate, Calif. If granted: Lunday-Thagard Oil Co. would receive a stay of a portion of its entitlements obligation pending final determination on its application for exception.	DEX-0065	Do.
Do	Young Refining Corp., Douglasville, Ga. If granted: Young Refining Corp. would receive a stay of a portion of its entitlements obligation computed pursuant to 10 CFR 211.67 pending a final determination on its application for exception.	DEX-0067	Do.
Apr. 27, 1978	Getty Oil Co., New York, N.Y. If granted: The DOE order issued to Getty Oil Co. on allocation fractions for propane for the central and eastern regions would be rescinded.	DEA-0172	Appeal from DOE order issued on Feb. 24, 1978.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 908-A]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

MAY 5, 1978.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (See § 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. [See § 1.227(b)(3) and 21.30(b) of the Commission's Rules.]

FEDERAL COMMUNICATIONS COMMISSION
WILLIAM J. TRICARICO,
Secretary.

[Docket No. 21396, File No. TS 2-77, FCC 78-271]

OFFSHORE TELEPHONE CO.

Memorandum Opinion and Order[1]

Adopted: April 20, 1978.

Released: April 27, 1978.

In the matter of petition of Offshore Telephone Co. pursuant to section 201(a) of the Communications Act of 1934, as amended, for establishment of charges for through interstate communications service and division of such charges with South Central Bell Telephone Co. and American Telephone & Telephone Co.

1. We have before us for consideration an order of certification of the presiding Administrative Law Judge (Judge), FCC 77M-2016, released De-

[1]See 42 FR 49498.

V 4 3 / 8 9

cember 1, 1977, requesting clarification of our memorandum opinion and order (designation order) which initiated this proceeding, 66 FCC 2d 184 (1977).

BACKGROUND

2. This proceeding resulted from a formal complaint filed under section 208 of the act, 47 U.S.C. 208, by Offshore Telephone Co. (Offshore). Offshore is engaged in interstate communication, providing "message telephone service" on an end-on-end rate basis to subscribers on drilling rigs and platforms at various points in the Gulf of Mexico.[1] Offshore alleged violations of sections 201(a) and 202(a) of the act, 47 U.S.C. §§ 201(a) and 202(a), by South Central Bell Telephone Co. (SCB), seeking two specific remedies for the alleged violations. 66 FCC 2d at 184-85. First, it requested that we establish charges applicable to a through route, in lieu of the end-on-end method of establishing charges, and order SCB to negotiate a toll-sharing agreement with respect thereto. We have authority to do so pursuant to section 201(a), after there has been opportunity for hearing, upon a finding that such is necessary or desirable in the public interest. Second, Offshore sought damages resulting from SCB's refusal in the past to establish through rates and negotiate a toll-sharing agreement which, Offshore alleges, indicates that SCB has unjustly and unreasonably discriminated against it, vis-a-vis, landline telephone companies in violation of section 202(a) of the act.

3. The presiding Judge states that he seeks clarification because, due to the nature of the complaint and the issues set forth in the designation order, he was unable to determine whether the order designated the matter as a rulemaking proceeding or an adjudication, or both. Whether this is an adjudication or rulemaking will by necessity determine important procedural rules applicable to this proceeding, e.g., the burden of proof and the applicability of the discovery rules. In an attempt to avoid requesting clarification, the Presiding Judge states that he sought comments from the parties to the proceeding. The Chief, Hearing Division of the Common Carrier Bureau, contends that this proceeding is rulemaking, that the rules for discovery do not apply, and that Offshore bears the burden of proof. Offshore argues that this is a rulemaking proceeding and that the discovery rules do not apply, but contends that section 208 of the act places the burden of proof on the carrier, SCB, and the burden of investigation on the Common Carrier Bureau. While both Offshore and the Chief, Hearing Division, agree that the rules for discovery do not apply, both argue that the Presiding Judge may, in the exercise of his or her discretion, provide for informal discovery. Conversely, SCB contends that the proceeding is adjudicatory as a matter of law, and that the burden of proof is to be borne by Offshore and that the rules for discovery are applicable.

DISCUSSION

4. At the outset, we believe it is clear that this proceeding is one of rulemaking as defined in sections 551(4) and 551(5) of the Administrative Procedure Act, 5 U.S.C. 551(4) and 551(5). Section 551(4) provides, in pertinent part, that rulemaking is an "agency process for formulating, amending, or repealing a rule" and section 551(5) provides that a rule is "• • • any agency statement of • • • future effect • • • and includes the approval or prescription of future rates • • • or practice bearing on any of the foregoing." Our designation order expressly specified that the purpose of this proceeding is to determine whether through rates, and a division of revenues therefrom, should be prescribed. Moreover, the complaint, upon which this rulemaking is predicated, alleged that section 201(a) of the Communications Act was violated. By definition under our rules, any proceeding conducted pursuant to section 201(a) is a restricted rulemaking proceeding in the absence of our order to the contrary.[2] Snce we did not otherwise order, this is a restricted rulemaking proceeding.[3]

5. Further, as we noted above, Offshore seeks two kinds of relief, a section 201(a) toll-sharing agreement and damages. Ordinarily, two different types of proceedings would result from the relief sought by Offshore, the first being rulemaking and the second being an adjudication. Since we would be precluded under our ex parte rules from communicating off-the-record with our Common Carrier Bureau in any case of rulemaking which also has adjudicatory issues included, our general practice is to institute entirely separate and distinct docketed proceedings in such cases so that we may avail ourselves of the Bureau's expertise and assistance in deciding rulemaking issues, particularly those which could involve complex ratemaking considerations. That certainly is true of this proceeding, which in many respects appears to be a case of first impression and which may raise important policy considerations within our mandate under section 1 of the Communications Act, 47 U.S.C. § 151.

6. Moreover, it is true that we could have expressly stated in our disignation order, as we did in *Tri City Telephone Co.*, 20 FCC 2d 674 (1969), that part of the Offshore complaint was really a petition for the establishment of through rates and the division of revenues therefrom. We did not do so because of our belief that such statement was unnecessary, since we styled the caption of docket 21396 as a rulemaking proceeding and established the proceeding pursuant to sections 201(a) and 403 of the act. Further, the issues specified in the ordering clause of paragraph 8 of our designation order are clearly rulemaking issues. 66 FCC 2d at 186. While we did fail to specifically order the deferral of the matters relating to the alleged section 202(a) violations, our intent was to take up the rulemaking issues first and defer questions of possible past violations of section 202(a) and damages to a subsequent, separate proceeding.[4]

7. Since we have established that this is to be a rulemaking proceeding looking to whether SCB should grant affirmative relief to Offshore beyond that available in SCB's tariffs, Offshore bears the burden of proof in this proceeding. It is Offshore which seeks the establishment of through rates and a division of revenues. In this regard, section 556(d) of the Administrative Procedure Act, 5 U.S.C. § 556(d), states "except as otherwise provided by statute, the proponent of a rule or order has the burden of proof."

8. We now come to the question of whether our discovery rules are applicable. Section 1.311(a) of our rules, 47 CFR § 1.311(a), provides that discovery is applicable in any case of adjudication as defined by the Administrative Procedure Act. Since this is not an adjudication, our formal discovery procedures are not applicable as a matter of right. See *Discovery Procedures*, 11 FCC 2d 185 187 (1968). However, the presiding Judge may, in the exercise of his discretion, provide for informal discovery. See § 1.243 (e), (f), (i), and (j) of our rules, 47 CFR 1.243 (e), (f), (i), and (j). We have ruled in the past that the presiding judge has authority to regulate and order discovery to ensure that the record contains information essential to a rulemaking decision.[5]

9. Accordingly, *It is ordered*, That our designation order is clarified to the extent indicated herein and particularly to make clear that this proceeding is in the nature of a restricted rulemaking.

FEDERAL COMMUNICATIONS COMMISSION
WILLIAN J. TRICARICO,
Secretary.

[FR Doc. 78-12383 Filed 5-5-78; 8:45 am]

[1] The rate charged Offshore's customers is comprised of the rate of Offshore to the point of connection and the rate of South Central Bell Telephone Co. (SCB) from that point to the terminal point.

[2] Section 1.1207(a) of our rules provides that "any proceedings conducted pursuant to the provisions of sections 201(a), 204, 205, 213(a), 214(d), 221(c), or 222 of the Communications Act" are rulemaking proceedings. 47 CFR 1.1207(a).

[3] Since this is a restricted rulemaking proceeding, we intended, by citing section 1.1209(d) of our rules in the ordering clause of paragraph 10 of the designation order, that the Chief, Hearing Division, as well as the trial staff, were to be separated. 47 CFR 1.1209(d).

[4] We stated in our designation order that Offshore's claim of discrimination and request for damages was preserved and in no way prejudiced by deferral and we requested that Offshore notify us, at the termination of this proceeding, of its intent to prosecute the same.

[FCC 78-289; RM-2952]

MOTION PICTURE ASSOCIATION OF AMERICA, INC.

Memorandum Opinion and Order Denying Petition for Rulemaking

Adopted: April 25, 1978.

Released: May 2, 1978.

In the matter of Motion Picture Association of America, Inc., petition for rulemaking to take measures limiting the distribution of television broadcast signals to cable television systems via satellite, RM-2952.

1. The Motion Picture Association of America, Inc. (MPAA), has filed a petition for rulemaking urging the Commission to institute a proceeding "to determine whether restrictions should be placed upon the dissemination of broadcast signals to cable systems via satellites." About 20 comments were filed supporting or opposing the petition. Those supporting the petition were primarily broadcast and program supply interests. Opposition came from cable interests as well as the parties now making use of satellite distribution. MPAA believes that satellite distribution of television signals to cable systems is creating "super stations" and that their existence is contrary to the public interest.

2. MPAA points out that WTCG, Atlanta, Ga., is now widely distributed via satellite. It says that by June 1977 requests to carry WTCG from 672 cable systems serving 1.2 million subscribers had either been granted or were pending. MPAA asserts that these statistics show WTCG is becoming a national "super station." Commenting parties opposing the petition argue that WTCG audience does not approach that of the largest independent stations.[1] Three New York City independents, WOR-TV, WPIX, and WNEW-TV have net weekly circulations of more than double the audience WTCG can now reach both off-the-air and via cable. MPAA apparently defines a super station as one whose audience and/or programming stands so far above conventional stations as to preclude real competition. The additional audience resulting from satellite transmission has not put WTCG in that category and there is no evidence that its programming is in a class by itself. MPAA also refers to station WYAH-TV, Portsmouth, Va., as being carried via satellite. However, thus far that station's signal is not available at all in that manner. Instead a package of programming for local cable origination is being supplied via satellite by the Christian Broadcasting Network, licensee of WYAH-TV.

3. Assuming that such super stations are emerging, MPAA argues that their existence would be contrary to the public interest. The thrust of its concern appears to be "localism." First, MPAA asserts that if a television station has a large national audience it will abandon or neglect its local service obligations. However, MPAA offers no evidence that this is happening or will happen. In any event, a station being distributed via satellite is still required to ascertain the needs and interests of its local community and to program to meet those needs.[2] Should WTCG or any other station fail to meet its obligations in this area, the deficiency can be addressed in the license renewal process.

4. Second, MPAA posits that importation of stations by cable systems via satellite will fractionalize the audience of local stations causing them to lose revenue. This loss could cause the local stations to cut back on local programming, or possibly even go off the air. MPAA bases this on the belief that a super station would provide such high quality programming that most local stations could not compete. Opposing comments point out that use of satellites for distribution has not affected the Commission's cable signal carriage rules. Those rules continue to limit the number of imported signals. As for the high quality program argument, these parties state first that MPAA is proceeding on pure speculation with no substantiating facts. Secondly, they wonder why increased competition would not improve the programming on television as a whole rather than have only negative consequences.

5. We are not persuaded that satellite use endangers local stations. As for the high quality programming which MPAA postulates, it hardly appears to be something the FCC should stifle. We find it hard to accept the argument that a development should be stopped because it might provide too good a service. Furthermore, while competition inherently poses a threat to those competing, we have faith that it would improve programming on the whole and not threaten diminution of service to the public.

6. Petitioner and its commenting supporters place great emphasis on the following language in our decision to delete the cable "leap-frog" rules:

> We will, therefore, continue to monitor the effect of the abolition of the leapfrogging rule with an eye to the effect the use of satellites may have. *If we find that "super-stations" are, in fact, being created, and that their creation is working to the detriment of the public, appropriate corrective measures will be taken.* [Emphasis added.][3]

These parties apparently read the above language to say that if significant satellite use occurs, the Commission will step in. However, it plainly does not say that. Instead the burden of proof lies on those who would restrict service to the public. If it can be shown: (1) That super stations are being created, and (2) that their creation is harmful to the public, then we will step in. But mere allegation without any factual support does not approach the showing necessary. There must be some evidence that the public is being harmed or is likely to be harmed before we can introduce a remedy.

7. One point ignored in MPAA's petition is that the Commission first approved the use of satellite transmission for distributing television signals to cable systems less than 18 months ago. In that case, *Southern Satellite Systems, Inc.*, FCC 76-1149, 62 FCC 2d 153 (1976), we had to make a determination whether this use was in the public interest. In that proceeding we concluded:

> SSS's proposal will permit a more efficient utilization of high capacity domestic satellite facilities • • •. SSS's proposal would also make available a service that cannot be efficiently or economically provided by terrestrial means and would result in an increase in the diversity of cable television programming available to the public [at para. 14].

Nothing unforeseen has happened since that decision and no new facts have been presented. It appears that Southern Satellite is successfully doing what it proposed and what we determined was a good thing. MPAA is

[1] *American Telephone & Telegraph (MPL)*, Docket 20814, 62 FCC 2d 35, 37 (1976); see also *Mebane Home Telephone*, Docket 20476, FCC 75M-1675, released October 1, 1975.

[1] And, of course, many stations with network affiliations have much larger potential audience than WTCG.

[2] For further information on those obligations, see *Primer on Ascertainment of Community Problems by Broadcast Applicants*, 27 FCC 2d 650, 36 FR 4092 (1971) and *First Report and Order in Docket 19716*, 57 FCC 2d 418, 41 FR 1372 (1976).

[3] *Report and Order in Docket 20487*, FCC 75-1409, 57 FCC 2d 625, 645 (1975), recons. denied, FCC 76-521, 59 FCC 2d 934 (1976).

V 4 3 / 8 9

urging that this success is reason to revoke or alter our authorization. Finally, it is significant that the Certificate granted to Southern Satellite was limited to 5 years for the express purpose of reevaluating this form of service in light of our experience at that time. We feel MPAA's request for evaluation now is premature.

Accordingly, *It is ordered*, That the petition for rulemaking (RM-2952) is denied.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

USED 23-CHANNEL CB RADIOS

Order Denying Petition To Extend or Waive Marketing Cut-Off Date

AGENCY: Federal Communications Commission.

ACTION: Denies petition to extend or waive marketing cut-off date.

SUMMARY: Order denies petitions to extend or waive January 1, 1978, marketing cut-off date for used 23-channel CB radios.

EFFECTIVE DATE: Nonapplicable.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Herman Garlan, Office of Chief Engineer, FCC, Washington, D.C. 20554, 202-632-7095.

Adopted: April 20, 1978.

Released: May 3, 1978.

By the Commission: Commissioner White dissenting and issuing a statement.

Order. In the matter of petitions to extend the January 1, 1978, marketing cut-off date for used 23-channel CB radios.

1. The Commission has before it two petitions to waive §§ 15.59(g) and 95.641(c)(6) of our rules which specify tht marketing of 23-channel CB radios[1] shall be terminated not later than January 1, 1978. The petitions request waiver for used 23-channel CB radios. See appendix.

2. One petition was filed on January 30, 1978, by Davidson Supply Co. and was put on public notice January 31, 1978 (FCC No. 96402). The second petition was filed on February 3, 1978, by the Colorado Pawnbrokers Association and was put on public notice on February 14, 1978 (FCC No. 96960). In response to these public notices a comment was received on February 21, 1978, from Pathcom, Inc., supporting the waiver requested in the petitions. A letter was also received on February 7 1978, from Capitol Loans which asks for special permission to dispose of the CB radios that Capitol has on hand which Capitol is holding as pledges on loans.[2]

3. The Commission established the new technical standards for CB radios and also established cut-off dates for the manufacture and marketing of 23-channel CB radios in several actions in 1976.[3][4] The Commission has also on three separate occasions[5][6][7] considered the question of waiver of the January 1, 1978, marketing cut-off date. With the exception of hand held CB radios[8] which presented exceptional circumstances, the Commission has denied all requests for waiver and has consistently maintained that marketing of 23-channel CB radios must be terminated not later than January 1, 1978. Our most recent denial (Order of November 9, 1978) was affirmed on review by the court.[8]

The Davidson Petition

4. Davidson explains that it sells CB radios at wholesale and at retail and that in 1977 it had sold 17,129 40-channel units and 89,933 23-channel units (Davidson exhibit A). In connection with its established policy of guaranteeing customer satisfaction, Davidson states that it accepts return of defective equipment and either refunds the customer's money or exchanges the returned merchandise for new equipment from stock. In the case of dealers, Davidson accepts return of defective merchandise and issues a credit for such equipment. Davidson then ships such returned equipment to the manufacturer for repair. Upon repair the equipment is returned to Davidson and is sold as used equipment. In a set of exhibits attached to its petition Davidson shows that during 1977, 490 40-channel units and 1,741 23-channel units were returned to the manufacturer for repair, and that as of December 31, 1977, 140 40-channel and 309 23-channel units had not yet been returned to Davidson. To allow it to continue its practice of exchanging and repairing defective 23-channel CB radios, Davidson requests the Commission either to waive the January 1, 1978, marketing cut-off date or to construe the term "marketing" not to apply to such used equipment.

The Colorado Pawnbrokers Petition

5. The Colorado Pawnbrokers Association represents 39 licensed pawnbrokers in the State of Colorado which constitutes 80 percent of the pawnbrokers in that State. Under Colorado law, the petitioner explains, no pawnbroker shall sell any pledge in his possession until 6 months after maturity of the loan or until the pledgor has been given 10 days notice by mail of the time within which the pledge shall be redeemed. The petition explains that data collected from the Association members shows that they hold 749 23-channel CB radios under pledge which are not yet available to be sold. They also hold 376 23-channel CB units that have become available for sale since January 1, 1978.

6. The petition explains further that experience indicates that about 80 percent of the pawned CB radios would ordinarily be redeemed by their owners. However, it appears that public notice of the FCC ruling[9] is causing a substantial reduction in the number of redemptions. Estimating that $20 was advanced on each CB radio that was pawned, petitioner states that the units now or soon to be available for sale represent an out of pocket loss of $22,500.

7. Petitioner explains that the advance of money by a pawnbroker is not a typical loan. Such a loan has no maturity date and continues indefinitely as long as interest is paid and the pledge is not redeemed. The pawnbroker has no control over the maturity of the loan and is powerless to require new security. If the borrower chooses not to repay his loan and abandons the pledged property, the borrower has no further obligation to the pawnbroker and the pawnbroker has no further recourse against the borrower. The pawnbroker's only way to recover the money he loaned is to sell the unredeemed pledge.

8. Referring to the Commission's order of November 9, 1977,[10] petitioner alleges that the reference to "adequate notice" in paragraph 9 of that order cannot appropriately be applied to pawnbrokers, since they do not fit the description of parties "involved in CB marketing" and that granting the requested waiver would not constitute unwarranted favoritism on behalf of pawnbrokers in view of the unique characteristics of the pawnbroking business and the legal restrictions under which pawnbrokers operate.

The Pathcom Filing

9. Pathcom urges the Commission to grant the waiver requested by Davidson and extend this waiver to all the retailers who follow the business practice described by Davidson in its petition. Pathcom points out that in many States, a retailer is required to refund the cost of inoperable equipment and in almost all States a consumer seeking redress from small claims court action effectively force the retailer to refund money.

10. Pathcom recognizes that the intent of the "new type of regulation"[11] was to stop the continued proliferation of interference causing devices. It argues, however, that a used CB radio is already on the air and as such its repair does not constitute a new potential source for interference. Finally, Pathcom argues, that denial of the instant petitions will work an additional hardship particularly on the smaller retailers who, having suffered by not being able to sell after January 1, 1978,[12] the new 23-channel CB radios they had in stock, will be compelled to take further losses if they are not permitted to sell as used equipment the repaired 23-channel CB radios that had been taken back from their customers under warranty.

Commission Decision

11. Let us turn first to Davidson. The business practice of taking back inoperable equipment, returning such equipment to the manufacturer for repair and subsequently selling this equipment as "used equipment" is precisely the business practice described by Montgomery Ward in its petition that was considered and denied in the Commission's order of August 24, 1977.[13]

12. Davidson is silent on the interference potential of the used 23-channel CB radios it is seeking to sell after January 1, 1978. However, Pathcom in supporting Davidson, argues that the used equipment is already on the air and therefore does not constitute a new potential source of interference. The Commission cannot agree with Pathcom. A transaction in which Davidson (or for that matter any other retailer) takes back a defective piece of equipment, has it repaired and returns the repaired equipment to the purchaser, is not a sale that is covered by our marketing cut-off regulation. Similarly, the exchange of a working unit for a defective unit would not be considered marketing. This interpretation is set out in paragraph 10 of our public notice of January 30, 1978: "Marketing of 23-channel CB radios" (FCC No. 96235).[14]

13. However, where the dealer takes back a defective 23-channel unit, has it repaired and then seeks to sell it as used equipment to a new purchaser, such a transaction is considered marketing and is prohibited after January 1, 1978. This last transaction does constitute a new potential source of interference, Pathcom's assertion to the contrary, and allowing the sale of such a piece of used equipment would fly in the face of the Commission's decision to remove interference capable equipment from the market place at the earliest possible time.

14. The Colorado Pawnbrokers argue that they are caught in a bind between the Commission's regulation that prohibits the sale of an abandoned pledge (a 23-channel CB radio) to redeem the loan that had been made thereon and the Colorado State law that prohibited the timely sale of such pledge. Moreover, they argue that the pawnbrokers did not receive adequate notice. The pawnbrokers argue that they do not fit the description of parties "involved in CB marketing" and cannot be expected to be knowledgeable of trade publications in which the ban against marketing of pre-September 10, 1976 was discussed.

15. The Commission is sympathetic to the pawnbroker's dilemma but cannot accept the argument that it is due to lack of notice concerning the marketing cut-off date. Our Orders of August 1976[15] which established this cut-off date were properly publicized in the FEDERAL REGISTER in accordance with established Federal rulemaking procedures[16] and parties affected are charged with notice.[17] Moreover, as we pointed out in paragraph 9 of our Order of November 9, 1977,[18] these rules were widely publicized not only in trade publications but also in publications of general circulations.

16. While it may be technically correct that pawnbrokers are not "involved in CB marketing" as alleged, it would appear that a pawnbroker must have a good knowledge of the market value of a CB radio (or of any other item that he accepts as security for a loan) if he is to succeed in his business. It can be expected therefore that a pawnbroker would take whatever measures are available under the law to protect his loan. In this connection we note that the 1973 Colorado Revised Statutes 12-56-112 set out a procedure for the pawnbroker to terminate a loan.

17. The Colorado Pawnbrokers' and Davidson's arguments for relief appeared to be largely based on financial hardship and economic loss. We have not been persuaded by similar arguments in our consideration of earlier requests for waiver or extension of the marketing cut-off date.[19] Nor are we persuaded in this instance. In setting the marketing cut-off date at January

---

[1] As used herein, the term 23-channel CB radio refers to a CB radio (transceiver) that does not meet the new technical specifications that were adopted by the Commission on July 27, 1976, and went into effect on Sept. 10, 1976. All CB radios manufactured to meet these new standards have a 40-channel capability.

[2] A petition from the Heilig-Meyers Co. and a comment from the Texas Pawnbrokers Association were received too late to permit detailed treatment in this order. Heilig-Meyers, a merchandiser in several States on the East Coast seeks the same relief sought by Davidson. The Texas Pawnbrokers filing and supplement is essentially a petition asking for the same relief sought by the Colorado Pawnbrokers Association.

[3] Revised technical standards for CB transmitters and the transmitter part of a CB radio (transceiver) were adopted in docket 20120, 2d report and order adopted July 27, 1976; released July 29, 1976 (41 FR 32678; 60 FCC 2d 762) and memorandum opinion and order adopted Oct. 18, 1978, released Oct. 28, 1976 (41 FR 47445; 62 FCC 2d 646). These revised technical standards went into effect on Sept. 10, 1976.

[4] Technical standards were imposed on CB receivers and the receiver part of a CB radio (transceiver) in docket 20746, 1st report and order adopted July 27, 1976, released Aug. 4, 1976 (41 FR 32590; 60 FCC 2d 687) and memorandum opinion and order adopted Oct. 18, 1976, released Oct. 28, 1976 (41 FR 47442; 62 FCC 2d 623). These new receiver standards went into effect on Sept. 10, 1976.

[5] "In the matter of manufacture and sale of 23-channel class D citizens band equipment that was type accepted prior to Sept. 10, 1976." Order adopted Aug. 1, 1977, denies request to establish a cut-off for importation and reaffirms the Jan. 1, 1978, marketing cut-off date. FCC 77-562. Simultaneously, the Commission on Aug. 1, 1977, issued a public notice (FCC 77-563) cautioning and reminding manufacturers and importers that manufacture of 23-channel CB radios must be terminated not later than Aug. 1, 1977, and marketing not later than Jan. 1, 1978.

[6] "In the matter of petitions to extend the sales cut-off date for certain CB radios." Order adopted Aug. 24, 1977, extended the sales cut-off date to hand held CB radios (as defined in par. 12 of the order) and denied an extension of sales cut-off for all other (23-channel) CB radios, FCC 77-586; 66 FCC 2d 139.

[7] "In the matter of petitions to extend the Jan. 1, 1978, sales cut-off date for 23-channel CB radios and CB receiver/converters." Order adopted Nov. 9, 1977, denied the petitions, FCC 77-768; 66 FCC 2d.

[8] *Arthur Fulmer, Inc.*, v. *FCC*, D.C. Cir. No. 77-2064.

[9] The petition does not indicate which FCC ruling is referred to. It may be assumed that the term FCC ruling encompasses the several FCC orders that established the new technical specifications and the manufacturing and marketing cut-off dates for 23-channel CB radios, and the orders that denied waiver or extension of the marketing cut-off date.

[10] See footnote 7 above.

[11] Presumably the Commission's new technical standards for CB radios and the manufacturing and marketing cut-off dates for 23-channel CB radios.

[12] See footnote 7 above.

[13] See footnote 6 above.

[14] Item 10 of this public notice states:

If a customer purchases a 23-channel radio before Jan. 1, 1978, and the radio is defective, can the dealer exchange the radio or repair it?

Both of these actions would be allowable. Repairs to the radios are not prohibited. In the case of an exchange program to supply the customer with a working radio in place of a defective unit, this would not be considered marketing by the Commission as the customer would still be in possession of the same type of unit that was originally purchased before the cut-off date. However, the dealer would not be permitted to sell the unit he took in exchange.

[15] See footnotes 3 and 4 above.

[16] 5 U.S.C. 552 (D) and (E).

[17] 44 U.S.C. 1507.

[18] See footnote 7 above.

[19] See footnotes 5, 6 and 7 above.

MAY 8 1978

V 4 3 / 8 9

1, 1978 we recognized that some hardship and financial loss would occur. We must reiterate that:

The dates chosen [August 1, 1977 for termination of manufacture and January 1, 1978 for termination of sales] represented however what was and is believed to be a reasonable compromise between the alternatives of providing the lowest level of interference potential on the one hand and a *total loss or waste of untold dollars of inventory of components, parts and finished sets on the other.* (italic supplied.)[20]

18. The need to reduce the potential interference to television, the land mobile service, and others is overriding. Neither of the petitioners had challenged this need. The loss asserted to be sustained by petitioners is no greater and in many cases less than that claimed by earlier petitioners who were denied. The Commission must insist therefore that the January 1, 1978 marketing cut-off date for 23-channel CB radios must stand.

19. In view of the above the petitions by Davidson, Heilig-Meyers and the Colorado Pawnbrokers are denied.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

APPENDIX

PETITION FOR WAIVER

Davidson Supply Co., petition filed January 30, 1978, by attorney Kenneth R. Keller of Tuggle, Duggins, Meschan, Thornton & Elrod, P.A., 228 West Market Street, Greensboro, N.C. 27402.

Colorado Pawnbrokers Association, petition filed February 3, 1978, by attorney Wilton W. Cogswell III. Mining Exchange Building, Colorado Springs, Colo. 80903.

Heilig-Meyers Co., petition filed March 24, 1978, by attorney Larry M. Goodall of McGuire, Woods & Battle, Ross Building, Richmond, Va. 23219

Texas Pawnbrokers Association, comment filed February 24, 1978, with supplement on April 7, 1978, by attorney Stephen A. Goldberg of Hogan & Hartson, 815 Connecticut Avenue NW., Washington, D.C. 20006. (These filings are labeled comment and supplement to comments, but for all practical purposes, these filings constitute a petition to exempt CB radios held by members of the Texas Pawnbrokers Association from the January 1, 1978, marketing cut-off date.)

COMMENTS

Pathcom, Inc., 24049 South Frampton Avenue, Harbor City, Calif. 90710; letter dated February 14, 1978.

Capitol Loans, 774 Poplar Avenue, Memphis, Tenn. 38105; letter dated February 4, 1978 (although not strictly a comment in this proceeding, this letter essentially asks for the same relief requested by the Colorado Pawnbrokers Association).

[20]FCC Order of Aug. 1, 1978 at Paragraph 5. See footnote 5 above.

DISSENTING STATEMENT OF COMMISSIONER MARGITA E. WHITE

IN RE ORDER DENYING EXTENSION OF MARKETING CUT-OFF DATE FOR USED CB RADIOS

I dissent to the majority's decision to deny an extension of the marketing cut-off date for used 23-channel CB radios for the same reasons that I stated in my dissent to the original order denying an extension of the marketing cut-off date for new CB equipment. See my dissenting statement *In the Matter of Petitions To Extend the January 1, 1978, Sales Cut-Off Date for 23-Channel CB Radios and CB Receiver/Converters*, FCC 77-768 (released November 30, 1977).

FEDERAL RESERVE SYSTEM

GERING NATIONAL CO.

Formation of Bank Holding Company

Gering National Co., Gering, Nebr., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding by acquiring 80 percent or more of the voting shares of Gering National Bank & Trust Co., Gering, Nebr. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Gering National Co., Gering, Nebr., has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Pioneer Saving Co., Gering, Nebr. Notice of the application was published on April 6, 1978, in the Gering Courier, a newspaper circulated in Gering, Nebr.

Applicant states that the proposed subsidiary would engage in the activities of operating an industrial loan and investment company pursuant to the laws of the State of Nebraska, including the issuance of paid-up certificates of indebtedness, installment certificates of indebtedness and making single payment demand loans, consumer loans, commercial loans and first and second mortgages on real estate; and acting as insurance agent for the sale of single and joint decreasing term credit life insurance and credit accident and health insurance and level term credit life insurance on single payment demand notes. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than June 1, 1978.

Board of Governors of the Federal Reserve System, May 2, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01]

NEW HAMPTON BANCSHARES, INC.

Formation of Bank Holding Company

New Hampton Bancshares, Inc., New Hampton, Mo., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842 (a)(1)) to become a bank holding company by acquiring 87.2 percent of the voting shares (including directors' qualifying shares) of First State Bank of New Hampton, New Hampton, Mo. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than May 31, 1978.

Board of Governors of the Federal Reserve System, May 1, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

FOREIGN-TRADE ZONES BOARD

[Docket No. 4-78]

FOREIGN-TRADE ZONE—ORLANDO, FLA.

Application and Public Hearing

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the Greater Orlando Aviation Authority (Aviation Authority), a public agency of the City of Orlando, requesting a grant of authority for the establishment of a general-purpose foreign-trade zone in the City of Orlando, within the Orlando Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 1, 1978. The applicant is authorized to make this proposal under Chapter 75-464, Laws of Florida, Acts of 1975.

The proposal calls for the establishment of a 201-acre general-purpose foreign-trade zone at the Orlando International Airport, about 8 miles south of downtown Orlando. Owned by the City of Orlando, the proposed zone area has been assigned to the Aviation Authority for development. At the outset of zone operations, the Aviation Authority plans to use an existing warehouse (Building 437), located at Florida Road and 9th Street. Other parcels within the 201-acre site will be activated as the need arises. The airport site is also served by highway and rail.

The application contains economic data and information concerning the need for zone services in the Orlando area. Several firms have indicated their intention to use the zone for storage, testing, repackaging, exhibition, and distribution activities. Among the initial zone users are firms involved in a variety of products, including sporting goods, electronic equipment, agricultural equipment, scientific instruments, graphic supplies, and automotive and aircraft parts.

In accordance with the Board's regulations, an Examiners Committee has been appointed to investigate the application and report thereon to the Board. The Committee consists of: Hugh J. Dolan (Chairman), Office of the Secretary, U.S. Department of Commerce, 14th and E Streets NW., Washington, D.C. 20230; James R. Cahill, Director, Inspection and Control Division, U.S. Customs Service, Region IV, 7370 Northwest 36th Street, Miami, Fla. 33166; and Col. Donald A. Wisdom, District Engineer, U.S. Army Engineer District, Jacksonville, P.O. Box 4970, Jacksonville, Fla. 32201.

In connection with its investigation of the proposal, the Examiners Committee will hold a public hearing on June 7, 1978, beginning at 9 a.m., in the City Council Chambers, 2nd Floor, City Hall, 400 S. Orange Avenue, Orlando, Fla. The purpose of the hearing is to help inform interested persons about the proposal, to provide an opportunity for their expression of views, and to obtain information useful to the examiners.

Interested persons or their representatives are invited to present their views at the hearing. Such person should, by May 31, notify the Board's Executive Secretary, in writing at the address below, of their desire to be heard. In lieu of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the Examiners Committee, care of the Executive Secretary, at any time from the date of this notice through July 7, 1978. The submission of evidence is not desired during the posthearing period unless it is clearly shown that the matter is new and material and that there are good reasons why it could not be presented at the hearing. A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Port Director, U.S. Customs Service, 9955 Benford Road, Orlando, Fla. 32309.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 6886-B, 14th and E Streets NW., Washington, D.C. 20230.

Dated: May 3, 1978.

JOHN J. DA PONTE, JR.,
Executive Secretary.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA-6987-A, AA-6987-B and AA-6987-D]

ALASKA

Alaska Native Claims Selection

On January 27, 1974, Yak-Tat Kwaan Inc., for the Native village of Yakutat, filed selection application AA-6987-A; on December 12, 1974, filed selection application AA-6987-B; and on December 16, 1974, filed selection application AA-6987-D under the provisions of section 16(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 706; 43 U.S.C. 1601, 1615 (Supp. V, 1975)), for the surface estate of lands located in the Tongass National Forest in the Yakutat area.

As to the lands described below, the applications, as amended, are properly filed and meet the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with Federal laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to section 16(b), aggregating approximately 20,003 acres is considered proper for acquisition by Yak-Tat Kwaan Inc. and is hereby approved for conveyance pursuant to section 14(b) of the Alaska Native Claims Settlement Act:

U.S. Survey 3589, Alaska, Lots 1, 2, 3, 4, 5, 5-A, 8, 9 and 10, situated on the southerly shore of Monti Bay, approximately ½ mile southwest of Yakutat.

U.S. Survey 3590, Alaska, Lots D, J, K, L, L-1 and N, situated on the southerly shore of Monti Bay, approximately ½ mile south of Yakutat.

Containing 9.46 acres.

COPPER RIVER MERIDIAN, ALASKA (SURVEYED)

T. 27 S., R. 33 E.,
- Sec. 1, Lots 1 to 20, inclusive, W½SW¼, all;
- Sec. 2, Lots 1 to 4, inclusive, SE¼SE¼, all;
- Sec. 10, Lots 1, 2 and 3, SE¼SE¼, all;
- Sec. 11, Lots 1 to 8, inclusive, NE¼NE¼, SW¼, SW¼SE¼, all;

Sec. 18, NE¼, SW¼, N½SE¼.

Containing approximately 592 acres.

Aggregating approximately 1,918 acres.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. As to the lands in T. 27 S., R. 34 E., Copper River Meridian, the highway easement deed, AA-12407, dated February 16, 1967, issued by the Bureau of Public Roads, U.S. Department of Commerce with the concurrence of the U.S. Forest Service for a right-of-way for a Federal Aid Highway. Act of August 27, 1958, as amended, 23 U.S.C. 317;

2. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accuring unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(f) (Supp. V, 1975)); and

3. Pursuant to section 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 708; 43 U.S.C. 1601, 1616(b) (Supp. V, 1975)), the following public easements, referenced by easement identification number (EIN) on the easement maps in case file AA-6987-EE, are reserved to the United States and subject to further regulation thereby:

a. (EIN 1 C5, D1, D9) A continuous linear easement twenty-five (25) feet in width upland of and parallel to the mean high tide line in order to provide access to and along the marine coastline and use of such shore for purposes such as beaching of watercraft or aircraft, travel along the shore, recreation, and other similar uses. Deviations from the waterline are permitted when specific conditions so require, e.g., impassable topography or waterfront obstruction. This easement is subject to the right of the owner of the servient estate to build upon such easement a facility for public or private purposes, such right to be exercised reasonably and without undue or unnecessary interference with or obstruction of the easement. When access along the marine coastline easement is to be obstructed, the owner of the servient estate will be obligated to convey to the United States an acceptable alternate access route, at no cost to the United States, prior to the creation of such obstruction.

b. (EIN 3 C1, C3, D1, D3, G) An easement sixty (60) feet in width for an existing road from Yakutat to the west boundary of section 27, T. 27 S., R. 33 E., Copper River Meridian. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

c. (EIN 26 C) The right of the United States to enter upon the lands hereinabove granted for cadastral, geodetic, or other survey purposes is reserved together with the right to do all things necessary in connection therewith.

d. (EIN 27 C) Easements for the transportation of energy, fuel, and natural resources which are the property of the United States or which are intended for delivery to the United States or which are produced by the United States. These easements also include the right to build any related facilities necessary for the exercise of the right to transport energy, fuel, and natural resources, including those related facilities necessary during periods of planning, locating, constructing, operating, maintaining, or terminating transportation systems. The specific location of these easements shall be determined only after consultation with the owner of the servient estate. Whenever the use of such easements will require removal or relocation of any structure owned or authorized by the owner of the servient estate, such use shall not be initiated without the consent of the owner of such improvement; provided, however, that the United States may exercise the right of eminent domain if such consent is not given. Only those portions of these easements that are actually in use or that are expressly authorized on March 3, 1996, shall continue to be in force.

These reservations have not been conformed to the Departmental easement policy announced March 3, 1978. Conformance is contingent upon resolution of the litigation *Calista, et al.* v. *Andrus* and implementation of the Secretary's new easement policy.

The grant of lands shall be subject to:

1. Issuance of a patent confirming the boundary description of the lands hereinabove granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands;

2. Valid existing rights therin, if any, including but not limited to those created by any lease (including a lease issued under section 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g) (1970))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee or grantee to the complete enjoyment of all rights, previleges and benefits thereby granted to him;

3. The following third-party interests, if valid, created and identified by the U.S. Forest Service as provided by section 14(g) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(g) (Supp, V, 1975)):

a. Cemetery, City of Yakutat, special use permit of June 30, 1934 in section 23, T. 27 S., R. 33 E.

b. Sanitary Landfill, City of Yakutat, special use permit of May 20, 1977 in section 29, T. 27 S., R. 34 E.

4. Requirements of section 22(k) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 715; 43 U.S.C. 1601, 1621(k) (Supp, V, 1975)), that, as to the portion of the above-described lands located within the boundaries of a national forest (a) until December 18, 1976, the sale of any timber from such lands is subject to the same restrictions relating to the export of timber from the United States as are applicable to national forest lands in Alaska under rules and regulations of the Secretary of Agriculture; and (b) until December 18, 1983, such lands shall be managed under the principles of sustained yield and under managememt practices for protection and enhancement of environmental quality no less stringent than such management practices on adjacent national forest lands;

5. Requirements of section 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c) (Supp, V, 1975)), that the grantee hereunder convey those portions, if any , of the lands hereinabove granted, as are prescribed in said section; and

6. The terms and conditions of the agreement dated March 2, 1978, between the Secretary of the Interior, Yak-Tat Kwaan Inc., and Sealaska Corp. A copy of the agreement shall be attached to and become a part of the coveyance document and shall be recorded therewith. A copy of the agreement is located in the Bureu of Land Management easement case file for Yak-Tat Kwaan Inc., serialized AA-6987-EE. Any person wishing to examine this agreement may do so at the Bureau of Land Management, Alaska State Office, 555 Cordova Street, Anchorage, Alaska 99501.

The United States waives administration of oil and gas leases AA-4875 and AA-4941 as well as all of the land embraced therein approved for interim conveyance, and the leases will be transferred to Sealaska Corportation when conveyance is issued.

COPPER RIVER MERIDIAN, ALASKA

AA-4875

T. 27 S., R. 34 E.,
Secs. 35 and 36, all.

Pursuant to section 16(b) of the Alaska Native Claims Settlement Act, Yak-Tat Kwaan Inc. is entitled to 23,040 acres of land; by this decision approximately 20,003 acres have been approved for conveyance. Patent to the surface estate of the surveyed land herein approved will be issued when this decision becomes final; interim conveyance will be issued for the unsurveyed land. Conveyance of the remaining entitlement to Yak-Tat Kwaan Inc. will be made at a later date. Pursuant to section 14(f) of the Alaska Native Claims Settlement Act, conveyance of the subsurface estate of the lands described above shall be issued to Sealaska Corp. when conveyance is granted to Yak-Tat Kwaan Incorporated for the surface estate, and shall be subject to the same conditions as the surface conveyance.

There are no inland water bodies considered to be navigable within the lands described.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the FEDERAL REGISTER and once a week, for four (4) consecutive weeks, in the Anchorage Times and in the Southeast Alaska Empire (Juneau). Any party claiming a property interest in lands affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510 with a copy served upon both the Bureau of Land Management, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510 and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501, also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign the return receipt shall have until June 7, 1978, to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of, and requirements for filing an appeal may be obtained from the Bureau of Land Management, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510.

ROBERT E. SORENSON,
Chief, Branch of Lands, and Minerals Operations.

ALASKA

Alaska Native Claims Selection

On January 27, 1974, Yak-Tat Kwaan Inc., for the Native village of Yakutat, filed selection application AA-6987-A; on December 12, 1974, filed selection applications AA-6987-B and AA-6987-C; and on December 14, 1974, filed selection application AA-6987-D under the provisions of section 16(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 706; 43 U.S.C. 1601, 1615 (Supp. v, 1975)), for the surface estate of lands located in the Tongass National Forest in the Yakutat area.

As to the lands described below, the applications, as amended, are properly filed and meet the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do no include any lawful entry perfected under or being maintained in compliance with Federal laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to section 16(b), aggregating approximately 1,866 acres, is considered proper for acquisition by Yak-Tat Kwaan Inc., and is hereby approved for interim conveyance pursuant to section 14(b) of the Alaska Native Claims Settlement Act:

U.S. Survey 2134, Alaska, Yakutat Native Cemetary, situated about three-fourths of a mile east of the entrance of Monti Bay.

Containing 2.10 acres.

COPPER RIVER MERIDIAN, ALASKA (SURVEYED)

T. 27 S., R. 33 E.,
Sec. 20, Lot 1, all;
Sec. 21, Lots 1, 2 and 3, all;
Sec. 27, Lots 1, 2 and 3;

Sec. 29, Lots 1 to 7, inclusive, all;
Sec. 32, Lots 1 and 2, Lot 3 excluding AA-15156, request for designation as sec. 3(e), Alaska Native Claims Settlement Act, Lot 4 excluding Native allotment application AA-6594;
Sec. 33, Lots 1 to 5 and 8 to 14, inclusive, Lots 6, 7, 15 and 16 excluding Native allotment application AA-6594.

Containing 1,079.70 acres.

T. 27 S., R. 34 E.,
Sec. 21, Lot 3 excluding AA-15143, request for designation as sec. 3(e), Alaska Native Claims Settlement Act, S½NE¼, SE¼NW¼, E½SW¼, W½SE¼.

Containing 298 acres.
Aggregating 1,379.80 acres.

COPPER RIVER MERIDIAN, ALASKA (UNSURVEYED)

T.26 S., R. 34 E.,
Sec. 24 (fractinal), all;
Sec. 25, E½NE¼.

Containing approximately 335 acres.

T. 27 S., R. 35 E.,
Sec. 18, NW¼.

Containing approximately 152 acres.
Aggregating approximately 487 acres.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. As to the lands in T. 27 S., R. 34 E., Copper River Meridian, the highway easement deed, AA-12407, dated February 16, 1967, issued by the Bureau of Public Roads, U.S. Department of Commerce with the concurrence of the U.S. Forest Service for a right-of-way for a Federal Aid Highway under the act of August 27, 1958, as amended, 23 U.S.C. 317;

2. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(f)) (Supp. V, 1975); and

3. Pursuant to section 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 708; 43 U.S.C. 1601, 1616(b) (Supp. V, 1975)), the following public easements, referenced by easement identification number (EIN) on the easement maps in case file AA-6987-EE, are reserved to the United States and subject to further regulation thereby:

a. (EIN 1 C5, D1, D9) A continuous linear easement twenty-five (25) feet in width upland of and parallel to the mean high tide line in order to provide access to and along the marine coastline and use of such shore for purposes such as beaching of watercraft or aircraft, travel along the shore, recreation, and other similar uses. Deviations from the waterline are permitted when specific conditions so require, e.g., impassable topography or waterfront obstruction. This easement is subject to the right of the owner of the servient estate to build upon such easement a facility for public or private purposes, such right to be exercised reasonably and without undue or unnecessary interference with or obstruction of the easement. When access along the marine coastline easement is to be obstructed, the owner of the servient estate will be obligated to convey to the United States an acceptable alternate access route, at no cost to the United States, prior to the creation of such obstruction.

b. (EIN 3 C1, C3, D1, D3, G) An easement sixty (60) feet in width for an existing road from Yakutat westerly around the Phipps Peninsula via The Ankau and Ocean Cape, then southeasterly along the shore of the Gulf of Alaska for access to public lands and waters. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

c. (EIN 3a C1, C3, D1, D3, G) An easement for an existing access trail, fifty (50) feet in width from road easement EIN 3 C1, C3, D1, D3, G at the bridge crossing the Ankau north and westerly by the cemetery to Point Carrew and around to intersect road easement EIN 3 C1, C3, D1, D3, G. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

d. (EIN 7 G) An easement sixty (60) feet in width for an existing road from junction with road in section 21, T. 27 S., R. 34 E., Copper River Meridian (covered by highway easement deed AA-12407), northerly to a 2-acre log transfer site on Sawmill Cove. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

e. (EIN 10 G) An easement one hundred (100) feet in width for a proposed road from the existing road in section 18, T. 27 S., R. 35 E., Copper River Meridian, northeasterly to public lands. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

f. (EIN 11 D9) A streamside easement twenty-five (25) feet in width upland of and

M Y 8 7 8 M

V 4 3 1 89

parallel to the ordinary high water mark on all banks and an easement on the entire bed of Humpback Creek through section 24 and the northeast ¼ of section 25, T. 26 S., R. 34 E., Copper River Meridian. Purpose is to provide for public use of waters having highly significant present recreational use.

g. (EIN 23 C4) A one (1) acre site easement upland of and parallel to the mean high tide line in section 28, T. 27 S., R. 33 E., Copper River Meridian, on the north side of the The Ankau near the bridge. The site is for vehicle use.

h. (EIN 26 C) The right of the United States to enter upon the lands hereinabove granted for cadastral, geodetic, or other survey purposes is reserved together with the right to do all things necessary in connection therewith.

i. (EIN 27 C) Easements for the transportation of energy, fuel, and natural resources which are the property of the United States, or which are intended for delivery to the United States, or which are produced by the United States. These easements also include the right to build any related facilities necessary for the exercise of the right to transport energy, fuel, and natural resources, including those related facilities necessary during periods of planning, locating, constructing, operating, maintaining, or terminating transportation systems. The specific location of these easements shall be determined only after consultation with the owner of the servient estate. Whenever the use of such easements will require removal or relocation of any structure owned or authorized by the owner of the servient estate, such use shall not be initiated without the consent of the owner of such improvement; provided, however, that the United States may exercise the right of eminent domain if such consent is not given. Only those portions of these easements that are actually in use or that are expressly authorized on March 3, 1996, shall continue to be in force.

These reservations have not been conformed to the Departmental easement policy announced March 3, 1978. Conformance is contingent upon resolution of the litigation *Calista, et al.*, v. *Andrus* and implementation of the Secretary's new easement policy.

The grant of lands shall be subject to:

1. Issuance of a patent confirming the boundary description of the lands hereinabove granted after approval and filing by the Bureau of Land management of the official plat of survey covering such lands;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under section 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g) (1970))), contract, permit, right-of-way or easement, and the right of the lessee, contractee, permittee or grantee to the complete enjoyment of all rights, privileges and benefits thereby granted to him;

3. The following third-party interests, if valid, created and identified by the U.S. Forest Service as provided by section 14(g) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(g) (Supp. V, 1975)):

a. Cemetery, City of Yakutat, special use permit of November 2, 1963, in section 27, T. 27 S., R. 33 E.

b. Residence, R. Edwards, special use permit of November 2, 1970, in section 29, T. 27 S., R. 33 E.

c. Telephone right-of-way, U.S. Coast Guard, special use permit of January 16, 1970, across sections 29, 32, and 33, T. 27 S., R. 33 E.

4. Requirements of section 22(k) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 715; 43 U.S.C. 1601, 1621(k) (Supp. V, 1975)), that, as to the portion of the above-described lands located within the boundaries of a national forest (a) until December 18, 1976, the sale of any timber from such lands is subject to the same restrictions relating to the export of timber from the United States as are applicable to national forest lands in Alaska under rules and regulations of the Secretary of Agriculture; and (b) until December 18, 1983, such lands shall be managed under the principles of sustained yield and under management practices for protection and enhancement of environmental quality no less stringent than such management practices on adjacent national forest lands;

5. Requirements of section 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c) (Supp. V, 1975)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section; and

6. The terms and conditions of the agreement dated March 2, 1978, between the Secretary of the Interior, Yak-Tat Kwaan Inc. and Sealaska Corp. A copy of the agreement shall be attached to and become a part of the conveyance document and shall be recorded therewith. A copy of the agreement is located in the Bureau of Land Management easement case file for Yak-Tat Kwaan Inc., serialized AA-6987-EE. Any person wishing to examine this agreement may do so at the Bureau of Land Management, Alaska State Office, 555 Cordova Street, Anchorage, Alaska 99501.

The United States waives administration of oil and gas leases AA-4875 and AA-4941 as well as all of the land embraced therein approved for interim conveyance, and the leases will be transferred to Sealaska Corp. when conveyance is issued.

COPPER RIVER MERIDIAN, ALASKA

AA-4875

Secs. 20, 21, 28, all;
Sec. 29, E½.

AA-4941

T. 27 S., R. 34 E.,
Secs. 35 and 36, all.

Pursuant to section 16(b) of the Alaska Claims Settlement Act, Yak-Tat Kwaan Inc. is intitled to 23,040 acres of land; by a previous decision on July 1, 1974, patent was issued to Yak-Tat Kwaan Inc. for 1.0086 acres. By a recent decision, 18,085.70 acres of surveyed land and approximately 1,918 acres of unsurveyed land were approved for conveyance. Together with the lands herein approved, the total of lands conveyed or approved for conveyance is 19,466.5086 acres of surveyed land and 2,405 acres of unsurveyed land.

Patent to the subsurface estate of the surveyed land herein approved will be issued when this decision becomes final; interim conveyance will be issued for the unsurveyed land and the lands requiring additional survey. Conveyance of the remaining entitlement to Yak-Tat Kwaan Inc. will be at a later date. Pursuant to section 14(f) of the Alaska Native Claims Settlement Act, conveyance of the subsurface estate of the lands described above shall be issued to Sealaska Corp. when conveyance is granted to Yak-Tat Kwaan Inc. for the surface estate, and shall be subject to the same conditions as the surface conveyance.

Kardy Lake and The Ankau, by reason of tidal influence, are the only inland water bodies considered to be navigable within the lands described.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the FEDERAL REGISTER and once a week, for four (4) consecutive weeks, in the Anchorage Times and in the Southeast Alaska Empire (Juneau). Any party claiming a property interest in lands affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510 with a copy served upon both the Bureau of Land Management, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510 and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501, also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign the return receipt shall have until June 7, 1978, to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of, and requirements for filing an appeal may be obtained from the Bureau of Land Management, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510.

ROBERT E. SORENSON,
Chief, Branch of Lands and Minerals Operations.

COLORADO STATE OFFICE

Order Providing for Opening of Public Lands and National Forest Lands

APRIL 28, 1978.

1. The Federal Power Commission issued orders September 29, 1976 (FR 41, pages 44464 and 44465) vacating in their entirety withdrawals for power development Project 1093 and transmission line Project 1261, affecting portions of the following described public lands and National Forest lands to the extent they were occupied by a diversion-conduit development and by power transmission lines:

SIXTH PRINCIPAL MERIDIAN, COLORADO

T. 1 N., R. 71 W.,
Sec. 7, NW¼SW¼, S½SW¼;
Sec. 8, SW¼NE¼, SE¼NW¼, N½SW¼, SW¼SW¼;
Sec. 17, W½NW¼, NW¼SW¼;
Sec. 18, N½NE¼, SE¼NE¼, NE¼NW¼, E½SE¼;
Sec. 19, E½E½, NW¼NE¼, E½NW¼, SW¼NW¼, NW¼SW¼.
T. 1 N., R. 72 W.,
Sec. 12, W½NE¼, SE¼NW¼, NE¼SW¼, N½SE¼;
Sec. 13, SE¼SW¼, SW¼SE¼;
Sec. 24, N½NE¼, SE¼NE¼.

ROOSEVELT NATIONAL FOREST

T. 1 N., R. 72 W.,
Sec. 1, SE¼SW¼, and SW¼SE¼;
Sec. 25, W½W½;
Sec. 34, SE¼SW¼ and SE¼;
Sec. 35, NE¼, NE¼NW¼, S½NW¼, and NE¼SE¼;
Sec. 36, SE¼NW¼ and N½SW¼.
T. 1 S., R. 72 W.,
Sec. 4, NE¼NE¼, NE¼SW¼, SW¼SW¼, and NW¼SE¼.
T. 7 N., R. 73 W.,
Sec. 20, NE¼SW¼.

The acres described aggregate approximately 75 acres in Boulder and Larimer Counties.

2. At 10 a.m. on June 5, 1978, the portions of the public lands affected shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable laws. All valid applications received at or prior to 10 a.m. on June 5, 1978, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 10 a.m. on June 5, 1978, the national Forest lands shall be open to such forms of appropriation as may by law be made of National Forest land.

Inquiries concerning the lands should be addressed to the undersigned, Bureau of Land Management, 700 Colorado State Bank Building, 1600 Broadway, Denver, Colo. 80202.

RODNEY A. ROBERTS,
Leader, Canon City-Grand Junction Team, Branch of Adjudication

[Colorado 8879]

COLORADO

Termination of Proposed Withdrawal and Reservation of Lands

APRIL 28, 1978.

Notice of a Forest Service, U.S. Department of Agriculture application, Colorado 8879, for withdrawal and reservation of lands for public purposes, was published as FR Doc. 69-6905, on pages 9291-9292 of the issue of June 12, 1969. It was republished as FR Doc. 77-37087 on pages 65280-65281 of the issue of December 30, 1977. The applicant agency has canceled its application insofar as it affects the following described lands:

SIXTH PRINCIPAL MERIDIAN, WHITE RIVER NATIONAL FOREST

AQUA FRIA LAKE RECREATION AREA

T. 8 N., R. 82 W.,
Sec. 29: SW¼SW¼;
Sec. 30: S½SE¼, SE¼SW¼;
Sec. 31: N½NE¼NE¼; and
Sec. 32: N½NE¼NE¼.

The areas described aggregate approximately 200 acres.

Therefore, pursuant to the regulations contained in 43 CFR Part 2311, such lands, at 10 a.m., on May 30, 1978, will be relieved of the segregation effect of the above-mentioned application.

ANDREW W. HEARD, Jr.,
Leader, Craig Team, Branch of Adjudication.

[FR Doc. 78-12375 Filed 5-5-78; 8:45 am]

[4310-84]

[Colorado 0126472]

COLORADO

Termination of Proposed Withdrawals and Reservation of Lands

APRIL 28, 1978.

Notice of a U.S. Forest Service application C-0126472 for withdrawal and reservation of land for public recreation sites was published as FR Doc. 65-12676, on page 14691 of the issue for Thursday, November 25, 1965. The notice of proposed withdrawal was republished as FR Doc. 78-114 on page 1011 of the issue for January 5, 1978. The applicant agency has canceled its application insofar as it affects the following described lands.

RIO GRANDE NATIONAL FOREST

NEW MEXICO PRINCIPAL MERIDIAN

Salthouse Campground

T. 44 N., R. 2 E.,
Sec. 12, SW¼SW¼ and SW¼SE¼SW¼;
Sec. 13, NW¼NE¼NW¼, and NE¼NW¼NW¼.

Therefore, pursuant to the regulations contained in 43 CFR, Part 2310, such lands will be relieved of the segregative effect of the above-mentioned application 30 days from the date of this notice.

EDWARD KOETEEUW,
Acting Leader, Canon City-Grand Junction Team, Branch of Adjudication.

[4310-84]

[Colorado 0122327]

COLORADO

Termination of Proposed Withdrawal and Reservation of Lands

APRIL 28, 1978.

Notice of a Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, U.S. Department of the Interior application, Colorado 0122327, for withdrawal and reservation of lands for wildlife management purposes was published as FR Doc. 64-3935, on page 5405 of the issue of April 22, 1964. The applicant agency has canceled its application in its entirety. The lands involved are described as:

NEW MEXICO PRINCIPAL MERIDIAN

T. 49 N., R. 3 W.,
Sec. 2, Lot 4, SW¼NW¼ and W½SW¼;
Sec. 3, N½SW¼ and SE¼SW¼;
Sec. 6, Lot 4;
Sec. 7, Lots 2, 3, 4, N½NE¼ and E½W½;
Sec. 8, N½N½, SE¼NW¼, and NE¼SW¼;
Sec. 10, NE¼NW¼ and S½NW¼;
Sec. 11, W½W½;
Sec. 14, W½;
Sec. 15, NE¼ and S½;
Sec. 16, All;
Sec. 17, S½NE¼;
Sec. 18, Lots 1, 2, 3, 4, and E½W½;
Sec. 19, Lots 1, 2, 3, 4, S½NE¼, E½W½, and SE¼;
Sec. 20, N½S½;
Sec. 21, N½, SW¼, N½SE¼, and SE¼SE¼;
Sec. 22, N½NE¼, NW¼, W½SW¼, and SE¼SE¼;
Sec. 23, W½;
Sec. 26, W½NE¼, NW¼, N½SW¼, and NW¼SE¼;
Sec. 27, E½NE¼ and NE¼SE¼.
T. 49 N., R. 4 W.,
Sec. 13, E½, NW¼, and E½SW¼;
Sec. 14, SE¼SE¼;
Sec. 23, NE¼, NE¼NW¼, SE¼SW¼, and SE¼;
Sec. 24, NE¼, E½NW¼, and S½.

The above area aggregates 7,085.98 acres.

Therefore, pursuant to the regulations contained in 43 CFR, Part 2311,

such lands, at 10 a.m., on June 5, 1978, will be relieved of the segregative effect of the above-mentioned application.

MERRILL G. ANDERSON,
Leader, Montrose Team,
Branch of Adjudication.

[Colorado 014334]

COLORADO

Termination of Proposed Withdrawal and Reservation of Lands

APRIL 28, 1978.

Notice of a Fish and Wildlife Service, U.S. Department of the Interior application, Colorado 014334, for withdrawal and reservation of lands for wildlife management purposes was published as FR Doc. 60-6020, on page 6147 of the issue of June 30, 1960. The applicant agency has canceled its application in its entirety. The lands involved are described as follows:

NEW MEXICO PRINCIPAL MERIDIAN

T. 49 N., R. 3 W.,
Sec. 2, Lot 4, SW¼NW¼ and W½SW¼;
Sec. 3, N½SW¼ and SE¼SW¼;
Sec. 8, Lot 4;
Sec. 7, Lots 2, 3, 4, N½NE¼ and E½W½;
Sec. 8, N½N½, SE¼NW¼, and NE¼SW¼;
Sec. 10, NE¼NW¼ and S½NW¼;
Sec. 11, W½W½;
Sec. 14, W½;
Sec. 15, NE¼ and S½;
Sec. 16, All;
Sec. 17, S½NE¼;
Sec. 18, Lots 1, 2, 3, 4, and E½W½;
Sec. 19, Lots 1, 2, 3, 4, S½NE¼, E½W½, and SE¼;
Sec. 20, S½;
Sec. 21, N½, SW¼, N½SE¼, and SE¼SE¼;
Sec. 22, N½NE¼, NW¼, W½SW¼, and SE¼SE¼;
Sec. 23, W½;
Sec. 25, SW¼SW¼;
Sec. 26, W½NE¼, W½, and SE¼;
Sec. 27, E½E½, NW¼NW¼, and SE¼SW¼;
Sec. 28, N½NW¼;
Sec. 29, N½N½ and SW¼NW¼;
Sec. 30, Lots 1, 2, NE¼ and E½NW¼;
Sec. 34, S½NE¼ and SW¼NW¼;
Sec. 35, N½NE¼, NE¼NW¼, and S½NW¼;
Sec. 36, NW¼NW¼.
T. 49 N., R. 4 W.,
Sec. 13, E½ and E½W½;
Sec. 24, N½NE¼, SE¼NE¼, and SE¼;
Sec. 25, NE¼, SE¼NW¼, and S½.

The areas described above aggregate 8,286.99 acres.

Therefore, pursuant to the regulations contained in 43 CFR, Part 2311, such lands, at 10 a.m., on June 5, 1978, will be relieved of the segregative effect of the above-mentioned application.

MERRILL G. ANDERSON,
Leader, Montrose Team,
Branch of Adjudication.

Office of the Secretary

[Order No. 3020]

REVOCATION OF SECRETARIAL ORDER 2987

Section 1. *Revocation.* (a) Secretarial Order 2987, dated March 3, 1976, provides for the reservation of easements for the transportation of Federal energy, fuel, and natural resources pursuant to the Secretary's discretionary authority in section 17(b) of the Alaska Native Claims Settlement Act (ANCSA).

(b) In an effort to speed the conveyance of lands to Alaska Natives, a thorough review of the Department's ANCSA policies was initiated, including policies concerning easement reservations. The Department's new policy, as stated in a memorandum and decision document dated March 3, 1978, provides that no transportation and utility corridors are to be reserved in conveyances to Alaska Natives as required by Secretarial Order 2987. To implement this policy, it was stated that Secretarial Order 2987 was to be revoked. In accordance with the Department's new easement policy, Secretarial Order 2987 is hereby revoked.

Section 2. *Effective Date.* This order is effective immediately.

Dated: May 1, 1978.

JAMES A. JOSEPH,
Acting Secretary
of the Interior.

[7590-01]

NUCLEAR REGULATORY COMMISSION

[Docket Nos. STN 50-592; STN 50-593]

ARIZONA PUBLIC SERVICE CO., ET AL. (PALO VERDE NUCLEAR GENERATING STATION, UNITS 4 AND 5)

Hearing on Application for Construction Permits

Pursuant to the Atomic Energy Act of 1954, as amended (the Act), and the regulations in Title 10, Code of Federal Regulations, Part 50, "Licensing of Production and Utilization Facilities," Part 51, "Licensing and Regulatory Policy and Procedures for Environmental Protection," and Part 2, "Rules of Practice," notice is hereby given that a hearing will be held before an Atomic Safety and Licensing Board, to consider the application filed under the Act by the Arizona Public Service Co., on behalf of itself, and 10 joint applicants—Southern California Edison Co., El Paso Electric Co., San Diego Gas and Electric Co., Nevada Power Co., Department of Water and Power of the city of Los Angeles, city of Anaheim, Calif., city of Burbank, Calif., city of Glendale, Calif., city of Pasadena, Calif., city of Riverside, Calif. (the applicants), for construction permits for two pressurized water nuclear reactors designated as the Palo Verde Nuclear Generating Station, Units 4 and 5 (the facilities), each of which will be designed for operation at a core power level of 3,800 thermal megawatts, with a net electrical output of approximately 1,307 megawatts. The proposed facilities are to be located in Maricopa County, Ariz., about 36 miles west of Phoenix.

The hearing, which will be scheduled to begin in the vicinity of the site of the proposed facilities, will be conducted by an Atomic Safety and Licensing Board (Board), which has been designated by the Chairman of the Atomic Safety and Licensing Board Panel. The Board consists of Gustave A. Linenberger, Dr. Quentin J. Stober and Robert M. Lazo, Esq., Chairman.

Pursuant to 10 CFR 2.785, an Atomic Safety and Licensing Appeal Board will exercise the authority and the review function which would otherwise be exercised and performed by the Commission. Notice as to the membership of the Appeal Board will be published in the FEDERAL REGISTER at a later date.

Upon completion by the Commission's staff of a favorable safety evaluation of the application and an environmental review, and upon receipt of a report by the Advisory Committee on Reactor Safeguards, the Director of Nuclear Reactor Regulation will consider making affirmative findings on Items 1-3, a negative finding on Item 4, and an affirmative finding on Item 5 specified below as a basis for the issuance of construction permits to the applicants. In the event that a separate hearing is held with respect to a limited work authorization, Item 6 below describes the matters for consideration.

ISSUES PURSUANT TO THE ATOMIC ENERGY ACT OF 1954, AS AMENDED

1. Whether in accordance with the provisions of 10 CFR 50.35(a):

(a) The applicants have described the proposed design of the facilities including, but not limited to, the principal architectural and engineering criteria for the design, and has identified the major features or components incorporated therein for the protection of the health and safety of the public;

(b) Such further technical or design information as may be required to complete the safety analysis and which can reasonably be left for later consideration, will be supplied in the final safety analysis report;

(c) Safety features or components, if any, which require research and development have been described by the applicants and the applicants have identified, and there will be conducted a research and development program reasonably designed to resolve any safety questions associated with such features or components; and

(d) On the basis of the foregoing, there is reasonable assurance that (i) such safety questions will be satisfactorily resolved at or before the latest date stated in the application for completion of construction of the proposed facilities, and (ii) taking into consideration the site criteria contained in 10 CFR Part 100, the proposed facilities can be constructed and operated at the proposed location without undue risk to the health and safety of the public.

2. Whether Arizona Public Service Co. is technically qualified to design and construct the proposed facilities;

3. Whether the applicants are financially qualified to design and construct the proposed facilities; and

4. Whether the issuance of permits for construction of the facilities will be inimical to the common defense and security or to the health and safety of the public.

ISSUE PURSUANT TO NATIONAL ENVIRONMENTAL POLICY ACT OF 1969 (NEPA)

5. Whether, in accordance with the requirements of 10 CFR Part 51, the construction permits should be issued as proposed.

ISSUES PURSUANT TO 10 CFR 2.761A (LIMITED WORK AUTHORIZATION)

6. Pursuant to 10 CFR 2.761a, a separate hearing and partial decision by the board on issues pursuant to NEPA and general site suitability and certain other possible issues may be held and issued prior to and separate from the hearing and decision on other issues. In the event the Board, after the hearing, makes favorable findings on such issues, the Director of Nuclear Reactor Regulation may, pursuant to 10 CFR 50.10(e) authorize the applicants to conduct certain onsite work entirely at their own risk prior to completion of the remainder of the proceeding.

In the event that this proceeding is not a contested proceeding, as defined by 10 CFR 1.3(n), the Board will determine without conducting a de novo evaluation of the application: (1) whether the application and the record of the proceeding contain sufficient information, the review of the application by the Commission's staff has been adequate to support the proposed findings to be made by the Director of Nuclear Reactor Regulation on Items 1-4 above, and to support, insofar as the Commission's licensing requirements under the Act are concerned, the issuance of the construction permits proposed by the Director of Nuclear Reactor Regulation; and (2) whether the NEPA review conducted by the Commission's staff has been adequate.

In the event that this proceeding becomes a contested proceeding, the Board will consider and initially decide, as issues in this proceeding, Items 1-5 above as a basis for determining whether construction permits should be issued to the applicants.

With respect to the Commission's responsibilities under NEPA, and regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with § 51.52(c) of 10 CFR Part 51: (1) determine whether the requirements of section 102(2)(A), (C), and (E) of NEPA and Part 51 have been complied with in this proceeding; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding for the permits with a view to determining the appropriate action to be taken; and (3) determine after weighing the environmental, economic, technical and other benefits against environmental and other costs, and considering available alternatives whether construction permits should be issued, denied, or appropriately conditioned to protect environmental values.

The Board will convene a special prehearing conference of the parties to the proceeding and persons who have filed petitions for leave to inter-

V 43 / 89
MY 8
7
8
M

V 4 3 / 8 9

vene, or their counsel, to be held within sixty (60) days after the notice of hearing is published or at such other time as the Board deems appropriate, for the purpose of dealing with the matters specified in 10 CFR 2.751a.

The Board will convene a prehearing conference of the parties, or their counsel, to be held subsequent to any required special prehearing conference, and within sixty (60) days after discovery has been completed or at such other time as the Board may specify, for the purpose of dealing with the matters specified in 10 CFR 2.752.

The Board will set the time and place for any special prehearing conference, prehearing conference and evidentiary hearing, and the respective notices will be published in the FEDERAL REGISTER.

Any person who does not wish, or is not qualified, to become a party to this proceeding may request permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715. A person making a limited appearance may make an oral or written statement on the record. They do not become a party, but may state their interest and raise questions which they would like to have answered to the extent that the questions are within the scope of Items 1-5 above. Limited appearances will be permitted at the time of the hearing at the discretion of the Board, within such limits and on such conditions as may be fixed by the Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission by July 6, 1978. The presiding Atomic Safety and Licensing Board may make further provision with respect to limited appearances subsequently during the course of this proceeding.

Any person whose interest may be affected by the proceeding, who wishes to participate as a party in the proceeding must file a written petition under oath or affirmation for leave to intervene in accordance with the provisions of 10 CFR 2.714. A petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why intervention should be permitted, with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompained by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to petitioner's interest and the basis for petitioner's contentions with regard to each aspect on which intervention is desired. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A petition for leave to intervene must be filed with the Secretary of the Commission and others as specified below by June 6, 1978. A petition for leave to intervene which is not timely will not be entertained absent a determination by the Board that the petitioner, in addition to the matters specified in 10 CFR 2.714(d), has made a substantial showing of good cause for failure to file on time. The reasons for the tardiness in filing a petition for leave to intervene, as well as the factors specified in 10 CFR 2.714(a)(1)-(4) shall be considered in making a determination whether there has been a substantial showing of good cause by the petitioner.

Pursuant to 10 CFR 1.101, the application has been filed without the Environmental Report required by 10 CFR 50.30(f). Under 10 CFR 2.101, the omitted material should be filed by the applicant within six months. In view of this, any person who wishes to participate as a party in this proceeding pursuant to 10 CFR 2.714 need not set forth in any petition for leave to intervene required to be filed by June 6, 1978 any contentions related to the omitted material. A deadline for filing of other contentions relating to matters covered in the omitted material will be established by the Board subsequent to acceptance of the Environmental Report for a detailed review. In all other aspects, said petition must meet the requirements of 10 CFR 2.714, namely, setting forth the interest of the petitioner in the proceeding, facts and reasons why intervention should be permitted, and a general statement as to the subject matter in the proceeding as to which intervention is sought. Subsequent to the submission of the omitted material, a supplemental notice of hearing will be published which will provide an opportunity for interested members of the public to intervene in this proceeding with regard to any issues raised by the Applicant's Environmental Report.

An answer to this notice, pursuant to the provisions of 10 CFR 2.705 must be filed by the applicant by May 30, 1978.

Papers required to be filed in this proceeding shall be filed by mail or telegram addressed to the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be filed by delivery to the Commission's public document room, 1717 H Street NW., Washington, D.C. 20555. Pending further order of the Board, parties are required to file, pursuant to the provisions of 10 CFR 2.708, an original and twenty (20) conformed copies of each such paper with the Commission. A copy of any petition for intervention should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 and to Arthur C. Gehr, Esq., Snell and Wilmer, 3100 Valley Center, Phoenix, Ariz., 85073, attorney for the applicants. Any questions or requests for additional information regarding the content of this notice should be addressed to the Chief Hearing Counsel, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

For further details, see the application for construction permits dated March 1, 1978 which, along with any amendments or supplements thereto, is or will be available as noted above for public inspection at the Commission's public document room, 1717 H Street NW., Washington, D.C., between the hours of 8:30 a.m. and 5 p.m. on weekdays. Copies of those documents will also be available at the Phoenix Public Library, Science and Industry Section, 12 East McDonnell Road, Phoenix, Ariz. 85004 for inspection my members of the public between the hours of 10 a.m. to 9 p.m. Monday through Thursday, 10 a.m. to 6 p.m. Friday, 9 a.m. to 6 p.m. Saturday and 2 p.m. to 6 p.m. on Sunday. As they become available, a copy of the safety evaluation report by the Commission's staff, the draft and final environmental statements, the report of the Advisory Committee on Reactor Safeguards (ACRS), the proposed construction permits, the transcripts of the prehearing conferences and of the hearing, and other relevant documents, will also be available at the above locations. Copies of the proposed construction permits and the ACRS report may be obtained, when available, by request to the Director, Division of Project Management, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the Commission's staff safety evaluation report and final environmental statement, when available, may be purchased at current rates, from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Va. 22161.

M Y 8 7 8 UMI

Dated at Washington, D.C. this 28th day of April 1978.

UNITED STATES NUCLEAR REGULATORY COMMISSION,
SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc. 78-12177 Filed 5-5-78; 8:45 am]

[7590-01]

[Docket Nos. STN 50-592 and STN 50-593]

ARIZONA PUBLIC SERVICE CO., ET AL.

(PALO VERDE NUCLEAR GENERATING STATION, UNITS 4 AND 5)

Receipt of Antitrust Information and Application for Construction Permits and Operating Licenses: Time for Submission of Views on Antitrust Matters

Arizona Public Service Co. on behalf of itself and ten joit applicants—Southern California Edison Co., El Paso Electric Co., San Diego Gas and Electric Co., Nevada Power Co., Department of Water and Power of the city of Los Angeles, city of Anaheim, city of Burbank, city of Glendale, city of Pasadena, and city of Riverside, Calif.—(the applicants), pursuant to section 103 of the Atomic Energy Act of 1954, as amended, filed portions of their application. These parts which consist of the Safety Analysis Report, general and financial information were accepted for docketing on March 31, 1978 and are assigned Docket Nos. STN 50-592 and STN 50-593.

In addition a portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L, and was also accepted for docketing and is assigned Docket Nos. STN 50-592-A and STN 50-593-A.

The application is for authorization to construct and operate two pressurized water reactors designated as the Palo Verde Nuclear Generating Station, Units 4 and 5 on the applicants' site in Maricopa County, Ariz. The reactor is designed for operation at a core power level of 3800 mega watts thermal, with an equivalent net electrical output of approximately 1307 megawatts.

A Notice of Hearing setting forth the radiological issues to be considered during the review is being published separately. A date for submitting petitions for leave to intervene on radiological issues is set forth in the Notice of Hearing.

Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation, on or before July 6, 1978. The request should be filed in connection with Docket Nos. STN 50-592-A and STN 50-593-A.

The Environmental Report was tendered but initially rejected and is expected to be resubmitted on or before September 1, 1978. A separate notice of receipt and availability for this remaining portion will be published at that time. A deadline for filing of other contentions relating to matters covered in the omitted material will be established by the Board subsequent to acceptance of the Environmental Report for a detailed review.

After the Environmental Report has been received and analyzed by the Commission's Director of Nuclear Reactor Regulation or his designee, a draft environmental statement will be prepared by the Commission's staff. Upon preparation of the draft environmental statement, the Commission will cause to be published in the FEDERAL REGISTER a notice of availability of the draft statement, requesting comments from interested persons on the draft statement. Upon consideration of comments submitted with respect to the draft environmental statement, the staff will prepare a final environmental statement, the availability of which will be noticed in the FEDERAL REGISTER.

Copies of the individual portions of the application, as noted above are available for public examination and copying for a fee at the Commission's public document room, 1717 H Street NW., Washington, D.C. 20555, and at the Phoenix Public Library, Science and Industry Section, 12 East McDowell Road, Phoenix, Ariz. 85004.

Dated at Bethesda, Md., this 20th day of April 1978.

FOR THE NUCLEAR REGULATORY COMMISSION,
JOHN F. STOLZ,
Chief Light Water Reactors Branch No. 1, Division of Project Management.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON FLUID/HYDRAULIC DYNAMIC EFFECTS

Meeting

The ACRS Subcommittee on Fluid/Hydraulic Dynamic Effects will hold a meeting on May 23, 1978 at the Royal Court Inn, 1750 S. Elmhurst Road, Des Plaines, Ill., to discuss the status items related to the Mark I, II and III Containment Systems.

In accordance with the procedures outlined in the FEDERAL REGISTER on October 31, 1977, page 56972, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

TUESDAY, MAY 23, 1978

8:30 a.m. Until the Conclusion of Business

The Subcommittee may meet in Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Subcommittee will hear presentations by and hold discussions with representatives of the NRC Staff, the General Electric Co., and their consultants, pertinent to this review.

The Subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

In addition, it may be necessary for the Subcommittee to hold one or more closed sessions for the purpose of exploring matters involving proprietary information. I have determined, in accordance with Subsection 10(d) of Pub. L. 92-463, that, should such sessions be required, it is necessary to close these sessions to protect proprietary information (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Dr. Andrew L. Bates, telephone 202-634-1919 between 8:15 a.m. and 5 p.m., e.d.t.

Dated: May 3, 1978.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[Rel. No. 20522(70-6149)]

COLUMBIA GAS SYSTEM, INC.

Proposed Issuance and Sale of Short-Term Notes to Banks and to Dealers in Commercial Paper and Exception From Competitive Bidding

APRIL 28, 1978.

Notice is hereby given that the Columbia Gas System Inc. ("Columbia"), 20 Montchanin Road, Wilmington, Del. 19807, a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating section 6(b) of the act and rule 50(a)(5) promulgated thereunder as applicable to the following proposed transactions. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transactions.

Columbia requests authority to issue and sell through May 31, 1979, short-term notes to banks and commercial paper aggregating up to $260,000,000. Generally, Columbia will make the proceeds from the sale of these notes available to its subsidiary companies for the purchase of gas for underground storage and other liquid hydrocarbons inventories and for other short-term requirements. In this regard, see Columbia's filing for intrasystem financing (file No. 70-6142). It is stated that the short-term gas and liquid hydrocarbon requirements of approximately $260,700,000 may make it necessary to have outstanding at any one time up to May 31, 1979, the aforesaid short-time notes in the aggregate amount of $260,000,000.

Columbia proposes to issue and sell commercial paper to one or more dealers, and it will continue to do so as long as the effective interest rate is less than the effective interest cost which Columbia would have to pay to banks for an equivalent amount of funds as of the date of borrowing, except that, in order to obtain greater flexibility, commercial paper may be issued with a maturity of not more than 60 days from the date of issue with an effective interest cost in excess of such effective interest cost on bank borrowings.

The commercial paper will be in the form of promissory notes with maturities not to exceed 270 days and will not be prepayable prior to maturity. The actual maturities will be determined by market conditions, effective interest cost to Columbia, and Columbia's anticipated cash requirements at the time of issuance. The commercial paper notes will be issued in denominations of not less than $50,000 and not more than $5,000,000 and will be sold at a discount which will be not in excess of the discount rate per annum prevailing at the date of issuance for commercial paper of the particular maturity and rating.

It is stated that no commission or fee will be payable in connection with the issuance and sale of the commercial paper notes. Each dealer, as principal will reoffer such notes at a discount rate of one-eighth of 1 percent per annum less than the discount rate to Columbia. The reoffering will be made to not more than an aggregate of 200 customers of the dealers, such customers to be identified and designated in lists (nonpublic) prepared in advance. No additions will be made to the customer lists, which will consist of institutional investors, without first advising this Commission. It is expected that Columbia's commercial paper notes will be held by customers to maturity, but, if they wish to resell prior thereto, the applicable dealer, pursuant to a repurchase agreement, will repurchase the notes and reoffer the same to others in its specified list of customers.

Columbia requests exception from the competitive bidding requirements of rule 50 for the proposed issue and sale of its commercial paper. In support of this request, Columbia states that the proposed commercial paper notes will have a maturity of 9 months or less, that it is not practical to invite competitive bids for commercial paper, and that current rates for commercial paper for such prime borrowers as Columbia are published daily in financial publications.

Columbia proposes that up to $260,000,000 of the proposed short-term borrowings may be in the form of short-term bank notes, issued from time to time in accordance with proposed credit-lines with participating banks. In no event will the proposed bank borrowings and/or commercial paper exceed an aggregate amount of $260,000,000, at any one time outstanding. A list of such banks and information regarding the terms of such borrowings are to be filed by amendment. The notes are to be repaid on or before May 31, 1979, and will be prepayable, in whole or in part, without penalty.

The expenses to be paid by Columbia in connection with the proposed transactions are estimated at $10,400, including rating fees estimated at $7,000 and charges for services of Columbia Gas System Service Corp. estimated at $1,200. Columbia has also requested that authority be granted to file certificates under rule 24 with respect to the proposed transactions on a quarterly basis.

The application states that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than May 22, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in rule 23 of the general rules and regulations promulgated under the act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 10229 (812-4289)]

INCOME TRUST FOR GOVERNMENT SECURITIES, FIRST SERIES (AND SUBSEQUENT SERIES) AND PRESCOTT, BALL & TURBEN

Notice of Filing of Application

MAY 2, 1978.

Notice is hereby given, that Income Trust for Government Securities, First Series (and Subsequent Series) ("Fund" or "Funds"), registered under the Investment Company Act of 1940 ("Act") as a unit investment trust, and its sponsor, Prescott, Ball & Turben ("Sponsor") (collectively, "Applicants"), 900 National City Bank Building Cleveland, Ohio 44114, filed an application on April 7, 1978, pursuant to section 6(c) of the Act, for an order of the Commission (1) exempting Applicants, to the extent necessary, from the provisions of section 14(a) of the Act; (2) exempting the Funds from Rule 19b-1 under the Act to permit more than one distribution of capital gains in any one taxable year; and (3) exempting the secondary market activities of the Sponsor and underwriters of the Funds from provisions of Rule 22c-1 to permit weekly retrospective pricing of units of beneficial interest in the various Funds ("Units"), subject to certain conditions. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that each Fund will be governed by a trust agreement ("Trust Agreement") between the Sponsor and State Street Bank and Trust company, as Trustee ("Trustee"). Interactive Data Services, Inc. will serve as Evaluator under the Trust Agreement ("Evaluator"). Applicants state that, subject to compliance with the Trust Agreement, entities other than those named hereinabove may serve as Sponsor, Trustee, or Evaluator, respectively. Applicants further state that there was filed simultaneously with this application a Registration Statement on Form S-6 under the Securities Act of 1933. Applicants state that the assets of the Funds will consist of securities issued by the U.S. Government or an agency or instrumentality thereof, in each case as to which the payment of principal and interest is backed by the full faith and credit of the United States, and/or contracts and funds for the purchase of certain such securities ("Securities"), all of which the Sponsor shall have accumulated for such purpose. Applicants further state that the Units will represent proportionate interests in the aggregate principal amount of Securities and representing in the aggregate the entire ownership of a Fund. Applicants anticipate that the assets of the First Series of the Fund will consist primarily of mortgage-backed securities of the modified pass-through type, fully guaranteed as to principal and interest by the Government National Mortgage Association.

SECTION 14(a)

Section 14(a) of the Act, in substance, provides that no registered investment company and no principal underwriter for such company shall make a public offering of which such company is the issuer unless: (1) the company has a net worth of at least $100,000; (2) at the time of a previous public offering it had a net worth of $100,000; or (3) provision is made that a net worth of $100,000 will be obtained from not more than twenty-five responsible persons within ninety days, or the entire proceeds received, including sales charge, will be refunded.

Applicants represent that the Sponsor will deposit in each Fund not less than $5,000,000 principal amount of the Securities. Thus, each Fund, at the date of deposit of the Securities and before any Unit is offered to the public, is intended to have a net worth, represented by the market value of the Securities on that date as determined by the Evaluator, in excess of $100,000. Applicant assert that each Fund will thereby fully comply with the first requirement of Section 14(a), of the Act, to the extent necessary.

As a condition to such exemption, the Sponsor has agreed that it will refund on demand and without deduction, all sales charges to purchasers of Units of any Fund from the Sponsor or from any underwriter or dealer participating in the distribution, and liquidate the Securities held in a Fund and distribute the proceeds thereof, (1) if within 90 days from the time that the registration statement relating to the Units of such Fund has become effective under the Securities Act of 1933, the net worth of such Fund shall be reduced to less than $100,000, or (2) if such Fund shall have been terminated. The Sponsor further agrees to instruct the Trustee to terminate any Fund in the event that redemption by the Sponsor or underwriters of unsold Units results in such Fund having a net worth of less than $5,000,000 and in the event of any such termination to refund or cause to be refunded, on demand and without reduction, all sales charges to purchasers of Units of such Fund from the Sponsor or from any underwriter or dealer participating in the distribution.

RULE 19b-1

Rule 19b-1(a) provides in substance that no registered investment company which is a "regulated investment company" as defined in Section 851 of the Internal Revenue Code shall distribute more than one capital gains dividend in any one taxable year. Applicants state that distributions of principal, including any capital gains, and interest relating to each Fund will be made to Unitholders monthly. Applicants further state that distributions of principal constituting capital gains to Unitholders may arise in the following instances: (1) an issuer might call or redeem Securities; (2) Securities might be disposed of in order to maintain the qualification of a Fund as a regulated investment company under the Internal Revenue Code; and (3) Securities might be liquidated in order to provide the funds necessary to meet redemptions.

In support of the requested exemption, Applicants state that the dangers against which Rule 19b-1 is intended to guard do not exist in the situation at hand since neither the Funds nor the Sponsor have control over events which might trigger capital gains. In addition, Applicants represent that any capital gains distributions will be clearly distinguished from interest and principal distributions in the accompanying report by the Trustee to Unitholders. In order to comply with the Rule, each Fund would be forced to hold any monies constituting capital gains from the disposition of Securities until the end of its taxable year. Applicants state that such a practice would clearly be to the detriment of the Unitholders.

Applicants further point out that Paragraph (b) of Rule 19b-1 provides that a unit investment trust may distribute capital gains dividends received from a regulated investment company within a reasonable time after receipt. Applicants assert that the purpose behind this provision is to avoid forcing a unit investment trust to accumulate distributable amounts received throughout the year and distribute them only at year end, and that the operations of the Funds will be consistent with the intended objectives of such provision.

RULE 22c-1

Rule 22c-1 provides, in pertinent part, that no registered investment company issuing any redeemable security shall sell, redeem, or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or sell such security.

Applicants seek an order exempting the secondary market operations of the Sponsor and the underwriters from the provisions of Rule 22c-1 under the Act. Applicants propose to value Units of the Funds, for repurchase and resale by the Sponsor and the underwriters in the secondary market, at prices computed on the last business day of each week ("Friday"), effective for all transactions made during the following week. The evaluation will be done by the Evaluator, who will also provide estimated evaluations on trading days in order to protect Unitholders and investors. Applicants represent that in the case of a repurchase, if the Evaluator cannot opine that the current bid side evaluation is less than the previous Friday's offering side evaluation, the Sponsor will order a new evaluation. In the case of a resale of Units in the secondary market, if the Evaluator cannot state that the previous Friday's price is no more than one-half point ($5.00 on a Unit representing $1,000 principal amount of Securities) greater than the current offering price, a full evaluation will be ordered.

Applicants state that there are two purposes of Rule 22c-1: (1) to eliminate or reduce any dilution of the value of outstanding redeemable securities of registered investment companies occuring through the practice of redeeming or repurchasing securities at a price above their net asset value or selling securities at a price based upon a previously established net asset value which permits a potential investor to take advantage of an upswing in the market and an accompanying increase in the net asset value of investment company shares, and (2) to minimize speculative trading practices which so compromise registered investment companies as to be unfair to the holders of their outstanding securities.

Applicants contend that the sale and repurchase of Units of the Fund in the secondary market cannot possibly dilute the value of outstanding securities. Applicants also contend that the proceedures followed in secondary market operations of the Fund cannot be regarded as encouraging speculative trading practices. According to the applicantion, the proposed procedure will insure that a Unitholder will never receive less than the redemption value of the Unit by selling his Unit to the Sponsor. The procedure will minimize the risk that a purchaser in the secondary market would be paying more than he would pay if daily evaluations were made.

Applicants further assert that while the purposes for which Rule 22c-1 was adopted would not be served by imposing the requirements of the rule upon the secondary market operations of the Funds, the interests of investors might be significantly impaired by imposing upon them the cost of the determinations of net asset value required by Rule 22c-1.

Section 6(c) of the Act provides, in part, that the Commission may, upon application, conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provisions of the Act or of any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes intended by the policy and provisions of the Act.

Notice is further given, that any interested person may, not later than May 23, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Rel. No. 10219 (812-4273)]

LIFE INSURANCE COMPANY OF NORTH AMERICA AND LIFE INSURANCE COMPANY OF NORTH AMERICA SEPARATE ACCOUNT A

Notice of Application for an Order Approving Offers of Exchange

APRIL 28, 1978.

Notice is hereby given, that Life Insurance Co. of North America ("LINA"), a stock life insurance company organized under the laws of the Commonwealth of Pennsylvania, and Life Insurance Co. of North America Separate Account A ("Separate Account"), 1600 Arch Street, Philadelphia, Pa. 19101, a separate account of LINA registered under the Investment Company Act of 1940 (the "Act") as a unit investment trust, (hereinafter collectively referred to as "Applicants"), filed an application on March 1, 1978, and an Amendment thereto on April 18, 1978, pursuant to Section 11 of the Act for an Order approving certain offers of exchange. All interested persons are referred to the applications on file with the Commission for a statement of the representations contained therein which are summarized below.

The Separate Account was established by LINA pursuant to the laws of the Commonwealth of Pennsylvania in connection with the issuance of group and individual variable annuity contracts ("Contracts") to certain persons who qualify for tax-deferred benefits under Sections 401, 403(a), 403(b), and 408 of the Internal Revenue Code of 1954 ("Code"), as amended. Applicants also offer the Contracts under deferred compensation and other retirement plans for persons who may not qualify for similar tax treatment.

The Contract-owner makes payments to LINA which deducts sales and administrative expenses. The balance of such payments under Contracts currently issued, including the Contracts which are the subject of the Application, are then allocated to one of six divisions of the Separate Account and are invested in shares of Decatur Income Fund, Inc., National Investors Corporation, Oppenheimer Fund, Inc., Trustees Equity Fund, Inc., Dreyfus Third Century Fund, Inc., or Qualified Dividend Portfolio, Inc. (collectively called "Fund(s))", which are open-end, diversified management investment companies registered under the Act. Contract owners or participants may also allocate a portion of their net purchase payments to the LINA fixed accumulation account to provide for fixed or variable annuity payments.

SECTION 11

Section 11(a) of the Act provides that it shall be unlawful for any registered open-end investment company or any principal underwriter therefor to make or cause to be made an offer to the holder of a security of such company or of any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first been submitted to and approved by the Commission. Section 11(c) provides that irrespective of the basis of exchange, the provisions of Section 11(a) shall be applicable to any type of offer of exchange of the securities of registered unit invest-

V 4 3 / 8 9

ment trusts for the securities of any other investment company.

Applicants' Contracts currently permit Contract owners or Group Contract participants, where permitted by State law and the retirement plan under which they are issued, to transfer the total or partial value of their Separate Account Division allocation to another Separate Account Division, or to or from LINA's general account providing for fixed accumulation, prior to annuitization. Unless otherwise restricted by state law or the applicable retirement plan, a transfer may be made no more often than once yearly measured from the date the owner or participant enters the retirement plan or date of last transfer, as applicable. One final transfer is permitted one month before annuity payments commence without regard to any other limitation. Transfers are made upon written instruction to LINA. Separate Account Division transfers are based upon accumulation unit values determined as of a valuation date coincident with or next following the date that LINA receives written instructions to make the transfer. Such pre-annuity transfers are permitted by the Commission pursuant to its Orders of Approval under Section 11 in Investment Company Act Releases Nos. 7769 and 9276. At present there is no exchange privilege once payments under the Contracts have commenced.

Applicants request Commission approval pursuant to sections 11(a) and 11(c) of the Act to permit a Contract owner or Group Contract participant to transfer the total value of his or her Separate Account Division allocation to another Separate Account Division after the annuity commencement date. Unless otherwise restricted by the retirement plan, State or other laws, no post-annuity transfer will be permitted more often than once yearly, measured from the date the owner or participant enters into the Contract or from the date of last transfer, as applicable. No transfer to or from LINA's general account will be permitted after the annuity commencement date nor will partial transfers be permitted between Separate Account Divisions. Transfers will be made upon receipt by LINA of properly detailed written instructions from the Contract owner or participant, as applicable. Upon receipt of such transfer instructions by LINA, the number of existing annuity units will be changed to reflect a new number of annuity units based upon their respective values on the valuation date coincident with or next following the receipt of proper instructions. After the annuity starting date, the value of the amount to be transferred will be based upon the present value of the remaining payments due, reflecting the attained age of the annuitant and mortality and interest assumptions. No additional sales or administrative charge will be imposed for making the transfer. Applicants represent that if Commission approval is obtained, they will grant the new transfer privileges to all of their existing Contract owners and participants, where permitted by State law, other applicable law, and their retirement plan. Applicants will send written notification of such change to each current Contract owner.

Applicants represent that the proposed liberalization of certain of the current pre-annuity transfer privileges under the Contracts apply the same principle which was previously recognized by the Commission to be appropriate in its Orders under Investment Company Act Releases Nos. 7769 and 9276.

Applicants state that the proposed extension of Contract transfer rights will be of benefit to those Contract owners or participants whose changing personal economic needs make it desirable for them to change their investment vehicle during the annuity period. It will also enable such persons to respond, if they so desire, to changes in general economic conditions after retirement which could have a meaningful effect on their retirement financial needs. Further, Applicants represent that no post-annuity Separate Account Division transfers will be actively solicited by LINA or its sales representatives, and that the absence of any charges for the exercise of the privilege or sales remuneration to sales personnel, removes the possible incentive to solicit or stimulate transfers.

Notice is further given that any interested person may, not later than May 22, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompained by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or in the case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following May 22, 1978, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 10224 (812-4281)]

MINNEAPOLIS SHAREHOLDERS CO.

Notice of Application for Order

MAY 1, 1978.

Notice is hereby given that Minneapolis Shareholders Co. (the "Applicant"), 4158 IDS Center, 80 South Eighth Street, Minneapolis, Minn. 55402, a closed-end, non-diversified management investment company registered under the Investment Company Act of 1940 (the "Act"), has filed an application on March 13, 1978, and an amendment thereto on April 18, 1978, pursuant to section 17(b) of the Act for an order of the Commission exempting from section 17(a) of the Act the Applicant's sale of 700,000 shares of the common stock of Arctic Enterprises, Inc. ("Arctic") and an option to acquire an additional 100,000 shares of Arctic common stock (the "Arctic Option") to Jacobs Industries, Inc. ("JII"), the holder of approximately 84 percent of the Applicant's outstanding common stock. All interested pesons are referred to the application on file with the Commission for a statement of the matters contained therein, which are summarized below.

The application states that through May 1, 1975, the Applicant was engaged in the manufacture and sale of Grain Belt beer. On May 1, 1975, the Applicant (then known as Grain Belt Breweries, Inc.) sold it assets for a cash consideratin of $4,100,000 to I. J. Enterprises, Inc. ("IJE") a company controlled by Mr. Irwin L. Jacobs and since 1975, Applicant has not engaged in an active business. It further states that in 1975, certain shareholders of the Applicant commenced litigation against the Applicant, Irwin L. Jacobs, IJE and the then directors of the Applicant alleging that the proxy statement utilized in connection with the proposal to sell the assets of the Applicant to IJE was materially false and misleading, all in violation of the Federal securities laws and that Mr. Jacobs, IJE and the director defendants had breached their fiduciary duties to the Applicant and its shareholders. Applicant advises that this litigation, known as the Rockler I litigation, is still before the Federal courts.

M Y 8 7 8 M

Applicant further states that on December 21, 1976, Irwin L. Jacobs commenced a tender offer for any and all of the outstanding common stock of the Applicant and after two extensions of the offer, Mr. Jacobs held 784,213 shares of the Applicant's common stock or approximately 84 percent of the outstanding shares; that during the tender offer, litigation was commenced by the Applicant and the plaintiffs in the Rockler I litigation wherein it was claimed that the tender offer violated section 14(e) of the Securities Exchange Act of 1934 as well as other statutory provisions of the federal securities laws and the Minnesota Securities Act. Applicant notes that it has since sought and received the dismissal of its tender offer claims but the Rockler I plaintiffs have continued the tender offer litigation and it is known as the Rockler II litigation.

Applicant advises that on March 10, 1978, counsel for all parties to the Rockler I, Rockler II and Marsh & McLennan, Inc. litigation (the latter litigation being an outgrowth of the Rockler I litigation) and their insurers, entered into an agreement in principal for the settlement of all three cases providing for the payment of $510,000 by defendants other than the Applicant, to the Rockler I and II plaintiff class representatives in trust for the class or classes represented, and for the payment of approximately $58,261 to the Applicant in reimbursement of attorneys' fees previously paid on behalf of the defendant directors in Rockler I. The balance of such attorneys' fees previously paid by the Applicant in the amount of $43,594 will be borne by the Applicant. As a result of that tentative agreement, Applicant notes that a binding Stipulation and Settlement Agreement is expected to be executed by all parties and preliminary approval by the District Court will be sought by the parties and that if preliminary District Court approval is granted a Notice to Class Members more fully describing that Stipulation and Settlement Agreement and giving notice of a hearing for the purpose of determining whether the settlement would be finally approved by the Court will be sent to class members.

By way of additional background, Applicant states that at its Annual Meeting of Shareholders held on June 17, 1977, the shareholders of the Applicant elected three directors, each of whom had been nominated by Mr. Jacobs and that after the meeting and following the death of one of the directors, a replacement director proposed by Mr. Jacobs was elected to fill the vacated position. The Applicant's three-man board of directors consisted of Daniel T. Lindsay, President of the Applicant and Secretary of JII and Federal Financial Corp., each company controlled by Mr. Jacobs; Wayne E. Olson, Treasurer of the Applicant and Treasurer of JII and President of Federal Financial Corp; and Ralph P. Klein, an employee of J.Y.J. Corp., a company controlled by Irwin L. Jacobs. The application points out that on November 23, 1977, Mr. Jacobs conveyed his shares of the Applicant to JII, a Minnesota corporation formed on November 10, 1977; that Mr. Jacobs is the controlling shareholder of JII: and that JII also holds all of the outstanding common stock of Federal Financial Corp., a company which is in the business of collecting the accounts receivables of the W.T. Grant Co.

Applicant states further that after the new Jacobs management took control of the Applicant, a review of the Applicant's assets was made with a view toward maintaining liquidity in anticipation of an opportunity to make a long-term investment. Applicant advises that assets held by prior management consisted primarily of government securites and that it had been prior management's stated intent to liquidate the Applicant and the shareholders were about to be asked to vote on liquidation prior to the Jacobs tender offer; however, the combination of the tender offer and the Rockler litigation prevented liquidation especially in light of Mr. Jacob's expressed objection to a liquidation. Applicant further advises that after the annual meeting, new management elected to make short term investments in commercial paper secured by bank letters of credit.

In addition, Applicant advises that in April and May of 1977, Mr. Jacobs, Mr. Lindsay, Mr. Olson, and Mr. Mathisen, the then Secretary of Applicant ("Jacobs Group") were purchasing the common stock of Sonesta International Hotels Corporation ("Sonesta") and over this period 114,600 shares were purchased at an average cost of $5.16 per share and a Schedule 13D was filed with the Commission, the NYSE and Sonesta indicating that the Jacobs Group held more than 5 percent of the outstanding shares of Sonesta. Applicant states that an amendment to the 13D was filed early in July 1977, in which the Jacobs Group reported that they had sought to meet with Sonesta's management concerning a proposed tender offer at $7 per share, which filing indicated that the Applicant would make the offer if an offer was made. Applicant also states that on July 15, 1977, the Jacobs Group conveyed the 114,600 Sonesta shares to the Applicant at a purchase price of $7 per share when the market price on the New York Stock Exchange at the time of the sale was $5¾ pursuant to an agreement which permitted the Applicant to put the shares back to the members of the Jacobs Group within six months at the $7 per share price.

Applicant states that a decision was subsequently made to shelve the Sonesta tender. When the opportunity to make an investment in Arctic presented itself, the Applicant advises that it decided to make the purchase and because it did not have sufficient funds to make purchase of the Arctic Securities and still hold the Sonesta shares it elected to exercise the put. According to the application, members of the Jacobs Group proposed that a privately held company controlled by them make the purchase, whereupon the shares were sold to Federal Financial Corp. at the put price of $7 per share on or about October 1, 1977.

Applicant states that its prior management did not consider Applicant to be an investment company within the meaning of the Act and, accordingly, no steps were taken to register the Applicant under the Act prior to the time the new Jacobs' management took control. In addition, applicant advises that its new management did not consider the Applicant to be an "investment company" since management's stated purpose was to acquire an active business. However, the application recites that the interim investment in June of 1977 of the Applicant's assets in commercial paper may have caused the Applicant to come within the definition of "investment company" under the Act. The Applicant states that it did not register under the Act at that time since the purchase of the Sonesta common stock in July, 1977 for $802,200 caused only approximately 15 percent of the Applicant's assets to be invested in Sonesta. Applicant advises that in management's view the size of the Sonesta investment relative to all assets continued to make it unnecessary to register under the Act; however, the investment of Applicant's assets in government securities may have required Applicant to register under the Act as early as May, 1975. Prior to the purchase of securities of Arctic the Applicant did register under the Act by filing Form N-8A.

The Application states that management of the Applicant has not engaged legal counsel to determine when and if Applicant should have registered under the Act; but advises that management has attempted to deal with the Sonesta purchase and sale on the theory that Applicant should have been registered under the Act and in so doing the assumption was made that both the purchase from members of the Jacobs Group and the sale to Federal Financial Corp. ("FFC") of the Sonesta shares required Commission approval under section 17(b) of the Act since the members of the Jacobs Group and FFC are affiliates of the Applicant. After discussions

V 4 3 / 8 9

with members of the Jacobs Group and FFC Applicant advises that its Board of Directors directed management to seek payment in cash from members of the Jacobs Group of $143,250 which payment was received on March 8, 1978, representing the difference between the $7 per share price for the 114,600 Sonesta shares and the $5.75 closing price on the New York Stock Exchange at the date of sale to the Applicant. In addition, Applicant advises that it entered into an agreement with FFC on March 9, 1978, pursuant to which FFC agreed not to sell the Sonesta common stock for 90 days unless directed by the Applicant to: (i) sell the shares into the market and turn over the proceeds to Applicant less the $802,200 cost of the shares to FFC; (ii) tender the shares to Sonesta and turn over the proceeds to Applicant less cost; or (iii) turn over the Sonesta shares to Applicant in return for $802,200. Applicant notes that on April 12, 1978 the closing price for Sonesta common stock was $7.25 per share and that such price reflects, in part, the publicized intent on the part of Sonesta's management to redeem common stock at $8.25 per share once various filings and approvals are obtained. The Applicant contends that the arrangements with the Jacobs Group and FFC effectively place Applicant in the same position it would have been in had it purchased the Sonesta common stock in the open market, and points out that Applicant has not had any carrying expenses related to the Sonesta shares since Ocotber 1977, while, under its agreement with FFC, it has the opportunity to benefit from the sale of the shares.

The Applicant advises that on October 21, 1977, it bought 700,000 shares of common stock of Arctic, constituting approximately 23 percent of Arctic's outstanding common stock, and an option to acquire 100,000 additional shares during 1978 at an aggregate purchase price of $4,900,000 or $7 per share (the "Arctic Securities"). Applicant states that it was in connection with the proposed purchase of the Arctic Securities that the Applicant filed with the Commission a notification of registration on Form N-8A on October 13, 1977 since such purchase involved substantially all of its assets.

Applicant advises that the implications of becoming a registered investment company under the Act were not fully appreciated by the Applicant's Board of Directors at the time the Form N-8A was filed with the Commission. Subsequently, two non-interested directors were added to the Board of Directors to bring Applicant into compliance with section 10(a) of the Act. In addition, the Applicant states that its Board of Directors determined, for reasons more fully set forth in the application, that every effort should be made to dispose of the Arctic Securities and to seek exemption from the provisions of the Act so that the Applicant could return to holding cash and government securities until such time as the Rockler litigation matters were settled or otherwise resolved, at which time a decision could be made with respect to liquidation of the Applicant or, in the event an active business opportunity presented itself, continuation of the Applicant's existence in an active business endeavor would be considered. Moreover, the Applicant notes that the general decline in the stock market and the decline in Arctic's common stock caused its Board of Directors to conclude that a sale at the Applicant's purchase price was in the best interest of the Applicant and its shareholders. Applicant advises that the restricted nature of the Arctic Securities and the fact that the market prices of the Arctic common shares as traded on the New York Stock Exchange were less than $7 per share, caused the Board to conclude that JII or some other affiliate of Mr. Jacobs were the only prospects to purchase the Arctic Securities at the $4,900,000 price paid by the Applicant.

Section 17(a) of the Act prohibits, in relevant part, any affiliated person of a registered investment company, acting as principal, knowingly to sell to or purchase from such investment company any security or other property. As stated in the application, by virtue of its ownership of approximately 84 percent of the Applicant's outstanding common stock, JII is an "affiliate" of the Applicant, as that term is defined by section 2(a)(3)(A) of the Act. Moreover, JII is presumed to control the Applicant pursuant to section 2(a)(9) of the Act.

Section 17(b) of the Act provides that any person may file with the Commission an application for an order exempting a proposed transaction from one or more provisions of section 17(a) of the Act, and that the Commission shall grant such application and issue such order of exemption if evidence establishes that the terms of the proposed transaction are reasonable and fair and do not involve overreaching on the part of any person concerned and that the proposed transaction is consistent with the policies of the registered investment company concerned and the general purposes of the Act.

Applicant maintains that the transaction between it and JII meets the applicable criteria set forth in section 17(b). In forming its opinion the Applicant advises that its Board of Directors considered appraisal letters submitted to it by the investment banking firm of Piper, Jaffray & Hopwood Inc. ("PJH") and that the appraisals indicated that the Arctic Securities would change hands between a non-affiliated, willing buyer and a non-affiliated willing seller at an aggregate maximum purchase price of $4,450,000, some $450,000 less than the proposed selling price. According to the application, because of the relationship between the parties, the recent date of the original purchase of the Arctic Securities and the relationship between the New York Stock Exchange closing price on October 21 and the recent closing price of $6 per share on January 6, 1978, it was determined that a price lower than the total aggregate purchase price paid by the Applicant for the Arctic Securities could not be justified. Moreover, because of the pending Rockler litigation and the hostilities arising therefrom, Applicant states that it was deemed imprudent for the Applicant's controlling shareholder to effect a purchase of the Arctic Securities at a price lower than the original purchase price. In addition to the total aggregate sale price of $4,900,000 proposed by JII, Applicant advises that JII also has agreed to reimburse the Applicant for the expense of the PJH appraisals, the cost of holding the Arctic Securities at the rate of 6 percent, and certain other expenses including up to $15,000 of legal fees associated with the assessment of the Applicant's responsibilities under the Act and the preparation of this application.

The Applicant's stated belief is that the proposed sale of the Arctic Securities is consistent with its stated investment policy since its stated policy is to effect the sale of the Arctic Securities so as to permit it to seek an order of the Commission terminating its investment company status. The Applicant further believes that the transaction is consistent with the general purposes of the Act to protect the public interest and the interest of investors.

Notice is further given that any interested person may, not later than May 23, 1978, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant(s) at the address(es) stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of

M Y 8 7 8 UM

course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Rel. No. 10225 (812-4275)]

MUTUAL ASSET AND MANAGEMENT, INC.

Notice of Filing of Application Pursuant to Section 6(c) of the Act for an Order of Exemption From all Provisions of the Act

MAY 1, 1978.

Notice is hereby given that Mutual Asset and Management, Inc. ("Applicant"), an open-end diversified management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on March 3, 1978, for an order of the Commission pursuant to section 6(c) of the Act exempting Applicant from certain provisions of sections 10(a), 14(a), 20(a) and rule 20a-1 thereunder, 22(d) and 24(d) of the Act and temporarily exempting the Applicant from certain provisions of sections 16(a) and 32(a) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Applicant was organized on February 22, 1978, under the Business Corporation Act of the State of Connecticut for the primary purpose of qualifying as an investment company of the type contemplated under title 36, chapter 641, section 36-96(12) of the Connecticut General Statutes, to serve as an investment medium for mutual savings banks in Connecticut and for the Connecticut Savings Bank Life Insurance Company. Applicant is subject to the following five fundamental limitations prescribed by the above-described Connecticut Statutes:

(1) Applicant must be registered under the Act;

(2) All of Applicant's shares must be owned by savings banks organized under the laws of the State of Connecticut and doing business there or by the Connecticut Savings Bank Life Insurance Company (hereinafter sometimes called "Authorized Investors");

(3) Applicant's assets must be invested only in such investments as are specifically permitted by section 36-96 and section 36-96(2)-(9), inclusive, of the Connecticut General Statutes;

(4) The amount of stock of any corporation which Applicant may hold cannot exceed, at the time of the investment by Applicant, 5 percent of the total number of shares of such corporation then outstanding; *Provided, however,* That at the time of such investment the amount invested by Applicant in the stock of any corporation shall not exceed 10 percent of the total assets of Applicant; and

(5) The total investment of any Connecticut mutual savings bank in the stock of Applicant cannot exceed six percent (6%) of such savings bank's assets.

Applicant advises that it intends to keep the Bank Commissioner of Connecticut informed on all aspects of its affairs and activities and to send to the Commissioner all reports that it sends to its shareholders and such other additional information which the Commissioner may request.

Applicant represents that it will be an investment company wholly owned by the Authorized Investors and will be internally managed by a Board of Directors consisting of individuals who are also officers of certain of the Connecticut mutual savings banks which will ultimately own stock in the Applicant. Applicant alleges that such individuals are not agents of their respective savings banks and are acting as Directors of Applicant solely in their individual capacities. There will be no outside investment adviser employed by Applicant. In addition, Applicant will contract for custodial services with the Colonial Bank & Trust Co. of Waterbury, Conn.

Applicant states that it does not propose to use an underwriter; it is contemplated that any Authorized Investor desiring to participate in the initial offering of Applicant's shares may place an order directly with Applicant at a price of $10,000 per share. Thereafter, any Authorized Investor, during certain periods of time established by the Applicant's Board of Directors, may purchase shares in the same manner at the then current net asset value per share. Redemptions will be effected in a similar manner, except for a redemption charge presently fixed at 1 percent of the current net asset value per share computed next after receipt by the Applicant or its transfer agent, if any, of the notice of redemption.

Applicant requests exemption from the following provisions of the Act to the extent stated below:

From section 10(a) of the Act which provides that no registered investment company shall have a board of directors more than 60 percent of the members of which are persons who are "interested persons" of such registered company as defined in section 2(a)(19) of the Act. Applicant states that at its inception, it is conceivable that its Board of Directors may be composed of certain officers of stockholders holding more than twenty-five percent (25%) of Applicant's stock. Although such officers will be acting solely in their individual capacities and will not be agents of their respective banks, under a strict reading of the Act, such officers may be deemed to exercise "control" of or for their respective savings bank within the meaning of section 2(a)(9) of the Act. Applicant states that, accordingly, it is possible that more than 60 percent of the Directors of Applicant might be deemed to be "interested persons" within the meaning of section 2(a)(19) under the Act. Applicant maintains that the statutory limitation of section 10(a) is neither necessary nor in the public interest in light of the Applicant's expressed intention to keep the Connecticut Bank Commissioner informed of all aspects of Applicant's affairs and activities and to provide the Bank Commissioner with copies of, and an opportunity to comment upon, all reports to Applicant's stockholders and reports and registration materials filed with the Commission. Applicant further states that the necessity for such limitation is mitigated by virtue of the very stringent statutory limitations imposed upon Applicant's choice of securities for its investment portfolio.

From section 22(d) of the Act which provides, in pertinent part, that no registered investment company or principal underwriter thereof shall sell any redeemable security issued by such company to any person except at a current offering price described in the prospectus. Applicant states that in view of the fact that each Authorized Investor is an experienced and sophisticated institutional investor and that Applicant's shares provide a common investment only for such Authorized Investors, Applicant does not propose to deliver a prospectus to them. Instead, before accepting an initial order from any Authorized Investor, Applicant will furnish a copy of its Certificate of Incorporation and its By-Laws, its custodian agreement with The Colonial Bank & Trust Co., its notification of and registration under the Act, this application and the Commission's order with respect thereto. Thereafter, the Applicant will insure that prospective purchasing Authorized Investors which are considering making subsequent purchases are provided with any material amendments to the foregoing documents. In addition, upon the written request of any Authorized Investor, the Applicant will deliver its most recent quarterly or annual report required under the Act. Applicant maintains that, under these circumstances, requiring the de-

V 4 3 / 8 9

livery of a prospectus to prospective purchasers would impose an undue expense and an unnecessary burden upon the Applicant without commensurate benefits to the Authorized Investors which may purchase its stock.

From section 14(a) of the Act, which, in part, requires a registered investment company to have a net worth of at least $100,000 before publicly offering its securities unless such company meets the rquirements of section 14(a) (2) or (3). Applicant states that it has firm commitments from four Connecticut mutual savings banks for the purchase of 170 shares of its stock at an aggregate purchase price of $1,700,000. Applicant states that inasmuch as it is seeking an exemption from section 24(d) of the Act so as to be able to rely upon an exemption from the registration requirements under the Securities Act of 1933, it would not, if such exemption is granted, meet the literal requirements of section 14(a)(3) of the Act.

From section 20(a) of the Act and rule 20a-1 thereunder, which requires that the solicitation of proxies by registered investment companies must be in compliance with the rules and regulations issued by the Commission under section 14(a) of the Securities Exchange Act of 1934. Applicant states that compliance with the proxy rules and regulations would serve no useful purpose. Applicant states that in view of the shareholders' knowledge of the conduct of its business, to require compliance with the proxy rules and regulations would not provide any corresponding benefit to Applicant's shareholders. In addition, Applicant states that in light of the sharply circumscribed limitations on investments imposed by section 36-96(12) and in light of the availability for review of all relevant documents of Applicant by the Connecticut Banking Commissioner, the added burden and expense of complying with section 20(a) and rule 20a-1 thereunder seems unwarranted. Applicant also states that the substantive information generally contained in the documents would, in large part, be contained in the documents being made available to prospective investors.

From section 24(d) of the Act which renders inapplicable to investment companies the "intra-state" offering exemption from the registration 3(a)(11) thereunder. Applicant alleges that such exemption would be available to Applicant were it not for section 24(d) of the Act. It alleges that inasmuch as it has been organized solely to provide Authorized Investors with a common investment medium, it is evident that neither the general public interest nor the interest of any of such Authorized Investors would be served by requiring registration under the Securities Act of 1933.

Applicant also requests temporary exemptions from sections 16(a) and 32(a) of the Act, which, respectively, require that shareholders of a registered investment company: (i) elect its directors, and (ii) ratify the selection of its independent public accountants. Applicant has no shareholders and will have none until its sells shares after it becomes registered as an investment company and after the exemptions requested by this application have been granted. Applicant states that it does not plan to have a shareholders' meeting until a special meeting is held during May or June of 1978, at which meeting the above two matters will be submitted. Since Applicant will issue no shares until the above prerequesites are fulfilled, there could be only a few months during which shareholder approval would be lacking.

Section 6(c) of the Act provides that the Commission, by order upon application, may conditionally or unconditionally exempt any person or transaction from any provision or provisions of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than May 26, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant(s) at the address(es) stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
SECRETARY.

[Release No. 14718 (SR-NYSE-78-24); (SR-Amex-78-10)]

NEW YORK STOCK EXCHANGE, INC., AND AMERICAN STOCK EXCHANGE, INC.

Order Approving Proposed Rule Changes

MAY 1, 1978.

I. THE EXCHANGES' RULE PROPOSALS

On April 13, 1978, the New York Stock Exchange, Inc. ("NYSE") filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act"), and rule 19b-4 thereunder, copies of a proposed rule change which would permit members to register as Registered Competitive Market Makers ("RCMM's") and would establish the obligations of such members as market makers on the NYSE floor.[1] Amendments which substantially changed the proposed obligations of the RCMM's were filed by the NYSE as amendment No. 1 to file No. SR-NYSE-78-24 on April 26, 1978.[2]

On April 17, 1978, the American Stock Exchange, Inc. (the "Amex"), also filed with the Commission, pursuant to section 19(b)(1) of the Act and rule 19b-4 thereunder, copies of a proposed rule change which would permit its members to register as Registered Equity Market Makers ("REMM's") and establish the obligations of such members as market makers on the Amex floor.[3] On April 26, 1978, the Amex filed, as amendment No. 1 to file

[1] Notice of this initial NYSE proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 14694 (Apr. 21, 1978)), and by publication in the FEDERAL REGISTER (43 FR 17890 (Apr. 26, 1978)).

[2] Notice of amendment No. 1 to the NYSE proposed rule change, together with the terms of substance of the proposal as amended, was given by publication of a Commission release (Securities Exchange Act Release No. 14706 (Apr. 26, 1978)), and by publication in the FEDERAL REGISTER (43 FR 18380 (Apr. 28, 1978)). Technical corrections, which do not change the substance of file No. SR-NYSE-78-24 were filed by the NYSE on May 1, 1978, as amendment No. 2 to that file.

[3] Notice of this initial Amex proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission release (Securities Exchange Act Release No. 14691 (Apr. 20, 1978)), and by publication in the FEDERAL REGISTER (43 FR 17888 (Apr. 26, 1978)).

M Y 8 7 8 UM

No. SR-Amex-78-10, substantial modifications to the proposed obligations of its REMM's.[4] As amended, the NYSE and Amex proposals both are intended to create a category of market makers whose transactions on their respective exchanges would qualify for an exemption under section 11(a)(1)(A) of the Act, and would accomplish that result through the implementation of new rules and amendments to existing rules of each exchange. It is these amended rule proposals which the Commission considers herein.

The stated purpose of SR-NYSE-78-24, as well as SR-Amex-78-10, is to create a supplemental market making function in listed stocks for which NYSE "competitive traders"[5] and Amex "floor traders" may qualify in order that their proprietary on-floor transactions may be eligible for the section 11(a)(1)(A) exemption for market maker transactions. To accomplish this, the NYSE and Amex each have proposed to authorize members to register as supplemental dealers (which the NYSE would label as RCMM's and Amex as REMM's) who would assume certain obligations to the markets in listed stocks (and possibly warrants) maintained by the two exchanges. The proposed classes of market makers on the NYSE and the Amex would not, however, assume obligations equivalent to those of a specialist or competing specialist in specified securities, nor would such members be designated as specialists for purposes of obtaining preferential credit treatment under rules promulgated by the Board of Governers of the Federal Reserve system.[6] As a consequence of their unique status, the proprietary trading of members who choose to register as RCMM's or REMM's would be governed by new rules which the NYSE and Amex assert would qualify such members as market makers and thereby exempt them from the prohibitions of section 11(a) of the Act.[7] The NYSE and Amex rule proposals both would expire automatically on July 31, 1979, unless extended by further exchange rules approved by the Commission pursuant to section 19(b) of the Act.

The NYSE and Amex both would require a member to pass an examination and register with the exchange before acting as an RCMM or REMM on either exchange.[8] Initial registration on the NYSE also would be conditioned on satisfaction of a capital requirement of $25,000 over and above any other applicable NYSE or federal requirement. Amex RCMM's would not be subject to any capital requirement other than that provided by the Commission's Uniform Net Capital rule.[9]

All transactions affected by RCMM's and REMM's and all bids or offers made by RCMM's or REMM's would be required to constitute a course of dealings in a manner consistent with the maintenance, as far as reasonably practicable, of a fair and orderly market.[10] REMM's on the Amex would be registered to perform market making functions in such securities as the prospective REMM would select and would be required to comply with all obligations of a REMM in each such designated security.[11] RCMM's on the NYSE would not select, or be assigned to specific securities, but would be required to fulfill all obligations of a RCMM in every security traded on the NYSE. RCMM's and REMM's would be permitted to act as floor brokers and to execute customer orders in any securities traded on the NYSE or Amex, but would not be able to transact as broker and dealer in the same security during the same trading session.

Apart from these general obligations, any member who becomes a RCMM or REMM shall be subject to call by a floor official, or a floor broker holding an unexecuted customer order, to improve the market in any listed stock. The RCMM would be obliged to enhance the market in a particular issue by either (1) bidding or offering so as to narrow the spread in the established quotation by at least the minimum trading variation or (2) improving depth by at least one unit of trading by making a bid equal to the current bid or an offer equal to the current offer. REMM's on the Amex would be subject to the same requirements to bid or offer, but would be required to equal or better the current bid or offer, as requested, only if that bid or offer was quoted by the Amex specialist for his own account. The alternative duties of both RCMM's and REMM's to improve the market in a particular issue arise generally whenever a RCMM or a REMM responds to a call by a floor official or floor broker or seeks to effect a proprietary trade without being called. Thus, the NYSE and Amex seek to qualify all on-floor, proprietary trades effected by RCMM's or REMM's as market maker transactions for purposes of the exemption in paragraph (A) of section 11(a)(1) of the Act.

These obligations to trade in a manner which results in either stabilizing transactions [12]or a narrowing of the existing quotation are subject to certain limited exceptions. These exceptions would permit RCMM's and REMM's to engage in the following transactions:

(1) Any transaction where a market maker liquidates a long or short position at a loss;

(2) A sale of stock on a "zero minus" tick at the bid provided that all market makers and the specialist in the aggregate do not sell more than 50 percent of all such stock bid for in the market; the NYSE would restrict this exception to situations where the quotation spread is at the minimum variation (generally, one-eighth of a dollar) and the minimum variation was not the result of the subject RCMM's offer.

(3) A purchase of stock on a "zero plus" tick at the offer to cover a short to cover a short position provided that

[4] Notice of amendment No. 1 to the Amex proposed rule change, together with the terms of substance of the proposal, as amended, was given by publication of a Commission release (Securities Exchange Act Release No. 14707 (Apr. 26, 1978)) and by publication in the FEDERAL REGISTER (43 FR 18379 (Apr. 28, 1978)).

[5] There are no substantive differences between the NYSE and Amex rules which currently govern the trading conduct of members who are called "competitive traders" on the NYSE and "floor traders" on the Amex.

[6] Regulations T (12 CFR 220.1-.8) and U (12 CFR 221.1-4.7).

[7] The NYSE and Amex both have submitted supplemental material to file Nos. SR-NYSE-78-24 and SR-Amex-78-10, respectively, by which the exchanges and their counsel further explain why their respective rule proposals qualify RCMM's and REMM's as market makers for purposes of the section 11(a)(1)(A) exemption. See letter dated Apr. 26, 1978, from James E. Buck, Secretary, NYSE, to Andrew M. Klein, Director of the Division of Market Regulation (file No. SR-NYSE-78-24) and letter dated Apr. 26, 1978, from Gordon L. Nash, Lord, Day & Lord, counsel to the Amex, to George A. Fitzsimmons, Secretary of the Commission (file No. SR-Amex-78-10). Copies of these materials are available for public inspection in the Commission's Public Reference Room, 1100 L Street NW., Washington, D.C.

[8] Both exchanges would defer, for such reasonable time as would allow adoption of an appropriate examination, the examination requirement for members who sought to register as RCMM's or REMM's by May 1, 1978, the date on which Section 11(a) of the Act becomes effective with respect to those traders who were registered in that capacity on May 1, 1975.

[9] Securities Exchange Act Rule 15c3-1, 17 CFR 240.15c3-1.

[10] See proposed NYSE Rule 107B(2-6) and proposed Amex Rule 114(b) and (c)(1). File No. SR-NYSE-78-24 and SR-Amex-78-10.

[11] Market participation by an RCMM on the NYSE is prohibited on an issue-by-issue basis under the following circumstances: (1) the market maker (or affiliated person or organization) has an option position in the particular security; (2) the market maker has already transacted as broker in the stock during the same trading session; and (3) a market maker's transaction in the issue would be excessive in relation to his available capital.

[12] A transaction is considered to be stabilizing if it is a purchase at a price which is lower than the last preceding transaction at a different price (a minus or zero minus tick) or a sale at a price which is higher than the last preceding transaction at a different price (plus or zero plus tick).

V 43 / 89

all market makers and the specialist in the aggregate do not buy more than 50 percent of such stock offered in the market; the NYSE again restricts this exception to situations where the spread is at the minimum variation and that spread is not the result of the subject RCMM's bid.

(4) A purchase of stock on a "zero plus" tick at the offer, at or below the previous day's closing price in that security, again provided that all market makers and the specialist in the aggregate do not buy more than 50 percent of the stock offered; the NYSE also restricts this exception as described in (3) above.

Both proposals also would implement certain recordkeeping requirements concerning the participation of RCMM's or REMM's in the markets. The NYSE and Amex model their proposed recordkeeping requirements for REMM's and RCMM's on existing recordkeeping requirements governing floor traders. The Amex proposed rule specifies that an REMM must file daily a report indicating the opening position of the REMM and (for each trade) the time, price, tick, number of shares, broker representing the other side of the transaction (or, when applicable, the specialist), whether the trade resulted from a bid or offer requested by a floor broker or floor official and, if so, the name of the person making the request. Similarly, a floor official or floor broker on the Amex who requests an REMM to make a bid or offer is required to report such requests, although he apparently is not required to report the circumstances surrounding the request or the response which is given to such request.

The NYSE proposed rule specifies that an RCMM must keep a record of each trade initiated on the floor for his own account showing the sequence in which each of his transactions actually took place, the tick, and, "insofar as practicable," the time of each transaction. Unlike the Amex proposal, the NYSE will not require RCMM's to report this information to the NYSE on a daily basis, but only on a periodic spot-check basis when requested by the NYSE.

The NYSE proposed rule, however, does specify instances which require filing of a report as to particular conduct of its RCMM's. First, an RCMM must immediately file a report of any transaction resulting from a request for a quotation by a floor official or floor broker. Such a report must include information describing the details of the trade and state of the market at the time of the trade, and be initialed by the floor official or floor broker who requested the bid or offer. The NYSE, however, does not require floor officials or floor brokers to record and report their requests for RCMM participation or the nature of the response or lack of response to such requests. Second, an RCMM must immediately file a report of any transaction which is effected pursuant to proposed exemptions which permit RCMM's, under certain circumstances, to engage in transactions which reach across the prevailing quotation.

COMMISSION FINDINGS

The Commission finds that the NYSE and Amex rule proposals represent efforts to establish a category of members on each exchange to perform the functions of market makers in equity securities and that, as programs of limited duration, the proposed rules of the NYSE and Amex which would attempt to accomplish this result are consistent with the purposes of the Act.

Section 3(a)(38) of the Act defines the term "market maker" as, among other things,

> any dealer who, with respect to a security, holds himself out (by entering quotations in an inter-dealer communications system or otherwise) as being willing to buy and sell such security for his own account on a regular or continuous basis.

One element of this definition focuses on the market making relationship between the dealer [13] and a particular security. The market in that security would theoretically benefit from the participation of the market maker by the addition of greater depth, liquidity and continuity. The NYSE proposed rule change would not require the assignment of specific securities to the RCMM. An RCMM's obligations would extend to each NYSE-listed stock. On the Amex, a REMM would assume market-making obligations only with respect to issues in which such member determines to register.[14]

Another element of the market maker definition requires a dealer to "hold himself out (by entering quotations in an inter-dealer communications system or otherwise)." At the minimum, a market maker would appear to be required to communicate to another person in some fashion concerning the availability of his market making capabilities in a particular security. That communication process might involve the publication of quotations in an inter-dealer communications system or any other comparable means. It also might include an agreement to provide quotations upon request. In general, the "holding out" would not seem to require more than an explicit agreement to take certain actions upon request, e.g., to provide quotations, provided that agreement is communicated to other persons.

In a market not characterized by the physical presence of brokers and dealers representing all orders, the market maker continually presents a quotation as representative of the market he is willing to make in a particular security.[15] The market maker's quotation is firm without regard to whether better bids and asks of other market makers exist, and may in fact differ from those other bids and asks.

In an exchange market which focuses on a trading floor, only the best bid(s) and best offer(s) have any standing.[16] Therefore, in an exchange market which only recognizes the best bid(s) and offer(s), the Commission believes that a person should be prepared to act in a meaningful way in any security in which he agrees to act as a market maker by providing either a bid or an offer (depending on which one is needed) which must match or better other bids or offers present in the market. By making that kind of contribution, a market maker would obtain standing for his bids or offers and the presence of those bids and offers in the market should contribute to the maintenance of a fair and orderly market in the subject security.

The Amex and NYSE rule proposals would require a REMM or RCMM, whenever he was making a bid or offer (whether requested by a floor official or floor broker or not) or effecting a purchase of sale, for his own account, to engage in a course of dealings for his own account or for the account of his member organization in a manner consistent with the maintenance of a fair and orderly market. In addition, the REMM or RCMM would be subject to call by a floor official or floor broker holding an unexecuted customer's order in any security at any time. Specifically, an RCMM on the NYSE would be required, in entering a quotation (or effecting a transaction) (i) to better the existing bid or offer by no less than the minimum variation of trading in that security or (ii) to improve the depth of the market in that security by equalling (for at least one round lot) the current bid or offer. An REMM on the Amex would be subject to a similar requirement, but would be required to better or equal the existing bid or offer only when that bid or offer was made by the registered specialist for his own account. The

[13] Section 3(a)(5) of the Act provides that the term "dealer" means any person engaged in the business of buying and selling securities for his account, through a broker or otherwise, but does not include a bank, or any person insofar as he buys or sells securities for his own account, either individually or in some fiduciary capacity, but not as a part of a regular business.

MAY 8 1978

RCMM and REMM both are required to enter a bid or an offer on the side of the market requested by the floor official or floor broker.[17] On the basis of the information available to it at the present time, the Commission believes that the combination of the two requirements enumerated above, i.e., the "on call" requirement and the "competitive bid/offer" requirement, should be deemed to satisfy the "holding out" standard set forth in the section 3(a)(38) definition of market maker during the temporary period when these rules are in effect.

The definition of a market maker also requires that he must be willing to buy and sell the particular security in which he has assumed a market making role. In order to satisfy this element, a market maker would appear to be required only to agree to buy and sell stock. There is not, however, an explicit reference as to what quantity or price must be provided. In this regard, the Commission views the obligations which the RCMM's and REMM's would assume, (a bid or offer for one round lot equal to or better than, on the NYSE, the current bid or offer and, on the Amex, the current bid or offer for the account of the registered specialist) as sufficient, for purposes of an initial experiment to determine whether such members, in fact, will function as market makers, to be consistent with the requirements of the Act.

A final element requires a market maker to be willing to buy and sell "on a regular or continuous basis." That element provides an indication of the frequency a market maker should be willing to perform in that capacity. A continuous market implies that the market maker is maintaining or establishing a quotation or other form of "holding out" without any time lag or interruption.[18] A regular market, while something less than "continuous," should be characterized by a bona fide effort to provide bids or offers in a reliable manner, which could include upon request or at periodic intervals of time. The Commission believes that the NYSE and Amex proposals should be sufficient to assure that RCMM's and REMM's will be required to provide regular bids and offers in a manner which would qualify them, during the temporary period when these rules will be in effect.

The Commission believes that the rules provisions which require a REMM or RCMM either to narrow the spread or improve the depth of a market in a given security, and be prepared to participate (at risk) in the market in a constructive manner at any time represents what may be potentially a useful means of encouraging competition on the Amex and NYSE and improving the markets which those exchanges provide. The Commission notes, however, that the rule proposals, as approved herein, would expire automatically on July 31, 1979. The Commission believes that this "sunset" provision is appropriate and facilitates its finding that RCMM's and REMM's, under the proposed rules, may act in a manner which would qualify them as market makers. During this period the Commission will monitor the implementation of this market maker function and, as set forth herein, seek the views of interested persons as to whether the obligations imposed upon RCMM's and REMM's, and their actual conduct in the marketplace, justify exempting their transactons in these capacities under section 11(a)(1)(A) of the Act. In light of the lack of any information which would indicate that, in practice, the obligations proposed by the NYSE and Amex would assure a bona fide market making function, the Commission's findings are based solely on what the Commission believes will be adequate safeguards in the rules approved today. Should the NYSE or Amex choose to file, pursuant to section 19(b) of the Act, proposed rules which would adopt these proposals on a permanent basis, the Commission wishes to make clear that it would require the exchanges to justify such proposals with specific data and statistics demonstrating that RCMM's and REMM's have acted in a manner which qualifies them as market makers.[19]

The Commission also has determined that, while the provisions of the proposed exchange rules which would permit RCMM's and REMM's to effect certain destabilizing transactions do not in themselves represent any undertaking to perform the functions of a market maker, they are, on balance, designed to facilitate the ability of an RCMM or REMM to engage in market making activities which could contribute to the maintenance of fair and orderly markets.

The Commission recognizes that the ability of floor traders or market makers to be attracted to the floor by commercial opportunity may require permission for those parties to liquidate positions and obtain the use of capital made available by such liquidations for activity in other securities. Further, it notes that, in particular, this provision permitting liquidations at a loss poses little threat of permitting market makers to use such liquidations as a means of manipulation, since any manipulation relying on these liquidations would be limited by the existing positions of the market maker and his willingness to continue taking a loss in furtherance of the manipulation.

With respect to the ability of RCMM's or REMM's to liquidate long or short positions at a profit on zero plus or zero minus ticks or acquire positions, below the previous day's close, on zero plus ticks, the Commission notes that while such transactions are not necessary to the maintenance of a fair and orderly market in the subject security, they also appear, at this time, to pose little threat of disrupting the market in that security or being used for manipulative purposes. First, market makers may not initiate a destabilizing tick by selling (except at a loss) on a minus tick or covering a short on a plus tick, but can only effect these destabilizing trades after the respective minus or plus ticks have been established. Second, market makers and the specialist in the aggregate may not take more than 50 percent of the stock bid or offered at a price which would result in a destabilizing transaction. Thus, a destabilizing trend through a given price level could not be continued without participation of orders other than those of market makers or the specialist.[20] Finally, as in liquidating a position at a loss, it may be desirable for a market maker to liquidate a position so that he may utilize the resulting free capital to assume positions in other securities where a greater need for a market making contribution exists.

On balance, and in view of the perceived need for market makers to trade in a destabilizing manner to achieve a profitable return, by means of the exemptions discussed above, the Commission has determined to permit the RCMM's and REMM's to effect such transactions during the interim period of these rules. The Commission would be quite concerned, however, if, as the NYSE and Amex gain experience with RCMM's and REMM's, it becomes apparent that market makers are utilizing the exemptive provisions for a substantial percentage of their trading activity rather than trading primarily in a manner better calculated to improve NYSE and Amex markets.[21]

[17] Proposed Amex Rule 114(c); proposed NYSE Rule 107.10(ii).

[18] The principal example is a market maker in the NASDAQ system which is obligated to enter quotations in such system during business hours. Schedule D., N.A.S.D. Manual (CCH) ¶1653A.

[19] See discussion infra at p. 14-15 concerning the exchanges' proposals to monitor trading by their market makers while these rules are effective.

[20] The Commission also notes that the NYSE would prohibit its RCMM's from engaging in such transactions except in markets where the quotation is at the minimum variation. Further, although Amex REMM's are not bound by such a restriction, it would be in their economic interest, when effecting such a liquidation, to attempt to effect a transaction by narrowing the spread before reaching across to hit the bid or offer.

[21] The Commission notes that the Amex would require 75 percent of its REMM's

Footnotes continued on next page

V 43 / M 89 78

In approving these proposals, the Commission notes that the exchanges, in their proposals, have undertaken to implement certain recordkeeping procedures designed to monitor the performance of RCMM's and REMM's. While the Commission believes that the recordkeeping provisions constitute a necessary first step in determining whether REMM's and RCMM's are complying with their obligations as market makers, it also is concerned that the information which the exchanges obtain be accurate and reliable and provide a meaningful picture of the function which these market makers will perform on the NYSE and Amex. In this regard, the Commission is concerned that the NYSE and Amex lack sufficient procedures to assure that they (or, where necessary, the Commission) can verify the accuracy of the information obtained by the exchange from the market makers. In particular, the Commission does not believe that it currently is possible on either the Amex or NYSE independently to verify the identity of any individual giving a quotation or the precise time in which such quotation is given in relation to preceding and subsequent transactions. This, of course, presents difficulties with respect to the exchanges' abilities to assure that market makers are responding with quotations which are consistent with the requirements of their rules or, when trading on their own initiative, are complying with applicable restrictions. Further, the Commission is concerned that the exchanges may not, as a practical matter, be able to enforce compliance with their rules by monitoring the 50 percent restrictions on the ability of market makers to reach across the market and sell stock to prevailing bids when liquidating a position at a profit or acquiring a position at a price at or below the previous day's close. The difficulty arises in part because neither the NYSE nor the Amex have any reliable means of determining at any given time, the exact amount of stock being bid for at a particular price, either on the specialist's book or in the crowd, and, accordingly, of ascertaining whether more than 50 percent has been taken by the market makers.

In this regard, the Commission's further review of the market maker proposals will rely to a significant extent on the ability of the NYSE and Amex to provide concrete evidence that its market makers do trade in a manner which contributes to the maintenance of fair and orderly markets. The Commission therefore notes its concern that the presentation of such reliable evidence will be facilitated by, and may be impossible without, the implementation of audit trail mechanisms on the NYSE and Amex designed to provide a comprehensive and reliable means of monitoring trading and ensuring compliance with applicable requirements.

transactions to be stabilizing on a monthly basis.

GOOD CAUSE FOR ACCELERATED APPROVAL

Section 19(b)(2) of the Act permits the Commission to approve a proposed rule change submitted by a self-regulatory organization prior to the 30th day after the day of publication of notice of filing thereof if the Commission finds good cause for doing so and publishes its reasons for so finding.

As discussed above, the purpose of the NYSE and Amex proposals is to permit their floor traders to register and trade in a capacity which would qualify for an exemption from section 11(a) of the Act, which becomes effective on May 1, 1978.[22] Absent Commission approval of these proposals, existing floor traders will not be permitted to trade on the floor of the NYSE or Amex unless they otherwise qualify for an exemption under section 11(a) of the Act. The late dates, however, on which the NYSE and Amex filed both their initial proposals and subsequent amendments would preclude the Commission from providing, before May 1, 1978, the opportunity for public comment which section 19(b) of the Act would otherwise require with respect to these proposals.[23] The provision of the customary 30-day comment period in this instance would disrupt certain trading activities on the NYSE and Amex which the Commission believes have the potential for improving the depth and liquidity of those exchanges' markets and increasing competition generally therein.

In addition, the Commission notes that the failure to act favorably on either SR-NYSE-78-24 or SR-Amex-78-10 by May 1, 1978, would compel cessation of on-floor proprietary trading by a number of NYSE and Amex registered traders, who would not otherwise be able to qualify for exemption under section 11(a). To the extent that floor traders act in the capacity of "market makers" under section 3(a)(38) and 11(a)(1)(A) of the Act, they are engaged in exchange activities which the Congress explicitly recognized as having a beneficial market impact and which should be allowed under section 11(a).[24] The Commission has found that implementation, during the interim period ending July 31, 1979, of the NYSE and Amex programs under the rule changes contained in SR-NYSE-78-24 and SR-Amex-78-10 is consistent with the purposes of the Act, including section 11(a). Accordingly, the Commission believes that preventing members who would register as RCMM's or REMM's from effecting proprietary transactions of May 1, 1978, in compliance with the NYSE and Amex market-maker rules, would not result in any demonstrable furtherance of the purposes of section 11(a) or of the Act in general and would cause unnecesary financial hardship to these persons.

In view of the foregoing, the Commission finds, pursuant to section 19(b)(2) of the Act, that good cause exists to accelerate approval of SR-NYSE-78-24 and SR-Amex-78-10. Although the Commission approves the NYSE and Amex proposals on an accelerated basis, the Commission actively solicits and will review any comments received from interested persons during the 15-month lifespan of the instant NYSE and Amex rules. In particular, commentators are invited to submit their views (supplemented by any relevant data or statistics) with respect to (1) whether additional affirmative obligations (e.g., a requirement to provided quotations in one or more particular securities on a regular or continuous basis) or negative obligations (e.g., a prohibition against any or all destabilizing transactions) should be imposed upon NYSE RCMM's or Amex REMM's (2) whether any existing affirmative or negative obligation should be modified or perhaps removed, and (3) whether, in practice, NYSE RCMM's or Amex REMM's provide significant liquidity, continuity and depth to the market, particularly under difficult market conditions and/or in respect to less active stocks.

Written comments received will be used by the Commission to assist it in monitoring the experiment, assessing the efficacy of the temporary NYSE and Amex rules approved today, determining whether there may be any need for the Commission to terminate or modify the experiment, and reviewing any subsequent rules which the NYSE or Amex may submit to obtain additional or permanent authority for the operation of nonspecialist market makers on their respective floors.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule changes (as amended by the submission of Amendment No. 1 to both File Nos. SR-NYSE-78-24 and SR-Amex-78-10), which would permit members of the NYSE and Amex to register as market markers and establish the obligations of such members as market makers on the respective exchange floors, be, and they are hereby approved.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-12426 Filed 5-5-78; 8:45 am]

[22] Section 11(a)(3), 15 U.S.C. 78k(a)(3).

[23] The Commission understands that the failure of the NYSE and Amex to file their proposals on an earlier date was at least in part, a consequence of the anticipated enactment of legislation (recommended by the Commission) which would delay the effective date of section 11(a)(1) of the Act until November 1, 1979. That legislation has not yet been enacted into law.

[24] Securites Act Amendments of 1975, Report of the Senate Comm. On Banking, Housing and Urban Affairs, to accompany S. 249. S. Rep. No. 94-75, 94th Cong. 1st Sess. 68 (1975).

NEW YORK STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

MAY 1, 1978.

On April 13, 1978, the New York Stock Exchange, Inc. (the "NYSE") filed with the Commission, pursuant to section 19(b) of the Securities Exchange Act of 1934 (U.S.C. 78s(b)) the ("Act") and Rule 19b-4 thereunder (17 CFR 240.19b-4), a proposed rule change to amend NYSE Rule 111 which prohibits any member other than a competitive trader from initiating transaction on the NYSE floor for its own account or the account of his member organization. The proposed rule change, among other things, added registered competitive market makers as exception to this prohibition in order to conform NYSE Rule 111 to the NYSE's proposal of registered competitive market makers as a new class of floor members in File No. SR-NYSE-78-24.[1] That class was approved today by the Commission on a temporary basis.[2]

Notice of the proposed rule change together with their terms of substance was given by publication of a Commission release (Securities Exchange Act Release No. 14696 (April 21, 1978)) and by publication in the FEDERAL REGISTER (43 CFR 17889 (April 26, 1978)). Interested persons were invited to submit written data, views and arguments concerning the proposed rule change. The Commission has not received any comments on the proposed rule change. On May 1, 1978, the NYSE filed an amendment which (i) withdrew technical portions of the proposed rule change relating to bond trading and (ii) clarified the extent of the prohibition of Rule 111.

The Commission finds that the proposed rule change set forth in File No. SR-NYSE-78-26, as amended, specifically the amendments to paragraphs (c), (e), and (f) and supplementary material .10, are consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges and, in particular, the requirements of section 6 and the rules and regulations thereunder.

Section 19(b)(2) of the Act permits the Commission to approve a proposed rule change submitted by a self-regulatory organization prior to the thirtieth day after the date of publication of notice of filing thereof if the Commission finds good cause for doing so and publishes its reasons for so finding. The Commission today had approved the proposed rule changes in File No. SR-NYSE-78-24 on an accelerated basis for a number of reasons,[3] including the fact that section 11(a) of the Act became effective today. In view of that action and those reasons, the Commission finds, pursuant to section 19(b)(2) of the Act, that good cause exists to accelerate approval of File No. SR-NYSE-78-26. Nonetheless, commentators are invited to submit written data, views and arguments concerning the proposed rule change in this filing.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

NEW YORK, NEW HAVEN & HARTFORD RAILROAD CO.

Notice of Suspension of Trading

APRIL 18, 1978.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of New York, New Haven & Hartford Railroad Co. being traded on a national securities exchange or otherwise is required in the public interest and for the protection of investors;

Therefore, pursuant to section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 9:30 a.m. e.s.t. on April 18, 1978 through April 27, 1978.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 20527; (70-6111); (31-606)]

NORTHERN STATES POWER CO.

Notice of Proposed Acquisition by Exempt Holding Company of Stock of Electric and Gas Utility and Application for Exemption Under Section 3(c)

MAY 1, 1978.

Notice is hereby given that Northern States Power Co. ("Northern States"), a holding company, has filed an application-declaration on behalf of itself and its subsidiaries as such designating sections 9 and 10 of the Public Utility Holding Company Act of 1935 ("Act") as applicable to the proposed transactions and requesting an exemption under section 3(a)(2) of the Act. All interested parties are referred to the application-declaration which is summarized below for a complete statement of the pertinent facts.

Northern States, a Minnesota corporation, is a utility company and also a holding company, as defined in section 2(a)(7) of the Act. Its wholly owned subsidiary, Northern States Power Co. ("Wisconsin"), is a Wisconsin corporation. Northern States is presently exempt pursuant to an order of this Commission under section 3(a)(2) of the Act. *In the Matter of Northern States Power Company*, 36 SEC 1 (1954).

Northern States is engaged predominantly in the generation, transmission, distribution and sale of electricity in the States of Minnesota, North Dakota, and South Dakota and the distribution and in the sale at retail of natural gas in the States of Minnesota and North Dakota. Its wholly-owned subsidiary, provides similar utility services in the State of Wisconsin. Northern States has two wholly-owned nonutility subsidiaries, Cormorant Corp., a Montana corporation, which holds interests in fuel resources, and United Power & Land Co., a Minnesota corporation, which holds nonutility properties of a relatively nominal value. For the year ended December 31, 1976, consolidated operating revenues of Northern States and Wisconsin from electric operations totaled $643.8 million and revenues from gas operations totaled $118.9 million. On December 31, 1976, Northern States and Wisconsin furnished electric service as an integrated electric utility system in a 40,000 square mile service area to 990,000 customers in 631 communities, and gas service to 248,000 customers in 78 communities located in the same general territory. For the year ended December 31, 1976, the Northern States system derived approximately 84 percent of its operating revenues from electric service, 15 percent from gas service and 1 percent from heating and telephone service.

V 43/89

Northern States proposes to acquire the shares of outstanding Common Stock, $10 par value, of Lake Superior District Power Co. ("Lake Superior"), a Wisconsin corporation, through an offer to stockholders of Lake Superior to exchange 0.48 shares of Northern States common stock, $5 par value, for each share of Lake Superior common stock.

Lake Superior is engaged primarily in the generation, transmission, distribution and sale of electric energy and the distribution and sale at retail of natural gas service in northern Wisconsin and the Upper Peninsula of Michigan. For the year ended December 31, 1976, operating revenues of Lake Superior from electric operations totaled $18.8 million and revenues from gas operations totaled $4.2 million. On December 31, 1976, Lake Superior served a territory with a population of about 125,000 in an 8,600 square mile area. It furnished electric service to 37,000 customers in 15 counties in Wisconsin and Michigan, gas service to about 8,000 customers in 22 communities in the same area, and water service in one community in Wisconsin. For the year ended December 31, 1976, Lake Superior derived approximately 81.5 percent of its operating revenues from electric service, 18.3 percent from gas service and 0.2 percent from water service.

Lake Superior, Northern States and Wisconsin are parties with other power suppliers to the Mid-Continent Area Power Pool Agreement pursuant to which parties may exchange power and energy under schedules designed in the pool agreement for various purposes, including improved operations, emergency and economy. For the purposes of these interchanges, additional transmission facilities in the area are available for interchange among these companies. Lake Superior's major current source of bulk electric power supply, in addition to its own generation facilities, is Minnesota Power & Light Co., under an agreement which expires in November 1980. In anticipation of the expiration of that contract, Lake Superior is contemplating the construction of transmission facilities for additional interconnections with major bulk transmission facilities in northern and central Wisconsin. Lake Superior, Northern States, Wisconsin and other utilities in the area have agreed to the joint ownership of a nuclear generating plant to be located in the central portion of the state near Durand, Wis. Lake Superior and other power suppliers, in response to invitations by Northern States, have also been reviewing the possibility of joining with Northern States in the joint ownership of other planned generation units. It is stated that the inclusion of Lake Superior in the Northern States system will provide improved coordination of planning, construction and maintenance of electric facilities and a reduction in administrative costs associated with generation and transmission facilities.

Northern States and Lake Superior have entered into an Agreement dated December 29, 1977 (the "Agreement") setting forth the terms and conditions of the proposed exchange offer. It provides that the exchange offer will be made during an initial period of approximately 30 days, subject to extension by Northern States for an additional period or periods. Northern States will not extend the exchange offer beyond 60 days from the initial date without approval by the Commission. The deposits of shares of Lake Superior Common Stock will be irrevocable during the initial period and any authorized extension or extensions thereof. Northern States will declare the exchange offer effective when shares of Lake Superior Common Stock equal to 80 percent of all of the voting securities of all Lake Superior stock outstanding are tendered prior to the expiration of the offer period and if all other conditions of the proposed exchange have been met. The offer is also subject to other conditions, among them, a favorable tax ruling and all regulatory approvals.

Northern States recognizes that if it does not acquire all of the outstanding common stock of Lake Superior the resulting publicly-held minority interest in such stock will create an unduly or unnecessarily complicated corporate structure or an inequitable distribution of voting power, contrary to the standards of section 11(b)(2) of the Act. Therefore, if less than all shares of Lake Superior common stock are acquired pursuant to the exchange offer, Northern States will register with the Commission in accordance with Section 5(a) of the Act for the limited purpose of promptly submitting a plan to eliminate the minority publicly-held shares of Lake Superior common stock through an exchange for Northern States Common Stock.

Northern States represents that it intends to operate Lake Superior as a separate unit, and that it is its present intention to retain all personnel currently employed by Lake Superior. Northern States expects that substantially all officers and all but one of the directors of Lake Superior will remain in their current positions.

A statement of the fees and expenses to be incurred in connection with the proposed transactions will be filed by amendment. The Minnesota Public Service Commission has jurisdiction over Northern States' capital structure, including approval of the issuance of Northern States securities required for the acquisition. No other State or Federal commission other than this Commission has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than May 25, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he disires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in rule 23 of the General Rules and Regulations promulgated under the Act, or the commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

PRIVACY ACT OF 1974

Revised System of Records

In 43 FR 8605 (March 2, 1978) a notice of a proposed revised system of records was published. Any person interested in commenting on the proposed revision was given 30 days to submit comments in writing.

Since no comments were received, this system of records is submitted herewith as the Agency's official system and is effective May 3, 1978.

A. VERNON WEAVER,
Administrator.

SBA285

System name:

Official Travel Files—SBA285.

System location:

Central Office, at address listed in Appendix A, Federal Records Centers, at addresses listed in Appendix B.[1]

Categories of individuals covered by the system:

SBA employees.

Categories of records in the system:

Files include Travel Voucher and Applications for Advance of Funds submitted by each employee.

Authority for maintenance of the system:

5 U.S.C. 301, 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Records are reviewed by the General Accounting Office in the course of an audit of the Agency.

In the event that a system of records maintained by this Agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulatory rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigation or prosecution of such violation or charged with enforcement or implementing the statute, rule, regulation or order issued pursuant thereto.

Storage:

Records are kept in file folders.

Retrievability:

Records are indexed by employee name and social security number.

Safeguards:

Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is utilized to prevent unauthorized disclosure.

Retention and disposal:

Records are maintained for two years after the end of a fiscal year, or until a GAO audit. Records are then transferred to a Federal Records Center, where they will be disposed of 10 years after the end of the fiscal year in which the records were compiled.

Systems manager(s) and address:

Privacy Act Officer. See Appendix A for address.

[1]Referenced appendixes A and B are included in 42 FR 48794.

Notification procedures:

An individual may inquire as to whether the system contains a record pertaining to him or her by addressing a request in person or in writing to the Privacy Act Officer, at the address contained in Appendix A.

Record access procedures:

In response to a request by an individual to determine whether the system contains a record pertaining to him or her, the Privacy Act Officer will set forth the procedures for gaining access to these records. If there is no record of the individual, he or she will be so advises.

Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

Contesting record procedures:

Individuals desiring to contest or amend information maintained in the system should direct their rquest to the official listed in the above paragraph, stating the reasons for contesting it and the proposed amendment to the information sought.

Record source categories:

Travel Vouchers and Applications for Advance of Funds submitted by employees.

SHIPPING COORDINATING COMMITTEE, COMMITTEE ON OCEAN DUMPING

Meeting

The Committee on Ocean Dumping, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting at 10 a.m. on Tuesday, June 6, 1978, in the Administrator's Conference Room, 11th floor, West Tower, Environmental Protection Agency, 401 M Street SW., Washington, D.C.

The meeting will review United States preparations for the following three intersessional meetings to be held in London:

June 21-23—Joint Ad Hoc Group on Incineration at Sea;
June 26-30—Ad Hoc Scientific Group on Ocean Dumping; and
June 26-30—Ad Hoc Group of Legal Experts on Dumping.

Requests for further information should be directed to Mrs. Norma Hughes, Oil and Special Materials Control Division (WH-548), Environmental Protection Agency, Washington, D.C. 20460. Mrs. Hughes may be reached by telephone on 202-245-3051.

The Chairman will entertain comments from the public as time permits.

Dated: April 27, 1978.

RICHARD K. BANK,
Chairman, Shipping Coordinating Committee.

[Public Notice CM-8/56]

STUDY GROUP 1 OF THE U.S. ORGANIZATION FOR THE INTERNATIONAL TELEGRAPH AND TELEPHONE CONSULTATIVE COMMITTEE (CCITT)

Meeting

The Department of State announces that Study Group 1 of the U.S. CCITT National Committee will meet on June 1, 1978, at 10 a.m. in Room 511 of the Federal Communications Commission, 1919 M Street NW., Washington, D.C. This Study Group deals with U.S. Government regulatory aspects of international telegraph and telephone operations and tariffs.

The Committee will discuss international telecommunications questions relating to telegraph and telex services, and maritime services, in order to develop U.S. positions to be taken at an international CCITT Study Group I meeting to be held in June 1978, in Munich, Germany.

Members of the general public may attend the meeting and join in the discussion subject to instructions of the Chairman. Admittance of public members will be limited to the seating available.

Dated: April 28, 1978.

ARTHUR L. FREEMAN,
Chairman, U.S. CCITT National Committee.

[4710-07]

ADVISORY COMMITTEE ON THE 1979 WORLD ADMINISTRATIVE RADIO CONFERENCE

Establishment of an Advisory Committee

In accordance with Pub. L. 92-463 the Department of State has requested and received approval from the General Services Administration to establish an Advisory Committee on the 1979 World Administrative Radio Conference (WARC), it having been determined that the establishment of the Committee would be in the public interest in connection with the performance of duties imposed on the Department by law.

The United States has a substantial interest in the outcome of the 1979 WARC. The Department of State has formed an initial delegation group to the 1979 WARC made up of Government experts. The initial delegation group will later be expanded to include persons from the private sector. Given the diverse and technical issues to be addressed, the Department will need not only the expertise available from Government officials but also substantial advice from the private sector.

The Committee will have a broad and balanced membership, and will include representatives of industry, public interest groups and others with an interest in the WARC.

The Committee will assist in the formulation of positions for the Conference. It will report to its Chairman, who also serves as Chairman of the U.S. Delegation to the WARC; on occasion it will consult with the Delegation itself.

The Committee will terminate not later than December 15, 1979.

In accordance with section 6 of OMB Circular No. A-63 (Revised), the Committee Management Officer, General Services Administration, has waived the requirement for a 15-day interval between the publication of this Notice and the filing of the Committee's Charter. The Committee will become effective on May 10, 1978.

A copy of the Charter of the Advisory Committee on the 1979 World Administrative Radio Conference will be deposited with the Library of Congress (Federal Advisory Committee Desk, Federal Documents Section, Exchange and Gifts Division), Washington, D.C.

Dated: May 3, 1978.

GORDON L. HUFFCUTT,
Acting Executive Secretary, Ad Interim.

Agency for International Development

HOUSING GUARANTIES

Prescription of Rate

Pursuant to section 223(f) of the Foreign Assistance Act of 1961 as amended ("the Act"), contracts of guaranty to be entered into for loan investments in housing under section 221 and section 222 of the Act will be subject to the following restriction:

The maximum allowable rate of interest to an eligible U.S. investor shall not be in excess of 1 percent (1%) per annum above the current rate of interest applicable to housing mortgages insured by the Department of Housing and Urban Development that is in effect at the time AID approves the borrower's selection of an investor's proposal.

This prescription of rate is effective as of April 11, 1978, the date approved by Mr. Sander Levin, Assistant Administrator, Bureau for Development Support.

Dated: April 26, 1978.

PETER KIM,
Director, Office of Housing.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 78-64]

BLACKWATER RIVER IN SEABROOK, N.H.

Proposed Amendment of a Permit to Modify a Bridge Across

The Commandant has authorized a public hearing to be held by the Commander, First Coast Guard District, at Seabrook Town Building, on Collins Street, Seabrook, N.H., June 8, 1978, at 7 p.m. The purpose of the hearing is to consider the permit application from Frank W. Hake, Inc., to reinforce the New Hampshire Route 286 highway bridge across the Blackwater River, at Seabrook, N.H., for approximately five years.

This reinforcement is deemed necessary to increase the load bearing capacity to accommodate extraordinarily heavy vehicles transporting components of the Seabrook Nuclear Powered Electric Generating Plant now under construction at Seabrook, N.H. The reinforcement of the bridge will be accomplished by placing steel beams under the beams presently supporting the bridge surface. The steel beams will reduce the vertical clearance under the bridge from 4 feet to 0.5 feet (MHW) and 9 feet (MLW). The determination of whether a Coast Guard bridge permit will be issued must rest primarily on the project's impact on navigation and the environment. Bridge permit actions, such as approval of minor modifications having no significant forseeable impacts on navigation and the environment, under consideration by the Coast Guard are classified as non-major federal actions for the purposes of the National Environmental Policy Act of 1969. Under criteria published by the Coast Guard in the FEDERAL REGISTER, Volume 41, No. 128, July 1, 1976, this proposal has been tentatively classified as a non-major federal action. It appears that the decision on this permit application will not alter the planned construction of the power plant.

The Nuclear Regulatory Commission is the lead Federal agency for preparation of the Environmental Impact Statement (EIS) for the power plant. The EIS is required by the National Environmental Policy Act. An EIS was filed with the Council on Environmental Quality in December 1974.

Preliminary information indicates that an alternative route is available. Comments on the feasibility of using an alternative route are desired.

The hearing will be informal. A Coast Guard representative will preside at the hearing, make a brief opening statement, and announce the procedures to be followed at the hearing. Each person who wishes to make an oral statement should notify the Commander (obr), First Coast Guard District, 150 Causeway Street, Boston, Mass. 02114, by June 2, 1978. Such notification should include the approximate time required to make the presentation. Comments previously submitted are a matter of record and need not be resubmitted at the hearing. Speakers are encouraged to provide written copies of their oral statements to the hearing officer at the time of the hearing. Those wishing to make written comments only may submit those comments at the hearing, or to the Commander (obr), First Coast Guard District. Comments must be received by June 19, 1978. Written comments will be available for public inspection in the office of the Commander (obr), First Coast Guard District. A transcript of the hearing will also be available for inspection approximately 30 days after the hearing.

All comments, oral and written, will be considered before a final determination is made of the subject application by the Commandant, U.S. Coast Guard, Washington, D.C. 20590.

(Section 502, 60 Stat. 847, as amended: 33 U.S.C. 525, 49 U.S.C. 1655(g)(6)(c); 49 CFR 1.46(c)(10).)

F. P. SCHUBERT,
Captain, U.S. Coast Guard, Acting Chief, Office of Marine Environment and Systems.

RADIO TECHNICAL COMMISSION FOR AERONAUTICS (RTCA) SEPARATION STUDY REVIEW GROUP

Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 1) notice is hereby given of a meeting of the RTCA Separation Study Review Group to be held May 31 and June 1, 1978, RTCA Conference Room 261, 1717 H Street NW., Washington, D.C., commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Comments; (2) Approval of Minutes of Second Meeting held November 1-2, 1977; (3) Status Report on FAA Separation/Navigation Standards Program; (4) Report of Actions Resulting from second Meeting; (5) Preliminary Report and Discussion on Initial Flight Inspection Test Results; (6) Discussion of Preliminary Data Collected on performance on VOR Routes in Cleveland, Memphis, and Albuquerque; (7) Discussion of Progress on Data Analysis Methods; and (8) General Discussion.

Attendance is open to the interested public but, limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to attend and persons wishing to present oral statements should notify, not later than the day before the meeting, and information may be obtained from, RTCA Secretariat, 1717 H Street NW., Washington, D.C. 20006, 202-296-0484. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C., on May 1, 1978.

KARL F. BIERACH,
Designated Officer.

ASSIGNMENT OF HEARINGS

MAY 3, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

AB 1 (Sub-No. 57), Chicago and North Western Transportation Co. Abandonment Between Lake Crystal and Winnebago in Blue Earth and Faribault Counties, MN, is now assigned for hearing July 10, 1978 (1 week) at Winnebago, MN, at a location to be later designated.

AB 7 (Sub-No. 43), Chicago, Milwaukee, St. Paul & Pacific Railroad Co. Abandonment near Paralta and Hopkinton, in Linn, Jones, and Delaware Counties, IA, is now assigned for hearing July 17, 1978 (1 week) at Anamosa, IA, at a location to be later designated.

MC 113651 (Sub-No. 244), Indiana Refrigerated Lines, Inc., now assigned May 22, 1978 at New York, NY, will be held in Room E-2222, 26 Federal Plaza, Federal Building.

AB 55 (Sub-No. 15), Seaboard Coast Line Railroad Co. Abandonment near Tunis, NC and Nurney, VA, in Gates and Hertford Counties, NC and the City of Suffolk, VA, now assigned June 5, 1978 at Gates, NC, is postponed and reassigned to June 6, 1978 (4 days) at the Gates County New Courthouse, Gatesville, NC.

MC 82492 (Sub-No. 145), Michigan & Nebraska Transit Co., Inc., now assigned July 10, 1978 at Washington, DC, is postponed indefinitely.

H. G. HOMME, JR.,
Acting Secretary.

CORRECTION

MC 143945 (Sub-No. 3), Artransport, Inc., was incorrectly shown in the FEDERAL REGISTER of May 1, 1978 as assigned for hearing on June 26, 1978. This information was published in error. However, MC 143945 (Sub-No. 3), Artransport, Inc. is now assigned for prehearing conference on May 31, 1978 at the Offices of the Interstate Commerce Commission, Washington, D.C.

H. G. HOMME, JR.,
Acting Secretary.

[7035-01]

[Ex Parte No. 241; 30th Rev. Exemption No. 12]

EXEMPTION UNDER MANDATORY CAR SERVICE RULES

It appearing, That the railroads named herein own numerous plain boxcars; that under present conditions there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipment to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

V 43 / 89

It is ordered, That, pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, ICC-RER No. 407, issued by W. J. Trezse, or successive issues thereof, as having mechanical designation "XM", and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b). (See note.)

Atlantic & Western Railway, Reporting Marks: ATW.
Chicago & Illinois Midland Railway Co., Reporting Marks: CIM.
Fonda, Johnstown & Gloversville Railroad Co., Reporting Marks: FJG.
Hartford and Slocomb Railroad Co., Reporting Marks: HS.
*Hillsdale County Railway Co. Inc., Reporting Marks: HCRC.
Lackawaxen & Stourbridge Railroad Corp., Reporting Marks: LASB.
Louisiana Midland Railway Co., Reporting Marks: LOAM.
Maryland & Pennsylvania Railroad Co., Reporting Marks: MPA.
Pickens Railroad Co., Reporting Marks: PICK.
Roscoe, Snyder & Pacific Railway Co., Reporting Marks: RSP.
Wellsville, Addison & Galeton Railroad Corp., Reporting Marks: WAG.

NOTE.—Does not include boxcars with mechanical designation "XMI."

Effective April 30, 1978, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., April 27, 1978.

[7035-01]

[Ex. Parte No. 241; Rev. Exemption No. 148]

CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC RAILROAD CO.

Exemption Under Mandatory Car Service Rules

It appearing, That there is an emergency movement of military supplies from Crane, Ind., to Earle, N.J.; that the originating carrier has insufficient system cars of suitable dimensions immediately available for loading with this traffic; that sufficient cars of other ownerships having suitable dimensions are available on the lines of the originating carrier and on its connections and that compliance with Car Service Rules 1 and 2 would prevent the timely assembly and use of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, the Car Service Division of the Association of American Railroads is authorized to direct the movement to the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. (Milwaukee), the railroads designated by the Car Service Division are authorized to move to, and the Milwaukee is authorized to accept, assemble, and load not to exceed 175 empty plain boxcars with military supplies from Crane, Ind., to Earle, N.J., regardless of the provisions of Car Service Rules 1 and 2.

It is further ordered, That this exemption shall constitute a modification of the provisions of section (a)(2)(ii) of Service Order No. 1309, and of all provisions of Revised Service Order No. 1301 and of Service Order No. 1306.

Effective April 25, 1978.
Expires May 31, 1978.

Issued at Washington, D.C., April 21, 1974.

[7035-01]

[Corrected S.O. No. 1304; Exception No. 4]

CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC RAILROAD CO.

Granting of Exception

Exception under section (a), paragraph (6), corrected Service Order No. 1304.

The Chicago, Milwaukee, St. Paul & Pacific Railroad Co. (Milw), has been using eighteen (18) jumbo covered hoppers supplied by another railroad in unit-grain service. These cars have been recalled by the car owners because of increased demands for cars by its shippers. the Milw has requested authority to substitute eighteen (18) of its own cars for the foreign cars ordered home in order to continue providing the present level of unit-grain services to the users of such trains. The addition of these eighteen cars will increase Milw's ratio of cars in unit-grain-train service from its reported level of 11.6 percent of ownership to 12.2 percent of ownership, a ratio substantially below the 20.0 percent level permitted by the order.

It is ordered, That, pursuant to the authority vested in the Railroad Service Board by section (a)(6) of Corrected Service No. 1304, the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. is authorized to operate eighteen (18) additional jumbo covered hopper cars in unit-grain-train service to replace a like number of foreign cars withdrawn by the car ower regardless of the provisions of section (a)(5) of the order.

Effective April 18, 1978.

Issued at Washington, D.C., April 18, 1978.

JOEL E. BURNS,
Chairman,
Railroad Service Board.

[7035-01]

[Corrected I.C.C. Order No. 54 Under R.S.O. No. 1252]

CHICAGO, ST. PAUL AND PACIFIC RAILROAD CO.

Rerouting of Traffic

In the opinion of Robert S. Turkington, Agent, the Chicago, Milwaukee, St. Paul and Pacific Railroad Co. is unable to transport promptly all traffic offered for movement over its lines between Savanna, Ill., and Kansas City, Mo., because of track conditions and shortages of locomotives.

It is ordered, That:

(a) *Rerouting traffic.* The Chicago, Milwaukee, St. Paul and Pacific Railroad Co. being unable to transport promptly all traffic offered for movement over its lines between Savanna, Ill., and Kansas City, Mo., because of track conditions and shortages of locomotives that line is authorized to divert or reroute such traffic via any available route to expedite the movement. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as possible the participation and revenues of other carriers provided in the original routing.

(b) *Concurrence of receiving roads to be obtained.* The railroad rerouting cars in accordance with this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order, shall notify each shipper at the time each shipment is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 4 p.m., April 4, 1978.

(g) *Expiration date.* This order shall expire at 11:59 p.m., April 30, 1978, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., April 4, 1978.

[7035-01]

[Rev. SO 1322; Exception 5]

ILLINOIS CENTRAL GULF RAILROAD CO.

Granting of Exception

By the provisions of Revised Service Order No. 1322 the Illinois Central Gulf Railroad Co. (ICG) is required to use seventy (70) percent of its serviceable ownership of jumbo covered hoppers for transporting shipments of raw grain. A review of the normal use of these cars by that line discloses that it requires the use of a large portion of its fleet for transporting grain, soybean and cottonseed products from the numerous processors served by its line in Iowa, Illinois, Kentucky, Tennessee, and Mississippi. The involvement of the ICG in the western grain traffic is confined to its Iowa division and does not directly affect the operations of other portions of its system. The use of seventy (70) percent of its serviceable fleet of jumbo covered hopper cars for transporting shipments of grain will result in undue hardship on other shippers normally using a portion of these cars. Accordingly, it is the opinion of the Railroad Service Board that an exception to the basic requirements of Revised Service Order No. 1322 should be granted to the ICG.

It is ordered, That:

Pursuant to the authority vested in me by section (f) of Revised Service Order No. 1322, the Illinois Central Gulf Railroad Co. is directed to assign to grain service at least forty (40) percent of its ownership of jumbo covered hoppers as defined in section (a)(2) of Revised Service Order No. 1322, regardless of the provisions of section (c)(1) of the order and regardless of the provisions of Exception No. 1 to the order.

The additional cars made available by this exception for transporting shipments other than grain shall be used for transporting shipments of grain products, soybean products or cottonseed products.

Effective 12:01 a.m., April 20, 1978.

Issued at Washington, D.C., April 20, 1978.

INTERSTATE COMMERCE COMMISSION,
JOEL E. BURNS,
Chairman, Railroad Service Board.

[7035-01]

[Finance Docket No. 28740]

ILLINOIS CENTRAL GULF RAILROAD CO.

Notice of Application To Acquire and Operate—A Line of Railroad in Tishomingo County, Miss.

Illinois Central Gulf Railroad Co., 233 North Michigan Avenue, Chicago, Ill. 60601, represented by Richard M. Kamowski, Attorney, Illinois Central Gulf Railroad Co., 233 North Michigan Avenue, Chicago, Ill. 60601, hereby give notice that on the 14th day of April, 1978, it filed with the Interstate Commerce Commission at Washington, D.C., an application under section 1(18) of the Interstate Commerce Act, for a certificate of public convenience and necessity to acquire and operate a line of railroad in Tishomingo County, Miss., which application is assigned Finance Docket No. 28740.

Applicant proposes to acquire and operate a line of railroad to be constructed by the United States Army Corps of Engineers at the Corps' expense. The Tennessee-Tombigbee Waterway Project's route requires applicant to relocate a portion of its Jackson, Tenn., to Birmingham, Ala., main line. Applicant has filed an application (Docket No. AB-43 (Sub-No. 44)) to abandon this portion of its line and intends to exchange the abandoned line for the new line of railroad, which is roughly parallel to the existing line. The line to be abandoned will be operated until the new line is available for use so that operations over applicant's Jackson, Tenn., to Birmingham, Ala., main line will not be interrupted. The line will be located entirely within Tishomingo County, Miss.

The line's route is northwest-southeast, having one terminus near Holts Spur, Miss., and extending southeast to a point outside of Paden, Miss. There are no incorporated cities or villages on this route. The total track length will be approximately 9.32 miles.

In the opinion of the applicant, the granting of the authority sought will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. In accordance with the Commission's regulations (49 CFR 1108.8) in Ex Parte No. 55 (Sub-No. 4), *Implementation—National Environmental Policy Act, 1969,* 352 I.C.C. 451 (1976), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall indicate with specific data the exact nature and degree of the anticipated impact. See *Implementation—National Environmental Policy Act, 1969, supra* at p. 487.

Pursuant to the provisions of the Interstate Commerce Act, as amended, the proceeding will be handled without public hearings unless comments in support or opposition on such application are filed with the Secretary, Interstate Commerce Commission, 12th and Constitution Avenue NW., Washington, D.C. 20423, and the aforementioned counsel for applicant, within 30 days after date of first publication in a newspaper of general circulation. Any interested person is entitled to recommend to the Commission that it approve, disapprove, or take any other specified action with respect to such application.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 39]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarded transfer applications filed under sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request

*Addition.

MAY 8 1978

V 4 3 / 8 9

for oral hearing, must be filed with the Commission within 30 days after the date of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-F-C 77577, filed March 13, 1978. Transferee: GLADES MOTOR LINES, INC., 406 North Morgan Street, Tampa, FL 33602. Transferor: Tamiami Trail Tours, Inc., 525 Madison Street, Tampa, FL 33601. Applicant's representative: Gregory A. Presnell, P.O. Box 231, Orlando, FL 32802. Authority sought for purchase of a portion of the operating rights set forth in certificate No. MC 74761, issued August 22, 1956, and a portion of certificate No. MC-74761 (Sub-No. 11), issued July 7, 1967, as follows: *Passengers, baggage, and express,* over specified regular routes, between Tampa, FL, and Punta Gorda, FL, between Punta Gorda, FL, and Fort Myers, FL, between Fort Myers, FL, and West Palm Beach, FL, and between LaBelle, FL, and the junction of U.S. Hwy 27 and FL Hwy 80, intermediate points to be served on all four routes. Transferee holds no Commission authority and does not seek section 210a(b) authority.

No. MC-F-C 77623, filed April 11, 1978. Transferee: INTERMODAL CONTAINER EXPRESS, INC., 6076 County Road 11, Rising Sun, OH 43457. Transferor: Interstate Warehousing Corp., 6076 County Road 11, Rising Sun, OH 43457. Applicants' representative: Kathleen L. Maher, 100 East Broad Street, Columbus, OH 43215. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in certificate No. MC 136230, issued November 14, 1977, as follows: *General commodities,* with exceptions, between Jacksonville, FL, on the one hand, and, on the other, points in FL and GA; *empty containers, trailers, and trailer chassis,* between points in FL and GA. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-C 77627, filed April 18, 1978. Transferee: HENRY V. RABOUIN, INC., P.O. Box 204, Pittsfield, MA 01201. Transferor: Henry V. Rabouin (same address as transferee). Applicants' representative: Sherwood Guernsey II, 57 Wendell Avenue, Pittsfield, MA 01201. Authority sought for purchase by transferee of a portion of the operating rights of transferor as set forth in certificate No. MC 30618, issued March 21, 1957, and all of the operating rights of transferor as set forth in certificate No. MC 30618 (Sub-No. 7), issued October 15, 1973, as follows: *Various commodities,* from, to, and between specified points in MA, NY, CT, VT, NJ, NH, and RI; and *dry animal feed ingredients,* from Troy, NY, to points in ME, NH, VT, MA, RI, and CT. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

H. G. Homme, Jr.,
Acting Secretary.

CONSUMER SAFETY COMMISSION.

LOCATION: Third Floor Hearing Room, 1111 18th Street NW., Washington, D.C.

TIME AND DATE: April 5, 1978, 9:30 a.m. and April 6, 1978, 2 p.m.

MATTERS TO BE CONSIDERED: Commission meetings; April 5, 1978 and April 6, 1978. Third Floor Hearing Room 1111 18th Street NW., Washington, D.C.

Revised Agenda[1]

APRIL 5, 1978

Open to the Public, 9:30 a.m.

Mid-year review

Following Mid-Year Review briefings on March 13-15, and preliminary decision meetings on March 24 and March 27, the Commission will continue to consider the decision-making process on the following general matters:

Adjustments to the fiscal year 1978 operating plan.
Guidance to staff for the fiscal year 1979 operating plan.
Guidance to staff for the zero-based budgeting exercise for fiscal year 1980, 1981, and 1982.
Priority-setting for the next 18 months.
General guidance to staff in allocating resources within specific activities.

Closed to the public, 2 p.m.

A discussion of a contractor's report which contains data that has yet to be fully evaluated.

APRIL 6, 1978

An afternoon session on the Mid-Year Review if one is needed.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Sheldon D. Butts, Assistant Secetary, Office of the Secretary, Suite 300, 1111 18th Street NW., Washington, D.C. 20207, telephone 202-634-7700.

[S-962-78 Filed 5-4-78; 3:34 pm]

[1] Agenda revised on April 3, 1978 to change the time for staring April 5 meeting from 10 a.m. to 9:30 a.m., and to add a closed item to the Agenda for April 5, 1978.

2

CONSUMER PRODUCT SAFETY COMMISSION.

LOCATION: Third Floor Hearing Room, 1111 18th Street NW., Washington, D.C.

TIME AND DATE: April 12, 1978, 9:30 a.m.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Commission briefing: Wednesday, April 12, 1978, 9:30 a.m. Third Floor Hearing Room, 1111 18th Street NW., Washington, D.C.

Agenda

OPEN TO THE PUBLIC

1. *Briefing on first-aid instructions for inducing vomiting*—In June 1977, the Commission proposed a statement of policy on this matter. At this briefing, the staff and Commission will discuss issues related to final Commission approval and issuance of the policy statement.

2. *Briefing on carpet and rug flammability standards*—At this briefing, the staff will seek guidance from the Commission on options for future action with regard to the flammability standards for carpets (FF 1-70) and for small carpets and rugs (FF 2-70), including sampling plans.

Agenda approved March 31, 1978.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Sheldon D. Butts, Assistant Secretary, Office of the Secretary, Suite 300, 1111 18th Street NW., Washington, D.C. 20207, telephone 202-634-7700.

3

CONSUMER PRODUCT SAFETY COMMISSION.

LOCATION: Third Floor Hearing Room, 1111 18th Street NW., Washington, D.C.

TIME AND DATE: April 13, 1978, 9:30 a.m. and 2 p.m.

STATUS: Partly open (a.m.) and partly closed (p.m.).

MATTERS TO BE CONSIDERED: Commission meeting; Thursday, April 13, 1978, 9:30 a.m. and 2 p.m. Third Floor Hearing Room, 1111 18th Street NW., Washington, D.C.

Agenda

OPEN TO THE PUBLIC, 9:30 A.M.

1. *Carcinogen policy*—The Commission will consider a proposed policy containing procedural guidelines describing how CPSC will proceed when presented with information on a substance that may present a potential carcinogenic hazard if present in a consumer product. The staff and Commission discussed this matter at briefings on January 18 and February 16, 1978.

2. *Final rule amending PPPA exemptions for certain aspirin-containing preparations*—In April, 1977, the Commission issued an interim rule on which comment was sought, amending the exemption from child-resistant packaging requirements certain aspirin-containing preparations. At this meeting, the Commission will consider issuing a final amendment increasing the exempted products to contain up to 13 grains of aspirin, rather than 10 grains.

3. *Final rule amending PPPA packaging requirements for certain iron-containing preparations*—In June, 1976, the Commission issued regulations requiring child-resistant packaging for certain preparations containing 500 mg or more of elemental iron per package. The regulation became effective in June, 1977. At this meeting, the Commission will consider an amendment to that rule lowering the requirement to those preparations containing 250 mg or more of elemental iron per package, as proposed in April 1977.

4. *Recommendation to close case and not pursue timeliness case: Estes Industries model rocket launch system, ID 77-38*—The staff has determined that there is insufficient information to support a belief that this product presents a substantial product hazard, and has recommended that the Commission close the case and not pursue a timeliness case.

CLOSED TO THE PUBLIC, 2 P.M.

5. *Recommendation to Initiate Adjudication: BCMI No. 1837* (OS No. 516)—The staff has recommended that the Commis-

V 43 / 89

sion initiate adjudication in this Flammable Fabrics Act case involving a mattress manufacturer, or alternatively, close the case.

6. *Interpretation of CPSA section 4(g)(2)*—The Commission will consider a former employee's request for an interpretation of post-employment restrictions in section 4(g)(2) of the Consumer Product Safety Act.

Agenda approved March 31, 1978.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Sheldon D. Butts, Assistant Secretary, Office of the Secretary, Suite 300, 1111 18th Street NW., Washington, D.C. 20207, telephone 202-634-7700.

4

CONSUMER PRODUCT SAFETY COMMISSION.

LOCATION: Third Floor Hearing Room, 1111 18th Street NW., Washington, D.C.

TIME AND DATE: April 20, 1978, 2 p.m.

STATUS: Partly open, partly closed.

MATTERS TO BE CONSIDERED: Commission meeting; Thursday, April 20, 1978, 2 p.m. Third Floor Hearing Room, 1111 18th Street NW., Washington, D.C.

REVISED AGENDA[1]

OPEN TO THE PUBLIC

1. *First-aid instructions for inducing vomiting*—The Commission will consider approval and issuance of a policy statement on this matter, which it proposed in June, 1977. The Commission and staff discussed the issue at the April 12, 1978 briefing.

2. *Miniature Christmas tree lights*—The Commission will decide on publication of a proposed safety standard for miniature Christmas tree lights. At previous meetings, on March 23 and March 30, 1978, the Commission and staff discussed issues related to the recommended safety standard which the National Consumers League developed under the "offeror" process of the Consumer Product Safety Act, and submitted in November, 1977.

CLOSED TO THE PUBLIC

3. *Aluminum wire strategies*—The staff and Commission will discuss implications of, and strategies for Commission action following a recent court decision on this matter.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Sheldon D. Butts, Assistant Secretary, Office of the Secretary, Suite 300, 1111 18th Street NW., Washington, D.C. 20207, telephone 202-634-7700.

[6355-01]

5

CONSUMER PRODUCT SAFETY COMMISSION.

LOCATION: Third Floor Hearing Room, 1111 18th Street, NW., Washington, D.C.

TIME AND DATE: April 27, 1978, 9:30 a.m. and 2 p.m.

STATUS: Partly open, partly closed.

MATTERS TO BE CONSIDERED: Commission meeting and briefing; Thursday, April 27, 1978, 9:30 a.m. and 2 p.m., Third Floor Hearing Room, 1111 18th Street, NW., Washington, D.C.

REVISED AGENDA[2]

OPEN TO THE PUBLIC, 9:30 A.M.

1. *Recommendation to accept corrective action plan: Kawasaki Motor Corp., U.S.A.; snowmobiles, ID 77-89*—The staff has recommended that the Commission accept the corrective action plan which Kawasaki has implemented to correct a possible steering failure in certain snowmobiles it manufactures.

2. *Recommendation to accept corrective action plan: U.S. Divers Co.; scuba regulators, ID 78-19*—The staff has recommended that the Commission accept the corrective action plan which U.S. Divers has implemented to correct a possible defect in certain scuba regulators it manufactures.

3. *Recommendction to close possible substantial product hazard case: Westinghouse Electric Corp. gas furnaces, ID 78-48*—Based on its determination that a possible defect in certain furnaces does not pose a substantial product hazard, the staff has recommended that the Commission close this case, and not pursue any timeliness investigation.

4. *Benzene petition*—The Commission will consider a draft proposed ban of products which contain benzene, which it discussed at the April 19 briefing. In May, 1977, the Health Research Group petitioned the Commission to declare benzene a banned hazardous substance because of possible acute and chronic hazards associated with the chemical.

5. *Meeting with Worthington Industries*—Bob Yeoman, Vice President of Worthington Industries, will brief the Commission on a clutch/brake device for rotary power lawn mowers.

6. *Briefing on power lawn mowers*—The staff will brief the Commission on power lawn mowers, specifically the issues of blade contact and the interrelation of blade contact and thrown-objects.

CLOSED TO THE PUBLIC

7. *Aluminim Wire Strategies*—The staff and Commission will discuss implications of, and strategies for Commission action as a result of, a recent court decision on this matter. (Originally scheduled for April 20)

OPEN TO THE PUBLIC, 2 P.M.

8. *Carcinogen Policy*—The Commission will consider a draft carcinogen policy which defines what actions CPSC will take when presented with information that a substance may present a potential cancer hazard if it is present in a consumer product. At the April 13 meeting, the Commission gave guidance to the staff on specific issues in the policy.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Sheldon D. Butts, Assistant Secretary, Office of the Secretary, Suite 300, 1111 18th Street NW., Washington, D.C. 20207, telephone 202-634-7700.

6

CONSUMER PRODUCT SAFETY COMMISSION.

LOCATION: Third Floor Hearing Room, 1111 18th Street, NW. Washington, D.C.

TIME AND DATE: May 11, 1978, 9:30 a.m. and 2 p.m.

STATUS: Partly open, partly closed.

MATTERS TO BE CONSIDERED: Commission Meeting and Briefing; Thursday, May 11, 1978, 9:30 a.m. and 2 p.m. Third Floor Hearing Room, 1111 18th Street NW., Washington, D.C.

AGENDA

OPEN TO THE PUBLIC, 9:30 A.M.

Decision items

1. *Recommendation to accept corrective action plan: Aero Tech Manufacturers, food dehydrator, ID 77-86*—The staff has recommended that the Commission accept the corrective action plan which this firm has implemented, and close the possible substantial product hazard case involving possible shock hazards in certain food dehydrators.

2. *Final regulations establishing safety requirements for baby rattles*—The Commission will consider a final draft version of a regulation it proposed in November, 1977, intended to reduce potential choking and suffocation hazards associated with certain infant rattles.

3. *Matchbook standard and certification*—The Commission will consider issues that arise from a recent court decision on CPSC's safety standard for matchbooks.

4. *Export policy*—The Commission will consider (1) the issue of exportation of TRIS-treated products, and (2) a staff briefing package on developing an export policy under all the acts which the Commission administers.

CLOSED TO THE PUBLIC

5. *Consideration of a post-employment matter under section 4(g)(2) of the Consumer Product Safety Act*—The staff and Commission will discuss actions related to a request from a former employee for interpretation of the post-employment restrictions imposed by the CPSA.

OPEN TO THE PUBLIC, 2 P.M.

Briefing items

6. *Briefing on advertising agency plans*—Staff from the Office of Communications and CPSC's contract advertising agency will brief the Commission on plans for future information programs.

7. *Briefing on sports hazards*—Staff will brief the Commission on possible future actions to deal with hazards associated with sports and athletic equipment.

Agenda approved April 28, 1978.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

FEDERAL ENERGY REGULATORY COMMISSION.

NOTICE OF MEETING

MAY 3, 1978.

The following notice of meeting is published pursuant to section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94-409), 5 U.S.C. 552b:

FEDERAL ENERGY REGULATORY COMMISSION.

TIME AND DATE: 10 a.m., May 10, 1978.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda (NOTE.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth F. Plumb, Secretary, telephone 202-275-4166.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda, however, all public documents may be examined in the office of Public Information.

POWER AGENDA

119TH MEETING—MAY 10, 1978

Regular Meeting—(10 a.m.)

I. Electric Rate Matters

ER-1. Docket No. ER78-310, Union Electric Co.
ER-2. Docket No. ER77-531, Illinois Power Co.
ER-3. Docket No. E-6454, City of Centralia, Wash.
ER-4. Docket No. EL78-6, Illinois Power Co.
ER-5. Docket No. ES78-18, Community Public Service Co.
ER-6. Docket No. ES78-25, Indianapolis Power & Light Co.
ER-7. Docket No. ES78-27, Pacific Power & Light Co.

POWER AGENDA

119TH MEETING—MAY 10, 1978

Regular Meeting

CAP-1. Docket No. ER78-247, Carolina Power & Light Co.
CAP-2. Docket Nos. ER78-300, ER78-303, Northern States Power Co., et al.
CAP-3. Docket No. ER78-251, Pacific Power & Light Co.
CAP-4. Project No. 739, Appalachian Power Co.
CAP-5. (A) *Pennsylvania Power & Light Co.* v. *FERC*, D.C. CIR. No. 78-1270 (Docket Nos. ER78-70 and ER78-71); (B) *Oklahoma Gas and Electric Co.* v. *FERC*, 10th Cir. No. 78-1246 (Docket No. ER77-465).

MISCELLANEOUS AGENDA

119TH MEETING—MAY 10, 1978

Regular Meeting

CAM-1. Narragansett Electric Co.

GAS AGENDA

119TH MEETING—MAY 10, 1978

Regular Meeting

I. Pipeline Rate Matters—A. Pipeline Rates

RP-1(A) Docket No. RP78-——, Midwestern Gas Transmission Co. (B) Docket No. RP-78-——, East Tennessee Natural Gas Co.

II. Producer Matters—A. Producer Certificates

CI-1. Docket Nos. CI76-633, et al., Tenneco Exploration, Ltd., et al. Docket Nos. CI76-806, et al., Pennzoil Offshore Gas Operators, Inc., et al.
CI-2. Docket Nos. CI77-133 and CI78-144, CIG Exploration, Inc.
CI-3. Reserved.
CI-4. Reserved.

B. Special Relief

CI-5. Docket No. RI78-4, Superior Oil Co.
CI-6. Reserved.
CI-7. Reserved.

C. Producer Rates

CI-8 Docket No. CI74-78, Freeport Oil Co.

III. Pipeline Certificate Matters—A. Pipeline Certificates

CP-1. Docket No. CP78-73, Natural Gas Pipeline Co. of America, Michigan Wisconsin Pipe Line Co., Transcontinental Gas Pipe Line Corp., United Gas Pipe Line Co., Trunkline Gas Co.
CP-2 Docket No. CP78-123, et al., Northwest Alaskan Pipeline Co.
CP-3. Docket Nos. CP75-372 and CP75-373, Tennessee Gas Pipe Line Co., a division of Tenneco, Inc.
CP-4. Docket No. CP76-399, *Southwest Gas Corp.* v. *Northwest Pipeline Corp.*
CP-5. Docket No. CP77-71, Natural Gas Pipeline Co. of America: Docket No. CP77-118, Columbia Transmission Corp.; Columbia Gulf Transmission Co.; Docket No. CP77-125, Texas Gas Transmission Corp.
CP-6. Docket No. CP78-171, Southern Natural Gas Co.; Texas Gas Transmission Corp.; and United Gas Pipe Line Co.

GAS AGENDA

119TH MEETING—MAY 10, 1978

Regular Meeting

CAG-1. Docket No. RP72-41(PGA Nos. 78-1 and 78-2), Western Transmission Corp.
CAG-2. Docket Nos. RP73-47, RP76-39 and RP77-6, Sea Robin Pipeline Co.
CAG-3. Docket No. RP76-158, North Penn Gas Co.
CAG-4. Docket No. RI77-56, Oil and Gas Futures, Inc. of Texas, et al.
CAG-5. Docket Nos. CI75-773, et al., Pioneer Production Corp., et al.
CAG-6. Docket No. CP78-191, Trunkline Gas Co.
CAG-7. Docket No. CP78-150, Trancontinental Gas Pipe Line Corp.
CAG-8. Docket No. CP76-525, El Paso Natural Gas Co.
CAG-9. Docket No. CP78-137, Panhandle Eastern Pipe Line Co.
CAG-10. Docket No. CP77-648, Equitable Gas Co.
CAG-11. Docket No. CP78-95, Mississippi River Transmission Corp.
CAG-12. Docket No. CP76-526, El Paso Natural Gas Co.
CAG-13. Docket No. CP76-500, Cities Service Gas Co.
CAG-14. *Amoco Production Co.* v. *FERC*, D.C., Cir. No. 78-1312.
CAG-15. Docket No. CP78-41, Columbia Gas Transmission Corp., Equitable Gas Co.

KENNETH F. PLUMB,
Secretary.

[Meeting No. 1194]

TENNESSEE VALLEY AUTHORITY.

TIME AND DATE: 10:30 a.m., Thursday, May 11, 1978.

PLACE: Conference Room B-32, West Tower, 400 Commerce Avenue, Knoxville, Tenn.

STATUS: Open.

MATTERS TO BE CONSIDERED:

A. Personnel Actions

1. Change of Status—H. N. Stroud, Jr., from Assistant to Acting General Manager, Knoxville, Tenn.

B. Consulting and Personal Service Contracts

1. Amendment to consulting contract with Weston Geophysical Engineers, Inc., Weston, Mass.—Office of Engineering Design and Construction.

C. Purchase Awards

1. Req. No. 823521—Furnish all necessary labor, tools, equipment, and materials to perform improvements to the Trace highway at Land Between The Lakes.
2. Amendment to Contract 69P-87-T1 with Peabody Coal Co. for coal for TVA steam plants, covering interim arrangements for coal washing.
3. Req. No. 148567—Management services for uranium/vanadium mill site and properties in Edgemont, S. Dak.
4. Req. No. 98-42-2—Barging services for transporting coal to Shawnee Steam Plant.
5. Req. No. 98-42-3—Rail-to-barge transfer services for coal for Shawnee Steam Plant.
6. Amendment to Contracts 66P-76-T1 and 67P-76-T2 with General Electric for nuclear fuel for Browns Ferry Nuclear Plant.
7. Req. No. 55580 (second reissue)—Indefinite quantity term contract for office furniture.
8. Req. No. 72—Spot coal purchase for Kingston Steam Plant.

D. Project Authorizations

1. No. 3335—Pickwick Landing Project—repair bridge deck over dam.
2. No. 3333—Purchase spare generator rotor for Cumberland Steam Plant Units 1 and 2.
3. No. 3336—Federal-American Partners uranium mining project, Gas Hills, Wyo.

E. Fertilizer Items

None.

F. Power Items

1. Deed and bill of sale to the Electric Plant Board of the city of Franklin Kentucky—13-kV switching facilities at TVA's Franklin Substation site.
2. Lease and amendatory agreement with city of Tullahoma, Tennessee—Tullahoma District Substation and a portion of North Tullahoma 161-kV Substation.
3. Lease and amendatory agreement with city of Milan, Tennessee—Milan 161-kV Substation, Milan District 69-kV Substation, and the proposed South Milan Substation site.
4. Lease and amendatory agreement with city of Cookeville, Tennessee—East Cookeville Substation.
5. Lease and amendatory agreement with Pontotoc Electric Power Association—TVA's Pontotoc 161-kV and Ecru 46-kV Substations.
6. Lease and amendatory agreement with Tishomingo County Electric Power Association—TVA's Belmont and Tishomingo Substations and Tishomingo-Belmont 46-kV Line.
7. Lease and amendatory agreement with Blue Ridge Mountain Electric Membership Corporation—TVA's Wood Grove Substation and Hayesville-Wood Grove 69-kV Line.

G. Real Property Transactions

1. Agreement with State of Tennessee Department of Transportation and Stewart County, Tennessee, for transfer of State Highway 49.
2. Grant of permanent easement for public road right of way affecting approximately 1.17 acres of Guntersville Reservoir land in Jackson County, Ala.—tract XTGR-125H.
3. Grant of 30-year easement to Claiborne County, Tenn., for public recreation facilities, affecting approximately 33.3 acres of Norris Reservoir land—tract XTNR-101RE.
4. Reconveyance to TVA of 0.21 acre of Cherokee Reservoir land in Grainger County, Tenn., and grant of permanent easement to the trustees of Harrell Cemetery for public cemetery expansion—tract XTCK-29.
5. Reconveyance to TVA of certain land on Chickamauga and Fort Patrick Henry Reservoirs—tracts XTCR-21, XTCR-51, and portion of tract XTFHR-4.
6. Sale of certain Tims Ford Reservoir land at public auction—tracts XTMFR-6 and XTMFR-7.
7. Filing of condemnation suits.

H. Unclassified

1. Severance pay for Board secretaries.

Dated: May 4, 1978.

The Board will also conduct the preliminary rate review. In connection with the Board's quarterly financial review, information concerning current and anticipated conditions and costs affecting TVA's power operations and the adequacy of revenues to meet the requirements of the TVA Act and the tests and provisions of its bond resolutions will be discussed with the Board. This information will be considered by the Board in its later determination as to whether an adjustment of the rates and charges for the sale of electric power will be necessary during the quarter beginning July 1, 1978.

CONTACT PERSON FOR MORE INFORMATION:

John Van Mol, Director of Information, or a member of his staff can respond to requests for information about this meeting. Call 615-632-3257, Knoxville, Tenn. Information is also available at TVA's Washington Office, 202-566-1401.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 115—SCHOOL ASSISTANCE IN FEDERALLY AFFECTED AREAS

Final Regulation

AGENCY: Office of Education, Department of Health, Education, and Welfare.

ACTION: Final regulation.

SUMMARY: This document sets forth the requirements governing the awarding of Federal assistance to school districts related to certain types of children receiving free public education in areas affected by Federal activities. They are being promulgated to bring current regulations into conformance with the amendment to Pub. L. 81-874 made by Pub. L. 93-380. The effect of the regulation is to provide entitlements for handicapped children residing on Indian lands or whose parents are in the uniformed services and for educationally deprived children who live in and/or whose parents are employed on federally assisted low-rent public housing property.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), this regulaltion has been transmitted to the Congress concurrently with the publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

William L. Stormer, Division of School Assistance in Federally Affected Areas, telephone 202-245-8427.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 305(a)(1) of the Education Amendments of 1974 revised section 3 of Pub. L. 81-874, which covers the computation of entitlements based on numbers of federally-connected children and section 305(a)(2) revised section 5, which covers the allocation of payments authorized under Pub. L. 81-874, the Impact Aid Program.

Section 3(d)(2)(C) of the Act provides for increased assistance for handicapped children who reside on Indian lands or who have a parent in the uniformed services. The regulation explains the method of computing entitlements for these children and establishes certain requirements for using these funds. Section 5(e)(3) of the Act provides that funds may be paid to an applicant agency for special programs for educationally deprived children. These funds are paid on the basis of the number of children who reside in and/or with a parent employed on eligible low-rent housing property. These two entitlements relating to handicapped children and children associated with low-rent housing are treated, respectively, in Subpart H, formerly published as § 115.28, and in Subpart I, formerly published as § 115.29 in the notice of proposed rulemaking.

1. MAJOR AMENDMENTS TO THE REGULATION

A. *Subpart H—Handicapped Children and Children With Specific Learning Disabilities.*

Subpart H sets forth provisions affecting the determinations for increased entitlements under section 3(d)(2)(C) of the Act and the use of funds attributable to these payments. Certain terms such as "handicapped children" and "children with specific learning disabilities" are defined in § 115.70(c). These are the definitions used in the Education of the Handicapped Act. Eligibility requirements for counting children for these purposes are that these children must have a parent on active duty in the uniformed services or reside on Indian lands and must be receiving services suited to their educational and related needs on the basis of the statutory requirements for these services (§ 115.71(a)).

In determining whether programs for children counted under this provision would meet the statutory requirement of being "sufficient size, scope, and quality to give reasonable promise of substantial progress toward meeting the special educational and other related needs of such children," the standards of the State in which the local educational agency is situated would apply (§ 115.73(a)). However, these State standards must conform to the policies and procedures established under sections 612 and 613 of the Education of the Handicapped Act (§ 115.73(b)). Applicants seeking to count children under this provision are required under § 115.73(b) to submit an assurance that these children are receiving appropriate services, and this assurance would have to be certified by the division in the State educational agency charged with the supervision of the programs under local auspices. Thus, in certifying programs which provide services for children counted under this provision of Pub. L. 81-874, each State shall apply its own standards for the programs so long as the State standards comply with the requirements of sections 612 and 613 of the Education of the Handicapped Act.

Section 412(b) of the General Provisions Act (20 U.S.C. 1225(b)) is applicable to Pub. L. 81-874 funds attributable to handicapped children or children with specific learning disabilities. Application of this provision will permit recipient local educational agencies to use funds through the fiscal year following the fiscal year for which the funds were appropriated.

B. *Subpart I—Entitlements Related to Low-Rent Public Housing.*

Subpart I sets forth requirements to ensure that payments made under Pub. L. 81-874 based on the number of children residing on or residing with a parent employed on low-rent public housing property, as determined under section 5(e) of the Act, are used for special programs and projects designed to meet the special educational needs of educationally deprived children from low-income families.

Section 115.81(b) establishes the following order of priority for the use of these funds:

(1) To be used for Title I, ESEA programs and projects that would be diminished or discontinued because of the new Title I allocation formula adopted under Pub. L. 93-380, where such a determination is possible; or

(2) To provide Title I programs and projects in eligible Title I areas which otherwise would be unfunded;

(3) To supplement existing Title I programs;

(4) To provide Title I-type programs for educationally deprived children in attendance areas of the local educational agency that do not meet the eligibility requirements under Title I, ESEA.

With regard to the first priority, it is recognized that it may not be possible for a school district to attribute the elimination or reduction of a particular program to the adoption of the new Title I, ESEA formula. In these instances, these funds must be used in unfunded eligible attendance areas, if any. Only when these needs have been fully met may the funds be used to provide Title I-type programs. Furthermore, if there are no unfunded eligible areas, the school district may use funds in accordance with the last two priorities. School districts are encouraged to serve ineligible areas in the order established for Title I. The use of these funds to further Title I purposes is prescribed in the legislative history of the provisions (S. Rept. 93-1026, p. 162 (1974)).

In administering section 5(e), the Office of Education utilizes the personnel and organizational structure already involved in the provision of Title I-type services in order to avoid a duplication of administrative functions. Applications are submitted through the State educational agency, according to procedures under § 115.11. However, it will be necessary for the applicant to obtain certification from the State Title I component regarding the applicant's assurances that these funds are to be used in Title I or Title I-type programs in conformity with this regulation. Monitoring is to be done by the State educational agency Title I monitoring component. This will avoid duplication of monitoring in programs where most of these funds are expected to be used.

2. COMMENTS ON THE PROPOSED REGULATION

Interested parties were given 30 days in which to submit written comments, suggestions, or objections regarding the proposed final regulation. (The Notice of Proposed Rulemaking was published in the FEDERAL REGISTER on December 5, 1975.) A summary of the comments and responses follows. The comments are arranged in order of the subparts of the final regulation to which they apply. For additional clarity, reference section numbers are included in this response to comments as they appear in the regulation followed by the section numbers in brackets [ ] as they appeared in the notice of proposed rulemaking.

A. *Subpart H—Entitlements Related to Handicapped Children. Comment.* One commenter declared that § 115.71 [§ 115.28], on entitlements related to handicapped children of uniformed services personnel, was inconsistent with recent Federal legislation on education of the handicapped and should conform to it. The commenter, however, did not specify the particulars to which he referred.

Response. No change has been made in the regulation. The regulation is consistent with the Education of the Handicapped Act, from which the definitions in § 115.70 [§ 115.28] of "handicapped children" and "children with specific learning disabilities" are taken.

Comment. Two commenters observed that § 115.71 [§ 115.28(c)(1)] restricts eligibility for being counted for the purpose of an increased entitlement under section 3(d)(2)(C) of the Act to handicapped children and children with learning disabilities, limiting eligibility to those who have a parent on active duty in the uniformed services and excluding children who live on Indian lands. The commenters referred to section 3(d)(2)(C)(i) of Pub. L. 81-874 with respect to those children for whom a determination is made under section 3(a)(2) and stated that section 3(d)(2)(C) did not mention uniformed services. They also pointed out that children residing on Indian lands comprise the second of two groups of children and are in addition to those with a parent on active duty in the uniformed services for whom a determination is made under clause (2) of section 3(a). The commenters argued that the law, on the surface, did not allow a ruling that would authorize a distinction between the treatment of the handicapped children of uniformed services personnel and handicapped children living on Indian lands.

Response. The regulation has been changed. The interpretation of the commenters was sustained in *Chinle Common School District* v. *Mathews*, Civil No. 76-1273 (DC, D.C., 1976). The regulation allows school districts to be compensated for handicapped children of uniformed services personnel or for those who reside on Indian lands under section 3(d)(2)(C).

Comment. One commenter remarked that the submission of information required in § 115.72 [§ 115.28(d)] should be undertaken if and when requested by the Commissioner. The section states that an applicant which claims an increased entitlement under section 3(d)(2)(C) of the Act shall be required to submit information the Commissioner may deem necessary to substantiate compliance with this condition. The commenter said that this information may not be needed from all applicants requesting an increase in entitlement.

Response. The regulation has been clarified to meet the concerns of the commenter. An applicant need not submit the information in the application but may be asked to do so later to assure compliance with the regulation.

Comment. One commenter stated that § 115.73(b) [§ 115.29(c)], in effect, imposed a State plan on local educational agencies, and the commenter declared that the law did not require State approval for each administrative action by a local educational agency, and that no Congressional committee had contemplated or discussed the idea of a State plan for aid under Pub. L. 81-874.

Response. No change has been made in the regulation. The regulation provides for the application of State standards to the programs provided by local educational agencies in which the handicapped children and children with specific learning disabilities are participating. Legislative history indicates that Congress contemplated that State standards would be sufficient for certifying these programs if they were in line with Education of the Handicapped Act requirements.

House Report No. 93-805 states, on page 45, with reference to the programs provided by local educational agencies for eligible children, that the determination of size, scope, and quality shall be based upon the individual State's standards for certification of these programs, and that each State must certify the particular programs. That report further indicates that the Commissioner must also require satisfactory assurance that all local educational agency programs for handicapped children counted under that part are in compliance with requirements now set forth under sections 612 and 613 of the Education of the Handicapped Act.

For the purposes of Pub. L. 81-874, the State merely has to certify conformance of the applicant's program with the policies and procedures required under the Education of the Handicapped Act.

Comment. One commenter objected to the citation in § 115.73(b) [§ 115.28(f)] of section 613(a) of the Education of the Handicapped Act stating the citation did not apply to Pub. L. 81-874 since it set forth procedures for qualifying for a grant under a State plan which Pub. L. 81-874 did not require.

Response. A clarification has been made in the wording in the regulation. As the previous response indicates, the legislative history makes clear that Congress intended that programs for handicapped children and children with learning disabilities under section 3(d)(2)(C) of the Act were to conform to policies and procedures required under the Education of the Handicapped Act.

B. *Subpart I—Low-rent Housing Entitlements. Comment.* Two commenters brought up the question of children eligible to be counted in computing entitlements pertaining to low-rent public housing, but who do not attend school in the district in which they live, or who attend school outside the area eligible for Title I aid. One commenter said a statement was needed under § 115.82 [§ 115.29] to the effect that "the money follows the child," as he said was provided by Title I regulations. The other commenter said that these children were excluded from sharing in any benefits from funds that their presence helped to bring to the school district.

Response. No change has been made in the regulation. Section 3(a) of Pub. L. 81-874 states that children, in order to be included among the number for whom a determination is made for the entitlement computations, are to have been in average daily attendance at the schools of the applicant agency that provided free public education for them. The use of payments made to a local educational agency under section 5(e) may include the provision of educational benefits to educationally deprived children from low-income families who do not live or work on low-rent public housing property. The statute does not limit the use of funds to children counted for entitlement purposes. It is possible that children may not receive services even though

MAY 8 1978

V 4 3 / 8 9

their enrollment occasioned payments to their school district.

Comment. One commenter raised the issue whether children of families receiving welfare payments and living in public housing projects should be classified under section 3(a) or 3(b) of the Act. The commenter said that the proposed regulation failed to provide guidance on that question. The commenter argued that students living in housing projects whose parents receive welfare should be counted under section 3(a). The commenter said that counting those students under section 3(a) rather than 3(b) would agree with the intent of Congress because it would restore funds lost to local school systems through the change made by Pub. L. 93-380 in the formula for the distribution of assistance under Title I of the Elementary and Secondary Education Act. The commenter also said that including children under 3(a) would be consistent with the distinction drawn by section 3 of Pub. L. 81-874 between parents who lived and worked on Federal property and those who met only one of those conditions because, usually being unemployed, those parents make no indirect contribution to the tax revenues of local educational agencies. Families on welfare living on low-rent public housing property are more like the families classified under section 3(a) than 3(b).

Response. No change has been made in the regulation. Whether a child living in low-rent public housing with a parent who receives welfare payments should be counted under section 3(a) of the Act is governed by the provision of that section and not section 5(e)(3). The legislative history of section 3 clearly indicates that children living in federally assisted low-rent public housing are not to be considered section 3(a) children without a second "Federal connection" (H. Rept. 93-805, p. 42 (1974)). To include a child living in low-rent public housing in the number determined under section 3(a), the child's parent must be employed on Federal property or be on active duty in the uniformed services.

Comment. A commenter said that § 115.81 [§ 115.29] made the public housing provisions a categorical Title I program. The commenter said that although the reports mentioned services to the kinds of children designated in Title I, legislation was not included in Pub. L. 81-874. If Congress had intended funds to be paid under Title I procedures for students in public housing, Part C of Title I would have been completely retained, and provisions for public housing students would have been added as an additional program.

Response. No change has been made in the regulation. The legislative history clearly relates the use of these payments to Title I or Title I-type services.

Comment. One commenter expressed concern that §§ 115.74 [§ 115.28] and 115.81 [§ 115.29] on entitlements relative to handicapped children and to low-rent public housing might require a local educational agency to budget and spend funds in the amount of estimated entitlements for these categorical purposes before actual receipt of even partial payments for those entitlements. The commenter said that such a requirement would be an extreme hardship for any local educational agency, particularly during periods when borrowing costs are excessive.

Response. No change has been made in the regulation. The comment appears directed not to the regulation, but to the practical consequences of Pub. L. 81-874 funds being unavailable for payment until sometime later in the school year. Payments will be made in accordance with established procedures. However, school districts may use these funds in the fiscal year following the year for which they were allocated. This gives the recipient school district the choice of holding the funds for future expenditure or of reimbursing itself for funds already spent.

Comment. One commenter stated that the provisions in § 115.86 [§ 115.29] relating to low-rent public housing entitlements were stated too generally. The commenter asked whether funds had to be expended within a given period and whether evaluations like those of Title I would be necessary. The commenter felt the intent of the legislation would be lost if it had to conform both to Pub. L. 81-874 and to Title I, ESEA.

Response. The regulation has been rewritten in part to be more specific and to reflect changes made in response to public comments or administrative reconsideration of the proposed rule. Funds must be expended by the end of the fiscal year succeeding the fiscal year for which they were allocated. Evaluations like those required under Title I must be made annually [§ 115.86]. It is clear from the legislative history that Congress intended that section 5(e) funds would provide a Title I-type program. Thus, it is appropriate that basic Title I-type provisions apply to the use of these funds in order that purposes similar to those of Title I will be fulfilled.

Comment. A commenter said the regulation in § 115.84(b) [§ 115.29] seemed to require a value judgment in determining whether any needs were unmet in Title I, ESEA areas. He said there were always many unmet needs because the application of Federal Title I and State requirements restricted possible program endeavors to a very narrow range of eligible reading activities.

Response. No change in the regulation has been made. There is a presumption of unmet needs in eligible areas which have approvable projects but do not have Title I assistance. Until those needs are filled, funds resulting from entitlements relative to low-rent public housing may not be spent in non-Title I attendance areas.

Comment. A commenter cited section 421(c)(2)(B) of the General Education Provisions Act to contest that either Pub. L. 81-874 or Title I, ESEA gave State educational agencies authority over the use of funds for Pub. L. 81-874. Section 421(c)(2)(B) of the General Education Provisions Act prohibits any limitation on the use of funds to carry out any applicable program other than limitations imposed by the law authorizing the appropriation or a law controlling the administration of the program.

The commenter further pointed out that section 421(c)(1)(C) of the General Education Provisions Act forbids the commingling of funds from two different appropriations and provides conditions for the approval of an application for funds from an appropriation that is based upon criteria other than those for which provision is made in the law authorizing the appropriation. The commenter said nothing in Pub. L. 81-874 gives any State agency approval authority or imposes Title I, ESEA requirements. In the opinion of the commenter, section 5(e)(3) simply provides that funds derived from entitlements based on children from low-rent public housing must be used for special programs and projects designed to meet the special educational needs of educationally deprived children from low-income families. In addition, the commenter argued that the imposition by § 115.81 [§ 115.29] of rigid priorities on the types of projects to be funded was based on an expression of intent that was not the law, that could not override section 421(c)(1) of the General Education Provisions Act, and that could not be used to create a new administrative mechanism and impose new requirements.

Response. No change has been made in the regulation. While certain requirements of the regulation may not be explicitly set out in the statute, they are, nevertheless, clearly set forth in the legislative history of the statute. The purpose of interpreting and implementing any statute is to effect the will of the legislature. To disregard the express will of Congress as reflected in the Committee reports, in this instance, would operate to defeat the purposes for which this provision was adopted. Therefore, this regulation does not conflict with section 421(c)(2)(B) of the General Education Provisions Act. Furthermore, since the funds provided under section 5(e)(3) of Pub. L. 81-874 will be subject to separate accountability from funds

M Y 8 7 8 M

provided under Title I, ESEA, the use of these funds in jointly funded projects would not constitute commingling.

Comment. One commenter expressed support for the priorities in § 115.81(b) [§ 115.29(b)(1)] regarding the use of funds under section 5(e) and for the ban stated in § 115.81(e) [§ 115.29(c)] against the consolidation of those funds with other payments under the Act or with funds from other sources. The commenter also stated a concern that the phrase "shall serve only * * * educationally deprived children from low-income families" was subject to an interpretation that would require children from low-income families served with funds authorized under the Act to be segregated from other educationally disadvantaged pupils. The commenter characterized as potentially inconsistent the use of the word "only" and the stipulation that the criteria for the participation of the children approximate those with respect to Title I, ESEA.

The commenter pointed out that under Title I, ESEA, schools and not children are selected to receive funds on the basis of the poverty of the residents of the area, and the children in those schools participate on the basis of educational need whether or not their families are impoverished. The commenter said that he did not believe that Congress intended section 5(e)(3) to result in the stigmatization or identification of low-income students receiving remedial services. The commenter expressed the view that section 5(e)(3) deals with the design of programs rather than the delivery of services and does not compel the restriction of compensatory services only to low-income children.

Response. The regulation has been changed in response to the comment. There is no indication of Congressional intent to exclude from the services of these projects, children who are educationally deprived in other ways besides being from low-income families. The evident intent that the provisions of Title I, ESEA and section 5(e) be coordinated implies the inclusion not only of children from low-income families, but also of all educationally deprived children in participation in the benefits of these programs.

Comment. A commenter said he interpreted § 115.29(b)(2) of the proposed rule to mean that the amount of payment would be used to benefit all children of low-income families. This would involve dual criteria for serving the same children as served by Title I, ESEA. He recommended changing the phrase "may consider" in the last sentence of the section to "shall only consider" to restrict the provision of services to the children of the stated categories.

Response. The regulation has been changed so that educationally deprived children from low-income families are not distinguished from other educationally deprived children. All educationally deprived children may be served in programs assisted by section 5(e) funds. A local educational agency is not required to make low-income determinations under this program.

Comment. One commenter hoped the text of § 115.81(b) [§ 115.29(d)] could be republished in proposed rather than in final form after a determination had been made with respect to the sections of the Act and regulations of Title I of the Elementary and Secondary Education Act that do not apply to the activities authorized by Pub. L. 81-874.

Response. No change in the regulation is necessary. Certain sections of the Title I regulations and statutory provisions were mentioned in the notice of proposed rulemaking as possibly inapplicable to this regulation. Some interested parties did respond to the request for further suggestions, objections, and comments as to which of these Title I provisions should apply. The public interest would not be served to delay the final promulgation of this regulation and thereby keep recipients from receiving authoritative guidance in making plans for the use of funds during the school year.

Comment. Certain comments addressed the applicability of particular Title I, ESEA requirements to activities conducted in accordance with section 5(e) of the Act regarding public low-rent housing funds. One commenter opposed the suggested exclusion of 45 CFR 116.4(b), which allows spending one percent of the Title I allocation on State administrative expenses. The commenter felt that including this section would emphasize the States' obligation to monitor the compliance of local educational agencies in restricting use of funds to special programs and projects designed to meet the special educational needs of educationally deprived children from low-income families. The commenter pointed out that, although Pub. L. 93-380 authorized no funds for State administrative costs, the notice of proposed rulemaking stated, "The Office of Education plans to utilize the personnel and organizational structure already involved in the provision of Title I-type services in order to avoid a duplication of administrative functions." The commenter said it was appropriate to treat State administrative expenses directly attributable to the monitoring of programs under section 5(e)(3) as permissible Title I State administrative expenses.

Another commenter protested that the one percent allowance was not nearly enough to provide the services and meet the demands that the Office of Education placed on the State educational agency for the administration of Title I, ESEA, and insisted that a more realistic amount be specified.

Response. No change has been made in the regulation. Funds appropriated for Pub. L. 81-874 are provided entirely for making payments to eligible local educational agencies. There is no authority for the Commissioner to allocate any funds to which local educational agencies are entitled to State educational agencies. Therefore, no question remains in regard to the Commissioner's authority to provide more than 1 percent. The States have already assumed certain administrative duties and expenses for which it is not reimbursed by Pub. L. 81-874 funds.

Comment. A commenter said it was not understood why the principle in § 116.20 regarding Title I, ESEA, and in section 434(c) of the General Education Provisions Act, providing that further payments not be made to delinquents until they complied with the terms of their grants, should not apply to misexpenditures of section 5(e)(3) funds and Title I funds.

Response. No change has been made in the regulation. Section 434(c) of the General Education Provisions Act applies to all applicable Federal education assistance programs, including Pub. L. 81-874. Therefore, it is not necessary to provide for this in the regulation.

Comment. A commenter argued that it was unnecessary to exclude from section 5(e)(3) the applicability of provisions of 45 CFR 116.36(a) with respect to expenditures for property. The specific reference to the purposes of Title I in section 5(e)(3) could be interpreted to mean the purpose common to both Title I and section 5(e)(3) in meeting the special educational needs of educationally deprived children.

Response. The regulation has been amended in accordance with the suggestion of the commenter.

Comment. A commenter felt § 115.81 [§ 115.29] should be amended to allow the expenditure in the current fiscal year of funds allocated in the previous year, as in the case under Title I, ESEA regulations.

Response. The regulation has been changed in response to the comment.

Comment. A commenter recommended a change in § 115.81(f) [§ 115.29] to extend the effectiveness of the provisions under Title I in regard to indirect cost of the operation of programs under section 5(e).

Response. The regulation has been changed to provide that Part 100c of Title 45 CFR dealing with indirect cost apply to programs under section 5(e).

Comment. A commenter said, in reference to § 115.84 [§ 115.29(e)], that

V 4 3 / 8 9

$11 million made it worth the while of his local educational agency to endure the extreme complexity and time consumption of the application process under Title I and the expense of the application, monitoring, reporting, and evaluation processes required by the law. Declaring his understanding that funds under Pub. L. 81-874 must remain identifiable for accountability purposes and that an entirely new accounting system would be required for any added programs, the commenter said it was questionable whether a grant about one-sixtieth (1/60) of the Title I amount would be worth the effort.

Response. The regulation has been changed so that, under section 5(e)(3), a description of a proposed project is required, rather than an application. If a project supplements an existing Title I project, only that part funded under section 5(e)(3) need be described. Accountability cannot be waived for these categorical funds.

Comment. A commenter asserted that there was no requirement under Pub. L. 81-874, as amended by Pub. L. 93-380, for the State to monitor programs of aid to federally affected areas and demanded that this requirement and all others relevant to it be dropped. The commenter said that the law required only assurances; anything in addition was not authorized. The commenter added that if Congress had wanted to give additional authority to the Office of Education or the Commissioner, it would have done so as it did in section 3(d)(2)(C)(iii) of Pub. L. 81-874, as amended by Pub. L. 93-380.

Another commenter favored the use of the regular State Title I monitoring components rather than the use of special services contracts between the Office of Education and the State agencies to implement the injunction that the State agency notify the Commissioner if a local educational agency has failed to comply with the terms of its application. The commenter expressed the view that, in most instances, local educational agencies would replace former ESEA Title I programs with others under section 5(e)(3), that the cost of monitoring the section 5(e)(3) programs might be considered part of a State's expenses in administering the Title I program, and that funds allocated to programs under section 5(e)(3) should not be diverted to fund special service contracts.

Response. The regulation has been rewritten to specify that the State educational agency should monitor the expenditures of section 5(e) funds by applicants. The Conference Report, Senate Rept. No. 93-1026, states on page 162, "The State education agency should monitor the expenditures of these funds for public housing since that agency has responsibility for monitoring the expenditure of Title I, ESEA."

NOTE.—The Office of Education has determined that this document does not contain a proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Program No. 13.478, School Assistance in Federally Affected Areas—Maintenance and Operation.)

Dated: January 18, 1978.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: April 26, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

Part 115 is amended by adding Subpart H and Subpart I to read as follows:

Subpart H—Handicapped Children and Children With Specific Learning Disabilities

Sec.
115.70 General.
115.71 Eligibility requirements.
115.72 Application procedures.
115.73 Assurances and certifications.
115.74 Use of section 3(d)(2)(C) funds.
115.75 Per pupil expenditure requirement.
115.76 Relation to section 5(d)(2) of the Act.
115.77 Children in private schools.
115.78 Individualized educational programs and parental involvement.
115.79 Applicability of other statutory and regulatory requirements.

AUTHORITY: (20 U.S.C. 238, 240, 242(b)).

Subpart H—Handicapped Children and Children With Specific Learning Disabilities

§ 115.70 General.

(a) *Scope.* The regulation in this Subpart governs the provision of financial assistance to local educational agencies which provide free public education to handicapped children who are claimed under section 3(d)(2)(C) of the Act. The regulation, however, is not alone in governing the relationship between the local educational agency and the handicapped child. Other statutes and regulations which may be pertinent in a particular instance are section 504 of the Rehabilitation Act of 1973 (20 U.S.C. 706 and 45 CFR Part 84 ff.), the Education of the Handicapped Act, as amended by the Education for All Handicapped Children Act of 1975 (20 U.S.C. 1401 et seq. and 45 CFR Part 121 ff.), and section 121 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 241c-1 and 45 CFR Part 116).

(b) *Purpose.* The purpose of the regulation in this Subpart is to set forth the requirements, interpretations, and guidance necessary to implement section 3(d)(2)(C) of the Act.

(c) *Definitions.* For the purposes of this Subpart, the following terms are defined as indicated:

(1) "Children with specific learning disabilities" means those children who have a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, which may manifest itself in imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. These disorders include conditions such as perceptual handicaps, brain injury, minimal brain disfunction, dyslexia, and developmental aphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or motor handicaps, of mental retardation, or of environmental, cultural, or economic disadvantage.

(2) "Education of the Handicapped Act" means Pub. L. 91-230, as amended (20 U.S.C. 1401 et seq.).

(3) "Free public education" means free appropriate public education as used in the Education of the Handicapped Act and as defined in 45 CFR 121a.4. In particular, this means special education and related services which:

(a) Are provided at public expense, under public supervision and direction, and without charge,

(b) Meet the standards of the State educational agency, including the requirements of this part,

(c) Include preschool, elementary school, or secondary school education in the State involved, and

(d) Are provided in conformity with an individualized education program which meets the requirements under 45 CFR 121a.340-121a.369.

(4) "Handicapped children" means mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, orthopedically impaired, or other health impaired, deaf-blind, multi-handicapped children, or as having specific learning disabilities, who because of those impairments need special education and related services.

(5) "Preschool program" means an educational or related program encompassing the educational level from a child's birth to the time at which elementary education is provided as determined under State law, provided that this program is recognized as free public education under State law.

(6) "Related needs" means those needs related to a handicap or specific learning disability for which related services, in addition to direct instructional services, are deemed necessary so that the child may effectively participate in the instructional program of the local educational agency.

(7) "Related services" means transportation and other developmental, corrective, and other supportive services (including speech pathology and audiology, psychological services, physical and occupational therapy, recreation, and medical and counseling services, except that these medical services shall be for diagnostic and evaluation purposes only) required to assist a handicapped child to benefit from special education, and includes the early identification and assessment of handicapping conditions in children.

(20 U.S.C. 238(d)(2)(C).)

§ 115.71 Eligibility requirements.

(a) In order that a handicapped child may be counted for the purpose of an increased entitlement under section 3(d)(2)(C) of the Pub. L. 81-874, the Act requires that a child must—

(1) Have a parent on active duty in the uniformed services, as defined by section 101 of Title 37 United States Code, or

(2) Reside on Indian lands, as described in section 403(1)(A) of the Act;

(3) Be receiving services suited to the child's special educational and related needs; and

(4) Be enrolled in a program (including a preschool program if appropriate) which is of sufficient size, scope, and quality to give reasonable promise of substantial progress toward meeting the child's special educational and related needs provided as part of free public education in the local educational agency.

(b) The applicant agency must meet the regular eligibility requirements of Pub. L. 81-874 under section 3(c) to receive the increase in entitlement under section 3(d)(2)(C). However, there is no minimum number of handicapped children who must be served for the agency to receive the increase in entitlement.

(c) The program provided the handicapped children claimed under section 3(d)(2)(C) of the Act must conform to State standards for programs for handicapped children and must encompass the specific educational and related needs of the children claimed.

(20 U.S.C. 238(a)(b)(d)(2)(C); 240(f); Sen. Rept. No. 93-1026, p. 159 (1974); *Chinle Common School District* v. *Mathews*, Civil No. 76-1273 (D. D.C., 1976).)

§ 115.72 Application procedures.

(a) The applicant agency must state the number of handicapped children it claims under section 3(d)(2)(C) of the Act in the application filed in accordance with procedures set forth in Subpart B of this regulation published separately.

(b) The applicant agency must provide the assurances and certifications required under § 115.73 of this Subpart as part of the application mentioned in paragraph (a).

(c) The Commissioner may require information in addition to that contained in the application in order to substantiate compliance with assurances provided with the application.

(20 U.S.C. 238(d)(2)(C), 242.)

§ 115.73 Assurances and certifications.

(a) *Size, scope, and quality of the programs.* (1) For each applicant for assistance under the Act which is based in any part upon children who are counted under section 3(d)(2)(C) of the Act, the applicant agency must provide an assurance that these children are receiving services in programs (including preschool programs) which are of sufficient size, scope, and quality to give reasonable promise of substantial progress toward meeting the special educational and related needs of these children. The Commissioner will consider any special education program serving the special educational needs of these children which conforms to the requirements for special education programs under Part B of the Education of the Handicapped Act as satisfying the assurance.

(2) For each application containing the assurance required by paragraph (a)(1) of this section, the applicant agency must also provide a certification from its State educational agency that the particular program(s) provided by the applicant conform(s) to State standards for programs for these types of children.

(b) *Education of the Handicapped Act requirements.* (1) For each applicant for assistance under the Act which is based in any part upon a determination under section 3(d)(2)(C) of the Act, the applicant agency must provide an assurance that the programs designed to meet the special educational and related needs of children determined under that section conform to the policies and procedures required in fulfillment of requirement under sections 612 and 613 of the Education of the Handicapped Act.

(2) For each application containing the assurance required by paragraph (b)(1) of this section, the applicant agency must provide a certification from the State educational agency that the program provided by the applicant conforms to the requirements of sections 612 and 613 of the Education of the Handicapped Act.

(3) In undertaking any further determination whether these State standards and programs conform to the policies and procedures required under sections 612 and 613 of the Education of the Handicapped Act, the Commissioner shall consult with persons in charge of special education programs for handicapped children and children with specific learning disabilities in the State education agency.

(20 U.S.C. 238(3)(2)(C); H.R. Rept. No. 93-805, pp. 43-46 (1974); Sen. Rept. No. 93-1026, p. 45 (1974); Cong. Record, daily ed., H7396, July 31, 1974)

§ 115.74 Use of section 3(d)(2)(C) funds.

(a) *General.* Section 5(f) of the Act requires that the amount of a payment to an applicant which is attributable to a determination under section 3(d)(2)(C) of the Act must be used for special programs and projects designed to meet the special educational needs of the children counted under that provision. Only payments related to the increase in entitlement affected by section 3(d)(2)(C) must be used in this manner. Payments related to the basic entitlement provided under section 3(c) for those children do not have to be used in this manner.

(20 U.S.C. 240(f))

(b) *Duration of availability of funds.* An applicant may obligate and expend funds received for section 3(d)(2)(C) until the end of the fiscal year succeeding the fiscal year for which they were appropriated. The recipient agency must return those funds to the U.S. Office of Education that it has not obligated by the end of that period.

(20 U.S.C. 1225(b))

(c) *Methods of obligation and expenditure of funds.* Obligations and expenditures may be incurred for the uses authorized under section 5(f) of the Act and paragraph (a) of this section in either of two ways:

(1) The applicant agency may reimburse itself for obligations or expenditures from local funds already made during the fiscal year for which the funds were appropriated or during the following fiscal year. Those obligations or expenditures must have been for appropriate programs or projects serving the children from whom the funds under section 3(d)(2)(C) were paid; or

(2) The applicant agency may obligate or spend these funds on a current basis during the fiscal year for which the funds were appropriated or during the following fiscal year. The obligations or expenditures must be for programs or projects serving the children for whom the funds under section 3(d)(2)(C) were paid.

(20 U.S.C. 238(d)(2)(C), 240(f), 242)

(d) *Allowable expenditures.* An agency receiving funds under section 3(d)(2)(C) of the Act shall use those funds for the following types of expenditures:

(1) Expenditures which are reasonably related to the conduct of programs or projects for the education of handicapped children which meet the requirements of this section. These expenditures may include planning, evaluating and disseminating of the results of those programs or projects but may not include the construction of school facilities;

(2) Expenditures for equipment to meet the special educational needs of

MY 8 7 8 M

V 4 3 / 8 9

the handicapped children counted under section 3(d)(2)(C). If funds received under section 3(d)(2)(C) of the Act are used for the acquisition of equipment and any financial advantage is realized through bargains, rebates, discounts, bonuses, free pieces of equipment (not used in the program or project covered by this paragraph) or other circumstances, the fair market value of that financial advantage is not an allowable expenditure and shall not be credited as an expenditure of those funds.

In no case may funds provided by section 3(d)(2)(C) be used to acquire equipment when the title to that equipment would be in a private school and not in the applicant agency.

(e) *No supplanting of State funds.* The use of funds provided under section 3(d)(2)(C) of the Act shall not supplant any State funds which were or would have been available to the applicant agency for the free public education of children counted under section 3(d)(2)(C).

(1) The applicant agency must spend at least the same amount, per pupil, of State general aid funds and State handicapped education funds on children counted under section 3(d)(2)(C) as it does for other similarly handicapped children enrolled in the schools of the agency.

(2) A reduction in the amount, per pupil, of State aid spent on children counted under section 3(d)(2)(C) of the Act from that spent in a previous year raises a presumption that supplanting has occurred. This presumption may be rebutted by the applicant agency demonstrating that an equivalent reduction was made in the amount, per pupil, spent on other handicapped children enrolled in the schools of the agency.

(20 U.S.C. 235, 238, 240 and 242(b).)

§ 115.75 Per pupil expenditure requirement.

(a) *Expenditures for children eligible under section 3(d)(2)(C).* Expenditures per pupil by an applicant agency from State, local, and section 3(d)(2)(C) funds for handicapped children enrolled in programs serving children counted under section 3(d)(2)(C) must be greater than the expenditure per pupil for all children, other than handicapped children, receiving free public education in the schools of that agency.

(b) *Computation.* In determining whether an agency fulfills the requirement stated in paragraph (a) of this section, the following computations must be made:

(1) Divide the total current expenditures from State, local, and section 3(d)(2)(C) funds for special educational programs by the total number of children who are being served in the special educational programs of the agency.

(2) Divide the total current expenditures from State and local funds for children receiving a free public education from the agency who are not handicapped children by the total number of those children who are not handicapped.

(3) If the figure obtained under paragraph (b)(1) exceeds the figure obtained in paragraph (b)(2), the applicant agency has fulfilled the requirement of paragraph (a) of this section.

(c) *Records and information required of an applicant agency.* An applicant agency which receives funds under section 3(d)(2)(C) must keep records of the expenditures for children receiving a free public education in its schools in such a manner to permit the computation set forth in paragraph (b) of this section. Furthermore, when requested, that agency must furnish to the Commissioner whatever information or data the Commissioner considers necessary to substantial compliance with the requirements of this section

(20 U.S.C. 238(d)(2)(C), 240(f); H. Rept. No. 93-763, p. 45 (1974).)

§ 115.76 Relation to section 5(d)(2) of the Act.

(a) Section 5(d)(2) of the Act provides that States having a State aid program designed to divide expenditures for children equally among local educational agencies in the State, which conform to Subpart B, may consider payments received by an agency under Pub. L. 81-874 as local resources in determining the need for or the amount of State aid allocated to that agency. A regulation setting forth these standards appears in Subpart B of this part.

(b) Whether or not a State has a program of State aid that meets the requirements of section 5(d)(2) of the Act, payments provided under section 3(d)(2)(C) may not be considered by a State in determining the need for or the amount of State aid which will be allocated to a local educational agency receiving those payments.

(20 U.S.C. 238(d)(2)(C), 240(d), (f), 242(b).)

§ 115.77 Children in private schools.

(a) An applicant may place a handicapped child in, or refer a handicapped child to a private school or facility, so long as it follows the policies and procedures for doing so established under section 613 of the Education of the Handicapped Act. Regulations implementing those policies and procedures are set forth in 45 CFR § 121a. The applicant must have placed the handicapped child in, or have referred the children to, the private school or facility that he or she is attending in order for the child to be counted under section 3(d)(2)(C) of Pub. L. 81-874.

(b) If placement in a public or private residential program is necessary to provide a free public education to a handicapped child because of his or her handicap, the program, including non-medical care and room and board, shall be provided at no cost to the child or his or her parents or guardian.

(c) Children who have been placed in private schools by the parents may participate in public school programs which use section 3(d)(2)(C) funds.

(20 U.S.C. 238, 240(f), 242(b), H. Rept. 93-763, p. 45 (1974).)

§ 115.78 Individualized educational programs and parental involvement.

(a) Each applicant must have in effect a written individualized educational program for a child counted under 3(d)(2)(C) of the Act. This program must:

(1) Be in effect before special education and related services are provided to the child; and

(2) Be implemented as soon as possible after meetings held for the purpose of developing, reviewing or revising the child's program.

(b) Each applicant must provide for the participation of and consultation with parents or guardians of handicapped children counted under section 3(d)(2)(C) of the Act in the children's educational development.

(c) Each applicant must take steps to insure the involvement of a handicapped child's parents or guardian in meetings held for the purpose of developing, reviewing or revising that child's educational program.

(d) Each applicant shall take steps to insure that one or both of the parents of the handicapped child are present at each meeting or are afforded the opportunity to participate, including:

(1) Notifying parents of the meeting early enough to insure that they will have an opportunity to attend; and

(2) Scheduling the meeting at a mutually agreed on time and place.

(e) The notice under paragraph (d)(1) of this section must indicate the purpose, time, and location of the meeting, and who will be in attendance.

(f) If neither parent can attend, the applicant shall use other methods to insure parent participation, including individual or conference telephone calls.

(g) A meeting may be conducted without a parent in attendance if the applicant is unable to convince the parents that they should attend.

(h) The applicant shall take whatever action is necessary to insure that the parent understands the proceedings at a meeting, including arranging for an interpreter for parents who are deaf or whose native language is other than English.

(i) The applicant shall give the parent, on request, a copy of the child's educational program.

(j) An applicant which satisfies, for children counted under section 3(d)(2)(C), the requirements of Part B of the Education of the Handicapped Act regarding the involvement of parents of handicapped children will have satisfied the requirements of this section.

(20 U.S.C. 238(d)(2)(C), 240(f), 242(b), 1231(d).)

§ 115.79 Applicability of other statutory and regulatory requirements.

(a) *Applicability of General Provisions Regulations.* Relevant provisions contained in parts 100a and 100c of this Chapter are applicable to programs conducted under section 3(d)(2)(C), with the following exceptions:

Sec.
100a.15 Applications for grants or contracts.
100a.26 Review of applications.
100a.27 Disposition of applications.
100a.31 Preapplications.

Subpart C—Application Forms for State and Local Governments

100a.54 Duration of projects.
100a.62 Payment methods for nonconstruction projects.
100a.71 Checks-paid basis letter of credit.

Subpart P—Financial Reporting Requirements

100a.405 Request for advance or reimbursement.

Subpart Q—Monitoring and Reporting of Program Performance

100a.432 Performance reports for nonconstruction projects.

(20 U.S.C. 1221c(b)(1); 20 U.S.C. 242(b); OMB Cir. A-102.)

(b) *Applicability of civil rights and related requirements.* Payments provided under section 3(d)(2)(C) are subject to the requirements of the following laws and regulations: Title VI of the Civil Rights Act of 1964 (45 CFR Part 80); Title IX of the Educational Amendments of 1972 (45 CFR Part 86); and section 504 of the Vocational Rehabilitation Act of 1973 (45 CFR Part 84).

AUTHORITY: 20 U.S.C. 238-240, 242(b), 244.

Subpart I—Entitlements Related To Low-Rent Public Housing

§ 115.80 General.

(a) *Scope.* The regulation in this Subpart concerns entitlements calculated under section 3 of the Act with respect to children who reside on low-rent public housing or who reside with a parent who is employed on low-rent public housing.

(b) *Purpose.* The purpose of the regulation in this Subpart is to implement the requirement stated in section 5(e)(3) of the Act that funds paid to local educational agencies with respect to the children described in paragraph (a) of this section must be used for special programs and projects designed to meet the special educational needs of educationally deprived children. This regulation establishes particular procedural and substantive requirements regarding the application for and use of these funds.

(c) *Definitions.* For the purposes of this subpart, the following terms are defined as indicated:

(1) "Educationally deprived children" means (1) children who have need for special educational assistance in order that their level of achievement can be raised to that appropriate for children of their age; and (2) children who are handicapped, as defined in 45 CFR 115.70(c).

(20 U.S.C. 240(e), 242(b), 1401(1).)

(2) "Low-rent public housing" means any low-rent public housing, whether or not owned by the United States, which is part of a low-rent housing project assisted under the United States Housing Act of 1937, section 516 of the Housing Act of 1949, or part B of title III of the Economic Opportunity Act of 1964.

(20 U.S.C. 240(e), 244(1)(c).)

(3) "Section 5(e)" means section 5(e) of Pub. L. 81-874.

(20 U.S.C. 240(e).)

(4) "Title I" means title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 241a et seq.).

(20 U.S.C. 240(e).)

§ 115.81 Use of section 5(e) funds.

(a) *General.* Section 5(e)(3) of the Act requires that an applicant which receives a payment based on a determination under section 5(e)(1) of the Act (payments attributable to children residing on, or residing with a parent employed on, low-rent public housing) use the funds from that payment only for special programs and projects designed to meet the special educational needs of educationally deprived children.

(b) *Use priorities.* An applicant receiving funds under section 5(e) must use those funds in the order stated below.

An applicant agency first has a choice of using the section 5(e) funds for either priority (1) or priority (2), or both, if applicable. However, it must fulfill the requirements of priority (2), if applicable, before proceeding to priority (3). It must then fulfill the requirements of priority (3) before proceeding to priority (4). The priorities are:

(1) *Agencies with reduced title I allocations.* If the local educational agency has:

(i) Received reduced allocations of title I funds because of the revision of the title I distribution formula in section 103 of Pub. L. 93-380 (Education Amendments of 1974); or

(ii) Received funds under subpart C of title I (as in effect before repeal by Pub. L. 93-380) during the period of July 1, 1973 to June 30, 1975, then it may use section 5(e) funds to continue or supplement existing title I programs in title I eligible school attendance areas already receiving title I assistance.

(2) *Unserved title I eligible areas.* If the local educational agency has school attendance areas which are eligible for title I assistance but which are not served by a title I program, the local educational agency may use the section 5(e) funds to provide programs for educationally deprived children in those areas.

(3) *Other title I programs.* If all eligible title I school attendance areas which did not receive title I funds are served by a section 5(e) program, the local educational agency may use any balance of these funds to supplement existing title I programs in other title I eligible areas.

(4) *Other school attendance areas.* If title I or section 5(e) programs are provided for all title I eligible school attendance areas, the local educational agency may use these funds to carry out the same type of programs for educationally deprived children in other school attendance areas.

(20 U.S.C. 240(e), 242(b); S. Rept. No. 93-1026, p. 162 (1974).)

(c) *Section 5(e) funds supplementary to State and local funds.* An applicant agency must use section 5(e) funds in a manner which supplement and do not supplant State and local funds which are or would have been expend-

V 4 3 / 8 9

ed for the free public education of the children to be served by the use of the section 5(e) funds. As part of this requirement, applicant agencies must adhere to the following practices:

(1) The use of section 5(e) funds must not result in a decrease in the use of State or local funds for the educationally deprived children to be served which, in the absence of funds provided under section 5(e), would be made available for the education of those children. This includes State and local funds for general education purposes as well as for special education purposes.

(2) The use of section 5(e) funds must not result in a penalization, with respect to the use of State or local funds for their education, of the educationally deprived children to be served, as compared to other children whose education is provided by the applicant agency.

(3) The applicant agency may use section 5(e) funds to provide services not provided by funds from other sources. However, there may be State or local funds available to the applicant agency which are designated for the same services included in the section 5(e) program or project. If there are any of those funds available to that agency at the time it submits its section 5(e) proposal, then it must apply those funds in conjunction with the section 5(e) program or project.

(4) The applicant agency may not use the section 5(e) funds to provide services which the applicant agency is required to provide under State law or under a formal determination under title VI of the Civil Rights Act of 1964, title IX of the Education Amendments of 1972, or section 504 of the Vocational Rehabilitation Act of 1973, as amended, or under a final court order.

(20 U.S.C. 240(d), (e), 242(b); S. Rept. 93-106, p. 162 (1974).)

(d) *Relation to section 5(d)(2) of the Act.* (1) Section 5(d)(2) of the Act provides that States having State aid programs designed to divide expenditures for children equally among local educational agencies in the State, which conform to subpart B, may consider payments received by an agency under Pub. L. 81-874 as local resources in determining the need for or the amount of State aid allocated to that agency. The regulation setting forth those standards appears in subpart G of this part.

(2) Whether or not a State has a program of State aid that meets the requirements of section 5(d)(2) of the Act, payments provided under section 5(e) may not be considered by a State in determining the need or amount of State aid which will be allocated to a local educational agency receiving those payments.

(20 U.S.C. 240(d)(2), (e), 242(b); S. Rept. 93-1026, pp. 162-163 (1974); S. Rept. No. 93-763, pp. 55-56 (1974); H. Rept. No. 93-805, pp. 42-43 (1974).)

(e) *Use of section 5(e) funds with other funds.* An applicant may not consolidate section 5(e) funds with funds from other sources, including other Federal funds. An applicant must keep records necessary to identify, for accounting and audit purposes, expenditures from section 5(e) funds for programs and projects specified in paragraph (b). However, section 5(e) funds may be used concurrently with funds from other sources in those programs and projects.

(20 U.S.C. 240(e), 20 U.S.C. 1231(c)(1)(C).)

(f) *Allowable expenditures.* An applicant agency which receives funds under section 5(e) must use those funds for expenditures which are directly related to the conduct of section 5(e) programs or projects, including expenditures for appropriate staff or instructional materials and supplies. These expenditures may also include:

(1) Expenditures for the construction of school facilities to meet the special educational needs of the educationally deprived children served with section 5(e) funds, but only if:

(i) The construction is essential to assure the success of the program or project serving those children, and

(ii) The construction project complies with the requirements of 45 CFR Part 100a, subpart K (Construction Requirements);

(2) Expenditures for equipment, exclusive of instructional materials and supplies, to meet the specific educational needs of the educationally deprived children in the program or project but only if:

(i) The equipment is essential to meet the needs of those children; and

(ii) The recipient agency has a staff trained in the use of the equipment to be acquired or has made provision for adequate staff training in the use of that equipment.

If section 5(e) funds are used for the acquisition of equipment and any financial advantage is realized through bargains, rebates, discounts, bonuses, free pieces of equipment (not used in the program or project contemplated by this paragraph) or other circumstances, the fair value of that financial advantage is not an allowable expenditure and shall not be credited as an expenditure of those funds.

(20 U.S.C. 235, 238, 240(e), 242(b).)

(g) *Use of property acquired with section 5(e) funds.* The applicant shall maintain title to and administrative control over property acquired with section 5(e) funds. The applicant shall use this property for the purposes provided in this section and shall not permit the property to be used to benefit any private school. The incidental use of the property for other purposes is permitted only for related educational purposes on public premises and only so long as the use does not interfere with the carrying out of a project under section 5(e).

(20 U.S.C. 240(e), 242(b).)

§ 115.82 Application procedures.

(a) *Claims for low-rent public housing children.* In accordance with the procedures set forth in subpart B of this part, an applicant agency must file in its regular application, initial claims for children who reside on or reside with a parent employed on low-rent public housing property. The Commissioner, however, will not make any payments based on those claims until the applicant agency has completed the steps set forth in paragraph (b) of this section.

(b) *Supplemental submissions.* The applicant agency must complete the following steps before it may receive any payments based on claims for low-rent public housing children.

(1) The applicant agency must submit to its State educational agency, as a supplement to its application filed under subpart B of this subpart, a document describing the proposed use of the section 5(e) funds. The document must establish that the applicant agency has complied with the requirements of §§ 115.81, 115.84, 115.85, 115.86, 115.87, and 115.88 of this Subpart. The State educational agency should retain this document, unless the Commissioner specifically requests the agency to forward it.

(2) The applicant agency must obtain a certification from the State educational agency, stating:

(i) The particular priority use(s) selected by the applicant agency in accordance with § 115.81 of this Subpart, and that the use(s) selected is appropriate;

(ii) That the proposed use(s) conforms to the requirements of this subpart; and

(iii) The amount of section 5(e) funds that the applicant agency will apply to the approved program or project.

This State certification must be based on a review of the document submitted by the applicant agency in accordance with paragraph (1) of this section. The State certification must be submitted to the Commissioner, either directly by the applicant agency or on behalf of the applicant agency by the State agency, before section 5(e) funds can be released.

(20 U.S.C. 240(e), 242(b); Sen. Rept. No. 93-1026, p. 162 (1974).)

(c) *Assurances.* An applicant agency which submits a claim based on children who live in low-rent public housing must provide the following assurances with its application filed under subpart B (Applications):

M Y 8 7 8 M

(1) An assurance that the section 5(e) funds will be used only for the purposes for which they were granted and in accordance with the requirements of that section of the Act and this regulation; and

(2) An assurance that the section 5(e) funds will be used in a manner which supplements and does not supplant State and local funds which are or which would be expended for the free public education of the children to be served by the use of the section 5(e) funds.

(20 U.S.C. 240-242(b).)

§ 115.83 Monitoring.

(a) The State educational agency should monitor the expenditure of section 5(e) funds by applicants for programs and projects certified by that agency in accordance with § 115.82(b) of this subpart. Whenever a State educational agency audits a title I program or project in a local educational agency which is also conducting a section 5(e) program or project, the State agency should also audit the section 5(e) program or project.

(b) If a State educational agency finds at any time that an applicant is not using any of its section 5(e) funds for the purposes certified by the State or in some other way is not complying with the requirements of this subpart, it should immediately notify the Commissioner.

(c) If the Office of Education or the Department of Health, Education, and Welfare has already audited an applicant's section 5(e) program or project, it is not expected that the State educational agency would audit the same program or project.

(20 U.S.C. 2401(e); Sen. Rept. No. 93-1026, p. 162 (1974); Cong. Rec. daily ed., July 31, 1974, H7396.)

§ 115.84 Needs assessment.

An applicant agency which submits a claim based on children who live in low-rent public housing must provide, as part of the document required to be submitted to the State educational agency under § 115.82(b) of this subpart, sufficient information to enable the State educational agency to determine that the applicant has made a needs assessment of the children to be served in its school. The steps required for this needs assessment are:

(a) *Review of existing data.* The local educational agency must review existing data on the performance of children in the agency's basic programs of instruction in all attendance areas. The purpose of the review is to determine the incidence and severity of educational deprivation among all children receiving free public education in all attendance areas.

(1) The data reviewed must include past evaluations, if any, of programs or projects that used section 5(e) funds in that agency.

(2) The agency must review data on children enrolled in private schools if the program or project for which section 5(e) funds will be used is designed to serve any of those children.

(3) If the agency has already reviewed data in connection with a needs assessment under title I for the fiscal year for which the section 5(e) funds are to be used, except for a review of past evaluations of projects funded solely with section 5(e) funds, the agency does not have to conduct another review under this paragraph.

(b) *Selection of project areas, target groups, and the needs to be served.* The local educational agency, on the basis of its findings from the review conducted under paragraph (a) must select:

(i) The project areas (in accordance with § 115.80(c)(2));

(ii) The age or grade levels at which it will operate the section 5(e) project(s); and

(iii) The types of educational needs to be addressed by the project(s).

(c) *Identification of target group children.* The applicant agency, using the data reviewed under paragraph (a), must identify all of the educationally deprived children in the areas to be served who are in the age or grade levels and have the type of educational needs identified under paragraph (b).

(d) *Identification of children most in need.* The local educational agency must secure any additional objective data which, in combination with the existing data specified in paragraph (a), will enable it to identify which of the educationally deprived children identified in paragraph (c) are most in need of special assistance.

(e) *Selection criteria.* The local educational agency must set forth specific criteria by which the educationally deprived children in the project areas will be chosen to receive section 5(e) services. An educationally deprived child may be included in a project even though he or she is not from a low-income family.

(f) *Diagnostic procedures.* The local educational agency must use adequate diagnostic procedures to determine the special educational needs of the children chosen to be served in a section 5(e) project.

(g) *Consultation.* In meeting the requirements under this section, the local educational agency must, to the extent feasible, consult with teachers, parents, and persons knowledgeable of the needs of private and public school children.

(20 U.S.C. 240(e), 242(b); S. Rept. No. 93-1026, p. 162 (1974); Cong. Rec. daily ed., July 31, 1974, H7396.)
